Check by Royal Canadian Mounted Police will commence immediately to insure that all operators of motor vehicles have the driver's licenses required by legislation enacted at the last session of the legislature, Hon. Ernest C. Manning, minister of trade and industry and provincial secretary declared on Saturday.

The Minister stated that to date 64,000 driver's licenses had been issued. Including pleasure cars and trucks, there are about 90,000 motor vehicles in the province.

HOW ABOUT CROW STEW AS DELICACY?

"How about a nice bowl of crow broth or a delectable crow stew for dinner tonight?"

This is the question farm wives will put to their husbands this season, it is presumed, following the discovery of the More Game Birds Foundation that crows—the big black fellows that are a universal pest—are good to eat.

"With an eye to abetting the unique move to control the black destroyer of beneficial birds' eggs and the farmers' grain" the foundations' members have been looking into the whole question with considerable care. Promoters of crow dinners were stymied however, because they were unable to find any satisfactory recipes for cooking their bag. Dr. T W. Stallings former Oklahoma public health officer came to the rescue and served roast crow to unsuspecting "gentlemen of the press." The "game" was pronounced delicious by the newsmen, who apparently labored under the delusion they were eating grouse or partridge.

Having tested Dr Stallings' recipe and others, the Game Bird Association now offers these tested dishes to the public. Officials refused to confirm however, that the foundation's new motto is "Eat Crow." There are several things to remember when cooking crow.

"First of all the older crows should be skinned. Use only the breasts and legs. Young birds may be roasted like a chicken but use of butter or bacon is necessary or the meat may be too dry.

"Crow Broth: Take the breast and legs brown a little in butter and then boil with a little celery until tender, using water according to quantity of broth desired.

"Crow Sandwich Spread: Use the boiled meat. Remove bones, run through meat chopper, add some mustard, minced onion, salt, pepper or paprika and Mayonnaise.

"Crow Stew: Breast and legs may be used. Brown some large onions in bacon fat (one large onion to the bird,) put in meat, salt pepper or paprika, smother for a few minutes in onions, add enough water to cover meat and let simmer over a slow fire until tender. Stir in some sour cream mixed with a teaspoonful of flour.

"Young crows, taken just before flying age are delicious when prepared like squabs. Clean, rub with salt and pepper, also either some lemon or, if flavor is liked some finely crushed mushrooms, if desired. Wrap completely in strips of bacon, tie, and broil or roast like squabs. Breasts of crow squabs may be also dipped in egg and bread crumbs and fried like cutlets."

RUBBER HORSESHOES

JOHANNESBURG May 23 — Horses used by mounted police in South African towns may be shod with rubber horseshoes in the near future as the result of experiments conducted here.

Now—The Safest Tire EVER BUILT
All These Extra Safety Features . . NO EXTRA COST

Firestone tires have always been noted for their safety and long wear. Now, with an extra rider strip in the tread in addition to all the other extra safety features, the new High Speed for 1936 is the safest tire ever built!

Performance records prove that Firestone tires give most value for your money. They cost no more than ordinary tires and your nearest Firestone Dealer has a tire for every purse. See him today.

PROVINCE PAYS OUT $8,375 ON SAVINGS

W. J. Kelly of Vancouver who as the owner of $107,500 in Alberta provincial savings certificates is by far the largest investor in these securities was paid Tuesday $3000 on account of principal and $5375 on interest to date.

The payment the largest made by the province since payment on the certificates was suspended last August was handed over to Mr. Kelly at the office of Deputy Provincial Treasurer J. F. Percival. The whole amount of the principal matured Monday.

HIS MAJESTY FLIES TO INSPECT SHIP

SOUTHAMPTON May 26 —His Majesty the King Monday saw the liner Queen Mary from the air. His scarlet and blue biplane circled over the great ship and then swooped down to a landing at East Leigh aerodrome.

The King joined the other members of a royal party in Southampton. It was the King's visit of Godspeed before the Queen Mary sails Wednesday on her maiden voyage to New York.

In the royal party were Queen Mary herself, the Duke and Duchess of Kent, the Duke and Duchess of York, the Duchess of Gloucester and the little Princess Elizabeth who was tremendously excited over everything.

With a typical touch of informality the King wore a straw hat and a black lounge suit with a double-breasted coat. He did not wear a vest.

His Majesty flew from Fort Belvedere, Windsor to East Leigh and then proceeded to Southampton by car. Other members of the royal family traveled by railway from London.

All workmen at the ocean dock had been given a day's holiday. Many of them were among the crowd that waved and cheered the royal party. Hundreds paid admission to the dock in order to watch the royal party arrive.

On the tour of the ship, the King, who went all over the liner when she was in Clyde, explained many features to his mother. One special object of interest was the plaque of the Queen on the great staircase. Under the staircase was a personal standard in a case inscribed: "A gift from Her Majesty Queen Mary, to the ship which bears her name."

The royal party made a prolonged tour of the ship.

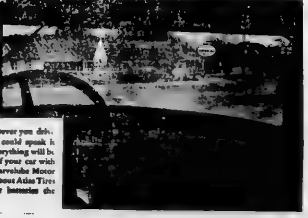
TREASURE HUNTERS . . . When prospectors and miners took to the air, mining in Northern Canada began its greatest development. A-1 pilots dependable aircraft and quality gasoline and oils make northern flying safe (90 out of every 100 miles flown in Canada are travelled with Imperial Oil products).

FARMING IN A BIG WAY . . . Farmers like Imperial Oil products. One Alberta farmer, who for years has used only Marvelube Oil in his tractor, decided that the eight-year-old machine would need new pistons and cylinder sleeves, but when the machine was taken down it needed only new piston rings. "I honestly think your Marvelube has had a great deal to do with the life and performance of this tractor," he wrote.



HIGHWAY BEACONS . . . Wherever you drive you will see the 3-Star Imperial Sign. If it could speak it would say to you, "I mark a place where everything will be done to serve you well." Get the best out of your car with Imperial Gasoline (3-Star or Esso) and Marvelube Motor Oil. While you are in the station find out about Atlas Tires and Atlas Batteries. If you need tires or batteries the Atlas Brand will save you money.

ALBERTA CROP REPORT NO. 2

Issued by Alberta Department of Agriculture, Edmonton, May 22nd, 1936

In the southern districts and north to Red Deer seeding has continued with little interruption during the past two weeks. In this area wheat seeding is completed in the more southern sections and only a small percentage remains to be completed east and north of Calgary, while seeding of coarse grains is well advanced especially from Calgary [illegible].

From Lacombe north to Athabasca, [illegible] rains and comparitively low temperatures have continued to retard progress. These conditions became acute in the northern portion of this area where only the lighter soils and well drained fields have been seeded. In this zone an appreciable reduction in the intended wheat acreage seems inevitable because of the abnormally late season. Warm weather is needed in this area to promote more favorable crop conditions.

Rapid progress in spring work has continued in the east central district north to Vermilion wheat seeding being almost completed and seeding of coarse grains general.

In the Peace River district fine weather with occasional light showers has prevailed south of the river where spring work has made normal progress and all seeding is well advanced. North of the river [illegible] the land was [illegible] heavy rains until early in the present week though considerable progress has been made during the last few days with the major percentage [illegible] seeding completed.

Heavy rains on May 2[illegible] were more or less general from the Edmonton zone south to the boundary. Though this only added to the excess moisture in the north it was most opportune in the more southerly districts where a deficiency of surface moisture was beginning to be felt. A precipitation of 1.04 inches is reported from [illegible] for last Wednesday's rain.

Following are brief reports of conditions in various districts:

MEDICINE HAT — Wheat seeding completed, coarse grains [illegible] cent. Rain of May 20th [illegible] needs.

LETHBRIDGE CARDSTON — Wheat seeding completed, [illegible] 75 per cent sugar beets seeded. Rains of May 20th provided one half to over one inch moisture.

Grass is growing rapidly in all parts of the Province. There is a distinct tendency towards increase of forage crops in the north. Further reports of severe winter killing of alfalfa are received from irrigation areas at Vauxhall and Brooks.

There has been a fairly heavy movement of the medium kinds of beef cattle to market. The heavier, well finished beef is not in demand and is meeting slow sale. Quite a number of these cattle are still in the feedlots and their disposal is presenting a rather serious problem to the feeders. Hogs are moving briskly in the south, but marketings in the north are down following adverse winter feed conditions. A fairly large mortality is reported amongst spring litters. Calf and lamb crops are satisfactory after the severe winter and long cold spring. Dairy production is improving with pastures.

High winds have caused a limited amount of soil-drifting on light lands of the south and east central districts where there was insufficient surface moisture. The heavy rains of May 20th have largely corrected this condition.

With the advent of warmer weather grasshoppers are hatching in scattered districts from the south boundary north as far as Morrin. Some damage to the wheat crop south of Bassano is reported. Poisoned bait mixing stations are already in operation at points where the infestation is most severe. Some slight damage from cutworms has occurred south of Lethbridge.

TRIES 3 TIMES TO ENTER U.S CAUGHT AGAIN

ST. PAUL, Minn., May 26 —John F. Schultz, Canadian citizen, is beginning to believe there isn't anything to the business "if at first you don't succeed try, try again."

He has been trying for 15 years to get into the United States and Monday for the fifth time in that period faced deportation.

[illegible] Monday deferred sentence to [illegible] a study of Schultz's record.

HORSE TURNS IN FALSE FIRE ALARM

NEW YORK, May 23 —Fire engines roared Friday. Sirens shrieked. Engines raced to Manhattan avenue and 101 street.

At the alarm box was a milk wagon, horse and driver, Leo Reynolds [illegible] fire. The horse—Leo said her name was Queenie—had rubbed her [illegible] against the box.

AN ECONOMIC UNIT

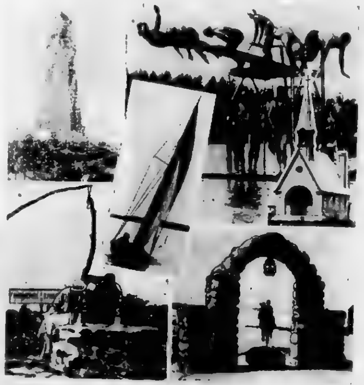
An economic unit can be one of any number of things. A sovereign state, province, municipality, town, village or even private enterprise as expressed in any particular business. No economic unit revolves absolutely within its own orbit, but it is becoming increasingly fashionable for economic units to, as far as possible, stay within their own orbits. It is called being on a self sustaining basis

The Tofield District is an economic unit. Within it are facilities for trade, education, religion Rural residents can find in Tofield stores most of the things they desire for everyday existence, no matter whether they are things to eat, wear, or use.

Included within the district is your local paper, published weekly, which like a wheel within wheels, is an economic unit itself. It strives to serve those people within the district and its fortunes are solely dependent upon those people. Mostly unassuming, yet burning its own light unshielded, it tells of things social or commercial, it is the publicity medium of the Tofield district economic unit, and as such, strives to merit the support of both readers and advertisers. If you are not a subscriber, we invite you to become one, the cost is small. If you are not an advertiser and have wares to sell, plan to become one, it is good business. If you live here, as far as possible deal here, the ultimate result will be beneficial to you

The Tofield Mercury

Summer In The Maritimes



The Maritime Provinces of Canada, favored as a vacation spot by President Roosevelt and hundreds of other discriminating Americans as well as by thousands of Canadians, are preparing to welcome large numbers of tourists again this year. St. Andrews-by-the-Sea, one of the most popular of Canadian resorts, will attract many famous golfers to its beautiful 18-hole and 9-hole courses, with their sporty fairways and greens.

Golf is only one of the many attractions at the Algonquin Hotel at St. Andrews, which will be open this year from June 27 to September 7. Tennis, yachting and swimming at famous Katy's Cove, deep-sea fishing, dancing at the Casino, and bowling on the green are other chief amusements. Motor trips can be made to such interesting places as Chamcook Mountain; the reversing falls at Saint John; and by boat to Campobello Island, President Roosevelt's summer home for several seasons.

A delightful boat ride from Saint John across the Bay of Fundy by the Princess Helene, lies Nova Scotia, Land of Evangeline, which offers to the tourist such attractions as rugged cliffs and long stretches of sandy beaches over which the Atlantic breaks, great forests with cool and fragrant depths, lakes lying like jewels in the sunshine, rivers rushing down from the hills to melt into the arms of the ocean, pastoral countrysides, and accommodation as good as can be found anywhere. Canadian Pacific Railway hotels in Nova Scotia include: The Pines, at Digby, open from June 27 to Sept 9, where golfing, tennis, and water sports make a pleasant day; Lakeside Inn, near Yarmouth, open from June 27 to Sept. 7, where yachting flourishes and where arrangements have been made for the usual run of summer sports; and Cornwallis Inn, at Kentville, open all year, which has facilities for golf and which is the centre for motoring excursions to Grand Pre, the Gaspereau Valley, Canning, Kingsport, Halls' Harbor, and Blomidon.

The pictures show a typical coast-wise lighthouse; happy holiday-makers about to greet the Atlantic; a yachting scene at Lakeside Inn; Evangeline Well and Memorial Church; and the unique and beautiful War Memorial at St. Andrews.

'THE TOFIELD MERCURY

Vol. XVII., No. 18 Thursday, June 4th, 1936 $2.00 Per Year. To U.S.A. $2.50

RAIN NOW BEING CALLED FOR

Following the unusually hot days of last week the land is showing need of a good rain. While there is a good supply of moisture well down, the surface is quite dry. The crops and gardens growing showed the effect of the heat but generally speaking are undamaged. The growth during the warm spell was extremely rapid. One day a field would appear black and the next carpeted with green shoots. With the exception of barley, late oats and green feed seeding is completed. The volume of cream is steadily increasing and what with the full leafing of the trees the summer season is definitely here.

LINDBROOK

Well, we kicked a few weeks ago about the intense cold, a little later about the excessive rain, and now it's the intense heat, not forgetting the mosquitoes which by the way, seem to be more numerous and virulent than usual. Always kicking, if it isn't the weather it's either the government or the depression. Still its a pity that this country's weather couldn't be mixed up a little better and not come in such rotten chunks of one kind at a time.

The monthly meeting of the L.C.C. met at the home of Miss Lily Morden last Wednesday afternoon. The afternoon was spent in playing games and seemingly all present had lots of fun. There was of course a dainty lunch served. At this meeting a motion was put forward to hold a picnic at Lakeview sometime in July, but nothing really definite was decided upon: this will probably all be settled at the next meeting which is to be held at the home of Mrs. Paul McMullen on Wednesday afternoon 24th June at 2:00 p.m. sharp. [illegible]

Mrs. Potter from Lancashire, England, is staying at the home of Mr. and Mrs. Bracegirdle and family here. Mrs. Potter arrived here direct from England last week.

The crops are practically in now bar a few oats and green feed and the pastures and meadows look fine.

The tax list in the Mercury this year is quite a lengthy one and some prophesy that it will be much longer next year owing to the fact that no money for road work this year.

BOY SCOUTS SEE BRIDGE CONSTRUCTED

On May 24th and 25th, due to transportation courtesy of Blake Clutterham a number of the local boy scouts made an overnight trip to South Edmonton where they witnessed the construction of a bridge by some of the more advanced Edmonton scouts. Leaving on Sunday they camped overnight at Cooking Lake and journeyed on to Edmonton in the morning. Both younger and older boys enjoyed the outing immensely. Those making the trip were: Blake Clutterham, Jack Smith, Jimmy Brace, Leonard and Charlie Worton.

LOCAL AND PERSONAL

A. B. and Mrs. Clutterham are attending the Postmasters' convention at Edmonton.

Mrs. J. W. Robinson attended the quarterly meeting of the Edmonton Diocesan Board of W.A. which was held in All Saints, Edmonton on Friday, May 29th.

The Renowned Madame Fontaine, most noted licensed palmist and fortune-teller will be in Tofield, at the Royal Alexandra Hotel, on Wednesday, June 10th.

Mrs. Webb sr. has just had her house painted and it now looks very smart and trim. H. Kendall and Plante were the contractors and made a good job.

The Misses Muriel Malcolm and Loret Ross spent the week end visiting in Edmonton.

Mrs. Bethel and Mrs. Bradely spent a few days in the city.

Mrs. McLeod and Kathie visited the city this week.

Mrs. Abbot, Mrs. Beirnes and Mrs. Taylor are attending the Eastern Star convention in Edmonton.

Mrs. A. E. Calvert of Edmonton is spending a few days in town.

A number of Tofielders attended one or more of the basketball series held in Edmonton last week.

Jack Smith left last week for Borden camp, Ontario, where we understand he will take a course in signalling.

BANK MANAGER LEAVING

Word has been received that Mr. L. W. Smith, manager of the Bank of Montreal here, has been transferred to Trochu, Alberta. It is not known exactly when Mr. Smith will leave. Mr. Allan, a former accountant here and now connected with a Manitoba branch will follow Mr. Smith here as manager.

EDMONTON GRADS SUCCESSFULLY DEFEND WORLD CHAMPION TITLE

Meeting the three best basket ball teams of the United States the Edmonton Commercial Grads have this spring season played ten games, winning eight and losing two.

The series with the Eldorado Lions just closed, went to four games, the Grads winning the last three and the Eldorado Oilers one. The teams were very evenly matched and represented basketball at its highest pitch.

The series opened on Thursday last and finished on Wednesday of this week. The results of the games were as follows:

Thursday—Grads 30, Oilers 44; Saturday, Grads 37, Oilers 25; Monday—Grads 38, Oilers 29; Wednesday—Grads 41, Oilers 26.

SENIOR BASEBALL CLUB RE-ORGANIZED

A meeting of baseball enthusiasts was held this week at the Crown Lumber Co's. store.

It was decided to again field a team this year and join the league comprising nearly towns the same as last year.

J. J. Jobb was elected president. S. Burke, secretary and Ray Coutts, manager.

As soon as a schedule of games is available we will publish it. The club desires the support of the public and are out to play the kind of ball that will merit it.

AMISK CREEK

Threshing is now finished around here and most of the spring work done, there is some green feed and barley to be put in yet.

Mr. and Mrs. R. O. Berg motored to the city last Saturday, while there they helped their daughter Ruby to move her effects to a new boarding place.

Mr. A. Haugen returned last week from Washington, U.S.A. where he had been visiting his sister-in-law who is quite ill.

Agnes Annebo from Camrose spent Sunday, May 24th and Monday the 25th at her parents home here.

Borst Berild who has been attending Normal School in Camrose returned home last week.

Sunday School was reorganized Sunday May 24th. Lillian Patterson as superintendent. Teachers for the Bible Class and the smaller classes were also elected.

Hazel Hillerud, teacher of Solberg school took several of her pupils in to Camrose to the musical festival and obtained several prizes.

Mr. and Mrs. B. Helgeland and children Sigurd and Ole Snortheim were visitors at R. O. Berg's home last Sunday.

Mr. and Mrs. J. Annebo visited at the P. O. Finstens home last Sunday.

Mr. and Mrs. C. Erickson, Mr. A. Erickson, Olive Haugen and Nora Sand were dinner guests at the Sorensons home east of Poe last Sunday.

Mrs. L. Watt from Edmonton have been staying with her mother Mrs K. Olson for a few days.

Mr. A. Moen from Bardo visited at the P. O. Finsten's home from Sunday till Monday this week.

Glen Olson from Camrose College spent Sunday at his parents home here.

Mr. A. Moen from Bardo, the contractor for building the new school, have arrived with his assistants to start work.

Doris Glasener, the teacher here, spent Saturday and Sunday at her parents home near Dodds.

LAKESHORE

Mr. and Mrs. E. H. Hopgood and little son Dean of Ponoka spent the week end visiting friends in the district.

Mrs. Owen Eaton received the sad news on Friday that her aged father Mr. Campbell, of Lamont, had passed away suddenly. The funeral was held on Sunday at Lamont.

Mrs. Bethel spent several days in Edmonton last week undergoing medical treatment. She suffered a severe attack of flu in early spring and has been unable to regain her usual good health since. Here's hoping that recovery will be rapid from now on.

Miss Grace McKinnon spent the week-end with Mrs. T. E. Seale.

SPORTS DAY MEETING

Assuming the Hall is available a Sports Day meeting will be held at the Town Hall on Tuesday evening, June 9th. It is particularly requested that as many as possible turn out so that organization and arrangements may be complete. The meeting is open to all.

Post Office Now Completed ---Changes Through the Years

The [illegible] round and round, and spread over a period of some thirty [illegible] the Tofield Post Office.

The new office opened [illegible] for the purpose [illegible]. The lobby has been painted [illegible] and [illegible] bright as spring sunshine.

Due to the courtesy of J. W. Morton, we are able to give a brief history of the various locations of the Tofield Post Office since [illegible] in 1906.

At that time the office was located in what is now John M[illegible] garage just east of town. The late Mr. Geo. [illegible] was postmaster and the mail was brought [illegible] Saskatchewan [illegible] winard. From [illegible] place it was moved [illegible] Mercury building [illegible] the old town [illegible] where Fred McIlleffey [illegible] Mr. [illegible] was the Post [illegible] being brought in weekly [illegible] by Mr. Josh Noland [illegible] living at the coast. Mr. [illegible] the present Sam Stauffer [illegible] ing his store and the post office was moved to the new building. Then when the town [illegible] the post office building and the Cross store were moved to the West side of the present main street, the store building and post office building performing the same functions as they did in the north town. When the present Brace block was erected the building was moved to the opposite side of the street and here there is a short space of time after [illegible] one seems to remember exactly where the post office was located. It is quite possible that C. H. Cross being postmaster he moved the fixtures to his store building now the Mercury building. After the erection of the present Brace block by Hall and Kennedy, J. E. Jamieson druggist became postmaster and the office was located in that block on the north side now occupied by [illegible] R. Brace. From there it was moved to the block that with other buildings [illegible] on the east side of main street. Rogers Bros. [illegible] the last [illegible] J. W. Somers [illegible] post master. From here [illegible] to the building adjoining the drug store on the west side of main street when J. W. Somers [illegible] drug store business over [illegible] here until the fire of 19[illegible]. Following Mr. Somers as post master was Mr. Beirnes now of Los Angeles and brother of A. A. Beirnes druggist of Tofield. A. B. Clutterham followed Mr. Beirnes. After the fire of 1935 the office found temporary quarters in the Women's Institute building and is now most likely settled for some long time.

SPAIN ABANDONS WHEAT CONTROL MEASURES

The first [illegible] French in Europe's [illegible] protecting domestic wheat growers [illegible] elaborate governmental [illegible] attributed to Spain. The government of that country has given [illegible] providing for fixed prices [illegible] sales and [illegible] of surplus stocks.

For twenty years the Spanish government has exercised control over the wheat [illegible] Spain, and of late years [illegible] have had infinite [illegible]. The objective has been to [illegible] returns to producers while maintaining low prices of bread. The only regulation now in force compels mills to keep on hand one month's [illegible]. The government now has on hand about 11,000,000 bushels of wheat [illegible] a surplus [illegible] 22,000,000 bushels which was purchased to prevent [illegible] of the market last year. The government [illegible] that the farmers have extended wheat seeding to unsuitable [illegible] the possibility of [illegible] surplus. Wheat is a [illegible] factor in the wealth of Spain representing about 25 per cent of the total value of all agricultural production.

INTEREST OBLIGATIONS OF PROV. GOVT. NOW CUT

Effective June 1st, interest payments on all Alberta securities, both bonds and Savings Certificates will be reduced to two and one half per cent, Hon. C. C. Cockroft, provincial treasurer, announced on Wednesday last. The present average rate of interest is 5 per cent and the anticipated saving to the taxpayers of the province will be $[illegible],000,000 in any fiscal year.

It is [illegible] stated that the refunding [illegible] passed at the last session of the legislature which enabled interest reduction was not yet being proclaimed [illegible] that this action was being taken under the Treasury Act.

[illegible] statement Hon. Mr. Cockroft said that "The feeling is [illegible] security holders should have [illegible] of considering Alberta's [illegible] and we as a government are anxious to submit to them that it is impossible for the government to pay a higher rate of interest, after so much has been imposed on the provincial people in the way of taxation.

"Now we are saying how much we can pay and it will enable the security-holders to come to us to negotiate to see if any further payments can be made.

"The anxiety from the government point of view is to balance the budget and we are working to that end with the view of living within our means.

"After going into the whole matter the government feels that the holders of various classes of securities will see the difficulties and will appreciate government efforts in trying to carry on business in business like manner. It is hoped that when the bondholders have all the information regarding Alberta's financial position, that they will co-operate and accept a satisfactory refunding scheme at a later date.

"Our whole anxiety is to do nothing to impair the market value of the bonds and the likelihood of the dominion guaranteeing our refunding plans. We want to protect the value of the securities as they are held by the public.

CORRECTION

With reference to the report of the Tofield student entries in the Camrose Musical Festival appearing in last week's issue. The small number attending was solely due to lack of transportation due in turn to the bad condition of the roads. Actually some thirty-three pupils comprising all five rooms were trained for entry but only three cars were obtainable. There were enough pupils for six cars.

RAIL GRADING OF HOGS—A NEW MARKETING SYSTEM PROVES POPULAR

During the past four weeks one Alberta packing house has bought over two thousand hogs on a rail graded dressed weight basis. This method of buying hogs has just been inaugurated in Alberta during the past four weeks, and from all reports the farmers who have sold their hogs in this manner are very well satisfied and are coming back again, to sell on the same basis.

The buying and selling of hogs on a dressed weight basis has been in operation in Eastern Canada for over a year. The packers buying on the basis report their shippers are very well pleased.

It is now well over ten years since the Federal Government installed the present system of live grading, and this could be called the first step in the right direction towards raising the right type of hogs. There has been a remarkable improvement during the last ten years, in the percentage of bacon hogs produced. This improvement is a direct result of the present system of live grading.

The Federal Government are now sponsoring what could be called the second step, namely the marketing of hogs on a rail graded, dressed weight basis.

A few words of explanation: the marketing of hogs on a dressed weight rail graded basis is exactly what the words imply. A farmer delivers his hogs; these hogs are then tattoed with a number so that they may be identified when they are killed. The live hogs are then weighed up so that a part payment may be made. This down payment usually runs around 75 per cent of the butcher price. The hogs are then killed and weighed individually to the exact pound. A government grading inspector then grades the hogs on the killing floor according to standards as set up by the Federal Government and the final payment is made on the basis of that grade. These grades correspond very closely to the present live grades and the premiums and discounts paid are practically on the same basis. It will be easily seen that the Grading Inspector is able to do more efficient grading with the split carcass before him as he does not have to estimate weight, depth of backfat or thickness.

Whip marks, scratches and bruises shall not be a factor in determining the grade, except those hogs that are seriously damaged. Carcasses that are condemned will be paid for on the same basis of the grade in which they would otherwise fall. The government will issue releases on all Rail Graded hogs.

A farmer might well ask himself: Why should I change over to Rail Grading? How do I benefit by it? How does the hog industry benefit by it? These questions are easily answered. When the present system of live grading was instituted the policy of paying premiums to the farmers who raised good hogs was started. In a very short time there was a great improvement in the number of bacon hogs marketed.

Today the following situation confronts us. A number of farmers have progressed to such an extent that it would nearly be impossible for them to raise a larger percentage of Bacon hogs. Another number are raising an average percent of Bacons while the balance of the farmers are just raising hogs. Under the present system of live grading the dressed "yields" of these hogs have a great deal to do with the final dressed cost. The word "yield" refers to the amount of dressed meat in relation to the live weight. For example two farmers have two hogs each weighing [illegible]. When these hogs are killed one [illegible] weighs [illegible] the dressed while the other weighs 160 pounds dressed. It is easy to see that the 160 [illegible] hog would receive more money [illegible] if these hogs had been sold [illegible] each producer would have received the same. The purpose of marketing hogs on a rail graded basis not only gives the producer a premium on his bacon hogs but also pays him on a basis of yield. Hogs that are fed right and looked after properly yield high, which results in the producer getting paid for exactly what he delivers.

23,000 COPIES NEW ALBERTA TOUR BOOKLETS

Making a strong appeal to tourists in its pages which contain a wealth of information and are well and attractively illustrated, a new booklet has just been issued by the publicity bureau of the Alberta Government.

No less than 23,000 copies of this free booklet have been printed for distribution in Canada and the United States and copies are also being sent to the old country, France and elsewhere. It has been praised by officials of the Alberta Motor Association.

Page after page of enthralling scenery, vast amount of data concerning the province and its resources, and general information for the use of visitors make the booklet something that will be treasured by its recipient.

Copies have been sent to points in Canada and the United States so as to meet the needs of organizations encouraging the tourist traffic.

A key highway map of Alberta, maps of bus routes, where to go when out for a delightful canoe trip and a statistical table of facts about this province form new features of the 1936 booklet.

A striking three-color cover has been provided. One side shows where prairie and mountain meet, the majesty of the Rockies and the soft appeal of the foothills being well blended. On the other side is a picture of His Majesty King Edward VIII and a view of his fine farm at Pekisko, Alta., something which should prove of rare interest to tourists.

A handy guide for the motorist, the booklet also contains sectional maps of Alberta highways. It also is made of size to be mailed conveniently.

Making a strong bid for a record tourist movement to Alberta this year the booklet was printed by the Metropolitan Printing Co., Edmonton.

HE CAN KEEP DIAMOND TEETH

BUFFALO, N.Y., May 26.—Robert Ashby doesn't have to give up two diamond-studded front teeth to satisfy a $242 judgment if he doesn't want to.

City Judge Rowe ruled Monday that the diamonds were a part of his body and could not be legally extracted to satisfy the judgment.

THE TREND OF WHEAT PRICES

The discouraging declines in wheat prices which have occurred in recent weeks may be attributed in large part to the failure of the world wheat trade to come up to expectations. Last crop year world trade totalled about 525,000,000 bushels, and this crop year it was anticipated by Mr. Broomhall that trade would reach 560,000,000 bushels. It has failed to keep pace with that estimate.

Mr. Broomhall is quite pessimistic of the outlook and intimates that Canadian wheat growers have made a serious mistake in seeding 25,000,000 acres this season. The aggregate wheat acreage in exporting nations is unquestionably excessive he says, having regard to the modern tendency towards economic self-sufficiency in importing countries in Europe and in the Orient. Annual world trade, he points out, has declined from a peak of 945,000,000 bushels in 1928-29 to about 525,000,000 bushels this year. Discussing Canada's marketing problems, he says:

"We have on a number of occasions drawn attention in our reviews to the danger of seeding 25 million acres to wheat in Canada when given a season of normal world harvest, there can be no possibility of profitably marketing the resultant surplus in the following twelve months."

There are still some people who have made up their minds that the world will take all the wheat Canada can produce. They do not seem to have gained anything from the experience of the Canadian Wheat Board under the chairmanship of James Murray during the past six months. If there was an attempt to dispose of wheat freely by the use of every available method, Mr. Murray and his Board made it, yet continental Europe has persisted in its attitude of being strangely cold to cheap wheat. People who should know better prate about European nations being offended at Canada. Actually these nations are defending their own farmers against what would be to them ruinously low prices for wheat.

Of course no one can delve into the future, but there is a good chance that a real crisis in wheat marketing may develop in Canada this coming fall if an average crop is harvested.

Those who support free and open competition and Canadian wheat selling at world prices may possibly get an opportunity to see their ideas put into operation before many months. They have been playing up the disastrous effect of a protective policy for the farmers upon railroads, grain companies, steamship companies, milling companies, lake and sea ports and commercial life in general. They have neglected to reflect upon the disastrous result of a very low price to the grower.

Alberta Wheat Pool, along with the Pools in Manitoba and Saskatchewan, has largely been determined in its attitude towards price protection for the wheat grower. Largely on this account the minimum price of 87½c was fixed by the Wheat Board for the 1935 crop. There is likely to be a drive for much lower prices this year, and possibly for unrestricted open market operations. Wheat growers should be concerned about this situation.—Wheat Pool Budget.

POULTRY RETURNS MAY BE [illegible]

The price of eggs has been discussed from a great many angles, but here is a graphic illustration of yet another point of view, and the fallacy behind it.

A farmer has a flock of fifty hens. In the winter they produce four dozen eggs a week, which are sold at 30c a dozen. In the summer these same hens produce twelve dozen eggs weekly which are marketed at 10c a dozen. In other words, from the same hens and similar feeds, equal returns—$1.20 a week—are secured winter and summer; and the argument has been advanced that he should be well satisfied with this.

That is not the opinion of the Dominion Experimental Station, Lacombe. The Lacombe Station has pointed out the fallacy in this illustration—that if a flock can produce twelve dozen eggs weekly in the summer (and this is only 41 per cent production) they can do just as well in the winter. The hens have to be fed a certain amount to maintain their body weight and produce four dozen eggs weekly in the winter, and very little extra care is required to make them produce twelve dozen eggs weekly at the time that egg prices are at their peak—so that, instead of having an egg income of only $1.20 weekly in the winter the farmer receives $3.60 weekly, or three times as much.

At the Lacombe Station, most of the chicks are hatched in April so that the pullets come into production in October. In September the flock is thoroughly culled, and all potential boarders "get it in the neck." The flock comes into full production at the time of the highest egg prices, so that the greatest possible returns are secured for the feed consumed by the birds.

Feeding plays a very important part. A little of a correct mixture of feeds is worth a great deal more than a lot of a poor mixture, and very little extra care is necessary in order to reap the benefits of the triple returns at a time when labor is cheap and plentiful, and when extra cash can be readily used.

The proper feeding of poultry at all stages of development is discussed in the bulletins "Brooding and Rearing of Chicks" and "Poultry Feeds and Feeding," which will be forwarded by the Pphlicity and Extension Branch, Department of Agriculture, Ottawa, on request.

THE GRAIN TRADE AND THE WHEAT POOL—

EVERY SO often one reads in the press of the day reference to the policies of the Wheat Pool and the Grain Trade, as if there was real distinction between the aims of both bodies. The "trade" apparently feel that the pool by its organization and policy of attempting to set a price for wheat antagonised European buyers with the result that they looked elsewhere for wheat supplies. The pool supporters answer back that the charge is ridiculous and the sole reason European buyers are not buying Canadian wheat as formerly, is because, through fear of war, many countries are endeavoring to raise their own foodstuffs. Like many another difference of opinion between interested parties, there is both truth and error in each representation. We do not by any means set ourselves up as being an authority on marketing Canada's grain, but we do believe that in the early years of the Wheat Pool when sometimes enthusiasm ran ahead of judgement, the European buyer looked askance at some of the literature representing to be the Pool's viewpoint. Centuries of buying in an open market had wed British buyers to this system, and for them, nothing else would do. We believe they were not enamored of the Pool, but do not believe they were very much alarmed. Right or wrong, fair or unfair, the problems of the overseas farmer meant nothing to them. They most likely felt, if they thought about it at all, that the problems of overseas farmers should be taken care of by overseas governments. And it is interesting here to note that despite the assertion in the early years of the depression that Canada would not peg the price of wheat, it was finally done.

But while it is most likely true that European buyers would not be dictated to as regards price, except as market fluctuations compelled them, it is not true that the loss of markets for Canadian grain can be charged altogether to the Pool's activity, either in its early stages or later, when considerable grain was held for a higher price.

There are twenty-six sovereign states in Europe, all endeavoring to assert their own interests. Centuries of diplomacy, intrigue and warfare, culminating in the great war, has left a legacy of suspicion, hate and mistrust. It is quite true to say that the unanimous desire of all nations is for a prolonged peace in Europe, but so intricate, far reaching, and to the dweller on the American continent, so confusing, are the issues involved, that while peace is fervently desired, war is apt to come any time, not necessarily through the elaborate designs of one or more nations, but through the action of a crank or group of cranks. The initial step or blunder once made, with all the old time hates, jealousies and pent up passions as a back ground, it is impossible to foretell subsequent events.

Adequate foodstuffs in time of war are a vital necessity, hence with no thought about the Canadian Wheat Pool, or even the one time suggested world wheat pool, the different nations for their own future protection are as far as possible growing their own grain. It is unlikely that they will ever become fully independent of the American Continent as regards grain supplies but they have considerably curtailed their importations.

So many different things enter into the growing and selling of wheat that it is impossible to predict with accuracy just what the future holds. On the theory that history repeats itself, which in a general way is true, wheat, as in the centuries that have passed, should stage a come back. The vagaries of nature, the wise or unwise actions of humans, even agricultural mechanical invention, as in the past, are expected to play their part in the great wheat industry. But while it is true in a general way that history repeats itself, it never repeats itself exactly, if it did the future would be easy to foretell. There are always enough differences in detail to make the foretelling of the future extremely uncertain.

But however the Argentine, Australia, Russia and other grain producing countries manage their affairs, the problem here in Canada is to bring about an adequate standard of living for the agriculturalist. In this respect the problems of the Grain Trade and the Wheat Pool are identical. The average farmer knows little about the finer points of marketing wheat, consequently a national responsibility rests upon those who do. Instead of arguing the relative merits of past decisions, it would be better if these were forgotten and a concerted effort made to bring about a national consciousness of the importance of wheat,, and continuous unified labor to the end that the farmers' lot may be improved.

Mr. Williams had hired Sambo to paint his shed at the stipulated price of $2.50. Reappearing on the scene some time later he found Sambo lying in the shade enjoying himself while another Negro was busy painting.

"How is this, Sambo?" asked Mr. Williams. I thought I hired you for that job."

"Yes, suh, Mr. Williams, Ah knows you did, but Ah done sublet the contract for $3."

"But," remonstrated Mr. Williams, "I pay you only $2.50, so you are losing money on this job."

"Yes suh, yes suh, Ah knows Ah is," was the reply. "But it's worth somethin' to be boss."

The Last Nests of Passenger Pigeons

By Wilfred B. Friesen in "Forest and Outdoors"

Editor's Note:—The following interesting article is taken from "Forest and Outdoors" published monthly at Montreal. An excellent magazine for those fond of the great outdoors and wild life.

BIRD LOVERS can never forget the continent wide slaughter that resulted finally in making the Passenger Pigeon a totally extinct species. Cash rewards amounting to $5000 offered for the discovery of one nesting pair of genuine passenger pigeons have been withdrawn years ago for the simple reason that the quest was finally recognized as futile. The last specimen died in Cincinnati Zoological gardens in 1914 after living twenty years in captivity. And since then no one has seen a living passenger pigeon, though many have claimed the rewards offered. On investigation the results disclosed many mourning doves but no pigeons.

Explanations of this tragic phenomena have been quaint if nothing else. Some suggest that the pigeon may have attempted a transoceanic migration and from exhaustion fell into the sea and perished, or that it has successfully migrated to some unknown land and continues to thrive in its old time unbelieveably large numbers, undsturbed and happy. Briefly the passenger pigeon has been ruthlessly exterminated by the insatiable appetites of [illegible].

Alexander Wilson, pioneer ornithologist of the U.S.A. writes an account of the arrival of a multitude of pigeons at a breeding place in Kentucky that strikes the writer as being almost incredible. Firstly he attributed the migration of these birds to the search for food, moving as they did to a new breeding place when the food in the vicinity was exhausted. The particular breeding place of which he wrote was about 40 miles long and three miles wide, and represented an area of woodland in which the trees were of sturdy growth, and particularly free from underbrush. Here millions upon millions of pigeons nested, weighing the branches of the tree so heavily that these were constantly breaking off and falling to the ground where thousands of the creatures were destroyed.

When the squabs had almost reached maturity (and incidentally, only one young one was hatched to a nest, though often two eggs were laid) people came in waggons, carrying their cooking utensils, and paraphernalia necessary to destroy, clean and preserve thousands of birds in preparation for the markets or private meat supplies.

Hundreds of pigs were brought along and fattened on the squabs and eggs that dropped to the ground continually. The axemen fell to finally, and cut down the trees which seemed to hold the most nests. According to reports, some trees had as many as a hundred nests. Wilson describes it all in the most painstaking detail, remarking especially on the climax of the slaughter when the noise of crowding and fluttering birds was so intense one could scarcely speak to one's neighbor and be heard, and the ground was covered for miles with carcasses. No one during the height of the industry, for such it had in truth become, considered that this wholesale and absolutely unbridled slaughter could have but one end, extinction. Later, in the year 1848 the state of Massachusetts gravely passed a law protecting the pigeon killing industry from foreign interference! It was generally agreed that there were too many pigeons and that the supply in consequence could never be exhausted.

To give us some conception of the phenomenal extent of these flocks, Wilson tells of a roosting scene which he witnessed on the banks of the Green River in Kentucky. People had gathered in the great forest for hours preparatory to the evening slaughter. Not long after sundown, someone shouted, "Here they come!" though Wilson says that there was no need to announce their approach. The noise they made, still distant, reminded him of a hard gale at sea passing through the rigging of a close-reefed ship. As the birds arrived he felt a terrific current of air, and the noise became almost deafening. Thousands of pigeons were knocked down by polemen in a few minutes. For hours they continued to arrive, so thickly in fact, that they were forced to alight anywhere, and one on top of the other, until solid masses as large as hogsheads were formed on the branches all around.

No one dared venture within the lines of devastation for fear of being smothered or struck by branches which cracked down continually under their too heavy burdens of birds. All night the pigeons kept coming and the slaughter was extended until morning when the ground everywhere was [illegible] with bodies.

As has been mentioned, the passenger pigeon's object in migrating was the search for sustenance. Climatic conditions had little or no influence on them, they remaining indifferent to the most extreme weather and breeding as far north as the Hudson Bay. It can be understood to what shameful extent these beautiful creatures were vulnerable to the attacks of men when it is considered that most of the pigeon population of the entire continent was gathered into perhaps a half dozen huge flocks of the kind described. In flight formation they would represent an unbroken front of several miles and more than one naturalist has remarked on the beautiful evolutions. Flying at the rate of about 60 miles per hour, they sometimes darkened the earth for hours, and created an impression of a hail storm by their excrement.

Wilson endeavored to arrive at an assessment of the size of the flock he mentioned in his writing. Judging the flight to be a mile in breadth, and the speed to be 60 miles per hour, he allowed for three birds to the square yard, and concluded that there were something over two billion pigeons in that particular body!

Though the chief food of the Passenger Pigeon was beech mast, it would feed upon all manner of grain and fruit, and favored chestnuts above most foods. Wilson estimated that each bird consumed a pint a day, and that the number of birds mentioned would thus require 17,000,000 bushels of food a day. A flock such as this might easily make away with the entire Canadian wheat surplus in something less than a fortnight!

The killing of passenger pigeons seems to have approached something very near to a major industry in the United States at a certain period. For forty days, three carloads of pigeons left Hartford Michigan daily for the markets, a matter of approximately 12,000,000 birds in a little better than a month. Many other centres representing a wide-flung area did a similar commerce, creating at times such a glut in the market that dressed birds sold as low as one cent apiece. Men contrived nets and individually averaged 20,000 birds in a short season. With sublime optimism and a blind faith in the propagating abilities of dead birds, people continued the slaughter until suddenly there was a definite decrease in their numbers. Several states passed laws to protect the birds, but these first manifestations of sanity appeared too late.

The passenger Pigeon whose habitat had extended from the North West Territories to the Florida Keys, and westward from the Atlantic to the foothills of the rockies in such tremendous flocks, was rapidly on the wane. Ornithologists like Wilson and Audubon expressed deep concern over their dwindling numbers, and predicted the pigeon's complete extermination in a few years if the country continued to destroy as it had been doing.

A sensation was created when someone shot a passenger pigeon in 1908. A long enduring female bird passed away in Cincinnati Zoological Gardens in 1914 and its death represented a tragic occasion. It marked the passing of the last of the passenger pigeons on this or any other continent. Indigenous to this American continent, only the occasional bird was ever seen in Europe, or elsewhere in the world.

HE SAW A NEW AMERICA

Before I left London . . . for my first visit to the United States . . . I read what I could about the great republic across the Atlantic. . .

On the way out I read some American history. So for me the surprises and questionings were reduced.

The Statue of Liberty, surely one of the most beautiful and eloquent statues in the world! But a little satirical in this very conservative, capitalist country where unemployment is worse than in Britain, where trade unions find it more difficult to function than in our country, where the power of wealth is stupendous, and where law and order sometimes find it difficult to get on top . . . .

A kindly, hospitable people are these Americans to the visitor from abroad.

I met kindness everywhere. . .

Fundamentally, I found them friendly to Britain. Keenly interested in us and our problems. Admirers of our capacity in public administration. A real respect for our labor movement.

But . . . well, a bit sore about the nonpayment of the debt. Suspicious—not without reason—about the foreign policy of our present Government. "Is is genuine about the League of Nations, or is it using the League for British imperialistic ends?"

I did what I could to hold our end up. I told them that our people were absolutely genuine about the League, I even got cross with them. When repeatedly, they asked, "What's Britain going to do about the League now?" I retorted with some heat, "And what are you going to do about it?" . . .

Get rid of the idea that America is just a "British colony gone wrong." That view is very inaccurate; and it does harm . . . .

Their language may be ours, but we must patiently learn the language of their thoughts.

Moreover, their political organization must be vastly different owing to the famous American Constitution.

It is a terrible machine to work. It may suit America. But give me the good old unwritten Constitution of the British . . . .

Officially, my powers at London's County Hall are nill, but I have more real power than the directly elected Mayor of New York—the chief executive of the city. I can get slums cleared on a big scale; he can hardly get any cleared at all.

In social administration, America is a conservative country.

Will it change?

Yes it is changing. The old America of more or less permanent "prosperity" is gone. . . . Mass unemployment is making a new America.

More and more the state concerns itself with economic and social affairs as they concern the masses. A long, long way behind us. . . . But it moves.—Herbert Morrison in the News Chronicle (London).

NEW REGULATIONS FUEL OIL BUSINESS

[illegible] provision is made under [illegible] licensing legislation passed [illegible] last session of the legislature [illegible] government taking [illegible] of the oil there is [illegible] of this power [illegible] Hon. Ernest C. Manning [illegible] trade and industry [illegible] statement was made in reply to a question prompted [illegible] rumors that the government [illegible] to enter the fuel oil business.

Asked if the government had restricted the opening of the new [illegible] tions the minister said the restrictions had been imposed [illegible] no new ones were being [illegible] further notice in view [illegible] that negotiations were [illegible] with companies for a reduced price of fuel oil and other [illegible] pertaining to the [illegible]

[illegible] is in the [illegible] drafted and would [illegible] in the near [illegible]

POPULATION PROBLEM

[illegible] cities and [illegible] but [illegible] at a fast [illegible] of crown lands were made available for settlement last year. At the present rate of progress Australian population will [illegible] reach 10,000,000 people until the year 2000. Settlement is proceeding at a snail's pace.

All this brings concern to Australian people as many authorities there think the continent will be wrested from the whites by the encroachment of the yellow races from the Orient. "The Land" says in this connection, "Nobody but a fool could believe that the land-hungry nations of the world will not before long challenge our right to doddle along the way we are."

PYGMY FEEDS GIANT . . . It's part of Imperial Oil's job to fuel mighty liners calling at Canadian ports. Here is one of the smaller Imperial Oil tankers on the job transferring its precious load of liquid power.

SHE'LL BE COMIN' THRU THE MOUNTAIN . . . It takes more than a mountain to stop a Canadian railroad train. Sometimes it goes around or up—sometimes it goes right through. Good lubricants are needed to keep those wheels humming—Imperial lubricants.

FLOATING SERVICE STATION . . . (left) A familiar sight in Vancouver's world famous harbour is the marine supply depot which makes Imperial Oil products conveniently available to power boats, large and small. You'll see it if you are one of the fortunate thousands who will visit Vancouver this year to help celebrate the Fiftieth Anniversary of B.C.'s metropolis.

"YES SIR, I'LL DO THE WHOLE JOB" . . . It's the smiling chap in the Imperial uniform speaking. He's talking about that Spring change-over, which every motorist has to have done sometime, somewhere. New, clean, summer oil and grease for old, thin, dirty, winter stuff. Have you had YOUR car put in tune with Spring, yet? Your nearest Imperial Oil Station or dealer will give you quick service, finest products.

AN ECONOMIC [illegible]IT

An economic unit can be one of [illegible] of things. A sovereign state, province, mun[illegible] village or even private enterprise as ex[illegible] particular business. No economic unit re[illegible] ly within its own orbit, but it is becomi[illegible] fashionable for economic units to, as far [illegible] within their own orbits. It is called bein[illegible] taining basis.

The Tofield District is an econom[illegible] it are facilities for trade, education, relig[illegible] idents can find in Tofield stores most of [illegible] desire for everyday existence, no matte[illegible] are things to eat, wear, or use.

Included within the district is your [illegible] lished weekly, which like a wheel withi[illegible] economic unit itself. It strives to serve th[illegible] in the district and its fortunes are solely [illegible] those people. Mostly unassuming, yet b[illegible] light unshielded, it tells of things social [illegible] it is the publicity medium of the Tofield di[illegible] unit, and as such, strives to merit the [illegible] readers and advertisers. If you are not a [illegible] invite you to become one, the cost is small [illegible] an advertiser and have wares to sell, plan [illegible] it is good business. If you live here, as fa[illegible] here, the ultimate result will be beneficial [illegible]

CUTTING PROVINCIAL INTEREST PROVING DETRIMENTAL

London.—Threat of removal of Alberta sterling stocks next week from the London stock exchange's official list was made Saturday in "the city" in consequence of Premier Aberhart's decision to cut interest on Alberta bonds to 2½ per cent after June 1.

It is not known here yet whether British issues are affected but if so the stock exchange committee will in all probability follow the precedent set in the case of Vancouver stocks in January, 1936, when Mayor McGeer proposed a reduction of interest rates by 50 per cent without consultation with bondholders.

Financial newspapers Saturday point out that while only a relatively small proportion of Alberta's bonds is held in the United Kingdom Premier Aberhart's "arbitrary declaration" has virtually suspended all dealings in them here.

VERMILION RESENTS "SLAP" OF MAYNARD

VERMILION, May 23.— Hon. Lucien Maynard's reference at St. Paul a few days ago to an unnamed Vermilion merchant as a "horrible example" of what non-co-operation in government certificates might mean brought a sharp retort from Vermilion merchants Saturday.

Mr. Maynard was reported as saying that one merchant who refused to accept Mayor W. A. Fallow's municipal scrip three years ago went practically bankrupt and never yet has regained his former business.

But merchants here declare now that no town merchant refused to accept the post-dated cheques issued by Mr. Fallow. A survey, on the contrary, showed that the opposite was the case: every merchant co-operated to full extent during the brief life of the scrip in efforts to tide the town over its temporary crisis.

ALBERTA ROAD WORK TO COST $385,000

Speeding up in preparing for a tourist rush, the Alberta Public Works Department has commenced work on projects which will require an expenditure of about $400,000.

The official announcement of this initial program was made lately by H. P. Keith, Deputy Minister of Public Works, in the absence of Hon. W. A. Fallow, Minister of the Department, who was in the east.

In launching this program, the department is responding to representations made by the Alberta Motor Association and others as to the need of improved highways in this province.

Grading, gravelling and oiling comprise this preliminary batch of road projects, distributed over various parts of the province.

The projects represent a total of 160 miles taking in the Calgary-Banff highway for a distance of 12 miles near Lesser Slave Lake a new route being necessary in view of flood conditions which had to be contended with last year, will require an outlay of $70,000.

Then there is the new highway to be graded and gravelled from Picture Butte, Lethbridge to Iron Springs, serving the million dollar sugar refinery in the Lethbridge Northern district and estimated to cost $102,000.

Grading and gravelling of the old railway grade on the Jasper highway for a distance of 31 miles from Stynal, where work was commenced last fall to Carrot Creek, is put down at $143,000.

New Banker Here Before

Following the news of the transfer of L. W. Smith, manager of the local branch of the Bank of Montreal, to Trochu, Alta., where he is to serve in the same capacity, word has been received of the appointment of his successor in the person of one who is already well known to many local residents, namely A. E. Allan, who served here as accountant of the bank from 1924 until 1929.

For the benefit of those who have arrived in this district since then it will not be amiss to review briefly Mr. Allan's career. He was born and educated in Scotland and before coming to Canada in 1912 had served on the staffs of banks in the Old Country. On his arrival here he entered the service of the Bank of Montreal at Guelph, Ont., and was in that city when the war broke out. He enlisted in August 1914 and went overseas with the Canadian Army Service Corps, serving in France with the 1st Divisional Train.

Shortly after returning from overseas to resume his banking career he was transferred to British Columbia and four years later was appointed accountant of the Tofield branch. In his service since then he has been accountant of the offices at Acme and Leduc, Alta.; acting manager at Penhold, Alta., and immediately prior to his present appointment, manager of the Bowsman River, Man., branch.

He has been active in recreational pursuits, his particular interests being golf, curling and badminton. When situated here before he was an active member of the golf and tennis clubs.

Mr. and Mrs. Smith Feted

Mr. and Mrs. L. W. Smith were the guests of the congregation of the United Church on Friday evening June 5th at a social evening. They have been closely associated with the church during their stay in Tofield and although the arrangements were hurriedly made, there was a large gathering present.

Everything was very informal. Rev. D. K. Allan acted as chairman. Messrs. Cowell and Broughton favored us with solos, Messrs. J. and G. Cookson sang a duet and Messrs. Smith, Swift, Broughton and Anderson rendered a quartette.

Mr. Allan spoke of the fine service rendered by Mr. and Mrs. Smith in the choir especially and also in other organizations. Messrs. Lovell and Swift referred to the important part they have played in the congregation and in the community.

As a token of goodwill and good wishes Mr. Allan on behalf of the congregation presented the guests with an electric coffee percolator.

Mr. Smith fittingly replied. The ladies served lunch afterwards.

It was a very informal gathering but it was full of good cheer and the best wishes of all present and of the whole congregation go with Mr. and Mrs. Smith and family to their new sphere.

THE GREAT ROBBER

Weeds are the great robbers of the farmer's income. Careful experiments made by Government Experimental Farms and Universities reveal that on our Western Prairies weeds take a greater toll than drought, rust, insects and plant diseases all put together.

Early June summerfallowing and clean cultivation destroy weeds, preserve precious moisture, so help to increase farmers' incomes and profits.

LOCAL AND PERSONAL

The regular monthly meeting of the Woman's Missionary Society of the United Church will be held at the home of Mrs. L. W. Smith on Thursday, June 18 at 3 p.m. A cordial invitation is extended to all. All members are requested to attend the quilting Tuesday afternoon June 16 at 1:30 in the basement of the church.

The W. A. will hold a tea and sale of home cooking at the Institute rooms on Saturday, June 13th.

Blake Clutterham and Ray. McCarthy are leaving for a three weeks vacation on Friday. They will motor to Portland and Gresham, Ore.

Mr. M. C. Hammond left for Tara, Ontario, on Saturday. He will attend the funeral service of his mother at that point. The late Mrs. Hammond will be remembered as having visited Tofield on quite a number of occasions. This is Mr. Hammond's first trip back to Ontario since he left that province thirty years ago.

Born.—To Mr. and Mrs. J. McKenna, on April 29th, a son.

A. T. McLean of Edmonton will make a professional visit at the office of J. E. Stinson on Saturday, June 20th.

Mrs. [illegible] of [illegible] is visiting with her [illegible] Mr. and Mrs. McLeod.

Mrs. Calvert returned to Edmonton this week after visiting friends in Tofield for a short time.

Mrs. [illegible] returned to High River after spending some time at her home here.

Among those who visited the city last week were Pat [illegible], Lovell Ross, Esther Jacobs.

Mr. Currie formerly of Chipman came to Tofield last week to take over the managership of the Tofield Creamery.

Mr. and Mrs. Eldred and boys moved to Edmonton this week where Mr. Eldred has been transferred to the Woodland Dairy there.

Mr. D. Brown of Edgerton has taken a position at the Tofield Creamery for the summer months.

Helen Schultz visited with Lois Thompson for a few days.

Charlie Edwards visited Viking for the week end.

Mr. M. Hutchinson and D. Brown motored to Edgerton on Sunday last.

Mr. G. Reber was a visitor in town last week.

Mrs. [illegible] of [illegible] is visiting with Mrs. [illegible].

Mrs. Letourneau, Mrs. Bruce and Mrs. Malcolm visited Edmonton on Thursday.

Mr. Chris. Hammond left on Saturday for Detroit to attend the funeral of his mother.

The Jolly Twelve Bridge Club motored to Wetaskiwin on Wednesday evening to visit Mrs. R. Whyte, a former member of the club.

Mr. McLaughlin was a town visitor on Wednesday.

Mr. A. Bairnes spent a few days in Edmonton this week.

Mr. Mackinnon, Les Barnett and Mr. Hammel motored to the city on Wednesday evening.

The McGregor construction Co. is putting up a telephone line to Edmonton for the Gas company.

SPORTS MEETING

A very successful sports day committee meeting was held at the Institute rooms on Tuesday of this week a fair number being present.

It was decided to again hold the sports day on July 1st, which this year falls on a Wednesday.

W. Worton was re-elected president and W. Chapman, secretary-treasurer.

The following committees were appointed.

Baseball—T. McBratney, R. S. Burke.

Ladies' Softball—L. A. Broughton, V. Bailey.

Grounds — T. Wellington, with power to add.

Horseshoes—F. McCaffey, W. Bellamy.

Races—John [illegible] and Les. Glover.

Advertising—President and Secretary.

Hot Dog Stand—W. Bellamy and Mr. Gravelle.

Dance—Ray Coutts, W. Taylor, W. B. Worton, R. S. Burke, B. Kendall, A. E. Clutterham.

The matter of the big booth was left in abeyance. If just one suitable organization desires it, it will be handed to them. If more than one, it will either be let by tender or drawn for.

Given fine weather we should have a good sports day. The committees got keen to work and in the intervening three weeks arrangements for a real good day will be completed.

SCHOOL FAIR MEETING

On Wednesday night a school fair meeting was held at the Town hall. A visiting speaker was present and a more detailed report of the meeting will appear next week.

GRAIN CLUB MEETING

A meeting of the local grain club was held on Tuesday evening at the Town hall. As it is not always possible for the editor to be present at all gatherings, secretaries are invited to send in reports to the press.

CREAMERY PRIZE RIBBON DISPLAY

A display worthy of notice now appears in the window of A. A. Bairnes drug store. Mercury readers will remember our recording the many butter awards won by the local creamery last year and now the ribbons have all been neatly mounted. They are outstanding evidence of the care and skill of D. Kendall, butter maker and also of the care in handling cream by the local farmers. Good cream and technical skill combine to make high grade butter. Congratulations to both the creamery and cream patrons.

At time of going to press the weather still remains dry, although there are signs of rain. Crops in this district would be much benefited by a good day's rain.

New Lawyer To Open Here

Mr. McLean of Edmonton has arranged to open a law office at Tofield and the following brief history of Mr. McLean's career may therefore be of interest.

Alfred Thomas McLean, B.A., LL.B., was born in Ontario but came west at a very young age; his parents settling in the city of Edmonton. He received his education in the grade and high schools in Edmonton. He registered at the University of Alberta, receiving the degrees of Bachelor of Arts and Bachelor of Law. Upon his graduation he articled with the firm of Woods, Field, Craig and Hyndman of Edmonton, being admitted to the bar before Mr. Justice Ewing in Edmonton. He has remained associated with Woods, Field and Co. since its admittance. Mr. McLean, as well as his practice in the City of Edmonton has a practice in the Village of Hay Lake which he opened about two years ago. He proposes to carry on his Tofield practice in the office of Mr. Stinson, real estate agent and will be in town every second Saturday until seven in the evening, commencing Saturday June 20th.

Word has been received that Mrs. J. McGinitie passed away in an Edmonton hospital today (Thursday). Further particulars will appear in our next issue.

Mr. Retigan, well known resident of the Ketchamoot district died on Thursday of this week at an advanced age. The funeral we understand will be held on Friday, service being held at St. Francis' Catholic Church.

In mentioning the Eastern Star women who attended the convention in Calgary last week we accidently omitted Mrs. Firth's name.

A number of Masons from Tofield attended the Grand Lodge held in Edmonton this week. Those that attended from here were Mr. W. Chapman, Dr. Law, Mr. J. Chapman, Mr. Wallis, Mr. Lovell and Mr. Smith, Mr. Allen and Mr. Jacobs.

On Monday afternoon of this week a number of friends gathered together at the Whyte home to help Mrs. Whyte and Mrs. Forman celebrate their birthdays. About twenty guests enjoyed bridge during the afternoon and honors were won by Mrs. [illegible] and Mrs. Scott. A delicious lunch was served by the hostesses.

Mrs. Laurie Scott and daughter from Denver arrived here this morning to visit with Mrs. Scott's parents, Mr. and Mrs. F. Griswold.

In the editorial re Prosperity bonds we should have stated that as the kind of bonds discussed are redeemable in TWO years, the result to the people would be one hundred dollars worth of work and $10,400 worth of business for an expenditure of $104.00.

Tofield Takes First Game

On Monday evening last the Gas Line Baseball League was opened at Tofield with Tofield's old time rivals, Ryley, supplying the opposition.

For the first game of the season both clubs put up a good brand of the summer sport.

Tofield went into an early lead and were never headed although in the latter stages of the game Ryley went on a batting spree which caused the locals a few anxious moments.

For Tofield Julius Lerbekmo was on the mound with Toby Nemeland doing the receiving. Later Ray Coutts replaced Lerbekmo.

For Ryley Hailey and Oslund shared the pitching duties with O. Anderson behind the plate.

Tofield went into a four run lead in the first inning and added two more in the 6th. Ryley did most of their scoring in the 5th inning when they laid down a barrage of hits to run in four scores and in the 7th inning came within an ace of tying the score when they pushed one across and had the other on the paths when the side was retired. The game ended with Tofield on the long end of a 6—5 score.

A fair crowd was in attendance and were well pleased with the performance of both clubs.

Bud Hannan and T. McBratney handled the game.

SEVERAL RECIPES FOR MOSQUITO DOPE

To workers in the open during the summer months and to campers in the woods, to fishermen, and to picnickers, existence is made uncomfortable by mosquitoes, black flies, midges, sandflies and punkies ("bite-and-no-see-ums"), deer-flies, moose-flies, or dog flies and horse-flies or "bull-dogs." Blackies and mosquitoes are the most numerous and most annoying.

With regard to personal protection, various essential oils applied to the skin are of great value in warding off the attack. None of the protective mixtures as yet evolved are absolutely effective, but several are of great value, especially when the insects are very numerous. The majority of the patent protective mixtures obtained at drug stores are effective but are [illegible] expensive. Equally good [illegible] be made by the individual at lower cost, and the amount of the ingredients used may be varied to suit individual requirement, according to the sensitiveness of the skin. The following recipes, and many other methods of making mosquito "dope" are taken from the bulletin of the Dominion Department of Agriculture on methods of protection from pests of the forest. The bulletin may be obtained free from the Publicity and Extension Branch, Ottawa.

No. 1 recipe—oil of citronella, 2 ounces; spirits of camphor, 1 ounce; oil of tar, 1 ounce; oil of pennyroyal, 1-4 ounce; and castor oil, 4 to 6 ounces, depending on the sensitiveness of the skin.

No. 2 recipe—oil of citronella, 2 ounces; castor oil, 2 ounces; oil of pennyroyal, one-eighth ounce.

No. 3 recipe—oil of tar, 2 ounces; castor oil, 2 ounces; oil of pennyroyal, one-eigth ounce.

No. 4 recipe—gum camphor, 3 ounces; salol, 3 ounces; petrolatum, 4 ounces. The purpose of the castor oil in mixtures 1, 2, and 3 is to prevent injury to the skin by the essential ingredients.

Another popular remedy of preventing is made by mixing together 1 ounce oil of citronella; 1 ounce spirits of camphor, and ½ ounce oil of cedar.

Among the remedies for relieving mosquito bites, household ammonia, tincture of iodine, borated vaseline, glycerin, and alcohol are widely used. In many cases, irritation passes away when ordinary toilet soap is moistened and gently rubbed over the puncture.

Where City Dwellers Enjoy Holidays

Up in Northwestern Ontario where the game fish grow large and put up a spirited battle, the Canadian Pacific Railway has well equipped chalet-bungalow camps at Devil's Gap, near Kenora, and at French River for the accommodation of fishing enthusiasts from all over the continent. Arrangements can be made, too, to take care of visitors to Nipigon River, another famous resort for game fishermen.

Year by year these favored spots, unspoiled by the civilization from which they are separated by a few short hours of train travel, attract more and more visitors. The camps offer a happy combination of the joys of the great out-of-doors and the comforts of the city. At the Devil's Gap and French River Camps the cabins are lighted electrically, cosily furnished, and have running water. Many of them have shower baths and all have screened verandahs. Efficient [illegible] is maintained.

Although fishing is the main attraction at the Devil's Gap Bungalow Camp, just a pleasant [illegible] ride's distance from [illegible] amusements are [illegible] at the camp dock [illegible] course [illegible] tance, and organized excursions by motor boat or canoe [illegible] great stretch of water [illegible] will be [illegible] 21 to [illegible] attraction that [illegible] Old Home Week which will be staged by Kenora from July 6 to the 11th.

The French River Camp provides especially good fishing and [illegible]. Fish [illegible] "muskies," except [illegible] and small mouth [illegible] "wall eyes," and other [illegible] fish are found in [illegible] a 33-pound "musky" was taken there [illegible] fish are brought in [illegible]. A picturesque [illegible] golf course is situated [illegible] and there is [illegible] sandy beach, [illegible] The [illegible]

HEALTH
by
M.D.
A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

PROTECT

To enjoy the advantages which medical science has made available in the prevention of disease, it is necessary to look ahead and not put off taking action.

During the summer months, most of the communicable diseases are at a low ebb. There are certain explanations offered for this seasonal variation. We mention it here lest the summer decline be used as an excuse for delay, with the idea in mind that the danger is past.

Now is the best time to look ahead and to realize that, with the coming of colder weather, in just a few months, there will likely occur the normal seasonal increase in communicable diseases.

Unfortunately, our knowledge is limited and so we do not possess the means for the prevention of adequate control of many diseases. Fortunately, however, we have had given to us practical, simple and safe procedures to prevent some.

One of the most persistent disease enemies of childhood is diphtheria. For many years, this disease was responsible for a large number of deaths. The larger centres of population were never free of it, and parents dreaded the name "diphtheria."

Diphtheria need no longer be feared. We are fully armed to fight successfully this old enemy. This statement is not bravado; it can be supported by the proof of what has happened during recent years in those places where the child population has been immunized.

Immunization is a simple and safe procedure. It means the injection of diphtheria toxoid under the skin. This toxoid stimulates the body to produce its natural defences against diphtheria. The result is that the injected person becomes resistant or immune just as he would be after recovery from an attack of diphtheria, except that with the toxoid, there is neither danger or suffering involved.

Diphtheria occurs commonly very early in life. Every child should be immunized before he is a year old or else he may contact the disease before he has had a chance to secure protection. It is a responsibility of the parents, no one else can be held accountable. You can have your child protected against diphtheria, but you must take the necessary steps to have it done; otherwise, your child is not protected.

There is no better time than the present for this, and by having the diphtheria toxoid given now, you can rule out one disease danger for your child. Why then delay to protect?

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

LOW RATES FOR SUMMER FAIRS

For the purpose of stimulating travel and at the same time affording residents of the western provinces an opportunity to attend their provincial summer exhibitions at modest cost, the Canadian railways have been authorized to put into effect very low fares in connection with summer exhibitions, according to an announcement made by Jos. B. Parker, secretary of the Canadian Passenger Association, western lines.

These special fares will apply to class "A" exhibitions at Brandon, Calgary, Edmonton, Saskatoon, Regina and Winnipeg exhibitions. The fare in all cases will be single first class fare for the round trip, with a minimum for adults and children of 25c.

The special fares will go into effect two days prior to the opening of each exhibition and will have a return limit of three days after the exhibitions have closed. Similar reduced fares will go into effect for class "B" exhibitions throughout the prairie provinces.

CANADA" DISPLAYED AT VANCOUVER

Canada from coast to coast is on display here for the balance of this summer to greet the thousands of visitors expected during the period of Vancouver's Golden Jubilee celebrations.

In the ground floor windows of its hotel building in downtown Vancouver, the Canadian National Railways has placed a series of displays portraying for the benefit of tourists the country's attractions from Pacific to Atlantic. It is the company's contribution to the city's birthday program.

As befits a jubilee celebration, one of the exhibits strikes an historic note. It is a full size model complete with cordwood and water barrel, of the "Dorchester", first locomotive used in Canada on the Champlain and St. Lawrence Railway. This first railroad in Canada is now part of the Canadian National System and its centenary is being observed this year. The colorful backdrop for the Dorchester shows the village of La Prairie "en fete", 100 years ago.

Most spectacular feature of the display is six huge hand colored transparencies at the building's main entrance. More than 10 feet high, these are brilliantly lighted from behind to disclose scenic gems of Jasper National Park and Alaska. One of the large windows holds a series of photographic panels enlarged to a man's height. Each panel contains a picturesque scene from each province, ingeniously identified with a tubular electric fixture. In front is the [illegible] between each province—a working model of a sleek "Northern" type locomotive used in Canadian National Railways transcontinental service.

Hunting and fishing are illustrated in a natural setting. Maple leaves, brilliant with the colors of autumn, carry the theme of display which consists of record catches of various species of game fish, including British Columbia's own giant Tyee and the heads of moose, mountain sheep and goat and a mounted black bear.

Flashing Neon tubes on a massive topographical map of British Columbia and the Rockies publicize another famed tourist trail—The Triangle Tour route through the Canadian Cordillera by sea and land.

Another part of the Empire and one much favored by Canadians is drawn to the attention of the visitor in the West Indies exhibit with its coral sands, coconut palms and native curios. Other features of the Canadian National System such as its hotels, telegraphs and express facilities are shown.

With window space available on three street sides the railway company has seized a splendid opportunity to advertise scenic highlights of the east and the west so that the visitor may be encouraged to plan further Canadian holidays in the future.

ROVER SEA SCOUTS ON COAST GUARD DUTY

When the Coastguard Chief of the South Gare Station on the English Coast met with a serious cycling accident, the 1st Tees Rover Sea Scout Crew volunteered their services over the week end to relieve the assistant officer. Fourteen scouts did watch duty of four hours each in turn, and kept the station log.

A NOVEL GOOD TURN

When a miner employed at the new Michael Colliery, East Wemyss, was compelled to vacate a room he occupied with his wife and two children, the local Boy Scouts came to the rescue. They erected a tent adjoining their Scout Hut, and offered hospitality to the family until such time as they could secure a home in the district.

CHARLES GORDON—

RESIDENTS OF this district will, with these more intimately acquainted with the late Mr. Charles Gordon, note his passing with sincere regret. Mr. Gordon died at Edmonton on Friday, June 5th, at an Edmonton hospital, death being the result of complications following an operation. At Vegreville Mr. Gordon was an outstanding figure and had enjoyed all the honors a provincial town could bestow upon a citizen of ability. Throughout the Tofield district he was known chiefly through his political activities, having carried the Liberal banner as candidate through three campaigns. Partly due to his own sterling qualities and partly due to the era in which his political life was cast, he was not so great a success as a politician as he was in business. Entirely apart from political parties, this paper always felt the people were passing up a good bet by not capitalizing on Mr. Gordon's outstanding ability. He appeared to us as too logical, too direct for a politician, but would have made an able administrator. As a speaker, he was unable to cast a spell over his audience, but in any question period he showed remarkable ability to analyse and present questions in their true light. As a public spirited citizen he was unique. Within a week or so of losing the last provincial election he was espousing the cause of the farmer at a meeting of the Vegreville Chamber of Commerce.

A. L. Horton, editor of the Vegreville Observer, and close friend of Mr. Gordon for some thirty years writes eloquently and with feeling of the passing of his long time chum. The following are excerpts from his editorial tribute:—

> "An intimate friend said to me the other day in speaking of Mr. Gordon: "Charlie never learned to play." Like all one sentence statements, this was a slight exaggeration, but there was too much truth in it. Whatever interest he took in the lighter side of life was confined exclusively to the odd game of curling in earlier years and even in that game, he was always in deadly earnest. He was a good loser and all that sort of thing, but actual relaxation seemed to be beyond him. This, to my mind, was the keynote of his character. Urged on by an irresistible ambition, Mr. Gordon rarely took time out to count the cost. Everything he entered into, whether it was business, or municipal or provincial or federal politics, or even social services, commanded from him the utmost intensity. He could not be inactive; he could not or would not leave to others details which they could and would have readily looked after. He just had to do it himself, or be on the spot to see that it was properly done.
>
> "Men of Mr. Gordon's type are rarely born; and when they are born, they are even more rarely found in comparitively small communities such as Vegreville. Usually men of such talents and ability seek a wider field. But, by preference, Mr. Gordon remained in Vegreville, by far its most active and enterprising citizen. . . . . . .
>
> "Mr. Gordon held very strong, sometimes intolerant viewpoints. Generally speaking, this feature has both its strength and its weakness. Its strength lies in the fact that men of strong and unyielding opinions know, at least, where they are going and usually have, as Mr. Gordon had, good reasons for their opinions. Its weakness lies in the fact that this is a world of compromise—not necessarily between good and evil, but between men and methods—and thus, it is often politic or tactful or diplomatic to yield a point here and there in order to gain the larger end. Mr. Gordon could not yield. No one could be firmer or more unshakeable than he, as I found out often enough. . . .
>
> "Closing this on the personal note, I may say that as most citizens know well enough, it is only at very rare intervals that I so much as enter a private home in this town. This is, of course due to my own idiosyncracies rather than any lack of friendliness. But I never venture to intrude, save in the course of duty. The one exception I made was Charles Gordon's home. There I was a frequent visitor, sure of his warm handshake and his friendly welcome. And as I pass his house today and think that never again will I meet Charlie Gordon, never again talk over with him our matters of mutual interest, never again receive from him his friendly counsell and advice, I am sure my readers will understand my feelings as I write these lines."

A NEW HALL NEEDED?—

A YEAR OR so ago a Norwegian silent picture was shown at Tofield. The picture which was purely of the scenic type was shown to about as large a crowd as could be packed into the old Variety Theatre. People from far and near of Norwegian and Swedish extraction as well as a large number of others packed the hall.

On Wednesday of last week the advance agent for a Norwegian talking picture called at the Mercury Office seeking information regarding the showing of his film. He was directed to the right people only to discover he was unable to show due to the lack of a suitable hall. Expressing regret he made contact with Ryley and will show his feature there, to, we expect, a full house.

BRITISH COLUMBIA EXPERIENCE FLOODS—

DURING EVERY winter, and particularly so during last winter, numerous Albertans would bitterly complain about the cold weather. And not without cause. Weeks on end of sub zero weather with the occasional storm thrown in for good measure is sufficient to try the patience of the most ardent Alberta booster. Almost invariably when the air is crisp and frosty, and green vegetation is most conspicuous by its absence, those wearying of the fight against the eternal forces of winter, look rather longingly to the west, where lies British Columbia with its rocks and green grasses, and an ocean borne warm current. But even there one is apt to meet disadvantages even worse than sub zero temperatures. Last week, due to storm and flood, quite a number of people lost not only their crop, but their homes, barns and livestock. Raging torrents, sweeping through the valley carried almost everything with it and people were forced to high ground for safety. In one case a whole town was ordered to stand by ready to evacuate at a moments notice. So it would appear that even if the grass is green longer and the air more balmy, even the green hills and pastures of British Columbia can turn about and become dangerous to life and property, in such a way as we here in Alberta, rarely witness. Of course the above applies only to a section of British Columbia and not to the whole province. Despite frigid air and frost bitten noses, Alberta buildings stayed "put" and old bossie and the horses were there when owners, braving the cold went out in the morning to feed and water them.

THOSE INTEREST RATES—

DURING THE early days of the depression, an economic period which we hope is now past, men would discuss the whys and wherefores of economic conditions in general. To some men the realization quickly came that while the wages of practically everything else had fallen, the wages of money remained fairly constant. To emphasize the claim that this was unfair, the following illustration was often given. Three men in pre-depression days were possessed of $50,000.00. One man erected a factory; another bought a farm; and the third place his money in hiding. The question was then asked which of the three men contributed least to his country's progress, and in view of depression conditions then prevailing, which of the three men had profited most? It was at that time obvious that the man who had placed his money in hiding had done the least towards his country's progress and had profited the most. Like many an illustration made to prove something, this one is open to attack, but there is plenty of truth in the claim that wealth in the form of money, despite devaluation as related to gold, increased in vavlue as related to other things. While practically all forms of other wealth as compared to money decreased in value. It would now appear that this knowledge is so well and widely absorbed that the money citidel itself is being attacked. The form of attack is the interest rate. Our own provincial government has been outspoken, other bodies, laboring under financial obligations, have or are making "technical defaults."

We see no good reason why those individuals, who, having purchased bonds, should not be required to share in the general economic debacle, as well as those who bought stores, factories or farms. And we believe a reduction of the interest rate is the simplest and most effective way of bringing this about. At the same time it is no matter for snap judgement, depending upon whether one is a bondholder or not, and above all, what new arrangements are entered into regarding outstanding indebtedness should be mutual arrangements. Bonds after being out for a number of years become widely distributed. Owners are to be found not only scatter-throughout the dominion, but throughout the world, hence it is difficult to get concerted action, but already there have been some form of organization and it is possible that bond holders will agree to some form of reduction of interest, realizing that in the long run this is the best thing for them. The chief requirement of an investment is security of principal and strangely enough with many bond issues out today, security of principal involves reduction of interest.

PROSPERITY BONDS—

INFORMATION FROM those in high office is to the effect that there will shortly be an issue of prosperity bonds. It is almost idle to predict just what form the bonds will take. Statements of policy vary from day to day and evidently governments enjoy the prerogative of being able to change their minds. Until such time as more definite information is available the public is left to assume that to which stamps are to be attached is the plan the government has in view. The plan is not new, is is not devoid of merit, but it must necessarily have limitations.

It is proposed that the government issues bonds for public works instead of borrowing the money as has been done in the past. Alright—one hundred dollars worth of work is done for the government for which they give bonds costing them next to nothing. The government is one hundred dollars to the good. To make these bonds function, one hundred dollars worth of stamps must be purchased from the government and the government is thus two hundred dollars to the good. They stand prepared to redeem the bonds when filled with stamps which would cost them one hundred dollars. Profit to the government one hundred dollars, or in other words they get the work done for nothing except the cost of printing the bonds, stamps and administration costs. Don't forget the government is the people.

So much for the government, let's see how the plan effects the individual handlers. The government in exchange for work done issues one hundred one dollar bonds. If they change hands weekly, in the course of a year they will do $5,200 worth of business in one year and will have cost each individual one per cent for the business done, an amount any business man would be pleased to pay to appreciably increase his business. Reckoning along these lines the people through the government get one hundred dollars worth of public work done and $5,200 worth of business in one year at a cost of $52.

This looks alright but we are afraid somewhere, sometime, there will be a clash between money and prosperity bonds. Within certain limitations the plan should work, particularly as a medium of exchange between services and services or for goods procurable within the province. But where goods have to be replaced by others from outside the province the merchant will need money to pay for them, for no matter how kindly disposed other provinces and countries are towards Alberta they are unlikely to help pay for our public works.

COUNTING NOSES—

WE OBSERVED a young fellow, spry of step and determined looking heading towards the Mercury Office this week. He was carrying a brief case. Taking him for a salesman we rapidly called to mind our best hard luck story and waited for his entry. To our great surprise we found it was Mr. Joseph Rogers, and his business was not selling, but gathering information, census taking if you please. He had a little advantage over us as we had to tell him our age, but there was no place for us to ask a question concerning his age. If there had of been we would have found that at 82 years of age he was stepping up to the counter and recording information as well as a mere youngster of 30.

PAYING FOR NEW WARS—

TO PAY for new armaments Great Britain has increased her income tax rates. The taxpayers are stunned. With the cost of the last war still heavy on their backs, they must now begin to pay for the next war as well. Germany has also been preparing for the next war, but she has avoided paying the bill through a kind of inflation. Her policy of borrowing to cover a deficit has created employment, and produced the illusion of prosperity, or at least staved off economic collapse. While Great Britain, if she pays as she goes, will merely draw off income which the taxpayers would have spent on things they could eat, wear or enjoy, and put it into the making of shells, guns and airplanes. In short, the British government is forced by fear of the future to make the lives of her citizens less worth living. This is what we mean by civilization.—Today.

NO NEWS THIS WEEK—

A THROB of sympathy was roused in newspaper offices from coast to coast by the mournful wail from the Nantucket Inquirer, which laments the lack of news in the district. The Nantucket paper says:

> "There has not been a fire, there has not been a bank robbery, there have been no births, there have been no marriages, there has not been a runaway horse, there has not been a railroad accident, there has not been a shipwreck. There has not been a murder, no one has fallen from a roof, no tramps or suspicious looking persons have been seen hanging around, no airplanes have cracked up, there has not been a hold-up, no man has run away with another man's wife, no one has absconded with another person's money, there was no president's birthday ball. As a matter of fact there has not even been a real good dog fight on Main Street."

Every weekly paper is from time to time a victim of this lapse of news, and so little can be done about it. The newspaper does not make the news, it merely records what happens. And in this recording it must have the interest and help of readers. It is a commonplace experienec—it must be—for readers to say "there's nothing in the paper this week."

Perhaps there would be more news if all subscribers thought of the paper as theirs, and remembered to pass on any little items of which they are aware. Perhaps it is literally true that there are periods in a community, when nothing of an eventful nature is happening. At any rate when readers say "there's nothing in the paper this week" they may rest assured that the newspaper office knows it, and has suffered grieviously over the reluctance of the community to make news, or to let the paper know about it.—Exchange.

CROP REPORT SHOWS DECREASE IN WHEAT

(Issued by Department of Agriculture, Edmonton)

Wheat seeding in the late districts of the north was completed a week ago. Some decrease in wheat acreage in the west-central and northern districts has resulted from the late spring with a corresponding increase in coarse grains. Seeding of coarse grains is practically finished [illegible] central areas and south of the Peace River. In the Ed[illegible] and north of the Peace about [illegible] per cent of coarse grain [illegible] to be done. Work on [illegible] well under way in [illegible] east-central parts and [illegible] Prairie district.

[illegible] hot dry weather was prevalent over the Province the week of May 27th. Fortunately the heavy [illegible] of the previous week had provided sufficient surface moisture in [illegible] crops [illegible] spell in reasonably [illegible] rain is now needed from Calgary south and eastern [illegible] Lloydminster for [illegible] growth. Cooler [illegible] the present week has af[illegible] these areas. [illegible] weather was most beneficial [illegible] the late sections of the central [illegible] very rapid growth [illegible] to some extent for earlier delay in seeding. There is still abundance of reserve moisture in these districts. During the present week showers have occurred at scattered points, heaviest rainfall being reported from Calgary west and north to Red Deer. Only the Lethbridge section of the dryer areas reports precipitation of appreciable value since rains of May 20th. Light rains are falling from Red Deer north to the Edmonton area with cloudy conditions over a large portion of the Province as this report goes to press.

Light frosts have been reported during the past few days at a number of points but have not been sufficiently severe to do much damage to crops. Some injury has been done to gardens.

FARM WOMEN'S WEEK AND ALUMNI REUNION

Applications are already coming in to the School of Agriculture Vermilion for the Farm Women's Week, from July 7th to July 10th. A very interesting and varied programme has been arranged for the Short Course and those who attend will not only have a profitable but a very enjoyable and pleasant few days at the school. A nominal fee of $1.00 per day is being charged and we are looking forward to a real enrolment this year.

No money required!

Under our Flour Exchange System you don't need money. Just bring your wheat to our elevator and take home a load of high grade flour. It costs less.

Tofield Sports Day July 1st. A Good Time Is Assured To All. Reserve The Date

School Fair Organization Complete--- Mr. Malaher Present

Mr. Malaher of the Provincial School of Agriculture at Vermilion was present at a meeting of the Tofield School Fair Society on last Wednesday evening. This meeting was called for the purpose of discussing the feasibility of a two day School Fair here in the fall of 1936.

It was held in the town hall and was under the chairmanship of Mr. J. Robinson, President of the Society. There was a good attendance, although several of the outside schools were not represented. After a few remarks upon the manner in which the fair could be handled more satisfactorily a very good discussion took place upon the matter of a two day fair. The object of a two day fair was to have the exhibits of all classes except the cattle and poultry brought in by truck or other conveyance on the first day. There would thus be no need for the parents to come in until the second day. On the second day a judge for the cattle and poultry would be present. These exhibits would be brought in and the children would attend. On the second day, also the sports, parades, recitations and singing would be carried out. This would enable everyone to see the cooking, vegetable and school-work exhibits, before they would have to be removed. Mr. Malaher gave several suggestions for the most expedient way in which to carry on this type of fair.

Those opposed to the two day fair thought that the trouble of getting the exhibits to some central place on the first day, followed by the extra time lost at a very busy time of the year was too much to expect. Following a very thorough discussion pro and con it was decided to postpone the two-day fair for this year and concentrate our efforts upon a one day fair.

To make the one day fair a more pronounced success several suggestions were advanced. It was decided to fix the hour of ten A.M. as the time for closing exhibits. There are to be no exhibits brought in later under any circumstances. While the judging is going on the sports, recitations, and singing is to be going on in different places. The times for all these events will be announced later. All entries for these events are to be registered at a certain time before the fair, to be determined by the committees of the different events. Due notice will be sent to all interested schools in sufficient time. Attention was drawn to the new changes that have been made this year in regard to the different classes. One other event was dropped for the year—the live stock. Poultry is to be kept in, but the live stock is to be dropped because of the low number of entries, the transportation problem and other reasons. The winners of the different scholarships will be announced at the school fair instead of sometime afterward.

The following committees were appointed and the chairman of each is named:

Recitations— Mr. L. McLeay, Lindbrook.

Singing — Miss McKinnon, Lakeshore.

Sports — Mr. W. P. McIntyre, Tofield.

Buildings — Mr. A. Moan, Tofield.

Decorations etc. — Mr. J. Robinson, Tofield.

Arranging of exhibits — Mr. O. P. Thomas, Tofield.

Luncheon Arrangements — Mr. Geo. Edwards and Mr. W. C. Swift.

Following is a summary of the financial statement for the year:

RECEIPTS

Balance brought forward from 1934 Fair	$ 17.15
Tofield School	50.00
Anderson School	10.00
MacKenzie School	10.00
Ketchamoot School	10.00

LOCAL AND PERSONAL

Miss Muriel Malcolm spent the week end visiting friends in Edmonton.

Mr. L. W. Smith left this week for Trochu, where he will assume the managership of the Bank of Montreal.

Mr. Mrs. Allan and Doreen arrived in Tofield last week from Bowsman River, Manitoba. Mr. Allan is taking Mr. L. W. Smith's place as manager of the Bank of Montreal here.

Miss Loret Bose visited friends in Edmonton over the week end.

Max Rogers left for California this week where he will attend the Sanford university for the summer.

Jack Beirnes, who has been taking a course in flying in Edmonton is spending some time at his home here.

Mrs. Somers, Mrs. McLaughlin and Mrs. R. Whyte of Wetaskiwin visited Tofield on Friday to attend a Eastern Star dinner.

Mr. McSporran and Mr. Letourneau motored to Edmonton on Wednesday.

Mr. and Mrs. Bert Swift and son of Fallis are visiting friends and relatives in Tofield.

Miss Margaret McCauley of the Lamont hospital is home for her holidays.

The Jolly Twelve Bridge club met at the home of Mrs. Chapman on Wednesday evening. Honors were won by Winnie Worton and Mrs. Rogers.

Mrs. Pearce of Edgerton was a visitor at the Barden home last week.

Mrs. Norman Scott visited the city last week.

Miss Beret Berild is visiting at the Bailey home here.

Miss J. Lukin of Viking is a new member of the Alexandra hotel staff.

Miss Kathie McLeod has obtained a position at St. Joseph's hospital in Edmonton.

Miss Margaret Whyte visited Mr and Mrs. R. Whyte at Wetaskiwin for a few days.

LINDBROOK

June 9th

The sympathy of the district is extended to M Jean Corbin and his daughter, Mlle J. Corbin on the death of wife and mother Madame Corbin who passed away at an Edmonton hospital last Saturday after a protracted illness. Mr. and Mrs. Corbin were amongst Lindbrook's first settlers. Interment took place at Edmonton Tuesday, June 9th.

Mr. and Mrs. Penfield and son motored down from Edmonton to visit Mr. and Mrs. A. Scott and family of this district, Mr. Penfield being a relative of Mrs. Scott's. They took Mr. and Mrs. Scott to the city same evening to witness the Commercial Grads Basketball game, both Mr. and Mrs. Scott being ardent admirers of the Grads. Mrs. Penfield is going to visit relatives in Ayr, Scotland and this is the hometown too of both Mr. and Mrs. Scott.

The weather having cleared, sheep shearing is in full swing and no doubt the sheep will appreciate the loss of their "woollies."

An extra gang composed of young fellows from the relief camp at Hope, B.C. are staying here on the siding and are working on ditching for the C.N.R. They are astounded at the amount of and the ferocity of our mosquitoes, seeming where they come from there are none. And oh, boy! don't the mosquitoes enjoy a change of diet! At least that's what the boys think.

Messrs. Tough and Bracegirdle are busy taking the Dominion census in townships 50 and 51 and expect soon to be asking questions in their sleep.

June 10th

After the recent hot dry spell, the recent showers are very much appreciated and are very valuable coming just when needed.

The district was grieved to hear of the death of Mrs. J. McGinitie Sen'r., who passed away recently. The late Mrs. McGinitie was of a loveable nature and well liked and respected by all who knew her, and the sympathy of her friends and neighbors of this district are extended to the family in the sad loss.

The junior softball team of Lindbrook played the Weslake team last week. Weslake won the game by quite a few points, still, better luck next time Lindbrook.

A dance was held at the home of Mr. and Mrs. Tucke last Friday to celebrate Mr. Tucker's birthday. A large crowd assembled to do him honor and of course enjoy themselves as well and all hope he has many more birthdays and hope all will be celebrated in the same manner for all enjoyed it thoroughly.

Divine Service was held at Lindbrook School last Sunday at 2:30

Mrs. McGinitie Esteemed Ketchamoot Resident Passes On

The funeral of Mrs. J. M. McGinitie, who passed away in Edmonton, on Thursday last, aged 57 years, was held on Saturday last, service being held at the United Church, Rev Stewart and Rev. D K Allan officiating. There were a large number of people present to pay their respects to a greatly esteemed old-timer of the district. Suitable words of comfort were given by the ministers and requested favorite hymns of the departed were sung. The floral tributes were numerous and beautiful.

Mary Elizabeth Likes was born February 14th, 1879 in Maitland, Mo. On December 10th, 1895 she was united in marriage to John M McGinitie and resided in Dixon County, Neb., until 1899. In March 1899 they came to Canada, arriving at Strathcona March 22nd.. In the fall of 1900 they came to Tofield district where they have resided since.

Mrs. McGinitie leaves to mourn her loss her loving husband, John M. McGinitie, and three sons, Maurice, Henry and Leslie. Also her father Mr. Henry N. Likes of Tyrone, Okla., three sisters, Mrs. J Thomas, Tyrone, Okla., Mrs. Homer Clark, Cashmere, Wash. and Mrs Herman Gatten, Sturgis, Ky.; four brothers, Fred Likes, Burk, S. Dak., Arthur Likes, Wayne, Neb., Grover Likes, Rock Springs, Wyoming and Jasper Likes of Jordan, Mont.

Floral Tributes

Loving husband and family; Gussie, John, Keitha and Stanley; Mary J. Warner; John, Alice, Agnew, Rose, Audrey and Donnelly; Mr and Mrs. Brown, Janet and Ethel; Dick and Ada; Mrs. Bruha and family; Mr and Mrs. J. W. Cookson; Sandy, Frank, and Bill; Mr and Mrs. Wm. Thomson, Mr and Mrs. John Thomson, Mr. and Mrs. C. D. Blake, Mr and Mrs. R. Ferguson and Mrs. M. Bradberry; Ketchamoot Ladies' Aid; Mr and Mrs Jesse McMullen and family; Jack and Vena, Bertha and Miriam, Mr and Mrs Forman, Mr. and Mrs Braaten, Mr and Mrs. A. Gill and Mrs. A. G. Smith; Friends and neighbors, Mr and Mrs Sears, Mr and Mrs J. H. Ingram, Mrs McMullen and Ethel, Mrs Henderson and Jason, Mr and Mrs. Wm Ingram, Mr and Mrs. Louis Carlisle, Mr. Wiley and Wendell, Mr. and Mrs. Nomeland, Mr. and Mrs. McClymont, Mrs. Peter Lee and Gordon, Lorne and Howard Lee, Mr and Mrs. Jim Sutton, Mr. and Mrs Nickerson, Mr and Mrs. Schultz, Mr and Mrs Coombes, Mr and Mrs. W. A. Mitchell, Mr and Mrs. Harrison, Mr and Mrs S Stirritt, Mr and Mrs E Carlisle, Mr. and Mrs. O Barnes, Mr and Mrs. Whillans, Mr and Mrs John Lee, Mr and Mrs A R Thompson, Mr and Mrs Joe Sutton, Mr. and Mrs. C. A. Ingram, Mr and Mrs Berrecloth, Mr and Mrs. H. Lawson, Mr. and Mrs R. Barnes.

p.m. The service was conducted by the Rev. A. Wallis of Tofield.

Sheep shearing has been going on in this district during the dry spell and now the lambs aren't sure just whether it is Ma or not. It smells like her, but yet doesn't look the same, still they take a chance.

CARD OF THANKS

Mrs. John McGinitie wished to thank Mr. and Mrs. A. Schultz, Mrs. C. A. Ingram, Mrs. Sears, Mr. and Mrs. Warner, Mary J. Warner, Mrs. Henderson, Mrs. Carlisle, Mrs. Mitchell, Mrs. Davison, Mrs. Wm. Lee, Ella Brown, Mrs. Younie, Ketchamoot Ladies' Aid, Mr. Buckshot, Mrs. Stirrit, Mrs. J. Appleby, Mrs. Whillans and any others whose names were not put down for their thoughtful gifts of fruit and flowers.

CARD OF THANKS

Mr. McGinitie and family wish to express their deepest appreciation of the kindnesses shown them in their recent bereavement.

AGRICULTURE THE GREAT WEALTH PRODUCER

Hon R. B. Bennett in House of Commons, May 29th, 1936:—Wheat has become of vital importance in our national economy. Why? Because you sow it in the spring and reap the new wealth in the fall. The reaping of the new wealth in the fall meant that you had available within the period of a few months vast sums of money which represented the return from an effort made only a few months before That is the distinction we must always keep in mind between the development of gold and mineral areas and the development of purely agricultural areas Agricultural areas produce the new wealth almost at once; therefore agriculture must be the basic industry of a country such as this. Mineral development will produce new wealth, but sometimes you have to wait a long time for it. Unfortunately, also, it is a wasting asset, for whenever a ton of quartz is taken out of the ground, milled and the gold taken from it, it is so much waste material; it is gone forever whereas the soil properly cared for by rotation of crops and the addition of fertilizer may continue to produce prolific crops for centuries.

"I say that the production of new wealth from mines and minerals has in the main been fraught with great uncertainty and the expenditure of vast sums of money and that the returns have very often been greatly delayed from the time the initial effort has been made What kept this country solvent for twenty-five years is the fact that in that other branch of our national endeavor we had immediate returns of new wealth from the effort made during each year. I mention this fact merely because it is desirable that while we rejoice, as we all do, that our mineral production has increased from $35,000,000 to $322,000,000 in the period from 1901 to 1935—and it is a very great progress—at the same time all one has to do is to read Mr. Vaughan's life of the late Sir William van Horne to realize that half a century ago when the first train of the Canadian Pacific reached Port Moody, no one was thinking that between the lakes and the mountains there was territory capable of producing new wealth to the extent of hundreds of millions of dollars every year. Yet for over a quarter of a century that territory was producing millions of dollars of new wealth year after year in which the effort was made. That has had the most significant influence upon our economic life of any single factor in our development, because never have so few people, as far as the ordinary history of the world is concerned, produced so much new wealth in a given time as has been produced within the last thirty years between the lakes and the mountains in this Dominion."

MARQUIS STILL KING OF WHEATS

In spite of the introduction of many new varieties of wheat, Marquis, according to a survey just completed by the Research Department of the Searle Grain Co., Ltd., not only still occupies a larger acreage in Western Canada than any other variety, but actually was seeded this spring on four times the area [illegible] up by its nearest competitor Garnet.

The [illegible] of Marquis in Western Canada, as a wheat satisfactory to both farmers and millers (a very rare combination), has been undisputed for twenty-five years. This year, therefore, can really be considered to be the Silver Jubilee of Marquis, for it was in 1911 that the variety was first used seriously by farmers of the West.

The origin of Marquis is interesting. In 1904 Dr. Charles Saunders, the first Dominion Cerealist, made a selection from a cross that had been made by his brother, Mr. A. P. Saunders, in 1892. One parent of the cross was that sound, standard, high quality wheat, Red Fife, and the other parent was an imported early ripening Indian wheat, Calcutta Red. In 1907 this new selection was grown in small plots at Indian Head, and in 1909 it was given the name of Marquis by Dr. Saunders. Distribution soon began to farmers and after 1911 was spread rapidly over most of the West. As the wheat belt was extended further north and west to the Alberta foothills, late summer frosts began to damage Marquis, and in the rust areas of Manitoba and Eastern Saskatchewan the rust scourge took its toll. To lessen this damage Durum, Reward and Ceres were recommended for use in Manitoba, and Garnet, Reward and Red Bobs, because of earlier maturity than Marquis, found favor in Western and Northern Alberta and in Northern Saskatchewan.

In recent years many have wondered how much these new varieties have reduced the use of Marquis in the West and consequently its content in our export wheat. No really accurate information upon this point, however, has been available. The Research Department of the Searle Grain Company set itself to remedy this need, and requested the Company's two thousand crop correspondents to make a wheat variety survey in their respective districts. The results, compiled and weighted for wheat acreage in each crop district, reveal the following interesting situation.

In ALBERTA Marquis occupies 49.2 per cent of the crop in wheat, Garnet 22.4 per cent, Red Bobs 19.9 per cent and Reward 6.8 per cent, with miscellaneous varieties including a very small amount of Ceres and Durum, 2.7 per cent.

In Saskatchewan Marquis occupies no less than 78.6 of the crop in wheat, Reward 9 per cent, Garnet 3.5 Durum 4.2 per cent., Ceres 3.3 per cent, miscellaneous varieties 1.9 per cent and Red Bobs .5 per cent only.

In Manitoba Durum leads with 28.9 per cent, Ceres comes second with 24 per cent, Marquis in third place with 22.1 per cent, Reward 10.8 per cent, Garnet 2 per cent, Red Bobs .5 per cent and miscellaneous varieties 1.7 per cent.

These figures indicate that there is a good substantial foundation of Marquis and Reward (which are undeniably the highest quality wheats in the world for milling and baking "strength") behind the reputation for quality now enjoyed by Canadian wheat on world's markets.

The results of the survey have been compiled not only by provinces as given in this article but as well by crop districts. The Searle Grain Company, Ltd., will gladly furnish a copy of the complete detailed results free of charge to those who desire the information.

CANADIAN NATIONAL RAILWAY TO HAVE STREAM LINED LOCOMOTIVES

The world's largest streamlined steam locomotive, and Canada's first "stream liner", Number 6400 of the Canadian National Railways, has just left the shops of Montreal Locomotive Works, the builders.

Four other locomotives of the same design are in process of completion and will leave the shops of the builders at intervals of about one week.

They will be used in fast passenger train service by the National system, operating between Montreal, Toronto and Sarnia on the route of the International Limited. Running tests will be made after the first of the new locomotives has been placed on exhibition. The builders estimate that the new engines are capable of reaching a speed of 100 miles per hour.

Canadian in design, Locomotive 6400 follows a stream lining plan developed by the National Research Council at Ottawa and officers of the Motive Power Department of the Canadian National Railways. The design was selected after exhaustive series of wind-tunnel and other tests made with models of the 6100 class of Canadian National locomotives.

Termed "partially stream-lined" in the official specifications, the new locomotive presents a striking appearance. The absence of such familiar "front-end" features as smokestack, bell, cow-catcher and coupler will immediately strike the average observer. Smokestack and bell are concealed by the stream lining and the automatic coupler when not in use disappears behind a door in the nose of the locomotive. The air pump and headlight generator are located on the front deck inside the nose to which access is provided by a side door. The whistle is installed outside of the stream-lining as required by railway operating regulations.

A stream of air drawn through a [illegible] at the top of the engine front will lift the smoke in the air as it emerges from the smokestack. This will give the engine crew clear vision and carry the smoke clear of the train.

Stream-lining extends from the nose of the locomotive above the running board to the engine cab, covering all pipes which were formerly exposed. The wheels and "running gear" are uncovered for easy access and inspection.

More than ninety feet long with tender, the locomotive and tender in working order weigh in excess of 650,000 pounds.

A new color design introduced with this class of locomotives makes them most striking in appearance. The front of the locomotive is black. Black is used also on the wheels, the rims of which are aluminum color. The apron of the running board, the cab and tender are in standard Canadian National passenger car green with gold stripes. The number of the locomotive appears in bronze on red background on the running board apron. "Canadian National Railways" trademark appears in red with gold lettering on the tender

The boilers on these locomotives are similar to those used on the 5700 Hudson type fast passenger engines but with longer barrel and combus[illegible]

Roller bearings are used on all engine truck, trailing truck and tender truck journals.

Two thermic syphons are installed in the firebox. The superheater is of the Schmidt Type E. The whistle is pneumatic operated from a valve in the engine cab and the throttle is American multiple type with compensating lever. A tangential dryer located in the dome eliminates most of the water which might be carried over in the steam. All axles and crankpins are of heat-treated carbon steel. A track sprinkler is located under the tender for use in laying dust on the road bed when travelling. The jacket of the engine, extending upward from the running board, is of planished steel, requiring no paint, but simply oiling to retain its natural bluish-grey coloring.

Observers will find a departure from the usual type of driving wheel Those on the new locomotives have "Boxpok" centres of a semi-disc type. The change was found advisable as this type of wheel will retain its "trueness" for a longer period than the spoke type of wheel. The main wheels of the locomotive are cross-counter-balanced with floating bush bearings on the main rod big ends on all side rod connections and main and intermediate driving boxes. The cab is of short vestibule type, a disc of high grade glass which revolves at high speed ensuring clear vision at all times.

PROVINCE TO START "PROFICIENCY EXAMS"

Examinations on proficiency for workers in specified trades under the terms of the qualification of tradesmen's act will be started by July 1, if the provincial government's present hopes are realized, it was stated by Hon. E. C. Manning, minister of trade and industry.

When arrangements are completed he said notification will be given to men in the trades affected.

Probably, he added, the government will recognize municipal permits and qualifications now required by some cities and towns in some trades, and in those cases will merely endorse the existing permits. Inspectors will be appointed to take charge of examinations in each trade, Mr. Manning said. All tests of electricians will be handled by one man, he exampled. Assistants will be appointed to work under each inspector's direction when necessary, he added.

TOWNS TO BE ABANDONED

VANCOUVER.— Within a month the once prosperous mining towns of Allenby and Copper Mountain, in the Similkameen district south of Princeton, B.C. will be almost completely abandoned.

Nearly all residents of these towns which boasted a joint population of some 2000 during the operating days of the Granby Consolidated Mining, Smelting and Power Co. Ltd, received notice that they would have to vacate by the end of June.

THEY DO IT FOR FUN . . . Hill-climbing contest rules are simple. Fill it up (a motorcycle) with Esso fuel and Marvelube oil. Find a hill that would make a sissy out of a mountain goat. Aim directly at it and step on the gas.

THE SCHOOL FAIR—

IT IS extremely gratifying to note the sustained interest in the Tofield district school fair, for we believe a school fair is one of the finest organization to grace an agricultural community. To be able to supply a needed product when others cannot will always ensure a certain degree of prosperity, but unless any one district is particularly fortunate, it rarely remains long in possession of a monopoly on any particular market. When competition is keen, as most often is the case, excellence of product is the only safe way to a steady market. In this respect, the school fair, by encouraging effort towards greater excellence is laying the foundation for a wider market, more prosperity and we hope, greater happiness. It is only a step from the school fair to the juior grain clubs, calf clubs and swine clubs, organizations which are also doing excellent work of perhaps a little more technical nature.

While prizes of course are a necessary stimulant to greater effort when connected with a school fair, they are not, even the winning of them are not, the most important feature connected with the event. The most important feature is the desire to learn, the acquiring of knowledge how to do things better. The youngster who is genuinely interested and who is observant is likely to get real lasting benefit from a school fair whether he or she wins a prize or not.

STATE LOTTERIES—

A few years ago when "times were bad", we approached a man to subscribe to the Mercury. To show how bad times were with him, he showed us his pocket book saying that the few dollars contained therein was all the money he had. In addition to the money there was, carefully folded an Irish sweepstake ticket. It is possible of course, to draw a moral two ways from this. One, that if the ticket had not been purchased the man would have had money to pay for the Mercury and the other that if it had been an Alberta lottery ticket the money involved would have stayed in Alberta instead of going to Ireland.

We sometimes think the people in Ireland, must by this time, be very healthy. With all the money that has gone over to Ireland from other countries in aid of hospitals they should have been able to endow enough hospitals to fix everybody up in fine shape. However, joking aside, from England, America and Canada large sums of money are continually going to the Emerald Isle, with only a portion of it ever making the return trip.

In a recent issue of an Edmonton daily, a traveller told of the State Lotteries in Queensland. There they seem to be going the limit, different kinds of draws with one almost every week. It is all expertly managed. Draws made in public with representatives of the police and press present. Machines which are impossible of manipulation by the operators are used and no doubt the state receives a nice profit above the administration costs. The danger connected with draws properly run is elastic. Undoubtedly those people who spend too large a portion of their income for lottery tickets are harming themselves, but the man or woman who takes an "occasional flyer" is not hurting himself or herself very much, either financially or otherwise, unless he or she wins, and there is no telling what suddenly acquired wealth will do. Undoubtedly the sale of lottery tickets is a lucrative source of revenue for worthy causes. Here in Alberta a serious illness necessitating hospital care often financially cripples a family. Assisted by lottery grants hospitals could give the same high grade service at fees the ordinary family could afford. A limited number of provincial lotteries a year with restrictions as to how many tickets a person could buy, combined with the discouraging of all outside lottery buying, would pep up things like nobody's business.

A CHICKEN FACTORY—

TIMES AND methods do change. Not so very long ago, chicken raising experts were telling people ample range during the growing period of chickens was necessary. Now we come to the time that from infancy onwards to old age, Biddy, the former pride of the barnyard, is confined to a wire cage. Fed a balanced ration, with cod-liver oil to take the place of sunlight, it is claimed the birds are healthier, lay better and in the end make more tender meat. Man's ingenuity to coax eggs out of a hen seems to know no limit and the method of handling them after they are laid creates admiration. The "chicken and egg factory" has been an idea with a few people for years and gradually a system has been evolved whereby any reasonably well ventilated weather tight building can be turned into a "chicken factory." The originator of the idea, a Mr. Arndt, of Trenton, New Jersey, U.S., is being copied by poultry men in numerous widely separated countries. Mr. Arndt's "chicken or egg factory, contains some 16,000 birds, each occupying its own allotted space of 18 inches square. The floor is of wire under which runs a conveyor belt, by which with the turning of a handle, all refuse is removed. A young chicken is put into the cage at about three months of age and stays there. An egg collector in each compartment permits the egg to slide to a receptacle outside the cage ready for collecting. When the hens laying days are over, due to being confined, the flesh is still suitable for roasting, something that those who, having experienced roast chicken of a distinctly rubbery texture will appreciate. Poultrymen, health authorities and government officials have all "looked into" the "egg and chicken factory" and put their O.K. upon it. How far the idea will spread is, of course, not known. Those who have studied it predict quite a future for it.

BANKER SMITH HAS GONE—

AFTER FIVE or six years service in Tofield as manager of the local branch of the Bank of Montreal, Mr. Smith left for Trochu, Alberta, on Tuesday, where he will assume a similar position. We are not so very keen on bankers as a class, they are inclined to be a lordly bunch sustained by the cream from industry. However, our experience with Mr. Smith in the bank was very limited. You see, a country printer's security is not exactly what banking practices call for and we couldn't borrow a hundred dollars from the bank if we wanted to But there are other ways of killing a cat besides choking it with butter.

So it is not so much as a banker that we will remember Mr. Smith, but rather as a real good sport. Over at the curling rink one can note the many idiosyncrasies of different people. Intensely interested in winning, they are as impatient or carefree, or courteous, as their true nature permits. As a green hand curling for Mr. Smith all of one season, we received plenty of encouragement but never a word of censure. Good shots and bad shots came to him with the same calm, alright! alright!!

Mr. Smith was always willing to do his share in any community enterprise, being connected with tennis and curling clubs, church, lodge, board of trade, the latter of which he has been president since its commencement.

Bank managers in the course of time, come and go and it can truthfully be said that the going of Mr. Smith will not be without some regret on the part of residents here. A good fellow, a good sport, and we imagine the inspectors would say a good manager, he carries with him the best wishes for happiness in his new location.

Mr. Smith was well supported in the numerous social activities by Mrs. Smith, who we understand, will not be leaving Tofield until the end of the month.

MYSTERY AND TRAGEDY OF WILD MIGRAT

By William MacMillan in Forest and Outdoors

WHILE THE uninitiated is likely to hotly deny it, the bald fact remains that migrants of every kind, birds and beasts are virtually facing extinction at the hands of man.

The fate of the migranti is in jeopardy. And there may come a time sooner even than the most pessimistic expect when the heavens—and the earth—will be empty of hurrying peoples and one of life's most amazing phenomena will be a thing of the past.

Man's ingenuity, admirable from many points of view, sometimes works havoc and destruction in the ranges of nature's children. Who would have dreamed, for instance, that the invention of the marine oil-burning engine would be followed by appalling loss of life amongst unsuspecting wildfowl coming to rest on oil-soaked waters? Spreading townships, back-to-the-land movements, lighthouses and lightships, the draining of swamps, and the reclaiming of seemingly useless acreage, all help to bewilder the flight-weary traveller.

The carnage is at its height. Right at this minute while these lines are being written, many spring migrants, wing-muscles weary from sustained flight, are frantically searching for some haven of rest not ringed about by man-made obstacles where they can breed and raise their young.

He has his sympathizers, of course, men and women tilting potent lances on his behalf. But here and there about them, even in lands we know of, are many more thousands who laugh at laws and the people who frame them and take particular delight in blasting the wild creatures from the face of the earth.

Pot hunting has done more to ruin whole species than any other single factor. And from certain angles the past record of the North American continent, guardian of a sacred trust, isn't anything to be proud of.

In the far south and extreme north, where space and solitude reigns supreme, the feathered migrant may continue to enjoy a certain degree of safety and isolation. But the moment he quits these havens conditions become intollerable. There no longer seems to be any place for him in the scheme of things and seemingly insurmountable handicaps meet him on every side.

There are no half way measures with a migrant, no dilly dallying. When the urge to go places is upon him he can no more fight against it than turn day into night. If a mountain range throws its shadow across his line of flight he will cross it or die in the attempt. If a sea separates him from his beckoning land, he will take it in his flight or perish.

This fatal courage isn't confined to any single species either. There seems to be a fatalism common to all. Even butterflies, for instance, most futile of migrants, will wing their way out over the open sea in a grand gesture, completely ignoring the urge that is driving them to almost certain destruction.

What is this urge, this burning thirst for faraway places that siezes whole species in the mass and not only robs them of rest, but gives them seemingly miraculous power to annihilate space and distance?

Years and years ago scientists, and others not quite so scientific, were confident they had figured it all out. Great masses of data were collected, and pigeon holed. Migration, to the few at any rate, is no longer a mystery.

Some truths were discovered then; the routes taken by different birds, for instance, how they fed, and, rather more vaguely, why some elected to fly at night and others in daylight hours.

Maybe we were just a bit too inquisitive! At any rate, we still don't know whether the real home of the wildfowl is in the north or south.

In spite of the numerous weighty opinions solemnly handed down through the years we are still in the dark as to the fundamental causes of this thing called migration. Of one thing we can be sure, however, and that is that the North American continent offers the feathered flyers of the world a sort of ne plus ultra summer home.

That these wild things can distinguish between cold and warmth, snow and sun, goes without saying. And the instincts that warn them that the north teems with things good to eat also tells them of deadly winter, when snow and cold seal fast all board and lodging.

Not all species of migrants agree on what constitute safety, however. While some birds, and a few animals too, move only a few miles from their summer or winter home, others cross continents and mountain ranges in a blind effort to conquer space and eventually reach the promised land.

When migrants strike out for faraway ports o'call, tragedy stalks close behind. In far off Scandinavia, that land of frozen leagues and strange legends of migrations, the movements of the lemming—a tiny mouse-like animal—is at once the most amazing, and tragic, of all wild life phenomena.

For years and years the velvet-footed creatures are content with their swampy surroundings. As their numbers increase, however, hundreds multiply into thousands, and thousands into millions. The magic of migration envelopes them and they strike out for unknown places, a mighty host of suicides.

Now that they are filled, blinded indeed, with the lust for travel everything is changed. No longer susceptible to the temptations of the flesh, they press on and on, fording rivers and swamps and climbing mountains till swallowed up by the sea.

FOUR FROM FIVE LEAVES NOTHING—

Doubtless Dr. Allan Dafoe deserves the fame which has accrued to him through his successful treatment of the Dionne quintuplets.- Film producers are not to be unduly censured if they esteem it profitable to invest hundreds of thousands of dollars in the future earning capacity of the five overpublicized infants.

Is there not, however, a question of values here, the kind of question which breeds skepticism in the intelligent young? A current news item refers to "the thousands of people who made unselfish offers of help to the babies in the early days." Those "unselfish offers" indicate a laudable condition of human sympathy. They also indicate the disproportionate generosity of an emotional mob.

Five infants receive wealth such as their parents never dreamed of possessing, simply as a reward for being born. "Neither the babies nor the rest of the Dionne family need worry about their normal requirements for the rest of their lives," announces the Ontario Minister of Welfare. Whether that is fundamentally beneficial remains to be proved. Everyone will agree that it is good to feel financially secure. No need to be apprehensive about the supply of the quintuplets.

Yet—there's a brave little youngster at the corner of Main Street, a lad of twelve, who trudged about in a pair of sneakers in the middle of winter, running errands and shovelling snow after school hours, who would like to go to college some day, but probably won't be able to finish high school. A child with an intellect, his teachers say, a child who should have an opportunity. His mother is a widow and he has two younger sisters.

There's another child on Main Street—a girl of seven, delicate featured, with a far too solemn expression in her gray eyes. Her parents are educated, but they are "on relief," and it's very cold when there's no fuel to light the kitchen stove. The last time it was lighted the mother made all the flour they had into doughnuts, which the little girl hawked around the neighborhood.

Sometimes the little boy and the little girl wonder why no "unselfish offers" from a sentimental public come showering down on them. It was a mistake to come singly. They should have come in fives.—The Christian Science Monitor.

KETCHAMOOT

Ketchamoot annual picnic will be held on Wednesday, July 8th, on the picnic grounds at the Sears' home. Chicken dinner and supper will be served by the Ladies' Aid, also hot dogs, booth on the grounds. The usual sports of baseball, softball, races etc. will entertain the crowd. Please keep this date and come and spend the day with us, everybody welcome. Sports committees: ball-games, Russell Schultz and Charley Sears; softball, Herb McGinitie; races, John Lee, ground committee, Martin Lawson, Roy Williams and Jimmie Ingram.

Miss Hazel Sears entertained the Social Hour Club at her home Thursday afternoon of last week. Miss Janet Brown will take the July meeting.

Lorne Lee spent the week end at the home of his parents in Edmonton.

Mr. and Mrs. C. Coombes and children and mother, Mrs. McMullen, visited with relatives near Bawlf Sunday of last week.

The boys of the neighborhood called a meeting at the Sears home on Thursday of last week. Russel Schultz was put in as manager, Albert Sears, captain; Stanley Sears, secretary. The first game was played at Lakeshore on Sunday with a score 11—14. Saturday [illegible] was spent working on the ball diamond.

Master Gordon Ray who lives with his grandmother, Mrs. Peter Lee is quite ill, complications from the measles.

Mr. and Mrs. William Lee of Edmonton spent Monday and Tuesday visiting friends and relatives in our district.

Miss Gertie Ingram entertained a number of friends and relatives on Sunday June 7, in honor of her birthday.

Mrs. Berreclough and children of Bardo spent a week end at the home of Mrs. Berreclough's parents Mr. and Mrs. Carlisle.

Mrs. Geo. Lawson entertained the Ladies' Aid at her home on June 3rd. Nine members and twelve visitors were present. A pleasant afternoon was spent.

Our community was shocked on Thursday of last week when word was received of the death of Mrs. John McGinitie and Mr. Ratigan, both on the same day and both residing on the same farm, though Mrs. McGinitie's death took place in an Edmonton hospital. We will leave it too the families to give a full detail of their lives and funerals, but would like to add a few words of our own.

Mr. Ratigan had only lived a few years in our district and there practically an invalid but a few of us had the pleasure of knowing him some thirty years and found him a fine old man having reached the ripe age of 85 or more. His wife passed away when the family was small, he kept them together and raised them all to manhood and womanhood. He was a good christian man of the Catholic faith and was highly respected by all.

Mrs. McGinitie was beloved by us all and one of the real props of Ketchamoot and will be greatly missed not only by her own family but all the neighbors. Never too busy to do a christian act and willing to help in any good cause. Her home from the time she lived in a log house to her modern comfortable home, she was the spirit of hospitality. Owing to failing in health, her name was not on the Ladies' Aid roll the last few years, but she took her turn in having the meeting and did her share as well as the members. She will surely hear the words "Well done good and faithful servant, enter into the joys of thy Lord." We wish to extend to both families our sincere sympathy.

THE GNAT

(Contributed by Buzz)

As this noisome insect buzzed around from place to place, until the last few days, all that one could hear was taxes, taxes, taxes, but now the tune has changed to Prosperity Bonds, and being of a simple mind I cannot but wonder what the difference or similarity is between the two.

When these bonds reach the channels of trade, taken by a merchant in trade, in any quantity they must be passed on for the purchase of goods, but as only a small part of the consumer goods are produced entirely in Alberta the large part must be changed for National money from the government; and apart from the taxes paid on the same in the meantime less the cost of administration, and will have achieved nothing. The government may have as well borrowed the National money in the first place.

If the Government refuses or cannot obtain National legal tender money, the bonds will be offered for a consideration to those who can get the most out of them. It will be impossible to hold them until maturity as they will pay a tax by that time of one-hundred-four per cent. To those who were in debt to the government they would have a value; one would be foolish to pay their taxes in legal tender if they could get their bonds for less than par, presuming naturally that they would be accepted at face value in payment of provincial taxes.

And thus the Prosperity Bonds, known the world over as taxed script would not be a tax but a compulsory method of collecting taxes.

[illegible]

If you want to save on gasoline, don't tramp on the accelerator. This is one of the rules worked out by a Pontiac engineer, who says modern cars make use of twice as much energy contained in gasolene as did the cars of 20 years ago. But, since it is up to the motorist to do the few things that will enable him to take advantage of modern engineering, the Pontiac man suggests—Accelerating gently; holding the car in second only until moderate speed is reached; coasting to a gradual stop instead of jamming on the brakes; proper tire inflation; shutting off instead of idling long periods; cleaning spark plugs; keeping car lubricated; properly filled radiator; setting intake manifold heater control for proper season; and finally, tuning motor regularly.

Will all those who have library books return them by June 27th. The library will be closed from June 27, to September 15th.

KETCHAMOOT

We are sorry we omitted Mrs. Geo. Lawson and Martin's name on the floral offerings for the late Mrs. John McGinitie.

The regular monthly meeting of the Ladies' Aid will be held on Friday July 3rd, instead of the regular time on Wednesday at the home of Mrs. W. A. Mitchell. A cordial invitation is extended to all.

The Tofield second baseball team and Ketchamoot played on Ketchamoot diamond on Sunday. Quite a crowd of spectators watched the game. We are not quite sure of the score, at the end of the seventh inning it was 1-2 and at the ninth 2-3 in favor of Ketchamoot.

Miss Cathrine Johanson of Bardo is assisting Mrs. C. A. Ingram with her home work.

Mrs. G. R. Owen, Mrs. Sears and Miss Kathleen Ingram motored to Holden Sunday for a visit at the Perry Owen home. They also attended a picnic at Brosa.

Mr. and Mrs. D. H. Mitchell, Mrs. Younie, Miss Helen Saisbury of Edmonton, Mrs. Henderson and Jason, Mr. and Mrs. Schultz were Sunday visitors at the W. A. Mitchell home.

Mr. Fred Williams was census taking in our district the first of the week.

Mr. John McGinitie and son Henry expect to start for Fresno, California on Wednesday. They will motor through and will be gone a month. Mr. McGinitie's sister, Mrs. Greta, will accompany them and make her home there.

Mr. J. H. Ingram and Miss Kathleen accompanied Mr. Carlisle to Edmonton Tuesday in his new truck.

A dance will be held in the curling rink on Sports night. This is in addition to the one being held at Ryley, and is being put on by the committee for the benefit of those unable to make the journey to Ryley.

LAKESHORE

Miss Helen Schultz of Edmonton is visiting at the home of her aunt, Mrs. McConnell.

Mr. and Mrs. T. R. Murray has as their home guests recently, Mr. and Mrs. J. H. Cook of Scotia, Nebraska. Mr. Cook is a cousin of Mrs. Murray's and the two had not met since Mrs. Murray was a small child. Mr. and Mrs. Cook were on an extended trip through the Western [illegible]

Miss Grace McKinnon spent the week end in Edmonton.

A party of young people from this district picnicked at Elk Island Park on Sunday. Miss Ethel Graham, a member of the party sustained a nasty fall which dislocated her knee. This unfortunate accident somewhat marred the pleasure of the occasion. In the meantime she is progressing as well as can be expected.

The Ladies' Aid met at the home of Mrs. Francis on Friday afternoon of last week.

The bridge battlers met at the Phillips home on Tuesday afternoon. The census taker also called, took one look and beat it. We don't know whether in his haste he dropped the parcel of bad luck which Mrs. Graham and Mrs. Phillips had or not. If so its going to take a lot of bridge score pads to square himself. However his courtesy in arranging to call some other time was much appreciated. Games have been few and far between the past two or three months since farm women find their time more than filled with the extra work of gardening and poultry raising at this season of the year, and an afternoon of recreation of any kind means quite a lot. Thanks Mr. McCauley. You will have gathered that Mrs. Wood and Mrs. Johnston won again. Privately we think it is the mascot Mrs. Wood acquired some time. She calls him Johnnie.

FOUND—One black and white cow, horns curved in. TB test mark on ear. Found west of Lindbrook. Apply to Tofield Detachment of R. C. M. P.

Welcome to Tofield--Wedneaday Next

EVERYTHING DEPENDS ON WEATHER MAN—ARRANGEMENTS ALMOST COMPLETED

Plans are practically complete for one of the best celebration days in the history of Tofield. Sports of all kinds are on the programme and from morning until night the committees plan to have something doing every minute.

The day will open up with a junior baseball game when Joe Wiltzen's hopefuls will try conclusions with another junior team. Coming right after will be a senior game, T. McBratney and R. S. Burke, the baseball committee, having been busy and procurred promises from six different teams to compete, and with six entries for the prize money, there should be some pretty good ball played during the day. Teams competing will be Chipman, Dodds, Holden, Ross Creek, Ryley and Tofield.

Ladies' softball, an increasing popular attraction at annual celebrations has been well looked after by L. A. Broughton and W. Bailey. Four teams have entered and there will be plenty of smart play and fun before the last ball is thrown. Amisk Creek, Holden, Ryley and Tofield will be represented by softball teams and one would have to be a good guesser to pick the winners before the games are played.

Devotees of barnyard golf, horseshoe pitching, will have an opportunity to test their skill. F. McHeffey and W. Billman are on this committee, both put on without their consent. But it's like this, if anyone should know his horse shoes, it's Fred McHeffey, and W. Billman is no novice either. Somebody once told us it is not so important what a man in his every day labors did, as it was what he knew, and we imagine that's why Messrs. McHeffey and Billman were placed on this committee.

Foot races for all, will be a feature of the day, W. Bailey and Les Glover being in charge of this department. They will have a list of races to suit all ages and sure enough there are going to be some happy youngsters.

The large firms that make the succulent weinies by the millions prefer to have them called "Red Hots" instead of "Hot Dogs", but whether they are called by one name or another, we have in Mr. Bellamy and Mr. Gravelle, the best two sandwich salesmen in Alberta. No doubt about it. They like to sell, and what's more, they make it a pleasure to buy.

The big refreshment booth will be in the hands of the Tofield W.A. (Anglican). There will be all kinds of refreshments available, including the old stand-bys, ice cream and pop. The ladies, assisted by the men folk will be on their toes to give service, so all you have to do is line up and call out your wants.

Basketball is on the cards too. Frank Dunn is the chief director of this sport and arrangements are under way whereby three teams will enter. A team from Lamont is expected and Lakeshore's snappy bunch of basketballer's will be in and with the local team in the running at least two good games are expected.

The dance at night will be "a big affair." Taken to Ryley due to temporary lack of accommodation here, there will be ample room to accommodate a large crowd. Ray Coatts, W. Taylor, W. B. Worton, R. S. Burke, B. Kendall, A. Dodds, and A. B. Clutterham are on the committee,, with Ray Coatts as convenor. Rather a big committee, but they are workers.

Tom Wallington is on the grounds committee with power to add. Tom is Tofield's chief landscape decorator. In the winter he plays the part of Santa Claus and decorates the town with Christmas evergreens, while in summer he waves a fairy wand to turn main street into a forest glade.

It all depends on the weather man. With real July 1st weather, visitors from near and afar will be here and will have a good time. We'll be seein' yuh!

LOCAL AND PERSONAL

The Rev. W. J. Bell, Holden will occupy the pulpit of the United Church on Sunday evening, 28th of June, 7.30 p.m. Mr. Broughton will sing.

Miss Edna Campbell of Edmonton spent the week end visiting at the McCaulay home.

Mr. Matchmess and Bill Worton motored to Vegreville on Sunday.

A number of Tofielders attended the Holden Sports held on Tuesday of this week.

Anne Swift and Arnold motored to Wetaskiwin on Tuesday of this week.

Miss M. Redig visited the city for the week end.

Mr. Geo. McLaughlin was a Tofield visitor one day this week.

Frank Wood visited Tofield for a few days.

Miss Pat Walker of Edmonton spent the week end visiting with Muriel Malcolm.

Miss Viola Lee visited the city last week.

Mrs. W. Pollard of Namao is visiting at the Allen Herndon home here.

Mr. Geo. Brace returned this week from Prince Edward Island, where he has been visiting his parents.

Mrs. Jacobs, Esther, Mr. and Mrs. Letourneau and Mr. McSporran motored to Edmonton on Wednesday.

Lee Burnett, Bill Worton and Mr. Matchmess motored to Edmonton on Wednesday evening.

Professor Ottewell of the University of Alberta attended a meeting in the Tofield Masonic hall on Wednesday of this week.

WHEAT, BUTTER AND HOGS SOAR IN PRICE AS U. S. PLANS HUGE DROUTH RELIEF AID

CHICAGO, June 24 – Farmers in the arid areas of the western United States, watching farm commodity prices rise while crop prospects waned, faced continuation of hot, dry weather Wednesday.

Deeply [illegible] over the spread of the drouth they received more bad news from meteorologists. Generally fair and warmer conditions were forecast. Showers were regarded as probable only in the northern plains section.

Market authorities cited the prevailing heat and lack of rain as the major factor in the advance of agricultural products to points at or near seasonal price peaks.

July wheat at Chicago passed the 95-cent mark Tuesday. A year ago the quotation was approximately 79 cents; a week ago 87 cents. November butter was at the 31-cent level Tuesday compared to 29 a week ago and 27 a year back.

The top of hogs Tuesday was $10.10 up 25 cents in seven days and 75 cents in a year. Number one red wheat, a grade superior to the usual market variety and from a new Indiana crop shipment, sold for $1.04 here Tuesday.

The federal government stepped into the emergency. Senator Bulow of South Dakota said President Roosevelt and WPA administrator Harry Hopkins had approved a program of WPA employment, livestock, loans and direct relief for farmers whose crops had failed in the northwest. The cost was estimated between $50,000,000 and $100,000,000.

BASEBALL

The Tofield Senior team attended the Holden Sports Day Celebration entering the baseball tournament there. Playing heads-up ball they defeated Ryley in their first game and Holden in their second game, thus winning first money. Detailed reports of the games are lacking. The team is holding its own in the league and are playing Holden at Tofield Friday night.

The girls' soft ball team also attended the Holden sports, playing in the softball tournament. They also played at Kingman sports on Saturday, losing to Kingman by a small margin.

Hurrah For Sweden

A valued subscriber came in the other day and paid, with a smile, quite a few years back subscription. He said, "I didn't make this money farming, it came from Sweden." So we say, Hurrah for Sweden. Strangely enough a former American and a former German also within a few days came in and paid up several back years, so we give a cheer for America and Germany, too. We were thus encouraged to send out subscription notices and hope that we will be kept busy cheering for almost every country in the world, with a special salvo for Canada.

EDMONTON EXHIBITION OFFERING OUTSTANDING ATTRACTIONS FOR FAIR WEEK

With the date of the Edmonton Exhibition drawing near—week of July 13 to 18th—the management are happy to announce the finest bill of attractions ever presented for the enjoyment of Edmonton Fair visitors. For the first time in many years the Railways are offering single-fare-return, good for the entire week of the Edmonton Exhibition and bus lines are also offering re-[illegible]. The usually large volume of show entries and capacity demand for show space in the Manufacturers Building foretell outstanding success for the 1936 show. The citizens of Edmonton, merchants and the Exhibition management are co-operating in their preparations to entertain a record crowd of visitors during fair week.

Firmly established as was Western Canada's premier Livestock and Agricultural Show, the Edmonton Exhibition has also built up an enviable record for the high class character and splendid variety in the entertainment features secured for Northern Alberta's Big Annual holiday and carnival of fun.

An event of much interest to many readers will be the Grand Rally of the Canadian Legion B E S L in Edmonton Fair week, and Friday, July 17 has been set aside as Legion Day with a gorgeous display of fireworks at night. For the evening show in front of the grandstand, Ernie Young, who has probably produced more outdoor shows than any other man on the continent, has built a magnificent show which he calls "The Passing Parade" and which will present to fair visitors the most unique and spectacular entertainment ever seen in an outdoor presentation. Good music—splendid singing—the best dancers in the show business, including the only team of one legged dancers on earth—side splitting comedy.

The Royal American Shows will provide outstanding midway and carnival attractions, new rides and devices—dazzling electrical effects—fun that makes everybody young again. Running horse Races every afternoon—House of magic—mammoth street parade of beautifully decorated floats—Grand Livestock Review—Horseshoe Pitching Tournament under Dominion association rules—Basketball tournament—Old Timers' receptions — Radio Show—a hundred and one things to interest you at the Edmonton Exhibition that you never saw before. Don't miss the Fair this year.

Readers will be pleased to note that advance tickets for the Edmonton Exhibition are again being offered at the cut rate of 6 for one dollar—on sale now at all points in northern Alberta by authorized agents, or you may mail your dollar direct to the Edmonton Exhibition and your tickets will be mailed to you. Plan to holiday in Edmonton Fair week, July 13 to 18. Get your admission tickets now and save that $1.50. For all information about accommodation write to the Edmonton Exhibition Association, Arena Edmonton.

FORTY-NINTH BATTALION CHURCH PARADE

The Forty-ninth Battalion (The Edmonton Regiment) Association will hold its Annual Church Parade on Sunday, July 19th next.

The parade will fall in on the Market Square, Edmonton at 10:30 a.m. and will march from the Market Square to Parliament Hill grounds where the service will take place. Following the service, a luncheon will be held in the Rose Room of the King Edward Hotel at which special rates have been secured for the members, their wives and children.

The Edmonton Regiment will supply brass and pipe bands, Color Party with the colours and an escort.

The 19th of July is the Sunday immediately following the close of the Edmonton Exhibition and it is felt that many members of the Old Battalion, who have visited the Exhibition, will remain over for the Parade.

SPEED KING'S WARNING

The modern competent driver is not "anxious to see how fast he can go," but he is interested in knowing "how fast he can stop."

That is the moral of arguments advanced by Barney Oldfield, who never seemed to worry much about how close he came to death in his younger days of automobile racing. Now he is an apostle of safe driving.

Mr. Oldfield is entirely consistent too. There were no pedestrians, grade crossings, or blind curves on the tracks on which he used to make his records. He and other speed demons felt that if they wanted to risk their lives without endangering the lives of others, that was their individual right.

But dangerous driving on streets and highways is something entirely different.

Making an educational safety tour of the country, Mr. Oldfield suggests that the speedometer on a car be used as a "stopmeter."

By the coincidence of numbers, the needle indicating speeds of between 30 and 50 miles an hour also indicates generally the distances required for stopping one's car.

"When the needle points to 50, think of 55 feet," says Mr. Oldfield. "That's how far the car will travel after the driver decides to stop, before his foot will touch the brake pedal. To find out how much room you need for stopping after beginning to apply brakes, multiply this reaction distance by three. Fifty miles an hour, three times fifty-five, or 165 feet. Only when the road is clear for more than 165 feet and there is no possibility that traffic will enter your path from the side roads, can 50 miles an hour be considered safe."

"As the driving speeds increase beyond 50 miles and hour, our easy formula will no longer hold true," he says. At slower speeds of 30 and 20 miles an hour, it provides a necessary margin of safety where the driver needs it most—in city streets. There is many a place where 20 miles an hour is dangerous unless there is extra stopping room.

M.D. OF BEAVER LAKE COUNCIL MEET

The monthly meeting of the M.D. of Beaver Lake Council was held at Ryley on June 13th, 1936.

All councillors were present and the minutes of the previous meeting were read and adopted.

A donation of $25.00 was granted the Salvation Army.

Increase in the old age pensions was granted John Wills and W. Hawke.

Pension was authorized for Mrs. Ella Stewart, Nick Fedolin and Anton Probrowski.

Mother's allowances for Mrs. Julia Logen and Mrs. Pearl Stadynk were reduced to $15.00 per month.

Relief was authorized for E. Atamanchuk at $5.00 per month.

The Secretary and Reeve were empowered to borrow $1000.00 for municipal account.

The next meeting date was set as July 18th, 1936, at 2 p.m.

The following weed inspectors were appointed: J. R. Coates, A. E. Wilson, A. F. Bigland, Nick Komarnicki, J. J. Korpan and Jas. A. Stewart.

The secretary was instructed to place a blanket seizure on all parcels within the M.D. where seed grain, fuel, or relief were owing, and to advise the public that a tax sale would be held in the fall of 1936.

CHEVROLET HITS THE TRAIL

Rough riding cowpunchers have swung over mountain trails, through treacherous passes and along mud-churned prairies on the backs of snorting pintos. Mr. H. Clements of Nelson, B.C., has done the same thing but in a Chevrolet Six which he purchased in 1929 from Pincher Creek Motors, Pincher Creek, Alberta. He states that he has driven his car 58,000 miles under all conditions winter and summer, and never had the engine down for repair, excepting a valve grind every 15,000 miles. In Mr. Clements' own words he has driven his car 5

"over mountain trails, through the Crow's Nest Pass and Vancouver and Seattle; also over heavy mud roads on the prairie and bucking snow in the Winter". Prior to purchasing Chevrolet, he says he had driven other makes of cars for 25,000 miles but "the Chev. Six has been the most satisfactory." Referring to all-night trips between Lethbridge and Nelson at an average speed of 35 to 40 miles an hour, Mr. Clements intimates that he averaged 21 miles to the gallon "with practically no oil."

CANADIAN POULTRY on BRITISH MARKET

Under the heading "Canadian Turkeys and Chickens," the Fish Trades Gazette (London, England) of May 9, 1936, says, with reference to the arrival of a shipment that week, Canadian turkeys are showing up perhaps rather late in the season, although ever since the Christmas trade there have been here and there large turkeys that could be bought if asked for. This week, however, a shipment has arrived which contains several cases of hens weighing from 6 lb. to 8 lb. and 10 lb. There should be no difficulty in disposing of these birds as they are of a size that any shopkeeper could use. They are eminently suitable for the family trade, whereas the larger ones, which weigh from 16 lb. to 18 lb. can only be used at this time of the year by hotels, or for the shipping trade. Canadian chickens too are more plentiful now than they were a few months ago.

Why these shipments should have been held up for so long is difficult to understand. There are a good many chickens on the market just now, but at prices that will suit the pocket of a good many tradesmen who can use a frozen chicken. One item in favor of the Canadian chicken is the quality, although most of what I have seen are grade B selected. They are young and a very good color. Here and there a box will be found not quite up to the standard, but taking the pack as a whole they are very good. Now, with regard to the future of the Canadian chicken, there is and always will be a good trade in this country, providing that the merchants in Canada can produce a bird that can be sold cheaper than English and at a season when the English chickens are scarce, or not plentiful. The general opinion is that February, March and April are the best months for cold storage birds, and there is no reason why Canadian chickens should not take the place of all other imported birds.

Firestone Tires Lead in Performance Records

Performance is the best proof of tire value. For seventeen years at the Indianapolis Speedway, at Pike's Peak and Lake Bonneville, Firestone Tires on the winning cars have *proved* themselves the safest and most enduring. Equip with the tires that Champions use — see your Firestone Dealer today.

SMALL TOWN SPORT—

THE COMING of sports day brings to attention the part played by organized sport in the average Western small town. Baseball, hockey, football and to some extent, lacrosse, all are "part of life". Just how important a part and what repercussions or reactions arise from small town sport, marks the standard of wisdom and skill of those directly connected with it, the true sportsmanship displayed by those participating in it, and the ability to properly appraise sport effort by the residents.

Essentially sport is the field of the younger element, particularly as it applies to actual playing. Nevertheless, there is, within its realm, a place for older and more mature judgement, judgement based on experience and just natural common sense. Of necessity highly competitive, with the desire to win especially keen, there is a standing invitation, to those prone to do so, to "beat the rules", and thus score an advantage. The desire to win in some cases become so paramount that the true "reason" of or "case" for sport is lost sight of. In any line of competitive sport the game is of greatest importance. Obviously in any game between two competing teams, one wins and the other loses, but while the fruits of victory are sweet and the dregs of defeat bitter, any single encounter is only of a transitory nature, a passing event, the inequalities of which time will inevitably smooth over. But the game itself is permanent, every year sport participants are coming up from the public schools and every year older participants who have seen their day in sport, are dropping out. Viewed in this light there is quite a responsibility resting upon present day participants, to maintain a high standard of skill and sportsmanship.

To the average small town a properly organized sport group is a valuable assett. It is one thing among others that focusses interest upon the trading centre of a community. A perpetual winning team is not the best attraction either, but a team holding its sport standard high, with a fair mixture of wins and losses, is the better organization for the small town. It is possible for a team to be so good as to outgrow a small town. Right at Tofield there is room for active support on the part of citizens in general, towards their sport organizations. Not the fervid win at any price support, but the rightful encouragement to which any home team is entitled to. Business men should realize that it is "good business" to have sport teams clicking properly and if it is "good business", it is worthy of attention.

On Wednesday, July 1st, the weather being fine, sporting aggregations of different places will assemble at Tofield and compete one with the other for honors. Tofield has been favored with happy throngs in years immediately past and this is an invitation to all and sundry to celebrate Dominion day here.

BE CAREFUL—

WITH THE coming of the hot summer months the usual visits to the lakes and streams will be made with the usual bathing and swimming activities. Each year there is a long list of river and lake fatalities and already this season quite a number have been reported. Whereever there is an element of risk the occasional accident will happen, but a full and proper understanding of the risks involved will tend to lessen the frequency of accidents. So many different circumstances surround bathing in lake and stream, that of necessity the bather is thrown upon his own resources as regards judgement. There is little a non-technical writer can say, except perhaps, be careful. The well known admonitions regarding bathing and swimming should be remembered. It is not wise to go in swimming alone; or immediately after eating; and for those who are not strong swimmers, it is wise to keep within one's depth. One of the most greatly missed things in the Western small town is a swimming pool for the youngsters. In the cities of course this problem is solved, but the small town boy is, if he swims at all, forced to go to any nearby creek or lake, swimming mostly unsupervised and running risks unknown in city pools. The surprising feature is that he gets along as well as he does, but perhaps ingenuity, born of necessity, stands him in good stead. Anyway parents and guardians would do well to give a word of warning now and then, it can do no harm and may do much good.

PROSPERITY BONDS AGAIN—

The battle of words concerning prosperity bonds goes merrily on. Those connected with the government insist that the bonds will work and serve a useful purpose, while many unconnected with the government are equally insistent that they will not. We do not propose to pass any opinion. If bonds come our way, we will find out quickly enough if they will work. We can spend up to our limit to supply. In fact our trouble has been to hold down our spending to what we receive. It will be no trouble at all to us to spend money. Therefore we stand ready to welcome the issue. A real test of the efficiency of script will get the argument out of Alberta's system. If conditions are improved and the unemployed put to gainful occupation and the issue is a success, all well and good, if the issue of script creates the confusion and loss to the business man predicted for it, the argument will be ended.

CANADA'S "NEW DEAL" MEET ADVERSE COURT FINDINGS—

LIKE THE Supreme Court of the United States which [illegible] some of the features of the Roosevelt New Deal unconstitutional, the Supreme Court of Canada has put a crimp into the Conservative grand gesture during its last few months of office. Of eight acts passed by the Bennett government during 1934 and 1935, only two were entirely approved, on three the six presiding judges split even, three for and three against, and three were completely turned down. The one that perhaps the West is most interested in, the Farmers' Creditors Arrangement Act, was upheld, which in effect means that farmers' affairs that have been settled by the Alberta Board of Review working under this act, stay settled. It is difficult to imagine any other decision, because were it not upheld, the numerous settlements already made would be, if not actually invalid, certainly open to doubt, and except as the different parties voluntarily continued the agreements there would be nothing to make the agreements binding. Therefore those farmers who by force of circumstances beyond their control became involved in financial difficulties may still obtain a hearing at one of the numerous sittings of the Alberta Board of Review. Farmers in general will be pleased at the decision of the Supreme Court on this one Act.

THIS BUSINESS OF TAP DANCING—

WHETHER CIRCUMSTANCES permit one to attend the theatre or not, even in the home one may and does, from time to time, hear from the radio the rhythmical clickety-clack, tap-tap, of the tap dancer. Viewed by many at one time as a fad, it has blossomed into a phase of popularity that at present shows no sign of lessening. And with tap dancing goes other forms of dancing, parlor, ball room, etc.

Down in New York in 1933 there was established by the University of the State of New York, what is known as the New School of Dance, Music and Drama and since its establishment it has registered over 14,000 students. It was started as a part of adult education, but to a large extent developed into an avenue where those of talent and a desire for self expression could be trained and steered into an avenue of lucrative occupation. But the New York institution is but one of many. In different parts of the United States, even to some extent at our own University of Alberta, attention has been given to music, art drama and dancing, so that those other than actual university students may obtain expert instruction regarding these things. Those that read of the theatre, even in a fragmentary manner will have read of the dancing grace of Fred Astaire and Ginger Rogers. And while no doubt all those who attempt to climb the ladder of fame by the dancing route will not crash the gates of Hollywood, still the avenue opened up by the popularity of the step dance will be a way to success for many of those seeking an [illegible] for their energy and talents and having in the [illegible] 30's found the doors of commerce closed to them. The following which is taken from the Magazine section of the Christian Science Monitor is one example, there are others, but space prohibits [illegible]ing, and no doubt there are hundreds that the magazine could not record.

> "Margot slipped in one day. She was sitting in a chair in his office, staring at him before Mr. Perce R. Benton, the executive director, even noticed her. She moved that way—lightly, quickly, with an effortless grace, and in a moment you will understand why.
>
> Mr. Benton couldn't account for the distraught, almost haunted look in her fine eyes.
>
> "I want to learn to dance," she said, abruptly. "My father says I have to be a stenographer. I can't, but my father doesn't understand why."
>
> Margot's race is one which makes a household god of the obedience of children. She and her father were as far apart as the poles. He seemed hard to get at. Mr. Benton drew the girl out, found that it wasn't that she was stubborn and just wanted her own way, but that she just couldn't, literally couldn't be a stenographer. "I've had three jobs. I lost them all. They were right to fire me. I am not a good stenographer. I never shall be. It isn't in me. I want to dance."
>
> Mr. Benton asked her if she thought her father would come in to see him. "He might."
>
> He did. Mr. Benton has been 25 years in the theatre. He is a very civilized man able to look into the hearts of the young and understand. Able to look into the hearts of older people, too, and see that, often, they do not understand because they can't, although they would like to.
>
> Margot's father couldn't see why Margot wanted to dance. He was an old man now who had worked hard all his life. If he had ever danced himself on the plains of Poland he had forgotten. He had paid for a business education for Margot. Now she would not put it to use.
>
> Finally he agreed that she could come for dancing lessons—if Mr. Benton paid the car fares, down from the Bronx.
>
> Margot could dance. She was meant to dance. In a few weeks she was ready to go to work, earning more than she ever could in a stenographer's job. They sent her to Montreal with a carefully selected group, to dance in a hotel. The engagement was for two weeks. The next to the last night Margot's hair fell down, in the midst of her dancing. It reached below her knees, and everybody watching gasped. The manager said, "I'd like to book this act for three weeks more." They laughed, but it was because of Margot's hair.
>
> Every night, then, Margot let her hair fall down. It added something to the act.
>
> The act came back to New York and was immediately engaged for another good job. Also because of Margot's hair. Margot is happy. She dances. Her father, and all her brothers and sisters, her dancing supporters, think she is the greatest person in the world. Mr. Benton remembers the look on her face that first day, when she sat in the chair in his office and stared at him and said, "I want to learn to dance." Margot is doing what she wants to, and she is a happy and useful member of society."

Since the establishment of the New York School, it has undergone many changes. Its 14,000 students have come from over 80 professions. It is estimated 50 per cent of them came chiefly for recreation, 30 per cent came for professional or semi-professional training; 15 per cent for educational and cultural advancement and 5 per cent for teacher training. A free engagement bureau has been established and it has found 4163 paying engagements for students whose estimated earning [illegible]r has been over $1,250,000.

This business of tap dancing would normally be a foreign subject to a country weekly paper such as the Mercury. But from this community, as small as it is, there has gone out into the world, following the course of professional dancer and teacher, one of our own young men. Horace McHeffey made his first public appearances on the stage of the old Variety Theatre and after conducting classes here, in the north and at Quebec, the desire for travel lured him on. Visiting the larger cities of Eastern Canada, he visited New York. Returning to Quebec he again conducted classes and then decided to go to Europe. He landed at Glasgow and [illegible] native soil. Later he went south to [illegible] and is now at a town in the south of England teaching tap dancing and other forms of dance.

The Variety Theatre of Tofield is a long, long [illegible] the county of Kent with its busy [illegible] hills and its famous hop fields, but the audiences who applauded the clickety-click, tap-tap, of Horace's dancing, will wish him well and hope that real success may crown his effort.

A FRUIT COUNTRY—

As we write this in the latter part of June, the sun is hot, the occasional fly is buzzing and the air is heavy with mid-summer heat. The grass is green, the trees are in full leaf and the fields appear promising for a good harvest to come. It is enjoyable. Here in Alberta there are lengthy periods of time when the air is not charged with heat waves [illegible], bare limbs of trees and wind swept, snow covered prairies greet the eye. But to-day it is easy to imagine oneself several hundred miles [illegible] comes later in the year and [illegible]. And as midsummer approaches, the [illegible] are absorbing the sun's rays and [illegible] beautiful to the eye and pleasing to the palate.

Fruit growing in Alberta is no new topic. For years enthusiasts, encouraged by courage and hope [illegible] planted and to-day, here and there in Alberta there are some creditable orchards. Some people believe this is not a fruit country, but a wheat country. That it is easier and in the long run cheaper, to grow and sell wheat [illegible] buy fruit. This belief, however, is only partly true. Fruit can be grown here, not so easily as in some other regions it it true, but it is not impossible, especially in a park like country like this to have a family orchard. One must be an enthusiast, a seeker after knowledge and withall, painstaking, to achieve success.

Perhaps Mr. and Mrs. Maurice McGinitie would say we are a little premature in tacking such euphonic adjectives on to them, but they are taking much more than ordinary interest in the growing of fruit. Keen to learn and experiment, they are building up an orchard of quite a number of varieties. Each year is a step forward, but a step carefully taken, it being necessary to be continually on guard against the rigors of our climate. Constant attention and hard work, combined with enthusiasm, will, they believe assure them success. And having reached that goal, it is certain others will become interested and enthusiastic too.

JOHN INGERS, 77, and SON, WALTER, 46, DIE WHEN BLAZE RAZES FARM HOME DESPITE RESCUE EFFORTS OF FRIENDS

LEDUC, June 24.—Two men were cremated alive Tuesday in their farm home at Calmar, 12 miles west of Leduc.

The victims were: John Peter Ingers, 77 years old. Waldemar (Walter) Ingers, 46, his son.

Heroic efforts of two neighbors, Emil Lundblad and Charles Erickson to save the trapped men were foiled by smoke and flames when the neighbors started to force their way into the burning house.

Cause of the fire has not been determined, but an inquest jury under Coroner Dr. C. B. Kidd, of Leduc, brought in a verdict of "accidental death by burning."

QUALITY COUNTS

Only the best of everything should find its way to your dinner table but above all things, the meat should be beyond question. Experience has taught us how to handle our product from beginning to end and with us it is—

QUALITY FIRST

Customers will oblige by letting us have their orders for week-end delivery on Saturday morning. We will then be able to give better service

AUCTION SALE OF SCHOOL LANDS

PUBLIC NOTICE is hereby given that the Superintendent of School Lands will offer for sale at public auction at Room 400, Administration Building, 109th Street, Edmonton, at 3 o'clock P.M., on Thursday, July 9th, 1936, the following lands at an upset price of $6.00 per acre.

North East Quarter Sec. 11-51-22, W. 4th Mer. 160 acres.
South East Quarter Sec. 11-51-22, W. 4th Mer. 160 acres.
North West Quarter Sec. 11-51-22, W. 4th Mer. 160 acres.
South West Quarter Sec. 11-51-22, W. 4th Mer. 160 acres.

on the following terms and conditions as to payment:

One-tenth of the purchase price to be paid in cash at time of sale and the balance of such purchase price shall be paid in eighteen equal, successive, annual instalments, with interest at the rate of 6 per cent per annum, which interest shall be paid with each installment on the balance thereof from time to time remaining unpaid. Overdue payments whether of principal or interest, to bear interest at the rate of 7 per cent per annum.

The sale will only convey the surface rights of the land, and will be subject to the usual reservations in favor of the Crown, and will also be subject to reservation for right of way of existing Roadways thereon.

The Department reserves the right to increase or decrease the area sold to conform with the latest revised Plan of Survey.

The purchaser shall be required before cutting, or allowing to be cut, any timber growing on the land, except for his own use, or removing any gravel from the land, except for his own use, to acquire from a proper officer of the Crown a Permit in accordance with the regulations of the Department and pay the necessary fee and dues for same.

The Sale shall convey to the purchaser only those improvements upon the land which are the property of the Crown at the date of Sale and the purchaser shall not at any time, prior to the date of completion of payments, remove, or cause to be removed from the land any of the said improvements, without the consent of the Minister of Lands and Mines being first obtained.

Payment may be made in cash or by marked cheque on any chartered Bank of Canada, payable at par at the City of Edmonton.

Cheques will not be taken in payment unless marked "accepted" by the Bank on which they are drawn.

Further particulars may be obtained by communicating with the Superintendent of School Lands, Department of Lands and Mines, Edmonton.

By Order,
J. W. Stafford,
Superintendent.
Department of Lands and Mines,
Edmonton, Alberta, 1936.

DOG SAVES BOY FROM DROWNING IN B.C. WATERS

NANAIMO, June 20.—Newfoundland dog Friday night saved his four-year-old master, Raymond Shephard, from drowning.

Raymond wandered to the beach near his home and waded into the water shortly before dark. Suddenly he slipped into the water beyond his depth. As he cried out "Tim," the Newfoundland swam out and fastened his teeth in the child's clothing. Then he returned to shore with his burden.

Raymond's father also heard the lad's cries and ran to the beach. When he got there the dog was standing over the dripping youngster.

Vol. XVII., No. 22   Thursday, July 2, 1936 $2.00 Per Year.   To U.S.A. $2.50

AMISK CREEK

Our deepest sympathy is extended to the John McGlaitie family in their recent and bereavement.

The rain we have been waiting for have come and it looks as if we will get quite a lot.

Arnold Berg succeeded in getting contributions of over $80.00 in this district for the 25th anniversary fund of the Camrose Lutheran College. They hope to be able to burn a three thousand dollar note against the college on their Silver Jubilee.

About fifty persons were gathered at the R. O. Berg home on June 21st, to help him celebrate his 23rd birthday. Some of them spanked him good and hard so he should remember for another 23 years. A tasty lunch was served by the hostess, Mr. and Mrs. Berg. Arnold received hearty wishes for many happy returns of the day.

The Ladies' Aid held their regular meeting at the P. O. Flaaten home on June 23rd. Over fifty persons were present, the young people and school children had soft ball practice at the same time.

Ruby Berg from Edmonton was visiting her parental home for three days last week, returning on Wednesday morning. Mr. and Mrs. R. O. Berg and Lilly motored up with her.

Mr. and Mrs. J. Holtee and little son Milo, from DeMay, were visitors at Mr. and Mrs. C. Erickson's home one day last week.

Lilly Berg attended the graduation ceremony of the students at the Camrose Lutheran College on Friday evening last.

The E. A. Moen, I. C. Olson and R. O. Berg families and Mrs. P. O. Flaaten motored to Camrose Saturday and attended the Lutheran College 25th anniversary ceremonies.

Mr. and Mrs. J. Annabo and R. Berg motored to Camrose on Sunday and attended the large meeting held there at the Lutheran Church. Lilly Berg returned with them

(Continued in column three)

Mr. and Mrs. A. Haugen, Arthur and Lilly, motored to Camrose on Saturday and took in the big gathering at the college. Mrs. Haugen and Arthur returned the same evening, but Mr. Haugen and Lilly remained for the Sunday services.

Mrs. K. Olson is visiting with her daughter, Mrs. L. Watt in Edmonton.

Mr. and Mrs. C. Erickson and Mr. A. Erickson motored to De-May Saturday evening and visited with Mr. and Mrs. J. Holtee. Carl and his father returned the same evening. Mrs. Erickson remained until the next day, when Mrs. Holtee and son accompanied her home and will visit there for a few days.

The programme committee for the young people's league had a meeting at the P. O. Flaaten home last Sunday evening to arrange for the program for next young people's meeting which will be held in the church on Sunday evening, July 12th. Everybody welcome.

Mrs. Elsie Carlyle who has been assisting with the work at Mrs. J. C. Olson's for some time, left for her home at Hay Lake recently.

Albin Pearson from Bently is here at his parents home, assisting with the summerfallow.

Solberg and Amisk Creek schools are holding a combined picnic tomorrow (Tuesday) at the R. O. Berg ball ground. We hope the weather will be nice for the children's sake.

Mr. and Mrs. C. Erickson and Mr. Erickson Sr. and Mrs. Kjereng from Ryley motored to the city one day last week.

Hazel Hillerud and her sister, Beulah, also visited the city last Saturday.

Mrs. C. Erickson and Mrs. J. Holtee and son motored to their parents home for a visit, the H. Sorenson home, east of Poe.

LAKESHORE

Mrs. Johnston entertained Mesdames Wood and McConnell and Miss Maggie Wood on Wednesday of last week. Mrs. McConnell and Miss Wood won the bridge game. Does this mean Mrs. J. and Mrs. W. are slipping?

Little Freddie Beal of Vancouver arrived on Saturday to spend the summer at the Phillip's home.

Mrs. Bertha Seale is in Edmonton, having undergone an operation on her throat. Her many friends are hoping it will result in much improved health.

The Ladies' Aid held a most successful strawberry social in the School house on Friday evening.

Mr. and Mrs. Neil MacKinnon of Manville attended the school picnic on Tuesday. They were accompanied home by Miss Grace MacKinnon and Neil Phillips.

NEW POTATOES BEFORE JULY 1

Mrs. Tofield, has we believe, scooped the district as regards new potatoes. Always an expert gardener, she has a potato patch that has for several days been out in full bloom. At the beginning of this week some were dug and found to be of table size.

WEDDING

On Saturday evening last a very quiet wedding was solemnized when Esther, eldest daughter of Mr. and Mrs. Jacobs, was united in holy matrimony with John Letourneau, son of Mrs. Letourneau of Tofield. Miss Goldie Jacobs attended the bride and Mr. Dorcey Letourneau was best man. The wedding took place in Edmonton, Rev. Stuart officiating. The happy couple returned to Tofield on Sunday and intend making their home here. Both young people are well known in this district, having spent most of their lives here, and all their many friends extend to them their best wishes for a long and happy married life.

Sports Day Goes Over Big

GOOD ATTENDANCE — HAPPY CROWD

The 19936 Tofield Sports Day will go down into history as a successful event in all departments. Favored with fine weather, though not of the scorching variety, a large crowd turned out to celebrate the day and see the sporting events arranged for their entertainment. As early as before ten o'clock in the morning events were underway and from then on, various activities moved forward smoothly and efficiently.

With so many games to cover, it is not possible to give detailed reports of all the games.

The day's programme started at 10:00 a.m. with a baseball game between Dodds and Tofield. The youngsters from Dodds were a little too good for our boys, and in the few innings that were played, they won by a score of 2—0.

The seniors took the diamond at 10:30 with Dodds and Ross Creek in action. The southerners were able to chalk up a 6—0 win. For an opener both teams played smart ball and were well worth watching.

Ryley and Tofield were drawn for the second game and it was nip and tuck to the last inning. Again smart ball was played, in fact the brand of ball throughout the day was a little better than we have seen here for several years. This game ended with Tofield on the winning end of a 3—2 score.

The third ball game was also closely contested, with a keen finish. Kingman and Holden battled it out and in the end Holden held the honors.

The fourth ball game between Dodds and Tofield left little doubt as to the outcome. Early in the game the locals counted twice and continued to advance their lead to the end. The game finished with Tofield leading 7—1.

The fifth and final game was played between Holden and Tofield and was keenly contested. In the early stages of the game the teams were running neck and neck but a good inning by Tofield towards the end put them two in the lead. Another score later put them three up, the game ending 5—2 for Tofield. This game gave Tofield first money and Holden second.

Pat Gladue refereed all games with T. McBratney and Fred Stevenson on the bases.

The softball games proved to be very popular, at times the crowd being equally divided between the two diamonds. We cannot give a resume of the games this week, the information being unobtainable at time of writing.

The basketball team from Skaro, for some unknown reason did not arrive. Lakeshore and Tofield played with Lakeshore winning by a handsome margin.

The races, as usual, were popular and there was no scarcity of prizes.

The various stands did a good business and all through the day the crowd was orderly, jovial and happy.

In the evening two dances were arranged, one at Tofield and the other at Ryley. Good natured crowds were present at both places and the dawn was breaking on July 2nd when the celebration of the first came to a close.

Every one of the committees are to be congratulated on the result of their labors. Days of this kind are only possible by careful planning and considerable work and it is gratifying to know that they were able to bring this work to such a successful conclusion.

Financially, it is expected the day will be a success, though at present writing there has not been time to prepare a statement. In a few days one will be prepared and published.

LOCAL AND PERSONAL

Mrs. Broughton sr., is visiting her son here at Tofield.

Miss Muriel Malcolm was in the city for the week end

Mr. Machmas motored to his home at Strome on Sunday.

Mr. and Mrs. J. Glover of Edmonton and Mr. and Mrs. J. Lorne visited at the Glover home this week.

Mr. Swift, Annie, John and Arnold and Winnifred Worton visited Mrs. Swift in Edmonton on Sunday Mrs. Swift is taking treatments at a hospital there

Mr. and Mrs. R. Whyte are visiting at the homes of their parents this week.

Mr. and Mrs. Thomas and family are holidaying at Pigeon Lake this week.

Miss E. Allan, who has been visiting in the city with her sister, returned home this week.

Mr. and Mrs. Beirnes left on Wednesday for the East and points in U.S.A. They are on a holiday tour.

A. L. Horton of Vegreville, Editor of the Vegreville Observer, was in Tofield on Thursday accompanied by his daughter. He is chief census official for this constituency and was here on official business.

Diana and Joan Davies and Edith Pearson are visiting at Lloydminster for a part of the holidays

Mr. M. C. Hammond returned from a visit to Ontario on Wednesday morning.

Mrs. Pollard of Namaio, was a visitor at the home of her sons, Allan and Leslie Herndon, recently. She returned home on Friday last

The Misses Verge and Leila Ball and Darrell were Sunday visitors in town and district

Dr. and Mrs. McPherson were Tofield visitors on the first and attended the final ball game in the evening

FOR SALE.—One and a half ton Truck, good condition. Reason for selling, too large for present use —Apply to G. P. Thompson, Tofield. 28p

FOUND—One Black and white cow, horns curved in. TB test mark on ear. Found west of Lindbrook. Apply to Tofield Detachment of R.C.M.P.

LINDBROOK

After the "tropical" heat that we've been getting of late, the few recent showers are very much appreciated and will benefit the crops, pastures and also the animals and humans who have not what one would say exactly enjoyed the heat wave

The L.C.C. met for their monthly meeting last Wednesday at the home of Mrs. Paul McMullen. It being the King's birthday, Miss Lily Morden read a short address concerning His Majesty and quoting anecdotes from his life to show how democratic our present ruler is or as it is termed out West "a regular fella" Singing was enjoyed by all and we hear that the ladies now have a theme song or club song or whatever you care to call it, and its a pretty good one too, say, what's the Club's yell anyway? All present en-

Norway Comes To Bat

Written quickly in order to fill a space, the advt. headed "Hurrah for Sweden," brought quick response. This week an old and valued subscriber came in and paid up several years, saying as he did so, "I see by the paper a former resident of Sweden was in and paid up, so I thought Norway should take a hand in it too." This was splendid and much appreciated. However this will be the last advertisement along these lines.

The Tofield Mercury

My Office has the best of Companies writing Automobile insurance. Be safe and insure your car or truck.

Fire, Life, Accident and Sickness Insurance written. Agent for C.P.R. and Hudson's Bay Lands. Notary Public—Issuer of Marriage Licenses. Express money orders issued.

A. J. H. McCAULEY

YOU CAN HELP US TOO

[illegible]

Publishing a weekly newspaper is rather a monotonous task. As the weeks roll round there is the same mechanical work to be done, the same searching for news to fill the columns and the same expended effort to procure sufficient advertising to make the venture a paying proposition.

But it is our work and as such, we must of course, keep going. Subscribers often help very much, not only by paying up their subscriptions, but by giving us a few words of praise and encouragement and naturally, some times friendly criticism.

We are always pleased to receive all three and there is no limit to the interest subscribers may take in this publication.

The Tofield Mercury is a country weekly newspaper published in the interests of this district. We neither aspire to or expect a huge circulation, but hope we have and are able to maintain the interest of the majority of residents of this district. Allied to no party or creed, the occasional e·pressions of opinion are given for what they may be worth at the time they are given and are always intended to be constructive—not destructive.

Readers may and can help greatly by taking an interest in their Home Paper.

DENTIST CHAIR STOP-GO-SIGN AID TO PATIENT

LONDON, June 24.—A "stop," "caution", "go," apparatus by which patients can reveal to the dentist exactly how they feel is the latest device for banishing fear from the dental surgery being used in Britain.

The patient holds the control switch in his hand while his teeth are being drilled. A box containing the red, amber, and green lights attached to a collar on the shoulder of the patient shows the dentist instantly if he should stop, go cautiously, or go all out.

The lights were first suggested to the inventor, a leading Wolverhampton dentist, as a joke. He perfected the apparatus and found that its psychological effect was tremendous. It usually gives patients so much confidence that they do not signal "stop" at all.

WEASEL INJURES 2-YEAR OLD GIRL

Attacked by a foot-long weasel as she was playing with a ball in the long grass at the sidewalk in front of her home at 11919 101st , Edmonton, Mona, the two year old daughter of Mr. and Mrs. L. Scott suffered painfull lacerations of the arm and wrist Tuesday evening. The baby screaming and swinging her arm with the weasel attached to it by its needle like teeth was rescued by her father who was some distance down the road. Mr. Scott knocked the weasel from the child's wrist and attempted to kill it but the animal made its escape. The tot was attended by Dr. L. A. Miller.

CHANGE IN PICTURE

How quickly a transformation can be brought about in the wheat situation has been demonstrated by the happenings of the past couple of weeks.

The area providing the bulk of the spring wheat production inthe United States has been hit by a searing drouth and early prospects that a surplus of wheat would be produced by that country have been nullified.

The Dakotas and Montana are the large spring wheat producing States. Torrid temperatures have ravaged the wheat fields beyond recovery.

The winter wheat crop is estimated at around 473 million bushels. A spring wheat crop of 160 million bushels will provide a total production of 633 millions. This is insufficient for normal domestic requirements.

In the fact of a fourth low wheat crop in the United States some anxiety about supplies was expressed by overseas buyers. The world surplus is down to normal and further depletion would be dangerous. A flare-up in the wheat markets of North America followed.

Last year the Dakotas and Montana raised 110 million bushels of spring wheat out of a total production of 170 million bushels. Washington state was the fourth largest producer with 15 million bushels.

THE REINS OF POWER—

QUITE RECENTLY on the street, two men met for the first time in several months. After the usual salutations were given, said one to the otner, "Well, what do you think of our government now." And then ensued a conversation along political lines during which the present Alberta government received both boquets and brickbats.

The conversation set us thinking along the lines —what is government, anyway? Why has it taken just the form it has? Is it the best form, and has it always been the same? What assurance have we that we have reached the apex of good government?

The word government implies sovereignty, which in turn means the person or persons invested with supreme authority in a politically independent society.

Children of any particular country, as they grow up and become educated, naturally absorb the mental impression of things that are going on around them. And they are prone to imagine that the things they see around them, especially those things concerning government are steadfast. That they are the right and proper things and that they are unlikely to change. This belief persists to no small extent, despite the study of history in the schools. Each new generation seem to believe, for a time at least, that they are living in the era of most advanced and best methods of government. Yet right at this minute, as the sun lights, from east to west the different countries of the world, it shines upon sovereign powers of vastly different opinions and methods of proceedure. We here in Canada, are quite sure that our form of democracy is the best type of government, yet were it possible to understand the beliefs and ideals of Italian youth, we would probably find that, filled with enthusiasm inspired by their supreme leader, they, like him, look with disdain upon democracy as a form of government. And what is true of Italy is most likely true of Russia, despite the fact that, as regards governmental ideals, the two countries mentioned have little in common. Most of us have arrived at the belief that we are really democratic as regards government, that government, by and for the people have been brought to a fine finish by our love of freedom and our desire for full representation. Yet we learn that the Greeks employed a more definite enactment of the literal sense of democracy than we in Canada do to-day. There in the city states, hundreds of years ago, every citizen took his turn at the proper business of government. We find to a certain extent a counterpart of this ideal, in the law passed either in New Zealand or one of the states of Australia a year or so ago making it compulsory for all electors to vote. Literally, the word democracy means "power of the people" and it is obvious the full power of the people cannot be brought into play unless all, who en joy the franchise, cast their votes.

Prior to the great war it was generally conceded that those nations failing to embrace democracy as a form of government were "backward" nations, but since the Great war ended political upheavals have resulted in quite a crop of dictators, large and small. Whether this trend towards dictatorship is really permanent or whether in the course of years the nations will swing back into some form of democracy, no one at this time can tell. It is significant, though, to note that Russia is gradually allowing to creep into its communistic form of government, certain democratic principles. Swinging from an extreme autocratic type of government to an extreme communistic state, Russia is gradually adopting a more democratic tone.

There always will be a difference of opinion as to which is the better form of government, Fascism, Communism or Democracy; other types could be considered too, if one wished, such as Despotism, Oligarchy, Ochlocracy and still others which have come down through the pages of history. This difference of opinion between Democracy and Fascism is genuine and sincere due to the simple fact that ALL the advantages accruing to a body politic do not come from any one single form. It seems that to some extent the peoples of the world must, as regards matters of government, take the bitter with the sweet. Democracy in its purest form insist that people do their own thinking as regards affairs of a public nature, and so few of them do. Newspapers, magazines, radios, all issuing propaganda for this or that party, tend to form political thought and opinion. The desire to attain political power and the emoluments that go with it, urge political groups to offer the most alluring promises to the electorate. Men and women are grouped together "for the good of the party," quite often when there is real difference of opinion among them. Briefly, while the principle of democracy demand that individuals do their own thinking, they rarely do, and furthermore, if they did, quite often, on many questions, nothing but a hodgepodge of ideas would result.

Fascism is the exact opposite. Under this form of government the individual citizen is told what to do and how to do it. Generaled by a master mind, the entire nation is regimented into a policy, having for its aim, the general well being of all. The state is everything, the individual a minor part driven by a mental mainspring. This type of government may, and has, brought a form of order out of chaos, but it is done at the expense of individual freedom of thought and action. There are two obvious dangers to this kind of government, one that a void is left when the dictator dies and the other that there is always the possibility that the "master mind" makes an error of judgement and takes his nation with him on the wrong track. It is quite possible that there are times in the history of a nation when dictatorship stands it in good stead, when a nation due to one or a number of reasons finds its internal and foreign affairs in such a muddled state that only the determined policy of an "iron man" can bring about anything resembling order. But to say the least, these are exceptional and not normal circumstances. Undoubtedly both Fascism and Communism denote a loss of political freedom, but here is the rub, as one man rather caustically remarked, when reminded of this, "yes, we are free, free to go barefoot if we have no shoes." And there is no adequate refutation of a statement like that However, we feel that for Anglo-Saxon peoples at least, the ideal of democratic government is the one that will be the most consistently followed. But in order that the needs of the state may be served best it is vitally necessary for the electorate to actually do some thinking, some analyzing, and some real appraising of values. We still believe the two party system of government, properly conducted, is the best plan of government for normal times yet devised, but a great many people do not. We have not, neither should we have, any desire to ram our beliefs down your throat, and if you do not believe in the two party system, we stand ready to respect your opinions and judgment. But it is necessary when reaching decisions regarding government, to take deep political soundings. One failing of democracy is that the state is used as a vehicle for a joy ride by those of pleasing countenance and pleasant tongue, which when contrasted with the rigid requirements of Fascism, does not reflect credit upon democracy. Yet the decision of who shall serve the people, rests with the people. The fundamental belief of Fascism, that the state is all, is a sound enough doctrine as far as it goes. Even in democracy this idea should prevail, but here is the difference—democracy leaves it chiefly voluntary while Fascism tends towards compulsion. Moreover, each citizen should look upon the state as something to make a contribution to, not something from which to take a contribution.

So, perhaps it is wise when we are taking part in discussions concerning governmental affairs that we attain as true a perspective as we can; that we should realize that under our system existing governments are simply reflections of the will of the people; and that governments are not necessarily omnipotent or infallible.

SIX UNHOLY STORIES—

Mark Hellinger in "Column Review"

To Every columnist in the land, especially in the early stages of his career, there are certain stories that seemingly bear the earmarks of truth. They are, in the main, unholy stories, yet they are written and told with such sincerity that the columnist generally believes them. Especially if it is late, and he has space to fill.

Permit me a few illustrations:

1. The Polish Traveler Story:

A naturalized American, away from his native Poland for some twenty-five years, returns to his birthplace in order to visit his aged parents. The town is small, and the parents are very poor. They do not recognize this handsome American who asks lodging for the night. He in turn, decides that it will be a greater kick if he converses with them, but does not disclose his identity until morning.

Late that night, because he has flashed large sums of money, they murder him. The next day, the y learn the hideousness of the crime they have committed. And both parents wind up in the insane asylum......

2. The Baby Eater

A woman residing on Long Island needs a fourth for an afternoon bridge game. She phones a friend, the mother of an infant, and asks her to play. The recent mother replies that it is the nurse's day off, but if she can bring her baby, she'll be happy to join the game.

In due time, she arrives. She places the baby on the bed, and sits down to play cards in the living room. An hour later she peers into the bedroom and finds her baby gone. Her friend's police dog—always part wolf although the fact was never known—has devoured it.

The dog is shot. But the booby hatch has claimed another victim.

3. The Mattress Episode

There is a servant girl who, for many years, has kept her earnings under a mattress. She has never said anything about it to her employers, who are a devoted man and wife. Fiction, again. They finally give her a well earned vacation. And when she returns, the maid finds that her employers have sold her old mattress and given her a brand new one.

She squawks bitterly, and tells them of the money that was hidden in the old mattress. After much trouble, they re-purchase the old mattress and find the money intact. They return it to the maid, but they make her promise that, from now on, she will keep her earnings in the local savings bank. She promises that she will do so.

Two weeks later, the bank fails. Her employers feel terrible about the situation because they had given the poor servant a bad steer.

But the girl isn't a bit worried. Force of habit had been strong with her. A few days after depositing it, the girl had withdrawn her money from the bank. And it now reposes upstairs under the new mattress

4 The Ghost Rider

This is a favorite story after a flood, a big fire, an earthquake, or a disaster of any sort. You can almost count upon its arrival

Two men are driving along in their car. As they ride through a lonesome neighborhood, an elderly woman steps to the center of the road and hails them They stop—and the woman tells them that she is desperately in need of a lift to her home. Her daughter is awaiting her, she says, and the last trolley has already left.

They agree to take her to her destination, since they are going in that direction. She sits, alone, in the back seat of the car—and gives them her address. They proceed

After a few miles, one of the men looks around. To his amazement, the elder passenger has vanished! She has either jumped or fallen from the car. The two men argue. One is in favor of going back and looking for the woman. The other feels differently. He says the passenger looked queer to him and he is in favor of going to the address she gave and asking for the daughter she mentioned. Since he is driving the car, he wins the argument.

Arriving at the house in question, they leave the car and ring the bell. The door is opened by a young women who, by her resemblance, is obviously the daughter in the case.

The men attempt to tell her what has taken place, but she places a finger on her lips and motions them forward

They advance into a room that holds a casket in the center. And in the casket, a victim of the previous day's disaster, is the woman who had vanished from their car only a few minutes earlier......

5 An Innocent Gal

A favorite around town whenever a new movie cathredal open. In this one, the pretty little girlie is sitting next to the old lady. The girl suddenly becomes ill, and the dear old woman helps her up the aisle and into the street.

There are some who suggest a doctor, but the old woman will have none of it. She will see that the pretty child arrives in perfect safety. So she summons a cab, places the now unconscious girl in the rear and is driven away

Invariably in the type of fable the "old lady" is a white slaver (remember them?): a man in woman's clothes and a wig. It was he who jabbed a hypodermic needle into the girl's arm as she sat next to him in the movie palace, and who has now dragged he off into a life that is worse than death, as the saying goes

What happens to the beautiful young girl, I have never found out. The story always ends as do most stories Right at the most interesting part...

6. The Lovely Pebble

Probably the most famous of them all is the girl who found the beautiful pebble on the beach, and who placed it in her mouth for safe keeping while tying her rowboat to a dock She swallowed it A few weeks later—convulsions.

So what happened? So the girl had swallowed a snake egg What she had thought was a pebble had turned out to be a snake. To operate now would be to irritate the snake that was wrapped around her intestines. If the snake were left there, it would kill her just the same. So what happened? So the girl died

The foregoing is far from a complete list of such anecdotes, but it will suffice here Even as you read these lines, I haven't the slightest doubt that some young columnist somewhere is feverishly pounding out one of these stories on his typewriter in the sincere belief that he is scooping the world.

And if his world is small enough, very probably he is. It may be that those who see his story in print will not have heard it before But if his public takes in a vast territory, woe be unto him!

SPENDING THE BONUS—

Nearly two billion dollars of fresh purchasing power is now being put into the hands of more than three and a half millions of American families through the distribution of the bonus bonds voted to veterans of the World War by Congress. That this distribution is bound to have a stimulating effect upon business of all kinds in every part of the country is certain

Never before has such an enormous amount of fresh money been dropped at one time into the channels of trade. How permanent the effect of this influx of cash may be it is much too early to say At best, its effect can only be guessed at, since there is no precedent in economic history. That it will in the main, be beneficial in tiding the business of the nation over the usual Summer slump is probably true. It is another question, however, what the effect of the bonus payments will be upon those who are receiving them.

LINDBROOK

(Continued from page One)

joyed the afternoon and a dainty repast was served before leaving. The ladies decided to hold a picnic on July 19th at Lakeview and members are to bring their menfolks to this, so it seems that even a Ladies' Club can't always get along without the old man.

Mr. and Mrs. Bradely and daughter Rene and Mr. Howell Williams were visitors here last week.

Mr. and Mrs. Phillips of Edmonton were also visitors during the week.

The "boys of the village" desire to announce that they are forming a ball team and will meet every Sunday at Mr. "Scotty" Tough's beach to play ball, practise and organise said team. Anyone interested is cordially asked to attend and get in on the game.

The annual School Picnic took place last Sunday at Mr. Norman Ellis's beach, Hastings Lake. It was a glorious summer day and not too hot. Mr. McLeay was in charge of sports and Mrs. Smith, secretary treasurer, etc., of other amusements. Ice cream, nuts, etc., were provided for the kiddies and even the grown-ups had their share too. Games races, etc., were the order and the sports programme was presided over by the teacher, Mr. McLeay. Here is the list of winners.

Small children's race.

Boys, 8 and under—1, Don Bailey; 2, Ken Bailey.

Girls, 8 and under—1, Vera Jenson; 2, Rosaline McKenna, 3, June Odiorne.

Boys, 12 and under—1, Richard Kortzman; 2, Victor Gill; 3, Howard McMullen.

Girls, 12 years and under—1, Pansy Bracegirdle; 2, Edith Odiorne; 3, Helen McMullen.

Boys, 14 and under—1, Clifford McMullen; 2, Richard Kortzman; 3 Tom Brady.

Girls, 14 and under—1, Alice Bailey; 2, Thelma Kortzman; 3, Merna McMullen.

Girls' Wheelbarrow race—1, Thelma Kortzman and Helen McMullen; 2, Alice Bailey and Edith Odiorne.

Girls 3 legged race—1, Alice Bailey and Thelma Kortzman; 2, Margaret Brady and Edith Odiorne.

Boys' Three legged race—1, Clifford and Howard McMullen; 2, Victor Gill and Ray Gould.

Relay race—1, Merna McMullen, Joyce Bailey, Kathleen Barland and Pansy Bracegirdle; 2, Thelma Kortzman, Helen McMullen, Margaret Brady and Richard Kortzman.

Boys' Broad Jump—1, Clicord McMullen; 2, Howard McMullen.

Girls' Broad Jump—1, Edith Odiorne; 2, Merna McMullen; 3, Thelma Kortzman.

Girls' race—1, Irene Bailey; 2, Alice Bailey.

You may see some of these above names in the Canada Olympic team in a few years time, because there is some good stuff there and only needs the training. If so, we'll have something to blow about anyway.

The people, children, teacher and trustees wish to thank Mr. Norman Ellis for so kindly placing his beach at their disposal for the picnic for it is an ideal spot for both games and bathing; shallow water for the little ones and lots of lovely sand and a nice place for games and the picnic.

KETCHAMOOT

There will be no Sunday school or preaching services at the schoolhouse next Sunday, July 12, owing to Rev. Allen being away on a short holiday.

Miss Mary Ingram of Edmonton is spending her summer holidays with her aunt, Mrs. G. R. Owen, in our district.

Mr. and Mrs. Tom Schultz spent Sunday night at the A. F. Schultz home, returning to town on Monday.

Miss Marjory Duncan of Vermilion spent several days visiting at the Schultz home, on Sunday she left with her parents for a trip to Toronto

Mr. and Mrs. Wm. Lee of Edmonton spent the week-end with his son's families in our district.

Miss Mabel Lawson accompanied by her friend Miss Howard of Camrose, are spending their holidays at the home of Miss Lawson's parents.

Mrs. W. A. Mitchell entertained the Ladies' Aid at her home Friday afternoon of last week, all the members but one was present and also a large group of visitors. A pleasant afternoon was spent. The August meeting will be held at the home of Mrs. Ed. Cookson.

Mr. and Mrs. Barrowclough and children were Sunday guests of the Carlisle family.

Miss Lindsay closed a successful term of school. On Tuesday, assisted by the board, a picnic was put on for all the ratepayers of the district on the grounds at the Sears' home. Most of the people were present. Dinner was served cafeteria style at noon. Soft ball games and a long list of races entertained the crowd. Ice cream, lemonade, was served free and chocolate bars were prizes for the races. We are sorry we haven't a list of winners. Needless to say, it was a happy crowd of youngsters. The parents enjoyed the day also.

Tofield second ball team and Ketchamoot played ball on Sunday on the home diamond. Ketchamoot boys came out victorious.

Mrs. G. R. Owen, Mrs. Sears, Hazel, Stanley and Charley, Ethel Coombes and Mary Ingram, were Sunday evening visitors of Mr. and Mrs. Will Ingram, West Ketchamoot.

Messrs. John McGinitie and son Henry, arrived at Fresno, California. They are away on a visit to friends and relatives there.

The Messrs. Kleinschroth left the first of the week for their home near Coronation, they will bring their threshing outfit back with them. The Kleinschroth families live on the McDevitt farm., also one family on the Jabb farm across from Mrs. Henderson.

LAKESHORE

We inadvertently omitted to mention last week that Mr. William Tiedeman had taken unto himself a bride. He and Miss Mary Dunne were quietly married in Edmonton on June 18th. After a short honeymoon in the city they returned to this district where they will make their future home. The best wishes of their many friends and neighbors are extended to them for a long and happy wedded life.

Mrs. Bertha Seale returned last week from Edmonton after undergoing a tonsil removal operation.

The J. H. Johnston, L. H. Graham, R. C. Phillips and Herman Tiedemann families picnicked at Elk Island Park on Sunday.

Mr. and Mrs. Roe Phillips and little daughter left for Vancouver on Sunday for a short holiday.

BASEBALL

Tofield baseball teams have just finished a busy week, aside from their regular games they have taken part in tournaments at the Camrose exhibition, Ryley Three Day Sports and Ketchamoot picnic.

The Tofield senior team played at Camrose on Tuesday and lost a hard fought game to Wetaskiwin. Considering the fact that Wetaskiwin have one of the strongest clubs in the province this year, the locals gave a good account of themselves. The following taken from the Camrose Canadian gives a good account of the game.

The Tofield—Wetaskiwin game, played at 12:15 opened the Exhibition Association's 1936 Fair baseball tournament in acceptable fashion. Tofield was not favored to win from the start since the Wetaskiwin team this year is particularly strong, but led by the stellar pitching and strong batting of Scotty Lee, the team from the north furnished plenty of opposition for the Wetaskiwin entry.

Clelland pitched a standout game for Wetaskiwin, the score sheet showing that only three men faced him at bat in each inning, none of whom got further than second base. He was given practically faultless support in the field, only two errors being chalked up against Wetaskiwin. The same number of errors were charged to Tofield.

Wetaskiwin scored twice in the first inning and once in the 7th. Anderson in the first inning drove the ball through an opening at second to score Lawson who had made first on a low drive to left field. Kohn, who preceded Anderson at bat and was hit by a pitched ball, scored the second run on a poor throw to first base. Barbettini scored Wetaskiwin's third run in the 7th when he hit to center field for two bases and then came in on Kohn's safe hit. Wetaskiwin had a man on third base on two other occasions during the game but were prevented from scoring further runs.

The game throughout was full value and was watched by a fair sized crowd.

On Wednesday afternoon Tofield's second team managed by Tom Schultz were defeated by Bardo at the Ketchamoot picnic. The score is not available but we understand that it was a good exhibition of the summer pastime.

Vegreville 13—Tofield 4

On Wednesday evening the local senior team met and were defeated by Vegreville in connection with the Ryley three day sports, the score being 13—4. Apparently the locals just couldn't get going right and were likely a little weary from their hard game in Camrose the day before.

Tofield 2—Camrose 5 ....

In the same tournament Tofield's second team met the crack Camrose aggregation and gave a good account of themselves before being defeated 5—2.

LOCAL AND PERSONAL

Mr. and Mrs. Geo. Coutts and Doris and Rev. and Mrs. Wallis left this week for a trip to the coast.

Mrs. John Lee of Edmonton is visiting at the Cap Lee home here.

Bill McCauley left this week for a trip to Ontario. He intends to study music while there.

Mrs. E. Thomson and daughters May and Doreen of Donalda are visiting with Mrs. B. Seale.

Miss Edythe Barden is spending some time visiting friends in Edgerton.

Mrs. Pearce of Edgerton visited at the Barden home last week.

The Anglican W.A. will hold their annual garden party on Wednesday, August 12th.

Miss Helen Lewis, of Gresham, Oregon, is visiting at the Clutterham home.

Reg. McCarthy and Blake Clutterham returned from Oregon where they have been visitng for the past month

Mrs. F. M. Webb, teacher of piano and organ will again take a limited number of pupils. Primary lessons 50c. and junior lessons combined with harmony and theory, 75c. Apply Mrs. F. M. Webb, phone 42.

Rev. and Mrs. Allan, Graham and Miss Ella Taylor are spending a couple of weeks at Banff.

Mr. and Mrs. Ed Weatherick and daughter are on their holidays. Mr. Hudson is taking Ed's place at the station.

Donald Beirnes is spending his vacation visiting in Regina.

Miss L. Ross spent the week end in Edmonton.

The Misses Myrtle Bethel, Katie McAllister and Anne Swift are attending summer school in Edmonton.

Mrs. R. Whyte returned to Wetaskiwin on Wednesday after spending some time visiting with her parents here.

Lee Burnett left last week for Heath where he is working on the railroad.

Messrs. Matchmess, McFadgen and Wurton motored to Vegreville on Sunday.

Mrs. A. Allan spent a day in the city last week.

Miss Audrey Jabb of Drumheller and Mr. and Mrs. McCulla of Neilburg, Sask., are visiting at the Jabb home here.

Mr. and Mrs. Abernethy and Mrs. Guy Walker spent a day or two in Edmonton this week.

An enjoyable dance was held in T. A. Jone's barn last Friday night.

FOR SALE.—14 ft. Mills wire weeder. The only implement that pulls the weeds out.— See it at M. C. Hammond's, Tofield.

BARDO

Born.—To Mr. and Mrs. Ingvald Ness on June 25th., at the Royal Alexandra hospital, Edmonton, a son

Born to Mr. and Mrs. Pete Bjornson, on June 26th, a son.

Congratulations.

Quite a number of people from here attended the meetings in Camrose last week

The male chorus sang at the Sons of Norway celebration, in Viking last Saturday.

Mr. T. A. Rorem left for Iowa U.S.A., last Wednesday for a short visit.

Mr. Arnold Steen spent a few days of last week in Edmonton

Several from here attended the Sports Day in Tofield.

Mrs Halstad, from Minn, Minnesota, president of the Women's Missionary Federation in Canada and U.S.A. spoke at the Lutheran Church last Friday forenoon

Wideman—Yoder

At 5 o'clock last Thursday afternoon a very pretty wedding was solemnized in the Salem Mennonite Church, when Edna, eldest daughter of Mr. and Mrs. Dave Yoder was united in marriage to Mr. John Wideman of Kingman. Bishop N. Roth and Mr. Milo Stutzman officiated. The bridesmaids were Miss Lavanda Yoder and Miss Norma Brenneman, and the best men were Mr. Floyd Wideman and Mr Noah Wideman. The bride was dressed in a floor length gown of white georgette, and carried a white crocheted purse. The bridesmaids had floor length dresses of pink and blue. All wore a corsage of flowers. After the ceremony a reception was held for three hundred and twenty-five guests, at the bride's home. The dining room was beautifully decorated in white, blue and pink streamers and white bells. In one corner was a large basket of gladiolus, carnations and peonies, with two smaller baskets of carnations and snap dragons. The table was centred with a three-tiered wedding cake, with the bridesmaid's cakes, decorated in pink and blue on each side. After a sumptuous supper a birthday programme was held for the bride; it being her birthday that day. On Friday morning Mr and Mrs. Wideman left for a honeymoon trip to Vancouver, B.C. the bride travelling in a navy-blue swagger suit, with white accessories.

The young couple were recipients of many lovely and useful wedding gifts. They will make their home on Mr Dave Yoder's farm. The best wishes of the community are extended.

FOR SALE.—One and a half ton Truck, good condition. Reason for selling, too large for present use. —Apply to G. P. Thompson, Tofield 25p

FOUND—One Black and white cow, horns curved in. TB test mark on ear. Found west of Lindbrook. Apply to Tofield Detachment of R.C.M.P.

LINDBROOK

A party was given to our departing teacher Mr. L. McLeay last Monday at the home of Mr. and Mrs. W. Glenn. It was a "stag" affair and several of his Tofield friends and lads of the village assembled to wish him the best of good luck, etc. Cards, songs and refreshments, were the order of the evening

The Anglican W.A. of Tofield met last Thursday at the home of Mrs W. Lancaster here. The ordinary routine business was done and then small talk and refreshments.

We are sorry to hear of the sudden and probably serious illness of

Minimum Wheat Price

The Alberta Wheat Pool invites the cooperation of all organized bodies and all interested individuals in impressing upon the Federal Government and the people of all Canada the importance of fixing a minimum price for wheat above the average cost of production.

This can best be done by resolutions passed by boards of trade, municipal councils and other similar organizations, or letters to members of parliament.

YOU CAN HELP US TOO

Publishing a weekly newspaper is rather a monotonous task. As the weeks roll round there is the same mechanical work to be done, the same searching for news to fill the columns and the same expended effort to procure sufficient advertising to make the venture a paying proposition.

But it is our work and as such, we must of course, keep going. Subscribers often help very much, not only by paying up their subscriptions, but by giving us a few words of praise and encouragement and naturally, some times friendly criticism.

We are always pleased to receive all three and there is no limit to the interest subscribers may take in this publication.

The Tofield Mercury is a country weekly newspaper published in the interests of this district. We neither aspire to or expect a huge circulation, but hope we have and are able to maintain the interest of the majority of residents of this district. Allied to no party or creed, the occasional expressions of opinion are given for what they may be worth at the time they are given and are always intended to be constructive—not destructive.

Readers may and can help greatly by taking an interest in their Home Paper.

THE MERCURY

JOBLESS TO MEET CABINET AS DEMONSTRATION OUTCOME

First actual "march" on Alberta's legislative buildings since the present government assumed power last September ended quietly late Monday afternoon, the 300 jobless single men who constituted the marchers leaving the buildings after occupying one corridor for an hour.

When they left, their five spokesmen had from Hon. E. C Manning a promise that they would get a hearing before the cabinet "as soon as possible, and probably Friday."

Mr Manning refused to issue a formal public statement.

Object of the visit to the legislative buildings, it was declared by Leader Jack Bloom, was to inform Hon. W. A. Fallow, minister of public works, that "all these men are ready to go to work on road jobs any time."

Bloom said the demonstration was a reply to a statement they attributed to the Edmonton Journal as quoting Mr. Fallow, that "there weren't enough men in each district who would go to work."

Statement in last Friday's Journal quoting Mr. Fallow, however, was this:

"We started out with the idea of getting all the workmen we needed from along the route of each (road) project, but we found there weren't enough men in each district who would go to work. So we had to go into other districts for them."

Contrary to a report blazoned in other quarters, there were not 1,000 men in the group, but only 300. They did not "push aside the doorkeepers who endeavored to block their way" and they did not "take possession of three floors of the parliament building." There were no demands made, either, apart from the demonstration of numbers to show how many wanted work, and a renewed plea that the "soup kitchen" be abolished in favor of vouchers or cash relief.

The march was organized on the market square, and the men paraded down Jasper ave., then down 108 st. to the buildings. They entered by the east door quietly, were greeted by Guide John Dundas and told him quietly that they knew the way to Mr. Fallow's office. All of them walked up the main staircase from the main to the third floor, and then up a small side stairway to the fourth floor.

One man walked into the office of Mr. Fallow's secretary, and informed that the minister was out of the city, led four other leaders across the hall into the office of Homer P. Keith, deputy minister of public works.

Meantime, the 300 men stood quietly in the corridor outside the offices, or sat on the floor. There was a hum of conversation but no loud talking. There were no banners.

The delegation of five, with Bloom as spokesman, was informed that Mr. Keith was busy in a conference in another part of the building. The delegation indicated it would wait.

Shortly Mr. Keith telephoned his own office, telling his secretary he would talk to the delegation on the telephone, but likely would be in conference all afternoon.

"We want to see him personally," said Mr. Bloom.

"He purposely left the conference to speak to you now", said the secretary, "and it is likely he will not be able to see you until tomorrow."

"We'll wait until we see him," Mr. Bloom returned.

Returning from the telephone where she reported the reply of the spokesman, the secretary said that "Mr. Keith will arrange an immediate interview with Mr. Manning." This was done and the five contact men spent about 25 minutes discussing their problems with the acting premier.

As they emerged from Mr. Manning's office, Bloom took command, calling his "comrades" together in the fourth floor rotunda where they had waited throughout the hearing, to report the results of the interview.

"Regarding the newspaper statement credited to Mr. Fallow, it was pointed out that this will be taken up with him immediately upon his return to the city," he told the marchers. "We told him of our wishes to eliminate the soup kitchen and get cash relief grants, either in currency or script or some other way and an interview with the whole cabinet will be granted us, probably early Friday. All the ministers and Premier Aberhart will be back in Edmonton then."

He urged the men to line up and leave the building in orderly fashion, saying, "We'd better go back to the soup kitchen at least until Friday."

From the market square the men made the march on the legislative buildings in a "surprise move." Both city and R.C.M.P. were rushed to the buildings in hurry-up calls, but no disturbance marked the parade's entrance into the marble halls.

The march itself was made along city sidewalks and not in the roadway. This was a precautionary measure, not to conflict with police regulations regarding interfering with normal street traffic.

ALBERTA'S CROP REPORT [illegible]

Issued by the Department of Agriculture, Edmonton, July 3rd, 1936

During the past two weeks, all dry land crops in the southern and east central areas have suffered a serious set back at a critical period because of prevailing hot weather and high winds, no rains having occurred to relieve these distressed conditions. This is especially true of the territory from Medicine Hat north-west to Brooks and continuing north to the Youngstown district, where hopes for even a fair crop are practically abandoned. In the more seriously affected districts, a shortage of food is already anticipated. The whole of the south and east is badly in need of moisture. This applies particularly to stubbled-in crops, pasture and range lands.

In the west central area and the Edmonton zone, some severe thunder storms and scattered showers have occurred, but these have only been very local. Though there is still a good reserve of subsoil moisture over a great deal of the country, many districts would welcome good rains for surface needs. If weather continues dry, maturity of grain crops will be unduly hastened with some consequent reduction in yields.

The most favorable conditions obtain in the Peace River district where good showers have been more general and development of all crops has continued normally. Prospects in this area point toward an earlier harvest by at least one week than in 1935.

Summerfallowing in the south is almost completed, though delayed to some extent by high winds and dry soil conditions. Rapid progress is being made in the centre and north where about 50 per cent of fallowing has been done.

Haying is general in the south with yields reported poor to fair. Some cutting has commenced in central districts where the crop is likely to be somewhat below normal. With favorable conditions during the next ten days, the hay crop in the north will be quite up to average.

The warm dry conditions have hastened the grasshopper hatch, and mixing stations are working at capacity. Crop damage up to ten per cent. has been suffered at some points, but the situation over the entire pest-ridden area is under reasonable control and no serious trouble is anticipated. Further supplies for mixing stations have been arranged for by the Department to safeguard the situation. Gophers are exceedingly numerous at certain points in the south, and their control is becoming a problem in a few districts where they are causing some crop injury. Hail has occurred in the Lacombe and Sedgewick districts with only slight damage.

The live-stock market has changed little during the last two weeks. Cattle prices continue low but movement is steady. The hog market is brisk with an encouraging trend in prices. Though hog marketings in the south are higher than usual, smaller marketings from the north make it increasingly apparent that sow holdings in many [illegible] have been materially reduced since last season for lack of feed grain. A satisfactory wool clip has been marketed from the south ranges.

Dairy production continues to make a steady increase with prices firm. Egg marketings and prices are also holding firm.

NOT ILL OR "THROUGH" BALDWIN DECLARES

London, Eng., July 3—Prime Minister Baldwin told a Conservative party gathering Thursday night he is not ill, and will "retire when I think fit."

"But it is for me to decide," he said, "and for no one to dictate to me."

He had gone to Chequers, his country residence, last week for a short rest, the prime minister said, because "I was feeling rather tired and not sleeping too well."

"I have learned much from my short holiday at Chequers," he went on, "I have learned there is a procession of doctors between London and Chequers and that the telephone wires were fusing with requests for me to return to London and that I was breaking up and my resignation imminent."

"There is not a word of truth in these statements."

"There have been no doctors at Chequers. The telephone wires never enjoyed such repose.

"We will all retire some day. I'll retire when I think fit."

Reiterating that sanctions could not work without the participation of the United States, Japan and Germany as members of the League of Nations and that Britain was justified in abandoning sanctions because their continued application would mean war, he said:

"War is a very terrible thing, and when once let loose in Europe no man can tell when and how it will stop.

"I am quite content under the circumstance to be called a coward if I have done what I could in accordance with the views of every country in Europe to keep my people out of war."

He said Britain's joining the "mad folly of Europe" in rearming was justified on the grounds of the impositions of sanctions and in the carrying out of any future obligations under the league covenant.

In addition the nation needed a guard against potential dangers which are becoming greater and greater."

Three points in Britain's relations with the continent of Europe were emphasized anew by the prime minister.

Mr. Baldwin said the British government will work for close collaboration between France and Germany, without which "no peace in Europe is possible."

COUNTERFEIT SILVER DOLLAR MOB HEADED TOWARDS EDMONTON

Over the signature of Assistant Commissioner H. M. Newsom, R.C.M.P. chief for Alberta, a special bulletin, warning all Edmonton merchants and bank tellers to be on the look-out for counterfeit silver dollars went out from headquarters Saturday.

R.C.M.P. plainclothesmen from "K" division, seeking to stem the flood of phoney coin at its source, were able to announce Monday after an intensive investigation, that the worthless silver is being minted in the south, probably in or around Lethbridge where mass circulation of the counterfeit cartwheels first attracted police.

The dud dollars are the work of experts. A clear and clean die job they ring true and only their greasy feel to the fingers tags them as imperfect.

Said the sailor to the benign old man: "Adventurous life I've led. Had an operation a little while ago. After I'd come to the doctor told me he'd left a sponge inside me. "Let it be," I said, and there it is to this day."

"Does it pain you?" his listener inquired.

"No pain at all, but I do get terribly thirsty!"

THE REINS OF POWER—A CLOSE-UP VIEW—

JUST TURNED the thirty mark, which is quite young as the age of provinces are considered, Alberta can look back upon a chequered political career. Some of it bright and some of it not so bright, but at least it is a political experience different from the more cut and dried liberal and conservative administrations of some of the older provinces. Hindsight, we are told, is better than foresight, and we must confess that most of the conclusions arrived at in this writing is based upon the actions, sometimes mistakes of past Alberta government or peoples.

In 1905 when the province was incorporated the first necessity was a government of some kind. With a wealth of British history as well as Eastern Canadian history to draw from, what was more natural than that the leaders of the day choose to adopt a similar system with IDENTICAL NAMES for the political parties. Right at the start, politically speaking, Alberta stepped off on the wrong foot. The Dominion itself of which Alberta formed a part, was only as the ages of countries go, a young country and it was considered necessary to impose tariffs on imported articles, partly for revenue, partly for protection. In dominion politics the Liberals were rated as free traders and the Conservatives protectionists, but whatever the ultimate advantages may accrue to the people of all the Dominion of Canada, the immediate welfare of every westerner lay in the ability to obtain his supplies as cheaply as possible. The westerner was compelled to sell his product on an open market and as far as casting his ballot would let him, rebelled against paying more for his supplies than he had to. While there was not nearly so much difference between the Liberals and Conservatives as regards tariffs as commonly believed, and while a provincial government had no voice whatever in the imposing or abolishing of tariffs, right from the start there was a preponderance of Liberal thought and Liberal members in the legislature. We recall with a certain amount of humor an incident in 1908. Working on an Alberta weekly newspaper, we had in the line of work to set up in type a letter written by a M.L.A. Commenting on the letter which in manuscript form was none too easy to decipher, we were told the writer was leader of the opposition in parliament. Our surprised look brought out the information that he was the whole opposition. Whether there was actually only one Conservative member we do not know, but certainly there were very few. The Conservatives in Alberta never had a chance, affiliated as they were by name to the dominion body. Our parliamentary system calls for a government and an opposition, and it is essential for the well being of the province that periodic changes occur. Briefly, because the Liberals were the only party the western farmer believed represented his viewpoint, they were allowed to stay in power too long. But even so, the Liberals, according to governmental ideals then in vogue, gave good government. A brand new province was handed over to them and in a period of very rapid development tried to keep pace, perhaps it would be true to say, tried to set the pace, for the province. Catering much to the supposed needs of farmers, they attempted to create prosperity via the dairy route by passing the famous cow bill which suffered an untimely demise, and they were the instigators of the present agricultural schools. We believe much work was done along these lines in the attempt to build up a prosperous province. Hon. Duncan Marshall was Minister of Agriculture and he was trying to duplicate the agricultural conditions of Ontario here.

Quite recently we were reminded of the installation of the schools of agriculture when looking through some old personal correspondence. Originally it was intended that there be four permanent schools of agriculture, located at Claresholm, Olds, Stony Plain and Vermilion. Three were actually erected and at Stony Plain a section of land was bought, a manager's house and foreman's house erected and handsome barns put up to house a herd of fine Holsteins purchased in Ontario and shipped to Stony Plain.

The building of the school itself hung fire, but in the letter received by us over 20 years ago from an elderly gentleman who has long since left this vale of tears, we were assured that the school would be erected. Some of the boxes of surplus material from Olds had, he wrote, been labelled Stony Plain. They probably were, but an election came along and Stony Plain choose to elect a Conservative instead of Honest John MacPherson, and that settled the school question for good as far as Stony Plain was concerned. The government operated the farm for some time, at we believe a loss, later rented it and if we remember right, the U.F.A. sold it.

But while the preponderance of opinion was decidedly Liberal, the inevitable public desire for a change was brewing. The turnover came in 1921 when the U.F.A were swept into power. This was another mistake. Here we do not wish to be misunderstood. The U.F.A. as a social and economic organization was probably the strongest and most useful organization this province had seen, but it was imperilling its own existence by entering politics. In the first burst of enthusiasm it was argued that only bona fide farmers could be members of the U.F.A. and candidates must be members. Reasoning thus, no one but a bona fide farmer could aspire to office, a rather unusual belief for a democratic province to adopt.

Undoubtedly there is a strong connection between government and economic groups and a strong economic group like the U.F.A. would be tempted to gain political power in order to look after its own people, but having one strong economic group in power was departing from the established democratic principles of Canadian and British parliamentary practice, and was sure sooner or later to come to grief. Again, like the Liberals, the U.F.A. gave the province fair enough government, and like the Liberals the U.F.A. catered to the farm element, but in a different way. Where the Liberals stressed inovations destined to enable the farm element to help itself, the U.F.A. by sponsoring farm co-operatives endeavored to help farmers more directly. Both Liberals and U.F.A. were caught in the development wave, the Liberals chiefly devoting their attention to schools, colleges, parliament buildings, railways, telephones, etc., while the rapid advance of automotive travel forced the U.F.A. into an extensive road building programme. Both parties were good borrowers and good spenders as the provincial debt proves, but there were no graft sensations connected with either one.

But even the power of direct political representation by the largest economic group in the province, after fourteen years, began to lose its thrill. With each succeeding election, the U.F.A. group was losing ground, to say nothing of the occasional member "crossing the house." Once again the inevitable desire by the people for a change was making itself felt. But many people were in a quandary. They could not support the Conservatives due to this party's dominion policies, imaginary and real, and they did not want to go back into the folds of Liberalism from which in 1921 they had fled. The U.F.A. by toying with social credit made an opportunity for a brand new party, which as far as the government of that time was concerned, got completely out of hand. Despite the most strenuous efforts of the U.F.A., Liberals, Conservatives and C.C.F. to stem the tide of social credit, it gained amazingly, and as everybody knows, was swept into power. And this was Alberta's third major political blunder. Again we must say we do not wish to be misunderstood. The present government is a fair cross section of Alberta citizenry, and as such are a good enough group of Alberta legislators—as good as those preceding them. But like both the Liberals and U.F.A. the government can be classed as an orphan. This is what we mean. In 1905 the Conservatives in Alberta were, due to their dominion affiliation and the particular interests of Albertans, unacceptable. This left the Liberals alone in possession of power, APPARENTLY in perpetuity—an orphan party. The U.F.A., due to its rise from an economic group, the largest economic group in Alberta, to political power, with its special appeal to class interest also stood alone, politically speaking. The Social Credit party also stands alone on the single plank of a new monetary system. It was the new monetary system they stressed, it was on the strength of promises along these lines that the present government was elected, and no matter what else they do, it will be along these lines that they will ultimately be judged. Numerically strong and in power—they stand alone, politically speaking

And what of the future? Parliamentary practice calls for a government and an opposition. Much fun has been poked at the Tweedledum-Tweedledee theory of government, but beneath its SEEMINGLY innocuous system, there are genuine benefits which accrue to the body politic. But certainly, if we are to follow, here in Alberta, the two party system of government, both parties must have a relatively equal appeal to the electorate, and this is something that has not yet happened in Alberta. Assuming that our province is large enough and populous enough for a two party system, the parties should certainly be free of all influence from Dominion politics. We would almost go as far as to say they should be known by two different names. With two parties each having a relatively equal appeal to the electorate, the vagaries of human nature would take care of the periodic change that, if the best interests of the people are to be served must take place With an opposition strong enough to test, not necessarily obstruct, every step of a governments' progress, sane and sound legislation would result and with periodic government changes occurring, every government would be moved to do its utmost for the benefit of the province and all the people therein

Turning His Back

An efficiency expert was called in to give "the once over" to an old-established business. The first thing he encountered, as he was being shown round by the manager, was a file of seven workers, of whom the first six were pushing barrows while the seventh was pulling his barrow behind him.

The expert stopped him: "Do you mind telling me, my man, why you are pulling that barrow when your comrades are all pushing theirs?"

The toiler looked at him sourly, "Because I'm fed up with the sight of it," he replied, and proceeded on his way.—El Paso World Herald.

Try It

"Very well, how do you spell 'need,' meaning to need bread?"

"Knead, of course."

"Wrong?"

"Wrong? Meaning to knead bread, you said, didn't you?"

"Yes "

"Well, it's knead."

"Not at all; you knead dough, but you need bread."—Wall Street Journal.

Wild Oats and Sow Thistles Too?

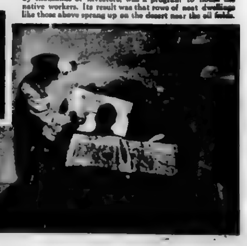
A man who took great pride in his lawn found this year, to his dismay, a heavy crop of dandelions. He did his best to uproot them, trying every known device to get rid of them

As his efforts were unsuccessful, it occurred to him finally that as the government was helping the farmer and rendering so many services, he should write to the Department of Agriculture about his dandelions. So he depicted in a letter his woes to great extent, enumerating all the things that he had tried and done, and ended his letter by saying, "What do I do now?"

In due time a reply came, stating, "We suggest you learn to love them."

A HOUSING PROBLEM SOLVED... Before Imperial Oil interests developed the oil fields of Peru there were homes there such as that on the left. Foremost in the development, which involved expenditures of great sums of money put up by thousands of investors, was a program to house the native workers. Its result was that rows of neat dwellings like those above sprang up on the desert near the oil fields.

THEN THE PHOTOGRAPHER RAN ... This picture of a great wave coming aboard an Imperial Oil tankship on the Atlantic Ocean was snapped by one of the crew whose next act was to "step out of it" into the shelter of a deckhouse.



HE CAN'T GO WRONG...

Clear, reliable road maps and courteous, helpful road and tourist information are only two of the extra services gladly given at Imperial Oil stations. ... With Imperial touring information and Imperial gasolines and motor oils, you just can't go wrong. Drop a line to Imperial Touring Service, 92 King St. East, Toronto, for free road maps marked with the best route for that motor trip you are planning.

LAKESHORE

Mr. Olaf Johnson who is in hospital at Edmonton. Mrs. Johnson is up there with him. His two grand children, Shirley and Gerald of Fairbanks, Sask., are here. We hope soon to hear of his speedy recovery.

Mr. Reub Rogers has also been rather ill with a touch of paralysis, but is we hear getting over it, so keep coming right along, "Reub". You've a long life ahead yet.

Mr. Chas Blake had the misfortune to have quite a sum of money stolen from his house one evening last week whilst he and the boys were milking. The police are investigating same.

It looks as if we'll need a few G men here soon, but the Mounties always get their man, so guess we can dispense with G men.

Divine Service was held here at the school last Sunday and was conducted by the Rev. A. Wallis of Tofield.

A few Lindbrook friends attended the birthday barn dance at Mr. Tommy Jones', Lakeshore, and report it a "splenditious" affair. Many happy returns of the day, Tommy!

QUALITY COUNTS

Only the best of everything should find its way to your dinner table, but above all things, the meat should be beyond question. Experience has taught us how to handle our product from beginning to end and with us it is—

QUALITY FIRST

Customers will oblige by letting us have their orders for week-end supplies on Saturday morning. We will then be able to give better service.

J. W. CHAPMAN,
Secretary, Sports Committee.

Messrs. Johnstone Ferguson, McSperran, Letourneau and C. Morden spent a day in Vegreville last week.

Mr. and Mrs. J. Brenneman, accompanied by Bishop N. Roth and Mr. James Brenneman returned recently from a visit to Oregon, Montana and High River.

Miss Ardis Wood is spending some time at her home here.

Mr. J. Brenneman is home on vacation from Goshen College, Indiana. In September he intends to enter Medical College at Omaha, Nebraska.

Mr. and Mrs. Clipston of Wainwright visited Mr. and Mrs. Jas Bracegirdle here last week. They were accompanied by Mr. and Mrs. T. Lissimore of Wainwright.

The Social Credit meeting at the School here last Friday was packed. The speaker was Mr. Baker of Ft. Saskatchewan who touched on many subjects and answered many questions. Evidently the Social Credit following here has not lost interest in the movement. A study group was formed with Mr. Lancaster President; Mr. J. Bailey, Vice-Pres. and P. McMullen Secretary-Treasurer and a meeting is to be held on Tuesday, July 7th at the School in the evening.

EDMONTON EXHIBITION GIVES TICKET to GROUNDS to SCHOOL FAIR WINNERS

The Edmonton Exhibition Association are evidently fostering the exhibitor spirit, as according to information received by Mr. Moan, secretary of the Tofield district school fair association, there is a ticket good for entrance to the grounds at Edmonton fair for every boy or girl who was awarded a first prize at the 1935 Tofield school fair.

Those desiring to pick up these tickets should get in touch with Mr. Moan without delay.

Jean and Leda Baptist returned this week after vacationing at the coast.

CHIPMAN

A farewell party was held at the home of Miss Eva Volk of Chipman on Saturday evening last, who is leaving for her home in Saskatchewan. Invitations were sent to the many friends of Miss E. Volk and those who were present were: Miss Nancy Masurak, Mrs. B. Rennsel, Miss Olga Shulba, Miss Rosie Sheptycki, Miss Lena Sheptycki, Miss Daisy Jackaski, Mrs. Edna Gallagher, Mrs. Nancy Kulka, Miss Edythe Mahoney, Miss Mae Shertel, Miss Eileen Anderson, Miss Alice Hohlwaychuk, Miss Mae Law, Miss Ellen Malcolm, Miss Mildred Malcolm, Miss Katie Stasko, Miss Milly Procyk, Miss Anneth Halawaychuk and Pearl Halawaychuk. Louis Wuetherich, Victor Letawsky, Joe Wuetherich, Grant Foster, Joe Mahoney, Albert Warshawski, Harry van Derlee, Johnny Masurak, Pete Procyk, Edward Malcolm, Pete Shulba, Tony Zimmer, Laris Kort, Frank Zimmer and Stanley Warshawski. The party was sponsored by Mrs. M. Kulka, Mrs. Gallagher and Mrs. B. Rennsel. Games were played and a guessing contest was had. Following the games a very delicious lunch was served, and during lunch, everyone stood, joined hands, and sang "For She's a Jolly Good Fellow", followed by "Auld Lang Syne." Miss E. Volk was then presented with a lovely bedspread. A wonderful time was had, and everyone enjoyed themselves immensely.

E. S. KALLAL SELLS PUREBRED HEREFORDS TO GOVT.

Mr. E. S. Kallal recently sold two extra good purebred Hereford bulls to the Dominion government. They will be taken to the Wainwright park where they will, with three other bulls, be used in the crossing experiment with buffalo cows.

KETCHAMOOT

A pleasant afternoon was spent at the Brown home Thursday afternoon when Misses Janet and Ethel Brown entertained the Social Hour Club.

The School Board held a meeting at the John Brown home on Friday evening for the purpose of engaging a teacher. Miss Nellie Lindsay of Innisfree was engaged for the coming year.

Miss Nora Kennedy of Poe is assisting Mrs. C. A. Ingram with her home work.

Mr. and Mrs. John Lee and family took in the Edmonton exhibition on Monday.

Mr. and Mrs. Herman Lawson and family, Mr. J. H. Ingram, Gertie, Kathleen and Jimmie, Lee Ovaldson, Mrs. Owen, Mrs. Davison, William and Lyle Coombes were Edmonton visitors Tuesday to take in the exhibition.

Mr. and Mrs. Coombes and children motored to Sideview near St. Paul on Thursday to visit Mrs. Coombes' mother and other relatives. They returned home Sunday evening.

Mr. and Mrs. C. A. Ingram are the proud owners of twin calves. Twin calves were also born on the Coombes farm earlier in the summer.

Mrs. Whi[illegible] daughters Marguerite and Joyce, sons Ralph and Neal, Mrs. Lerbekmo and son Jackie and Jack Fair left on Thursday of last week for a ten day holiday at South Cooking Lake.

Mr. and Mrs. Roberts and family of Poe were Sunday guests of Mr. and Mrs. A. F. Shultz, Miss Margaret remained for a longer visit. Miss Maude Wildman is also visiting at the Schultz home.

The Ketchamoot picnic under the auspices of the Ladies' Aid was a decided success, the day being exceptionally fine. A large crowd was present and both tables and stand was well patronized. The sports were run off with out a hitch and included baseball, softball and numerous foot races, etc.. We wish to thank one and all who so kindly helped in any way to make the day a success and they were many. The receipts after all expenses were paid at the tables, $68.41; at the stand $35.45.

TOWN COUNCIL MEET

A regular meeting of the town council was held on Monday evening July 6th, at which were present, Mayor Bruce, Councillors Lovell, Swift, Hammond and Law. Business transacted was purely of a routine nature.

Mention was made of the lack of a suitable hall in the town and after some discussion, Mayor Bruce was appointed to get the feeling of the people regarding the selling of shares in order to establish a fund. The suggestion was that a number of people buy one or more shares at $25.00 each, the money thus obtained being used to cover the first cost of building the hall.

SCHOOL BOARD MEET

A meeting of the school board was held on Tuesday evening July 7th. Present were Chairman, Mr. Harrison, and trustees Dodds, Robinson and Chapman. Prior to the meeting the trustees made an inspection of the school buildings. Certain minor repairs and some alterations to the windows in the primary school to improve the lighting were ordered done. High School Inspector's reports on the High School staff were read and considered. Both teachers received what were considered satisfactory reports and were given a rating by the inspector of V.G.

DR. AND MRS. McPHERSON ADDRESS SOCIAL CREDIT MEETING

Despite a warm night, and no election in the immediate future a fair number of people were present at a Social Credit meeting held at the curling rink on Tuesday evening. Dr. and Mrs. McPherson were the speakers and at the commencement Mr. Johnston Ferguson was elected chairman.

Mr. Ferguson in introducing the first speaker, Mrs. McPherson, spoke for a short time on Prosperity Bonds saying in effect that this method of financing public works was better than borrowing money from the banks.

Mrs. McPherson said, in part, that with the Dr. and herself addressing the meeting as if it was a family compact. At least that was the way it appeared to her when elected to the presiding of the Vegreville Constituency S.C. Association. She accepted the office with reluctance because of this and recently at Vegreville she wanted to withdraw but was persuaded not to. Now she was not sorry as she felt she should work to spread the news of this great movement.

After all, we are all but one large family who have but one opposition —Finance. She did not name the bankers as they themselves were in the toil of finance and some were getting let out. She had no apology to offer for carrying on the work. They were in the process of re-organizing the constituency, and would like to have an active group in each polling division so as to have a point of contact with the electors. Then two or three polling divisions would be formed into a zone. Zone bodies would send delegates to constituency conventions. Constituency bodies would send delegates to divisional convention and the divisional body in turn would send one delegate to the provincial convention. Thence to the cabinet ministers. Thereby a direct line of approach from the small study group to the provincial cabinet would be provided. At the recent Vegreville constituency convention it was decided to suggest to the study groups that they take up the study of the book "Money." They would go farther and suggest that examination papers be prepared and examinations held based on the study of the book. She had taken this matter up with the Premier and he had thought it a splendid idea. The premier even went so far as to say that he had a suitable book and would prepare the lessons himself.

Dr. McPherson and the speaker did not come as public speakers but we all know something is wrong and the Social Creditors are trying to remedy it. Money is the least understood thing of all. There was nothing in the school curriculum about money. If a school child were not taught arithmetic it would fare very badly when it grew up. We, as regards money are no better. If we had known we would not have allowed conditions to drift as they have drifted. The subject of money was not taught in the schools because the schools are supported by finance. Some writers have left us with some wonderful works, Mayor Douglas, Arthur Kitson, etc. It was not long before these books were expelled from colleges and schools.

The speaker then went on to describe the growth of the money system from the days of straight barter to the present system of the gold standard. The gold standard, said the speaker, is as hollow as anything can be. Gold was used for foreign trade but was unnecessary.

Many a party was swept into power on a favorable balance of trade, but nations do not exchange money, they exchange goods.

A few years from now, when we read of the past manipulation of money they will look upon us as an insane race, depriving ourselves of every comfort to support the financiers. With every public enterprise we have had done in the past we have paid interest and still owe the principle. The new era is here, said the speaker, we all should join it. If we do not we are selling ourselves to the financiers. The whole world is in the clutches of two families. New times demand new men and new ways.

Dr. McPherson opened his address by saying that it was easy to see there was one speaker in the family. He said in part: when the government took office they were confronted with short budgeting. The previous government knew when you touched a man's pocket he reacted and with an election approaching, they budgeted for less money than they actually needed. Before the present government took office people were told taxes would be lowered, not raised, but such was the condition of the provincial treasury that it was found necessary to borrow money to take care of fixed charges. The previous government had not provided for this. They then had to balance the budget. The financiers congratulated them for this. With other things the financiers disagreed, so the press said, but the press was not always correct. Then they had to budget for their own requirements, so they had to put the two per cent sales tax on. They preferred to pay as they went. The financiers said it was terrible but not a word about those taxes we do not know about. The Alberta government thought it much wiser for the people to know what they were paying. While some people were saying the credit of the province was ruined, only two weeks ago Alberta floated a loan in Great Britain in twenty minutes. The speaker dealt with the seed grain question saying that inasmuch as the mortgage companies owned the land of most of the applicants, the government felt they were the people who should furnish the seed. Dealing with the interest question and prosperity bonds, during which he said this government is the first government in the British Empire to defy

(Continued on back page)

LOCAL AND PERSONAL

Mr. and Mrs. R. P. Shitch and family of Grande Prairie visited friends in Tofield one day last week.

Mr. and Mrs. H. Hicks and family of Edmonton were guests of Mr. and Mrs. Ed Hicks for a few days last week.

Mr. and Mrs. Norman Scott and Norma left for a holiday at the Coast on Friday.

Miss L. Ross left on Saturday for her holidays.

Mrs. Dr. Law and boys returned from Bawlf after spending some time visiting there.

Miss Muriel Malcolm and Mr. W. Taylor are visiting friends at Wetaskiwin.

Mrs. Wilmore of Edson is visiting her parents Mr. and Mrs. H. Kendall for a few weeks.

A good number of Tofielders are attending the Edmonton Exhibition this week.

The Rev. D. K. Allan and Graham returned from Banff on Monday evening.

Mrs. Currie and little daughter left on Thursday for Cold Lake, where they will visit Mrs. Currie's parents.

A stampede and rodeo show is being held at Tofield on Friday and Saturday, July 24th and 25th. Bills are out advertising this event and it should draw a good crowd. Mr. Art Ginther is manager and has put on a number of stampedes at different points.

NEW BANK BUILDING TO BE ERECTED

A new bank building to take the place of the present Bank of Montreal structure will soon, we understand, be erected. The building will be of one storey and will be erected on the corner site north from Taylor's store, and east of Swift's garage. It will be 25 x 40 ft., stucco finish and when completed, will add to the attractiveness of that section.

The regular services of the United Church will be held on Sunday, July 19th: Ketchamoot, 11.00 a.m.; Lakeshore 2.30 p.m.; Tofield 7.30 p.m.

LITTLE AILEEN IMLER DIES WHILE AT LAKE

A sad occurrence took place while Mr. and Mrs. Imler and family were holidaying at Pigeon Lake. Their little daughter, Aileen, aged 20 months died from heart failure brought on by an attack of whooping cough. The little one had been poorly for some time, but it was believed the whooping cough was on the mend. On Sunday morning she collapsed after an attack of coughing and despite efforts to revive her, passed away. The funeral took place at Wetaskiwin on Tuesday.

The Town of Tofield Office will be closed from July 20th to August 3rd.

Mr. and Mrs. A. B. Clutterham and Miss Lewis left for Oregon on Thursday of this week. Miss Lewis was returning home and Mr. and Mrs. Clutterham are on vacation.

SUIT OWNED HERE ONCE WORN BY BATTLE OF NILE VICTIM

(Reprinted from the Edmonton Journal)

About the year 1782 a two-year-old boy whose name was Hawkesford and who lived in Wales wore a little tan suit with 20 silver buttons that surely must have made the little Welshman feel very well dressed indeed. The one-piece suit reached down to Baby Hawkesford's ankles just as it does today to three-year-old Donnie Hooper's ankles. Donnie donned the suit and had his picture taken by the Journal's photographer.

His father, Lynn Hooper, who lives in the Manning block, brought the suit to the Oldest Anything editor to show him how little folk dressed 'way back 175 years ago. The suit is owned by E. W. Hooper, farmer of Tofield, who is Lynn Hooper's father.

It was the fate of the original owner of the suit, who grew up to be a medical officer in the British Navy under Lord Nelson, to be killed in the Battle of the Nile in 1798 when the British were fighting the French. Medical Officer Hawkesworth was then 18 years of age.

Little did the brave officer of the forces of His Majesty King George IV dream that a baby suit of his would appear in Canada 175 years later but here it is worn by a far distant chubby little Canadian relation, all but one of the 20 silver buttons still in place, a patch here and there covering worn spots made by an 18th century little boy!

Mr. Hooper, Sr., who has other antiques which the O A editor will write about later, got the suit from his great aunt, Jane Hawkesworth, who died in Wales in 1912. Mr. Hooper came to Canada from Newport, Wales.

CORRECTION

The Anglican W.A. will hold their annual garden party on Wednesday, August 5th, and not August 12th as announced in these columns last week.

YOU CAN HELP US TOO

Publishing a weekly newspaper is rather a monotonous task. As the weeks roll round there is the same mechanical work to be done, the same searching for news to fill the columns and the same expended effort to procure sufficient advertising to make the venture a paying proposition

But it is our work and as such, we must of course, keep going. Subscribers often help very much, not only by paying up their subscriptions, but by giving us a few words of praise and encouragement and naturally, some times friendly criticism.

We are always pleased to receive all three and there is no limit to the interest subscribers may take in this publication.

The Tofield Mercury is a country weekly newspaper published in the interests of this district. We neither aspire to or expect a huge circulation, but hope we have and are able to maintain the interest of the majority of residents of this district Allied to no party or creed, the occasional e pressions of opinion are given for what they may be worth at the time they are given and are always intended to be constructive—not destructive.

Readers may and can help greatly by taking an interest in their Home Paper.

THE MERCURY

THE CANADA YEAR BOOK 1936

The publication of the 1936 edition of the Canada Year Book is announced by the General Statistics Branch of the Dominion Bureau of Statistics The Canada Year Book is the official statistical annual of the country and contains a thoroughly up-to-date account of the natural resources of the Dominion and their development, the history of the country, its institutions, its demography, the different branches of production, trade, transportation, finance, education, etc.—in brief, a comprehensive study within the limits of a single volume of the social and economic condition of the Dominion. The new edition has been thoroughly revised throughout and includes in all its chapters the latest information available up to the date of going to press.

The 1936 Canada Year Book extends to over 1,150 pages, dealing with every phase of the national life and more especially with those susceptible of statistical measurement Attention may be called to some of the special features of the present volume. The statistical summary, included in the introductory matter, has been extended this year. A special article "Canada on Vimy Ridge" prepared by Colonel A. Fortescue Duguid, D.S.O., B.Sc., R.C.A., Director of the Historical Section, (G.S.) Department of National Defence, has been included in Chapter II This is apropos in the light of the pilgrimage to Vimy and the official unveiling of the Vimy Memorial arranged to take place this month. Improvement has been affected in the presentation of the financial statistics of the provincially-controlled schools of Canada by the collection of data on a more comparable basis from all provinces. These are presented in Chapter XXV, Tables 8 and 9. Chapter XXVI has been revised; sections dealing with the public health authorities and a brief sketch of the origin and growth of the different classes of institutions in Canada have been included.

The death of His Majesty King George V. on January 20th, 1936, received with deep sorrow throughout the Empire and with world-wide regret, and the succession of King Edward VIII to the Throne, have been appropriately marked by the reproduction, as frontispiece, to the official Proclamation of the Government of Canada made on Jan. 21st, 1936, accompanied by the latest official photographs, obtained through the courtesy of the respective Court photographers.

The Volume is illustrated by many maps and diagrams and the latest available data are everywhere included.

Owing to the urgent need for economy in the distribution of Government publications, it has become necessary to make a charge to all individuals receiving the Canada Year Book Persons requiring the Year Book may obtain it from the King's Printer Ottawa, as long as the supply lasts, at the price of $1.50, which covers merely the cost of paper, printing and binding. By a special concession, ministers of religion, bona-fide students and school teachers may obtain paper-bound copies at the nominal price of 50c each.

HOW MUCH MOISTURE DOES A WHEAT CROP UTILIZE?

HOW IS THE MOISTURE STORED IN THE SOIL?

In spring and early summer, when at times high temperatures occur or dry winds blow or rainfall is scanty, diverse opinions often are expressed as to whether or not the wheat plant has been damaged, and if damaged, how much harm has been done?

Ancient agricultural records reveal that for thousands of years men have wondered about these things, but until quite recently no really accurate information on the subject was available.

During the past few years, however, a substantial increase in knowledge of how moisture is retained by the soil, and how the wheat plant utilizes this moisture has been made through scientific investigations conducted by Mr. E. S. Hopkins, Dominion Field Husbandman, and the late Mr. S. Barnes, at the Dominion Experimental Station, Swift Current:

The studies of these scientists have brought to light certain important information and principles, some of which may be stated or interpreted as follows:

(1) Under average Western Canadian conditions, it takes from 1,000 to 2,000 pounds of water to produce one pound of grain. Or, in other words, it requires from 30 to 60 tons of water to produce a bushel of wheat.

(2) An average summerfallow conserves probably about 5 inches of moisture. (This includes 1.5 inches conserved during the fall previous to the summerfallow.) Then, on the average an additional of about 1.5 inches is conserved during the fall immediately preceding the crop; then the average rainfall for the growing season, April 1st to July 31, in the West, is approximately 8 inches. Therefore, on an average "summer-fallowed" field a total of 14.5 inches of rainfall should normally be available for the use of the wheat crop.

(3) Winter snowfall adds but little to moisture reserves, the reason being that the ground freezes before the snow occurs, then the snow melts runs away or is evaporated before the ground thaws in the spring.

(4) The roots of the wheat plant extend, under ordinary conditions, to a depth of between 5 and 6 feet in the soil.

(5) By harvest time, a crop of wheat, whether produced on stubble or on "summerfallow," has usually completely exhausted every scrap of available moisture in the soil to the depth of the roots, some 5 or 6 feet.

(6) The belief, held quite generally, that moisture moves continually upwards in the soil capillary action has been found to be incorrect. On the contrary, it is discovered that the movement of moisture upwards to the surface is so exceedingly slow that it may be considered to all intents and purposes to be negligible.

(7) Rain falling upon the soil tends to move fairly quickly downward, the depth of penetration being determined by the amount of rainfall and the state of the soil at the time the rain occurs. Rain penetrates quicker when the soil is moist than when it is dry. The downward movement apparently continues, becoming slower with depth, but there is a tendency for the area penetrated to become equally saturated quite quickly

(8) Once rainfall has penetrated the soil 3 or 4 inches, that is, to a level below the usual depth of disturbance by implements, atmospheric conditions seem unable to deplete the moisture. It is then apparently only given up by the soil through the medium of the roots of growing plants.

(9) A substantial percentage of the rain that falls is quickly evaporated into the atmosphere. This applies particularly to showers of less than a quarter of an inch. But a certain amount of rainfall is lost by evaporation with every rain. Loss from evaporation is one of the important reasons for relatively low yields of crops.

(10) Under average farming conditions, weeds also utilize a substantial percentage of moisture that otherwise would make wheat or other grain.

(11) Contrary to general opinion, wheat plants do not seem to be injured directly either by hot temperatures or drying winds. It is the lack of moisture, or the drought, that damages the plant. It has been noted that under very adverse conditions of heat and dry winds, crops that are irrigated do not suffer.

(12) Also contrary to general opinion, hot drying winds do not "lap up" moisture from the soil, the reason being that during such periods the top two or three inches of soil is already dry, and moisture that has penetrated below that depth is apparently safe from the action of heat or winds. As already stated, most moisture is lost or "lapped up" by the atmosphere during or immediately after rains and not in dry spells.

(13) Until the wheat plant is from 4 to 6 inches high, it uses relatively little moisture. From this time on, until about the last week in June, the daily use increases. From April 1st to June 30th the plant normally has used much less moisture than on the average falls Therefore, a reserve has been built up for later use. From the end of June, however, until July 30th, the use of moisture by the plant proceeds at an almost incredible rate, the crop during this short period utilizing all the moisture the soil has previously stored up.—Searle Grain Company.

WHEAT A NATIONAL PROBLEM—

THERE WAS a time in this province when, comparitively speaking, the farmer was, to use a slang term "sitting pretty". New and fertile land, ample rainfall and good crops at which were then considered good prices, made conditions much less uncertain than they are to-day. This was before the so-called prosperity period of the late teens and early twenties. With the advancing of the years into the thirties, a number of things came into existence that caused the farmer of the North American continent plenty of grief. It is not our intention to attempt to enumerate them, mostly they are well enough known. Now, we have observed that as regards free advice, the agriculturalist is the luckiest of persons. Let any set of circumstances combine to make the lot of the farmer an unhappy one, then numerous people all over the land begin formulating plans for the farmers' benefit. It is true that the plans so formed almost invariably result in the farmer being required to DO something while those doing the planning are satisfied with THINKING OUT something. The gradual piling up of wheat surpluses immediately brought forth suggestions as to how to bring them down. These suggestions ranged all the way from sinking wheat in the ocean to compulsory curtailing of acreage. No less an authority than Mr. Broomhall, so we read, was quite convinced that Canada was making a big mistake in planting so many acres, that surpluses of wheat which were having a depressing effect upon prices could not be reduced if present acreages sown were continued. Perhaps there are some good grounds for his reasoning. Other men, well known in their respective spheres, spoke about agricultural planning. Planning, they agreed, was the keynote of the industrialist, who when demand slackened, immediately curtailed output. It was suggested the agriculturists follow suit. Even when reminded of the uncertainties of the weather, a prominent United States citizen stated that even the weather could be averaged out. We don't know about this, but certainly a fellow would have to be a wizard to do the averaging.

The drouth of 1934 created havoc in large sections of the United States and that country which normally is a wheat exporting nation was compelled by force of circumstances to be an importing one, which as it so happened, was lucky for Canada. It was explained by meteorologists that that year climaxed a twenty-five year cycle of dry years and that commencing with the 1935 season the North American continent would enter upon a cycle of wet years. Certainly the year 1935 was an improvement as regards moisture for the great wheat areas of this continent, so much so that there was in many districts too much rain and not enough sunshine, with accompanying grief from rust, bloom rot, etc. No one need to be reminded of the intermittent rains during early threshing season or the heavy snows which came later, and it appeared as if the weather boys had predicted correctly. But now again from the south, from Eastern Kansas and the Dakotas and from southern Alberta come reports of a hot blistering sun daily burning up millions of acres of crops. And once more it appears as if the United States instead of being an exporter of wheat will become an importer, quite likely of Canadian wheat. Those men who would place agriculture in the same category as industry, as regards planning, must have by this time, had their faith sorely tried. For the plain truth is that planning as far as agriculture is concerned can only be carried as far as actual planting. From that point on all planning as regards yield is useless. Even the planning of acreage to be sown is of little or no real value for unpredictable weather conditions may cause one acre planted to produce 50 bushels of wheat or nothing, or anything in between.

In the southern portion of the Canadian West prairie country and in arid portions of the United States, governments have had to step in and relieve the distress created by the ravages of extremely hot weather. The necessary requirements for man and beast had to be assembled outside the territories and as far as these territories were concerned, wheat just naturally, temporarily at least became a national problem. This does, as it were, make wheat a national problem on two counts. Readers will remember that it is only a brief year or so ago that national government intervention was necessary, both in Canada and the United States because of the surplus. Now in certain areas in both countries government intervention of a different kind is necessary because of the shortage.

Writers, public men, even individuals have of late years been repeating with all the emphasis of a gospel truth, that mankind have completely solved the problem of production, and that distribution was the only thing to worry over. In the light of some of the information regarding crops and weather conditions coming over the wires at present, it is wise to pause awhile, examine the statement and try to arrive at a decision as to whether it is literally true or not. The wheat industry undoubtedly during the past twenty-five years has undergone some great changes. Vast areas in Canada, U.S.A., Australia, South Africa, India, Argentine and other countries have geen brought under cultivation. But side by side with this great expansion in wheat acreage there has been going on an increase in population. The increase in the consumption of wheat has not kept pace with the increase either of wheat or the potential possibilities to produce wheat, but apparently the increase of population is continuous. A brief one hundred years ago the United States was a sparsely settled country with the centres of population mostly around the sea board. Now well over one hundred millions of people there, are to no small degree dependendent upon the wheat crop for their very existence—and the wheat crop now, as it always has been, is dependent upon the weather.

It does not seem possible that with the wheat growing areas of the world as widely scattered as they are, for a world wide short crop to occur. Yet who would be brave enough to say such a thing could not happen. There have been periods of food shortages before, serious ones, and to-day, the world's capacity to consume is much greater than it was twenty-five, fifty or one hundred years ago.

So, in more ways than one it would appear as if the wheat problem is a national one; it would almost be true to say, an international one. Just what methods should be used is too hard a subject for us to discuss here now. There is just one thought. If it is good business for governments to hoard gold and silver as a protective measure, which we believe to be the case, it would appear to be equally good business for governments to devise machinery so that its people should have a relatively even supply of wheat available throughout the years.

THE STORY OF A PAPER PAGE—

(Reproduced by courtesy, Provincial Paper Ltd.)

PAPYRUS, Parchment and Vellum were the writing materials commonly used in the Western World before the introduction of paper. We still retain the terms parchment and vellum to designate certain grades of paper, but papyrus to many of us is only the name of a race horse of a few years ago. Although much has been written about these materials in the popular press of to-day, many interesting facts relating to them are still new to most of us.

Papyrus, a term derived from the Greek, is the name of a reed plant belonging to the family of sedges, unknown to-day but prolific in ancient Egypt where it grew often to a height of ten feet in the immense marshes of Lower Egypt. The papyrus plant was of great economic importance, the bark being made into cordage for sails and the roots used for fuel.

The stem was split into two parts and after the removal of the bark, the pellicles or thin layers of fibres were flaked from the stalk, arranged at right angles in a double layer and pressed together with usually only the Nile water as an adhesive or a thin paste of wheat flour. The Egyptians made it up into rolls 10 inches wide of which numbers have been found 40 to 50 feet long. First used to replace sheep's bladder, bones, potsherds, etc., for records in 4000 B.C., papyrus became the chief article of commerce in ancient Egypt. Alexandria with its great University of learning was the centre of the trade.

By the time of Christ, the manufacture had become a monopoly, each sheet had to be marked with a stamp denoting its authenticity and value which is an early example of the use of a "watermark". It is said that the Egyptians were able to finance most of their wars from profits derived from the Papyrus trade. A sheet 10x12" sold for the equivalent of the modern quarter. It became very popular with the Romans who called both the papyrus and the document written on it—"charta". The size of the sheets seldom exceeded two feet in length. Different names were used to designate the size and quality of the sheets. "Imperial" the largest sheet and also the best quality, was used for letter paper by most prominent Romans.

Papyrus was imported into Europe up to the 10th Century A.D., and for a long time all diplomatic instruments were written on it on account of its beauty and adaptability of length. However, papyrus was poorly fitted for use in books and was gradually superceded first by parchment and then by paper.

Parchment is the term applied to the skins of animals which have been dressed and prepared for writing. Although parchment, which was common in Ancient Persia and was used by the Ionian Greeks in 500 B.C., is possibly a more ancient writing material than papyrus, it did not come into general use until the 2nd Century B.C. At that time, 190 B.C. Eumines, King of Pergamus endeavored to found a library which would surpass that of Ptolemy Philadelphus at Alexandria, but in so doing he enraged Ptolemy to such an extent that all export of papyrus to Pergamus was forbidden. Accordingly a substitute had to be perfected and parchment was brought into general use. No doubt the King handed the problem over to his research staff with dire threats of execution if they failed

Parchment is ordinarily made from sheep, the skin being fleeced, dipilated, scraped, polished, treated with lime, stretched and dried. The skins of lambs produced a better grade than sheep and the skins of unborn lambs, known as 'virgin parchment' was like vellum in quality. Eumines' famous library was written on goatskin The durability of parchment increased its popularity and although papyrus was cheaper, parchment was used for more permanent records. By the end of the 7th Century it had replaced papyrus everywhere. The most ancient manuscripts on parchment date back to the 3rd Century.

Parchment was chiefly prepared by monks in abbeys. The great market was in Paris where once a year in the second week in June, a fair was held in the St. Denis plain. The court and universities had first choice to buy up their supply for the year. By the 10th Century, a process of bleaching had been

THE WORLD WHEAT SITUATION

On the 1st of June Canadian One Northern wheat was selling for around 75c at Fort William, and on July 6th the close was 92 3-8c. This strengthening of prices was due to the destruction of the spring wheat crop of the United States by drouth and the serious damage to the Western Canadian crop from the same cause. It is estimated that the intensely hot dry weather of the last month has caused the loss of one quarter of a billion bushels of wheat in Western Canada and Western United States.

Added to the North American condition is the situation in Europe. The weather luck that brought huge crops to the continent during the worst years of the depression seems to have ended, for this year's European crop, excluding Russia, looks like it will be 80,000,000 bushels less than last year's and 375,000,000 bus. less than the record 1933 output.

A statistical study of the present wheat situation throughout the world can readily furnish enough ammunition to chase the "bear" out of the wheat markets. But one of the lessons of the depression has been that statistics are uncertain guides at times. In the federal inquiry into Wheat Board operations held last spring James Murray, the chairman of the Board, gave the advice, "Put not your trust in statistics." He presented evidence to show that the world's leading authorities, including Broomhall, Stanford University and the International Institute of Agriculture at Rome had consistently over-estimated international trade for several years past. With this warning we proceed.

The Canadian spring wheat area produced 265,000,000 bushels of wheat last year. The previous year about the same volume was harvested. The damage already done this season suggests that the crop will not be much larger, but allowing 300,000,000 bushels as the total will provide a surplus of 200,000,000 bus. Adding the prospective carryover of 126,000,000 bushels gives a total of 326,000,000 for export and carryover at the end of the crop year 1936-37. The United States wheat crop is inadequate for domestic requirements and imports may possibly reach a considerable figure. The supplies in the Southern Hemisphere are unimpressive and new crops will not be available from that source until the end of the present year. In view of this the Canadian carryover and prospective supplies do not look large.

On August 1st the European carry-over will probably be 240,000,000 bushels. Adding this year's European crop of 1,467,000,000 bushels will provide total supplies of 1,707,000,000 bushels, a volume substantially inadequate to meet that continent's food requirements. The lowest reserve Europe has carried for fifteen years has been 234,000,000 bushels in 1923 and it is hardly likely that stocks will be permitted to depreciate that low at the present time in the face of the turmoil and threats of war prevalent in Europe. But if stocks should be cut to 200,000,000 bushels it seems obvious that Europe will have to import 500,000,000 bushels during the coming crop year, a volume larger than Broomhall's estimate of total world trade of 1935-36. Add to this the demands from ex-European countries such as Japan, China, Brazil and United States, etc., which may total 175,000,000 bushels, world trade this coming crop year may reach a figure of 675,000,000 bushels, the largest since 1931-32. If world trade revives to this extent Canada should readily dispose of her surplus supplies.

Italy, Spain, Portugal and France have comparitively poor wheat crops this year. The Italian crop is estimated at 216,000,000 bushels or 67,000,000 bushels less than last year's. France has a substantial carryover, possibly 60,000,000 bushels, but the most of this has been denatured and cannot be used for human consumption. The Spanish crop is estimated at 15,000,000 bushels less than last year. Germany's crop will not be as large as last year's. In contrast to this, the Danube basin will have 65,000,000 bushels surplus to export against 22,000,000 bushels from 1935-36.

If any dependence whatever can be placed on statistics prospects are for quite a lively trade in world wheat this coming crop year, and any damage to crops in the Southern Hemisphere may create a tight situation.—Wheat Pool Bulletin.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else.

(Continued from page two)

discovered and the parchment was very fine and white unless stained for special purposes, e.g., prayer book parchment was stained black. Parchment was the most common substance of writing in the 13th Century but from then on the quality falls off, until the coming of printing and of paper brought its great day to a close.

Vellum is a writing medium prepared from the skin of calves and differs from parchment in the delicate nature of the skin, its higher polish and its whiteness and transparency. Vellum was made from the skin of calves not over six weeks old, the younger the calf the finer the grade of vellum; that produced from the skin of a still born calf being the most highly valued. The art of preparing vellum was perfected by the monks during the 10th and 11th Centuries and was a more costly process than that of parchment. Some of the most beautiful manuscripts of the 14th Century were written on vellum. Purple-stained vellum was used for silver lettering and crimson for gold lettering. When used for miniature painting, the surface of the vellum was prepared by rubbing with pumice stone.

Vellum to-day is a term applied to certain types of high grade writing paper made from cellulose fibre. Modern parchment is prepared by treating high grade paper with sulphuric acid which compacts the sheet and hardens the surface. True parchment has practically disappeared from use to day; even the so-called "sheepskins" which Universities present to their students upon graduation, are commonly printed on paper or artificial parchment made from paper.

To-day paper is manufactured on giant machines running night and day and in the case of newsprint, at speeds up to 1,300 feet per minute. Paper has thus become the universal writing and printing material, available to all at low cost and in almost unlimited quantities. The development of this tremendous industry in little more than a century has often been described as the romance of paper.

LINDBROOK

The picnic given by the ladies of the L.C.C. at Lakeview was a grand and glorious success. The weather was fine and a large crowd attended, in fact it was about the largest attendance at any picnic held lately. The tables were loaded with edibles and all sat down to lunch together and the same at tea time. During the day ice cream and nuts, etc. were dispensed to both kiddies and grown-ups. A baseball game was staged by the men during the afternoon, just pick-up teams and the score was 14—2, whether just luck or not we won't say. The ladies spent their time viewing the bathing beach, pavilion etc. Most of the youngsters went in swimming as did lots of their elders and had a whale of a time. The water was fine and the day warm and the beach is ideal, there also being diving facilities and a water chute there, in fact, to sum it all up it was a grand and glorious picnic. Thank you, ladies! and by the way, the next meeting of the L.C.C. will be at the home of Mrs. Earl Wilson on the afternoon of the last Wednesday in the month.

We regret that through our announcement that Mr. R. Rogers was ill with a touch of paralysis and was at his sisters', Mrs. E. Wilsons, that she should have been subject to annoyance by people thinking it "infantile paralysis" and allowing her family to be out and about. The facts are that it was most certainly not "infantile" paralyses, the patient being over 30 years of age and besides the complaint was internal trouble and not in the least contagious or infectious, in fact Mr. R. Rogers is about again and practically O.K. so we must apologize for causing Mrs. Wilson annoyance re our news item and hope that all is satisfactorily explained by this note.

The sympathy of the district is extended to Mr. Frank Kortzman of this district and his brothers Charlie, August and Oscar, all of whom are well known here, on the death of their mother recently.

Seems to be a plague of wasps this year, most everyone has their quota, chiefly in the barns, and a rotten nuisance, they are too. Various methods are said to be effective in displacing them, but we wouldn't advise the ones tried by two of our neighbors who tried the "ordeal by fire method," only to lose their barns, wasps and all.

Mr. J. Wozencroft had the misfortune to lose 7 head of cattle on the railroad here this week just west of Lindbrook. They were struck by a gravel train and badly smashed up. Tough luck Jack!

Another truckload of cattle from Hardisty crashed into the ditch here by Mr. Lepine's place last week, wrecking the car and one animal had to be destroyed.

The heat wave is causing great concern here and if it doesn't let up soon the crops will be poor. The pastures are suffering now, but cheer up fellows, the haying season has started and old Jupe Pluvious is only waiting till there's a lot cut, to bleach it, or if its bunched up soak it and rot, same with a few open stacks, so don't worry, we'll get our rain, the mowers are out!

Mrs. Jas. Bracegirdle and family are on a holiday at Wainwright.

Mr. Harry Glenn of Bonnyville, Alta, was a visitor here this week.

RUNAWAY ACCIDENT

On Thursday morning of this week Mr. J. Weiss while driving horses and rake met with a painful accident. The horses became unmanageable and threw him off the seat, the rake dragging him for some distance. He received cuts and bruises.

LAKESHORE

Miss Ethel Baines of Gadsby visited at the Wood home over the week end.

Mr. and Mrs. J. H. Johnston motored to Leslieville last week and spent several days with their daughter, Mrs. Jas. Gemmel.

Mrs. Rollans and children of Viking returned home Sunday after spending a week with relatives here.

An enjoyable birthday party was held at the Eaton home on Saturday in honor of Leroy Eatons seventh birthday. Twelve guests enjoyed the fun and games etc., also the eats which were delicious and abundant.

Mrs. Johnston entertained the "inseparables" on Thursday afternoon. We promised to keep the results of the game dark.

Mr. and Mrs. Phillips and Mr. and Mrs. Plants motored to Ohaton Sunday, visiting old friends there.

Miss Maggie Wood was hostess to a number of ladies in honor of her sister, Mrs. Rollans, on Friday afternoon. Three tables of bridge played and Mrs. Phillips and Mrs. Jones were the lucky ones in winning prizes. A dainty lunch was served by the hostess after the game.

Mrs. John Wood, Mrs. Graham and Mrs. Phillips visited Mrs. Bertha Seale on Tuesday afternoon.

Mrs. Seale and Mrs. Thompson were guests of Mrs. Booth on Thursday of last week.

Practically everyone at Lakeshore visited the Edmonton Exhibition one day or another last week so we shall not attempt to name them all.

Mrs. Anderson entertained the Ladies' Aid on Wednesday.

LOCAL AND PERSONAL

The C.W.L. Lawn Social and Chicken Supper will be held at the Church grounds on Saturday, July 25th, commencing at 3:00 p.m.

Miss E. Allan of Westlock spent a few days visiting her parents here last week.

Mr. Matchmes left on Sunday for a two week's vacation at the coast.

Isabel Robinson attended the reunion of the Alumni Association of the Vermilion School of Agriculture which was held from the 16th to the 18th. On her return she visited with friends in Edmonton.

A few from Tofield attended the Bruce stampede on Wednesday.

Mrs. Armstrong is visiting with her parents Mr. and Mrs. Griswold, for some time.

Miss Helen McCauley left on Monday for Ponoka where she will train in the hospital there.

On Tuesday afternoon the primary department of the United Sunday school held their annual picnic. The picnic was held at the home of Mrs. Jackson and there were about twenty-five small children there, besides their parents and teachers. Games and races were held and a very happy time was spent.

Mrs. Chevreaux and small daughter is visiting with her parents, Mr. and Mrs. Foreman.

Mr. George McFadzean left this week to compete in the tennis tournament being held in Edmonton. To date we understand he has won his first matches.

Mrs. J. W. Robinson and Edith attended the Edmonton Exhibition this week.

AMISK CREEK

Mr. and Mrs. J. Annebo, the two boys and Magda, Mr. J. Berild and H. Hillerud, Mr. and Mrs. R. O. Berg and Lloyd, Mr. P. O. Flaaten and Nora Sand motored to Viking to attend the Sons of Norway celebration held there the first week in July.

Mr. and Mrs. Bebee from Washington were guests at the I. C. and R. Olson homes the first part of July.

Mrs. J. Blackburn from Lavoy visited with her mother, Mrs. Olson for a few days during the first part of July.

Misses H. Annebo, Thora Haugen and Doris Glasinger are attending Summer School at the varsity in Edmonton.

The Shonts soft ball girls succeeded in getting third prize at the Ryley ball tournament.

Mr. and Mrs. G. Lawrence and small daughter Marian from Hainsburg and Mrs. Brant from Bonnyville visited with the R. O. Berg and P. O. Flaaten and E. A. Moen homes on their return from the coast.

Mr. J. Berild is on the job painting and repairing the church.

Nora and Gordon Sand are visiting at Elk Point and Hainsburg for a couple of weeks.

Mr. and Mrs. E. A. Moen attended the funeral of late Mr. Olaf Johnson. The interment took place at the Ryley cemetery.

A miscellaneous shower was held in honor of Hazel Hillerud, bride of this week, was held at the home of Mrs. E. A. Moen last Sunday. Little Doreen Ward and Gladys Berild brought in the large basket of gifts for the bride to be. Merl Hillerud and Pearl Patterson assisted Hazel in opening the parcels. There were about one hundred friends and relatives present. A lovely lunch was served after which the younger ones played baseball.

A school soft ball team played a team in Ryley on Saturday evening, the Shonts team winning to the tune of 11-1.

Mr. A. Erickson visited in the city most of last week, taking in the fair while there. He returned Saturday evening.

Mr. and Mrs. R. O. Berg, Lily, Alice and Lloyd motored to the city last Friday and took in the fair, returning the same evening. Lloyd remained until Saturday and had some dental work done.

E. A. Moen and P. O. Flaaten shipped some hogs last week.

Mr. and Mrs. J. [illegible] and little son from De-May visited at the Erickson home last Sunday.

Mrs. Torval Brocke and her four girls from Norway Valley are visiting at the Hillerud and Solberg homes for a few days.

CORRECTION

In the report of the Social Credit Meeting appearing in last week's issue, we reported Dr. McPherson as saying the Alberta Government had recently floated a loan in England. This is incorrect, as Alberta has floated no new loans recently. The Dr. was speaking of the erroneous assertions that the credit of the Dominion as well as of Alberta had been impaired and as we remember it said, "we floated a loan that was over subscribed in twenty minutes", meaning the Dominion, we at the time understood it as meaning Alberta. Anyway, we gladly make the correction.

Mr. and Mrs. Hildred and son Bobbie visited at the Stinson home for a few days last week.

Sisters Walsh and Fitzmaurice from the Catholic Hostel, Edmonton, are preparing students for confirmation this week. They are guests at the Schmalz home.

Mr. and Mrs. Fraser of Edmonton, Mr. and Mrs. Majoi also of Edmonton and Miss Florence Kendall were visitors with Mr. and Mrs. H. Kendall on Sunday.

Makes Railway Epic

Richard Arlen, Hollywood movie star now making "The Great Barrier", epic of Canadian Pacific Railway construction days, with the Gaumont-British Corporation, arrived in Canada recently on the Canadian Pacific liner "Empress of Britain". The popular movie star is now on location with his unit in the Canadian Rockies. Mr. Arlen is taking the part of a Royal Canadian Mounted Policeman. In the picture above he is seen with his well known wife Jobyna Ralston, and their young son Richard Jr. They are shown in a happy family group just before reaching Quebec.

YOU CAN HELP US TOO

Publishing a weekly newspaper is rather a monotonous task. As the weeks roll round there is the same mechanical work to be done, the same searching for news to fill the columns and the same expended effort to procure sufficient advertising to make the venture a paying proposition.

But it is our work and as such, we must of course, keep going. Subscribers often help very much, not only by paying up their subscriptions, but by giving us a few words of praise and encouragement and naturally, some times friendly criticism.

We are always pleased to receive all three and there is no limit to the interest subscribers may take in this publication.

The Tofield Mercury is a country weekly newspaper published in the interests of this district. We neither aspire to or expect a huge circulation, but hope we have and are able to maintain the interest of the majority of residents of this district. Allied to no party or creed, the occasional expressions of opinion are given for what they may be worth at the time they are given and are always intended to be constructive—not destructive.

Readers may and can help greatly by taking an interest in their Home Paper.

FARM ORCHARDS FOR HOME FRUIT SUPPLY

With the idea that each farm should be able to provide its own supply of apples, plums, and small fruits, the development of small orchards on the farm has received considerable attention in the scheme of work of the Illustration Stations of the Dominion Experimental Farms. This project was first started about nine years ago in Nova Scotia and has proven very successful. The home orchard, in addition to serving as a fruit supply to the farm concerned, is affording a means of study with regard to the hardiness and adaptation of new varieties resulting from the breeding trials carried on at the Experimental Stations. The latter work is being done in co-operation with the Dominion Horticulturist at Ottawa.

In the Prairie Provinces, the home orchard has also proven interesting and valuable from an information standpoint, particularly in Manitoba where the idea has been developed over a longer period than on the Illustration Stations in Alberta and Saskatchewan.

ALL TRAIN WHISTLES to SOUND TUESDAY, JULY 21st

Montreal, Que.—A salute of thousands of engine whistles, which will be heard from one end of the Dominion to the other, will mark the centenary of the start of the first Canadian passenger train and the commencement of the second century of service by the Canadian National Railways. Instructions were issued from headquarters here that the whistles of all engines under steam throughout the National system are to be sounded for one minute at noon on Tuesday, July 21st. All Canadian National shop and roundhouse whistles will join in the salute

It was at noon on July 21st, 1836, that the Dorchester, the first engine in Canada, started from Laprairie for St. Johns, Quebec, hauling the first link in the chain of railways that are now component parts of the Canadian National System. Just one hundred years later the engines of the System will echo the starting whistle of the old Dorchester.

The salute will be given by all engines, whether running on the line or in the yards, and will be heard by millions of Canadians.

Knowledge

The amplest knowledge has the largest faith. Ignorance is always incredulous.—Willmott.

ALBERTA CROP REPORT NO. 6

Issued by Alberta Department of Agriculture, Edmonton, July 17th

Extreme drought conditions have continued during the past two weeks in southern and east-central areas, with the result that in the eastern portions of these districts particularly, hope for a harvest of any consequence has been abandoned. That part of the Province from the Taber—Medicine Hat line north through the Berry Creek area to Provost, has suffered most intensely, and an almost complete crop failure is accepted by the major portion of this section. Pastures and forage crops in these districts are burned up and shortage of feed is a cause of immediate concern. It is still hoped, with the advent of rain, that a portion of the grain crop may yet be salvaged as feed, but the feed situation in any case is likely to be quite serious.

In the more westerly districts from the U.S. boundary north through the Calgary area, the hot, dry weather has also taken a heavy toll, but with rain at an early date fair crops may yet be harvested in some sections.

In the west-central districts and extending for a distance north of Edmonton, only a few light scattered showers have fallen in the last fortnight. Crops, though as a whole not yet suffering excessively, have utilized all reserve moisture and are heading out short. Yields will be much reduced unless there are general rains at an early date. The continued dry weather is especially hard on the later sown grains, and the hay crop is considerably below average. To the west of Edmonton and to the east, showers have been more general and crops continue to develop very favorably.

In all sections of the Peace River country, there has been plenty of rainfall, and conditions generally are excellent. An exceptionally good crop is in prospect throughout this territory.

Some hail has occurred at points in the central and northern districts, but damage in most cases has not been very heavy and is confined to a few small patches.

A vigorous campaign continues to be waged against the grasshopper menace which is well under control. No very great danger from grasshoppers is reported from any of the south and eastern districts, where drought conditions are now the problem of major concern.

Livestock on the whole is in good condition, though feed scarcity in the dry areas is likely to be felt before long. There is little change in the cattle market, movement of cattle from the dry areas has commenced and shipment of hogs is fairly strong. Sow holdings in central and northern districts are definitely on the increase in anticipation of improved feed conditions. Dairy production has fallen off in the south owing to dry weather, but continues steady elsewhere with cream prices a little stronger.

GOOD MINIMUM PRICE NEEDED

The setting of a fair minimum price for wheat by the Wheat Board is a matter of primary importance to Alberta and Western Canada. The Alberta Wheat Pool invites the co-operation of all organised bodies who are interested in seeing this desired end brought about. It is also important that the Federal Government be impressed with the need for the continuation of the Wheat Board.

The experience of 1935-6 crop year shows that the setting of a reasonable minimum price provided a measure of protection for the wheat growers that could have been obtained in no other way. The Alberta Wheat Pool contends that the losses, if any, entailed are trivial as compared with the advantages gained by providing purchasing power for the farmers of the west. A drive to bring about lower wheat prices was frustrated by the Wheat Pools in co-operation with the Federal Government last year. While the situation has changed somewhat and prospects appear brighter to improved prices this year, it is suggested that the welfare of agriculture needs the steadying influence of a substantial minimum price in order to offset adverse movements which may develop later on.

THAT ENLARGED HEART

Many people have the wrong idea about an enlarged heart. Of course it must always be taken seriously, but sometimes it is interpreted the wrong way.

First of all the heart may be enlarged in either of two ways—it may actually be thickened, like the wrestler's arm, or it may just be overstretched without thickening of the muscular wall. This latter is called "dilatation" and is often due to sudden overstrain.

The form with actual muscular thickening may be due to constant effort over a period of months, as for instance in a well trained marathon runner, but it is more often due to some valvular leakage in the heart.

This may have resulted from old infection back in childhood. It may have been due to infection getting into the valve edges during an attack of rheumatic fever or perhaps from chronically infected tonsils. The actual infection in the valves and heart muscle may have long since been healed, leaving only the scars on the valves.

Now the body requires that so much blood be pumped per minute. If there is an appreciable back leakage, obviously the heart must pump the required amount plus the amount leaking back. That means more work, which will produce a thickened muscle in time.

This explains why the actual thickening of the heart wall may be a life saver. Without it we could not carry on an active life; with it many a person with damaged valves can live practically a normal life, except, of course, that the ordinary strains of life, lifting heavy objects, running for street cars, cranking the car etc., must be avoided

This explains too why the heart tends to enlarge with high blood pressure. There may be no leak, but a higher pressure may be required in the force pump to overcome resistance somewhere in the blood circuit.

Of course if the heart be dilated only, or if there be dilation on top of the thickening, and a careful examination by your physician can ascertain this—the utmost care must be taken until the dilation be corrected.

Because of the efforts of the heart muscle to "compensate" for these extra demands there is a tendency to abuse this protection. Remember that the muscle is always overtaxed and have it checked from time to time. Frequent short rest periods under your doctor's direction will often enable people with "hearts" to far outlive their more active associates.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

2,000 SMALL FIRST AIDERS

With the winning of the Hesketh First Aid flag by the "first aider" team of the 44th Winnipeg Wolf Cub Pack a record was established for such competitions. The contest was the 25th. Since the inauguration of the competition, in memory of the late Col. Hesketh, some 2,000 Wolf Cubs, between 8 and 12 years of age, have given special study to elementary first aid, and have taken competitive tests in the subject.

SOMETHING FOR NOTHING—

SATURDAY WE took time off to visit the Edmonton fair. There were the usual throngs of people, myriad of lights, pounding noises and traps for the unwary. For those of a more serious turn of mind, there were livestock exhibits, grain, needle work, cooking and everything that goes to make a first class agricultural show. As we entered the manufacturers building a young fellow commenced to talk. Now, mingling with holiday throngs is no new experience to us, quite a number of years ago we did so, scores, perhaps hundreds of times each summer season and considered ourselves quite immune to the blandishments showered upon the typical holiday group by a fast and clever talker. The lad at the entrance to the manufacturers' building was good, his "line" ran smooth and he did not actually misrepresent. So it was with a feeling of absolute confidence in being proof against [illegible], and more to see how good he really was, that we stopped to listen. As he started and threw down one quarter, two quarters, three quarters, up to eight quarters, "panning his patter," at the same time, we felt distinctly superior, and with a cynical smile, instinctively knew that somebody was going to be caught. He was just that good. Interested much more in the method of telling than in the story itself, we lingered on, and as all stories must, this came to a close. What he was doing, according to him, was advertising a line of safety razor blades, not by newspaper, magazine or [illegible] advertising, but by giving a watch with the eight packets of blades. He showed the [illegible] and they appeared to be genuine. We still felt superior, these people, so we reasoned, were crazy to believe this stuff, in the first place it was not good advertising and in the second he would not give away the watches; for some reason the crowd would not be "representative" enough or the watches would be given away at night. Anyway, still feeling superior, we knew no firm would be giving away wrist watches for a quarter even if a [illegible] did condescend to shave with their razor blades. Then came action, fast action. "Here you are, ladies and gentlemen, with the first eight packets of goes one of these wrist watches." Hands were outstretched with the quarters held between the fingers, one, two, three, four, five, six, and then we came to life. Great Scot these people ARE getting a wrist watch and razor blades for a quarter, so with a quick motion we bring out a quarter and receive the seventh watch and blades, at the same time, quickly calling to mind the code of the holiday resort arcades that "possession is nine points of the law, we literally pushed the quarter in his hand We then inspected the "watch" we had bought for a quarter—it was a toy watch, value about 10 cents, which with the blades made usual value for a quarter. We were stung—not by him, for he gave all he said he would give, but by our own credulity and desire to get something for nothing. A little later on we saw the young fellow in a heated argument with one of his customers, the argument ending with the customer getting his money back. A few minutes later the "super-salesman" was sitting outside the building, looking none too happy, probably waiting for another crop of "victims". We walked up to him and said: "Listening to your line was worth a quarter, fellow," and after a first apprehensive look, he smiled and replied, "you bet it was, and you got your quarters worth." Just one thing more on this trivial happening. The toy watch was made in Japan and at first glance resemble a modern real watch. Years ago, merchandise like this chiefly came from Germany, and somehow or other could be recognised at once for what it was. Even in making toy watches and "putting over" catchpenny schemes, the world moves on.

Surrounded by the glamor of hundreds of other things, one other feature caught our eye at the exhibition. One would imagine, that, to anyone deprived of a leg, the opening to a stage career would be closed. And if by chance one person so afflicted could be found, the possibility of finding two, would be remote. Yet in the performance in front of the grandstand in the evening, among a number of other excellent and original numbers, were two men, of a size, who had each lost a leg, but one possessed a right leg and the other a left one. Together they walked in under one cape, supporting each other. They then did some excellent feats of balancing and strength. The number was announced as the only one of its kind in the world, and we believe the statement true enough. Watching them, the thought came to us, this was overcoming a physical disadvantage with a vengeance. Only about one man in a thousand physically complete, ever become an athletic stage performer, yet two men, each minus a leg had made the grade.

CONSERVATION: WORD OF 20th CENTURY—

By H B Elliston in the Christian Science Monitor

The Resettlement Administration has sponsored a movie called "The Plow That Broke the Plains." I saw it yesterday If anyone [illegible] as to the necessity of remedial action on these plains, better known nowadays as America's dust bowl, I suggest that he should see it, too. The depredation of the plow has been so grevious that the fear of a great Sahara overtaking mid-America does not seem to be exaggerated.

The dust bowl cuts a wide treeless swathe from the Dakotas to the Texas panhandle. All told the area involved is 625,000 square miles, or seven times the size of Great Britain The Buffalo Bills of three quarters of a century ago first eliminated the Indian tribes and the buffalo herds Then the ranchers in two separate waves overran the region They came from Texas way, debouching on to the southern plateaus with their cattle They spilled over from eastern Kansas into the High and the Great Plains west and northwest. It was an immensely profitable business, this ranching

The dustbowl is a country of extremes of climate. It lies in what has been called the temperate zone, a zone that ought to be called the [illegible] zone For to Montana the winds import arctic conditions so severe that the people have to endure a lower temperature than the North Pole. In addition, the vast interior of the continent has its own special way of cooling off. In the summer the same winds bake the plains with [illegible] the tropics. Perhaps no other region has witnessed such extremes. This last six months, for instance, there has been a variation of no less than 175 degrees In Minnesota, where snow was so deep the trains could not push thr[illegible] to 55 degrees below zero last [illegible] North Dakota last week a [illegible] was registered.

The desert dry grassland [illegible] and provided good grazing country Too [illegible] herds of cattle were raised in such a number [illegible] they overgrazed the plains The result was [illegible] the soil which had been kept more or less in place by the buffalo grass. So that, when the high winds blew, the soil was carried away in tons When the occasional rains fell, too, th[illegible] runoff of soil as well as water

In the '90's the farmer followed the stockman. It is one of the most fascinating sights in the world to see the plow in its full [illegible] career It may be observed in China's Northwest For many years past, the Chinese with his plow has been pushing back the nomad Mongol with his herds Just as the plow is conquering the Asian steppe, so it conquered the mid-American prairie. But, where the herds simply overgrazed, the plow pulled up the grass entirely and pulverized the underlying earth The dust, in consequence, became "snust": the winds whirled up great clouds of soil, and deposited them in distant waterways, where they were carried out to sea lost to America forever.

The war had more to do with this Pyrrhic victory [illegible] than any other event. Wheat was [illegible] the dust bowl became the bread[illegible] allied and associated powers. [illegible] a common question Part of [illegible] rendered by these mute and [illegible] plains Not only did they pay the pen[illegible]; they overweighted the world [illegible] when the war was over Mr Hoover's ill[illegible] prices by holding wheat [illegible] dust bowl. So did the equally ill[illegible] notion of crop control

[illegible] man, however, is not solely [illegible] the conditions from which mid-America [illegible] suffering Drought was known in the [illegible] belt when the Indians and the buffalo [illegible] the plains The foresters tell us of those cycles by tree rings The written history of [illegible] is marked by intermittent [illegible], not a shower fell in Kansas [illegible] 1859, to November, 1860 By [illegible] west had continued for four [illegible] The dry spell this time has [illegible] since 1929 According to a Chi[illegible] is due to the precipitation over [illegible] the Gulf stream of the air." [illegible] moisture-laden clouds over [illegible] man has simply intensified the [illegible] of nature

[illegible] did I say. This soil is among the [illegible] it was not too extravagant [illegible] after the war to assert [illegible] crop would buy a plot outright The [illegible] by Dr Isaiah Bowman. [illegible] Fringe."

[illegible] wheat could be sold at [illegible] man might pay for his [illegible] good crops He was then [illegible] second farm."

[illegible] It sent the rain at long [illegible] one such rainfall, coupled [illegible] of the soil, was an in[illegible] harvest. It is true that the [illegible] plains has been dropping off [illegible] But the major trouble seems to be that man has not conserved the rainfall or al[illegible] to conserve it either.

I have often thought that study between droughts and the soft-money campaigns in America [illegible] William Jennings Bryan [illegible] of the dust bowl, Nebraska. [illegible] money when the West was [illegible] of rain and loss of soil. William [illegible] the heart of the dust bowl, North [illegible]

[illegible] the settlers are leaving these once-[illegible] All last year 30,000 a month trek[illegible] the great plains. The migration to[illegible] Alas! there are no more virgin [illegible] the farther and deeper West. And

CONTINUED FROM PAGE THREE

California would like to borrow the immigration bars of Ellis Island for domestic use. The fear is, consequently, that many of the uprooted farmers will turn nomad.

The problem is definitely one for the Federal Government to tackle. But its solution depends more upon recasting the economy of the great plains, it seems to me, than upon resettlement. Resettlement raises far more problems than it solves. But the recasting of the economy of the depleted area would be an elementary protection of the country's heritage before the heritage turns into America's derelict area. The word for the twentieth century is conservation.

WEDDING

A wedding of local and district interest was consumated on Wednesday of this week when Miss Hazel Bernice Hildrude, eldest daughter of Mr and Mrs. Hildrude, and Mr. Conrad Patterson eldest son of Mr. and Mrs. Patterson were united in marriage.

The ceremony, which took place at the home of the bride was performed by Rev. Mr. Gordon of Vulcan at three o'clock in the afternoon. Miss Evlyn Hilrude, sister of the bride was bridesmaid and Mr. R. Patterson, brother of the bridegroom was best man.

Following the ceremony a reception was held and a delightful supper was served at five o'clock.

After supper the happy couple left for Banff where they will spend their honeymoon. Upon their return they will take up residence at Tofield where Mr. Patterson is the proprietor of the Tofield Service Station.

STAMPEDE AT TOFIELD THIS WEEK

Friday and Saturday of this week will see the boys of the plains riding the bucking bronchos, steers, wild cows, etc. Mr. Ginther and those associated with him have staged a number of stampedes throughout Alberta and promise those attending plenty of excitement for their money.

In addition to the stampede there is the Desert Show which consists of an exhibit of many reptiles taken from the desert lands of America. The reptiles are alive and form an interesting exhibit—educational as well as entertaining.

There will be dancing at night both Friday and Saturday.

REGISTRATION FOR DIVIDENDS CAUSES GOV. MEETING

Members of the legislature who can devote from three to six weeks of their time to assisting the government in registering residents for receipt of basic dividends and otherwise aiding in starting Social Credit in this province will meet with the premier and members of the cabinet on Thursday and Friday of this week. Hon. Ernest Manning, minister of trade and industry declared in addressing the Edmonton Prophetic Bible Conference on Sunday in Edmonton.

The minister also expressed the concern of the government over the drought situation.

The seriousness of the drought problem was not to be over-estimated he said. It was important that everything possible be done to preserve the natural products of the province.

"The government is giving serious attention to this problem," he said. "The government is relying on the whole-hearted co-operation of all residents of the province to cope with the situation. The scarcity of marketable products will mean less purchasing power for the people, especially will producers of primary products, representing the largest percentage of people in this province where agriculture remains the basic industry.

The minister announced that the government must also make provision for establishment of credit houses in various provincial constituencies to handle the issuing and distribution of provincial credit.

"We feel now is the great opportunity for the people. They have been patiently waiting and now it is time to act," he said. "If they want to free themselves from the monopolistic credit, they will have a great opportunity in the next six months. We hope producers and manufacturers specially will give careful consideration to the advantages of using provincial credit for the purchase of Alberta produced goods."

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

MAKE HAY BY ELECTRICITY IN 15 MINUTES

FONTHILL BISHOP, Wiltshire, Eng.—The age-old worry of English farmers—the curing of their hay in the brief intervals between frequent rains—is now being solved by the application of scientific methods. A demonstration held here of artificial grass drying was attended by over two thousand people. The plant here, which cost about 1,000 pounds in all, dries a ton of grass by electricity in about 45 minutes. The finished product retains all its color and food value indefinitely; and the vitamin content is unimpaired in the new curing process. There are about 20 such plants in England now.

CROPS SHOW SIGNS OF HEAT WAVE

The prolonged dry spell coupled with high temperatures have had their effect on the growing crops in this district. While we are not in as bad a condition as regards moisture as districts in the southern part of the province, rain is urgently needed if even a fair crop is to be harvested. The hope of a really good crop is gone for another year, but features other than yield will of course play their part. The wheat is filling but the oats particularly are in need of moisture. Directly north of Tofield several showers have fallen but what is needed is a really good rain, 24 hours or more. The sky frequently holds promise of rain but the clouds evaporate and practically none falls. Each day without rain means a lessening of the yield and rain cannot come too soon.

BUSINESS CHANGE

During the week the business known as the Club Cafe changed hands, the new owners being Mah Sam and Mah Jett of Edmonton. They are relations of Mah Kee the laundryman. The former owners were Chow Joe who is now in China, Joe Yee who managed here and Chow How who manages a restaurant at Viking. The business has been conducted by the late owners for quite a few years, Chow Joe managing it for some time. They have been quite popular with the patrons and have given good service.

KITCHAMOOT

Little Miss Cleave and Ruth Coombes of Red Deer are spending a month's holiday at the home of their grandmother, Mrs. E. McMullen.

The members and their families of the Social hour club held a picnic at Lakeview on Sunday.

Miss Helen Schultz was the guest of Miss Hazel Sears for a few days last week.

In honor of Miss Margaret Lindsay whose marriage takes place next week, Mrs. L. Carlisle held a miscellaneous shower at her home on Wednesday of last week. The shower gifts were presented by Miss Marie Lawson and Maude Wildman from an imitation well, decorated with boughs of greenery. Miss Lindsay's former pupils and their mothers were the principal guests. Many pretty and useful gifts were received. Miss Mabel Lawson opened the afternoon entertainment with a few well chosen words. Mrs. John Brown and Mrs. Herman Lawson sang two duets. Refreshments were served which brought a pleasant afternoon to a close. Mrs. Lindsay and daughters Annie and Margaret and girl friend from Innisfree attended the shower at the Carlisle home Wednesday afternoon.

Miss Katie Carlson of Vermilion is visiting her sister, Mrs. Joe Sutton.

Mrs. G. R. Owen, Mrs. Sears, Hazel, Albert and Charley and Miss Ethel Coombes spent a few days in Edmonton during fair week.

Two nice showers occurred on Saturday, the first one a rain shower, which was very welcome to the parched fields and gardens.

Misses Selma Nemeland and Hazel Sears entertained at a miscellaneous shower at the Sears home in honor of Miss Helen Schultz whose marriage to Mr. Stanley Jack of Edmonton takes place on Saturday, August 1st.

Beautiful and useful gifts were presented from a prettily decorated table done in pink and white streamers suspended from a white wedding bell from the ceiling. The bride to be was assisted by Selma and Hazel in opening the many parcels.

During the afternoon Miss Lola Wilson favored the guests with a recitation and little Miss Cleave Coombes with step dancing.

After refreshments photos were taken of the guests, fifty ladies and twenty children were present.

Mr. and Mrs. Gallegar and son Jackie of Edmonton visited Mr. Gallegar's aunt, Mrs. E. McMullen on Sunday.

Mr. and Mrs. Rimel of Hunting Beach, Los Angeles, Cal. who are on a motor trip through Alberta and U.S.A. stopped off on Saturday for a few days visit at the Carlisle home. Mrs. Rimel and Mrs. Carlisle are cousins.

Miss Maude Wildman is spending a few days of her holidays at the John Warner home.

TAKE INITIAL STEP FOR S.C. DIVIDENDS

First step in connection with plans to pay basic dividends to Alberta citizens was taken by the provincial government Wednesday when a cabinet meeting placed the registration operations under the supervision of Hon. E. C. Manning, minister of trade and industry, according to announcement by Premier Aberhart.

An order-in council was passed authorizing the minister to carry on the work.

Approval was given by the cabinet to a form of qualifications of those entitled to receive basic dividends.

Other forms which are in final course of preparation deal with retailers, producers, manufacturers, and individuals. A person would fill out a form as a manufacturer and still another form if he wished to accept the basic dividend.

The individual form contains questions as to number of years the applicant has resided in Alberta, number of children under 21, occupation or possible occupation, present purchasing power through income, decrease of purchasing power through debt payments.

"The other forms have questions designed to discover the amount of production now available and the amount possible if disposal of it were assured," said the premier.

LOCAL AND PERSONAL

The W.A. will hold their annual lawn social and tea at the home of Mr. J. W. Robinson on Wednesday, August 5th. Supper at 5:30.

Mr. and Mrs. Dr. Morrison of Edmonton and two children were visitors at the home of Mrs. Morrison's mother, Mrs. E. V. Gray over last week end.

Betty McCarthy returned this week from Viking where she has been visiting with the Carey family.

Mrs. MacLeod is visiting with her daughter Mrs. Hronek of Halcourt.

On Wednesday afternoon a number of Tofield tennis players motored to Viking to play tennis with the Viking Club. The Viking Club under the directorship of Dr. and Mrs. Richardson very handsomely entertained the Tofield players, lunch being served at their home.

Reg. McCarthy spent last week on a fishing trip to Lac la Nonne.

Mr. and Mrs. A. R. Thompson and family are holidaying at High Prairie. They will return this week.

Miss Edythe Barden returned from Edgerton on Thursday where she has been visiting friends for a few weeks.

Mr. and Mrs. Lovell and family returned home after spending their holidays at Lake Thomas.

Miss Loret Ross returned to work on Monday after spending a two week's holiday.

The Misses Ela Taylor and Aileen Allan visited with Mrs Geoglein for a few days this week.

Mr. and Mrs. Harold Green are holidaying at Pigeon Lake.

Miss Maude Redig visited friends in Edmonton over the week end.

Mr. and Mrs. Norman Scott returned from the coast this week.

Miss Myrtle Bell of Edmonton is visiting with her sister, Mrs. N. Scott here.

The Misses Jessie Munro, Mary Burnett, Helen Cookson and Goldie Jacobs left on Thursday for Elk Island where they will camp for 10 days.

Wes Taylor was taken to the Royal Alec hospital on Thursday evening, undergoing an operation for appendicitis on Friday morning.

Miss Joan Ellis of Edmonton spent the week end visiting with Muriel Malcolm.

Mrs. Malcolm is spending a few days visiting in Edmonton.

On Tuesday evening a number of Tofield young people shivareed Mr. and Mrs. John Letourneau, newlyweds of this district. Much noise and fun was had before the self-invited guests returned to their homes.

ADDRESS MADE BY HIS MAJESTY, KING EDWARD VIII, AT VIMY UNVEILING

Many Tofield people arose early Sunday morning to hear the broadcast from Vimy Ridge in France, carried over land and sea, and received in this and hundreds of other centres by people as deeply interested as were the 6,000 Canadians actually standing on the scene. Of those who spoke, the voice of the King, Edward VIII, high and distinct, seemed especially clear. One correspondent says the King was looking "more youthful than ever" as he went about among the visiting Canadians with friendly greetings.

The text of His Majesty's speech at the unveiling of the Canadian war memorial was as follows:

"I am very grateful to you, Mr. President, for having made the journey to Vimy to join with us on the occasion of today's ceremony.

The presence of the president of the republic will touch profoundly the Canadian people. For my part I congratulate myself that you have given me the opportunity to express from the bottom of my heart to the French nation my thanks and all gratitude of the people of Canada for the honor you have done to those whose sacrifice is inscribed on this monument and for the welcome you have accorded to their parents and friends who have crossed the ocean to be present at this inauguration. (In French).

His Majesty then continued in English:

In the capital city of Canada at the heart of the dominion there is a memorial chamber set apart as a perpetual reminder of the service and losses of Canada in the great war.

Nine years ago I had the privilege of dedicating an altar within it where will lie forever a book of remembrance recording the names of more than 60,000 Canadians who gave their lives for the cause which Canada made her own. Above the door is graven: "All's well for over there among his peers a happy warrior sleeps." These words reveal the inner meaning of what we do today. They tell us that, beautiful and impressive as is the Ottawa memorial, the Canadian people would not feel it was complete. It was "over there" that Canadian armies fought and died. It is "over there" that their final monument must stand.

Today, 3,000 miles from the shores of Canada, we are assembled around that monument—yet not on alien soil. One of our English poets, Rupert Brooke, whose ashes lie in an Ionian island, wrote that where he lay would be "forever England"—that England for which he died. He spoke a parable; but here today that parable is living truth. The realisation of it will I know bring comfort to many thousands of Canadian men and women. For this glorious monument crowning the hill of Vimy is now and for all time part of Canada. Though the mortal remains of Canada's sons lie far from home yet here we now stand in ancient Arto's their immortal memory is hallowed upon soil that is surely Canada's as any acre within her nine provinces.

By a gesture which all can understand but soldiers especially the laws of France have decreed that here Canada shall stand forever.

We raise this memorial to Canadian warriors. It is an inspired expression in stone chisled by a skillful Canadian hand of Canada's salute to her fallen sons. It marks the scene of feats of arms which history will long remember and Canada can never forget. And the ground it covers is the gift of France to Canada.

All the world over there are battlefields, the names of which are written indelibly on the pages of our troubled human story. It is one of the consolations which time brings that the deeds of valor done on these battlefields long survive the quarrels which drove the opposing hosts to conflict. Vimy will be one such name. Already the scars of war have well-nigh vanished from the fair landscape beneath us. Around us here today there is peace and rebuilding of hope. And so also in dedicating this memorial to our fallen comrades our thoughts turn rather to the consecration of our love for them to the cannonage which beat upon this ridge a score of years ago.

In that spirit, in a spirit of thankfulness for their example, of reverence for their devotion and of pride in their comradeship, I unveil this memorial to Canada's dead.

FAIR NUMBER ATTEND TOFIELD STAMPEDE

The first stampede to be held at Tofield for several years (the last to be held taking place at the Wood farm north of Tofield) took place on Friday and Saturday of last week.

The attendance on Friday was meagre but between three and four hundred people turned out on Saturday afternoon to see the riders do their feats of horsemanship.

The sponsors of the event received luke-warm support from the town, nevertheless those responsible put on a good show and those attending were well enough pleased. Art Ginther, manager of the organization, unfortunately broke his leg on Friday while rounding up some horses and had to be taken to a hospital in Edmonton.

In addition to the stampede there was a sideshow and various stands.

In the saddle bronc class, Jack Thomas came first, Frank Brown second, and Jim Milburn, third.

In the horse-riding, loose rope class, Tim Davison came first, Art Boyce second and Snap Bergstrom, third.

In the steer riding class Tim Davison was first, Art Boyce second Albert Larson third.

The judges were Mel Wood, Tofield. Jim Burge, Edmonton and Jack Colton, Fort Saskatchewan.

Dances were held both Friday and Saturday evenings and a good crowd was in attendance both nights.

A loose rope walker performed in connection with the stampede and did numerous and very clever feats of balancing, among which was placing a ladder on the rope and walking up it.

STOP PRESS NEWS

As we go to press Friday evening, word has just been received of a car accident in which Mrs. Foreman was seriously injured. Mr. Foreman cut and bruised and the occupants of the other car, Mr. and Mrs. Anderson, returned missionaries, badly shaken up.

A Call To The Colors

Drouth and crop tragedies dim the Alberta outlook but they only emphasize the need for policies which will give more security and better returns to grain growers and agriculture in general.

The cause of agriculture must come first or collapse will ensue. At all costs the agriculture of this province and the west must be protected. And included in the program must be the price protection or the effort will fall far short of what is needed.

The Alberta Wheat Pool asks the co-operation of all grain growers in the continuation of the fight on behalf of a better deal for western agriculture. Patronage of Pool elevators is the very best method of helping along this all-important cause.

Alberta Pool Elevators

Listen to the Alberta Pool radio program every Sunday evening from 5:30 p.m. to 6.00 p.m. over the Foothill Network, C.F.A.C., C.J.C.A. and C.J.O.C., commencing August 2nd.

SOMEBODY TO SEE YOU

IF EVERYBODY with something to interest you should come and ring your bell, what a nuisance it would be. Think of the swarming, jostling crowd: the stamping of feet on porch and carpets.

Every day we know of many callers who come to see you. They never jangle the bell—they don't take up the whole day trying to get your attention. Instead, they do it in a way that is most considerate of your privacy and your convenience. They advertise in THE TOFIELD MERCURY.

These callers don't clutter up your steps or fill your mail boxes with large, untidy circulars. They don't annoy you by having their merchandise advertised in circulars which are thrown carelessly on your porch or in your automobile. They are considerate of your patience and your time. Instead, they gain your good-will, friendship, and respect by advertising in THE TOFIELD MERCURY.

In this way you have only to listen to those whom you know have something to interest you. They make it short, too, so you can gather quickly just what you want to know. You can receive and hear them all in a very few minutes, and without noise and confusion or annoyance.

In fairness to yourself, look over all the advertisements in THE MERCURY every week. The smallest and the largest—you never can be sure which one will tell something you really want to know.

THE MERCURY

WHAT THE FARMER BUYS AND SELLS

By H. G. L. STRANGE

In 1921, I found myself a member of a Committee appointed by a farmers' organization in Alberta, charged with the duty of investigating the high cost of things that farmers had to buy. It was felt by the organization that prices were unjustly high and that something should be done about it.

The Committee discussed the matter with representatives of manufacturers whose goods and products had increased in price. These gentlemen presented the following argument: "Farmers really have nothing to complain about, for while the prices of the things they buy have greatly increased, the prices of the products they sell have increased in proportion. Therefore, it takes only the same number of bushels of wheat today to purchase a plow or a binder or a given quantity of lumber, paint, clothing, or other goods as it did before the war." This argument seemed to be very fair and so was effective and convincing to the Committee.

If the yardstick of the exchange value of a bushel of wheat was a just and proper one then, from the point of view of the industrialist and the farmer, it should still be just and proper today. But it is found that on that basis farmers now have much to complain about, for at this date it takes many more bushels of wheat to purchase the same quantity of goods and commodities than it did either in 1921 or in 1913—14, before the War.

Today we find the price of wheat, —and on the average the price of most other products that farmers raise in Western Canada,—almost back to the pre-War level. But the prices of the things that farmers buy, averaged together, stand at approximately 26 per cent higher today than they were in 1913-14. Or, in other words, it means that today the farmers of Western Canada have to give 26 per cent more bushels of wheat in exchange for the same items and quantities of goods, on the average, than they did either in 1921 or in 1913—14.

What exactly does this decline in the purchasing power or exchange value of wheat mean to the farmers and others of Western Canada? It can be put in this way: Last year the worst scourge of rust that has ever occurred, swept over the West. It has been calculated that this meant a loss of some 60 million dollars to the farmers alone. The sympathy of all in Canada and of numbers of people in other parts of the world was accorded to those farmers who unhappily suffered. I have calculated that the increase of 26 per cent in the prices of the things that farmers have to buy takes a toll each and every year, while it exists, from farmers alone, of about the same amount as was taken last year by the rust scourge—that is to say, of around 60 million dollars each year.

Put in these terms, it will be realized that this is a most serious matter for farming families. If it persists, without any question, it must result in a substantial lowering of the standard of living as compared with that of pre-War, 1913—14, and there are many who contend that in 1913—14 the standard was none too high.

The losses suffered do not, however, end with the farmers, for it is obvious, of course, that the reduced farmers' purchasing power demand a much smaller quantity of manufactured goods than would be the case if the prices of the things farmers buy were back to pre-War levels. This in turn means that numbers of men are unemployed in industry. Men, as well, are out of employment on the railways, which are again obviously not called upon to transport goods which are not manufactured; and, again, unemployment consequently exists in wholesale, retail and other distributive agencies. Governments too, suffer, for their taxation revenue is decreased. All these unemployed in turn, because of their own decreased purchasing power, tend to throw others out of work, and so a vicious spiral of unemployment is started, and hardship and suffering endured, all due to the lessened quantity of goods that farmers are able to purchase because of the increase of 26 per cent in the price of those goods they would like to buy as compared with pre-War prices.

The increases in prices that have taken place, vary greatly with individual items, as revealed by the Searle index. This index, started several years ago, is an attempt to set out, as accurately as possible, the variations that occur, month by month and year by year, in the cost of the things Western farmers buy, hence in the purchasing power of a bushel of wheat, all as compared with 1913—14 prices.

Comprising 147 items, the index is divided into sub-groups. Groceries, for instance, comprising 16 items, show an increase of 11 per cent today as compared with pre-War prices. Clothing, 26 items, shows an increase of 15 per cent. Household equipment, 29 items, shows an increase of 45 per cent. Heavy farm machinery, 12 items, an increase of 55 per cent. School and municipal taxes, an increase of 56 per cent, giving a weighted total of 26 per cent. That is to say, calculated on a basis of the quantity or amount of each of the 147 items chosen that a farming family of five people, living on a half section of land, would use or consume during the course of a year.

Now, farmers form about 40 per cent of the population of Canada. Hence such a serious decline in the purchasing power of such a large percentage of the population must have very serious results on the rest of the people. Indeed, perhaps it is not too much to say that if the prices of the products farmers sell, and the prices of the things they have to buy were back to the relationship of 1913-14, the greater part of the depression in Canada would be ended, and large numbers of people now unemployed would be put to work. As well, of course, the numerous creditors of the farmers would benefit, as the debt repaying ability of agriculturists would be increased.

It would seem, then, that substantial benefits would accrue to all if the prices of the things that farmers buy could be brought back to the 1913-14 level. In addition, of course, it would also seem that it would be a very fair, just and proper thing for farmers if it could be done.

But can it be brought about?

Some have claimed that it would mean serious suffering to industries manufacturing the goods in question. This might be so, but at the same time it has to be remembered that as long as the present situation exists, it is the farmers who are unfairly enduring the suffering. The amount of hardship that industry might have to bear might prove to be not as bad as anticipated, for the reason that almost immediately there would be a demand by farmers for some 20 per cent greater volume of the goods and commodities they purchase (for there is a vast demand in the West alone for more goods of every kind and description, which farmers would most eagerly buy if their products could command the additional purchasing power). Such increased requirements would, of course, increase the income of workers.

The extra volume of goods would no doubt enable taxation on each unit of goods to be decreased, and no doubt freight rates as well. Or, in other words, substantial benefits would seem to flow to all, from the mere fact of increased volume of goods manufactured, transported, handled, distributed and taxed.

Naturally in an endeavor to lower prices the exact causes that have brought about the increases would need to be accurately identified and appraised. The following probable factors at once spring to mind: Increases in tariffs that have occurred since 1913—14 on the raw materials of the goods that industry requires; higher hourly rates of wages of industrial labour (these are shown by the Department of Labour on the average to be 79 per cent higher than they were in 1913-14, whereas the cost of living of that labour is but 27 per cent higher than it was then); increases in taxes; increases in freight rates on materials going into factories, and on the goods from the factories to Western Canada; possible over expansion of plants and equipment, which may have increased overhead expenses possible increases in cost brought about by uncollectable and unpaid accounts.

To show what can be done in the way of lowering costs, hence prices, a list is appended of a number of goods the prices of which are as low or lower now than they were in 1913-14. Incubators, poultry fencing, rubber belting, manilla rope, lariat rope, raw hide halters, sweat pads, clothes baskets, gooseneck crow bars, horsehide gloves, horsehide mits rubber boots, women's cloth coats, women's frocks, women's house dresses, women's patent leather shoes, women's cotton stockings, children's shoes, lunch pails, thermos flasks, coffee, beans, prunes, canned tomatoes, raspberry jam, cast iron frying pans, and gasolene (less tax.)

It is interesting to note also that the charges to farmers for handling grain at country elevators today are definitely lower than they were in 1913—14. Interest on money at least is no higher than then, and for many purposes is lower.

It is to be hoped then, that the enquiry now being made by parliament into the price of farm implements will be enlarged to take in the price of all other things that farmers buy, because it must be remembered, important as implements are, they only form a small part of the total expenditures made by farmers for goods and services during the course of a year; therefore, for any substantial alleviation of the present difficult situation to be brought about would require that the prices of all items now higher than 1913—14 should be reduced, and not only the prices of farm implements.

PAIN OVER THE HEART

A man who may have faced death under fire without the slightest qualm, or who will cooly pit his skill against all competitors in the ruthless field of high finance, will often "blow up" with the slightest pain over his heart.

Many a strong man has presumed that this has meant the end and has promptly gone to pieces mentally. He points figuratively speaking, to this and that prominent citizen who has without warning collapsed at his desk or in his car, and presumes he will be next.

But is he right in taking such a pessimistic viewpoint? Is there not another side to this subject?

Very few of us get very far along the pathway of life without some pains around the heart. This may not be due to the heart at all. Frequently it is just a disturbance due to gas in the stomach; sometimes it is due to infection or adhesions in the chest. In people undergoing severe mental strain, particularly if they are of the worrying type, transitory precordial pain is often noticed.

Of course it may be of considerable significance. It may indicate a serious condition, particularly in the busy man over fifty. In such case it may necessitate a complete change in one's activities and habits, if serious consequences are to be avoided.

But before getting panicky one should make every effort to find out exactly what is wrong. Do not suppose it is this or that, but go and have a thorough physical examination by a competent physician. Let his judgment, based on many such cases, guide you in your decision. Let him do the worrying.

However, if he says "ease up", do so. If he says "go to bed", send your suit to the pressers and turn in. If he says "no cocktails" and "only nine holes of golf" it is up to you to do your part. While you may wisely let him do the worrying, remember that it is your heart.

There are three things to keep in mind. One is that the pain may not be from the heart at all. A second, supposing that it is from the heart, that getting panicky is not going to help matters in the slightest, and a third is that a little heart scare may often do the over-strenuous person a lot of good, for, if he slows down and follows the doctor's instructions implicitly, he may actually live a longer, more useful life than had this warning signal not been given.

2 EXTRA CORD PLIES *Under the Tread*

Marketing of Canada's Grain

Functions of the Country Elevator Explained By Marketing Authority

By A. E. DARBY, Secretary, Winnipeg Grain Exchange

Article I

The articles here reproduced formed part of a review of the machinery of grain marketing in Canada, presented to the Special Committee of the House of Commons on the Marketing of Wheat and Other Grains on April 21, 1936, on behalf of the Winnipeg Grain Exchange by its secretary, A. E. Darby.

This article deals with the operation of country elevators.

The machinery of grain handling and trading falls naturally into three or four main divisions. These comprise the collection of grain at country points and its transference to central storage elevators; its storage and shipment in bulk to seaboard; the machinery by means of which it passes into export channels; and, finally, the facilities provided by the Winnipeg Grain Exchange which facilitate the working of this machinery to the greatest advantage of and at the lowest possible cost to the producers and all concerned.

The distinctive feature of the machinery of grain handling as developed on the North American continent is that the grain is handled in bulk. The grower is not required to place it in bags or containers. It is received in a building designed and equipped to handle, weigh, store and ship grain in bulk, and that method is followed right throughout the whole process of transportation from the farm to the overseas market.

Dealing with the collection of grain at country points and its transference to interior and terminal storage elevators, this is done chiefly by the system of country elevators and to a more limited extent by commission merchants and track buyers handling farmers' grain loaded over the platform.

The primary function of a country elevator is that of buying the farmer's grain. Its operator is ready at all times to buy grain direct from any farmer who desires to sell. The elevator is built by a grain buyer to enable him to weigh, handle and ship the grain purchased by him. It is in a real sense a primary grain market. The operator and the farmer agree upon the grade of the grain and the percentage of its weight to be allowed for seeds and waste. The farmer receives a cash ticket in the form prescribed by statute which shows the gross net weights, grade and dockage and the total amount of money due. He presents this ticket to the buyer's paying agent (banker or merchant) and receives money.

Such a local market is a great advantage to farmers. It is always active and available while there is grain for sale. There is no day in the year in which the farmer cannot sell his grain and get his money. The farmer is, or can be, well acquainted with the standard grades of grain and is, or can be, fully apprized of the prices of these grades by means of the press, the telephone, the telegraph or the radio. He knows the railway freight rate from his shipping point to the terminal elevators at Port William and the tariff of charges in elevators. He can appeal to the Government Inspection Department on grade and dockage and he can watch the weighing of his grain. If he does not choose to sell he can store and get an advance from the grain dealer on his stored grain. For no other farm produce is there such a market as this available, and keen competition prevails throughout the primary grain market.

The second function of a country elevator is that of public warehousing. If its price and terms do not satisfy, if direct selling appeals to him instead of selling to the grain buyer, the elevator facilities for weighing, storing and shipping are at his disposal as long as there is space available, and without discrimination. The elevator offers him alternative methods of warehousing. He may store according to grade agreed upon between himself and the operator. He may store subject to inspector's grade and dockage; or he may store his grain in special or separate bins.

The elevator is built on a railway siding and partakes, necessarily, of the character of a public warehouse. Grain is the stable product of Western Canada and elevators are necessary to its movement. Elevators are required by law to be licensed before doing a public warehouse business and in this respect their operations are closely regulated by the State through the Board of Grain Commissioners.

It is important to notice that in performing its main functions of buying and warehousing an elevator renders various services to the farmer which are of great value. It is an efficient transportation machine. The operator acts as a bank or credit agency in giving advances upon stored grain. He will take steps to save the grain if it shows signs of going out of condition and assist the farmer by loading out the car, while the storage receipt or ticket relieves the farmer of the risk of loss in transit, being redeemable in grain of like grade and quantity at the terminal elevator.

As already stated, country elevator operators buy from those who wish to sell, and advance money to those who wish to hold the grain in store, and for these purposes they need to have large sums of money at their disposal. While elevator companies have working capital of their own, in the main they borrow from the banks, and do so by arranging lines of credit, running usually from the first of August in one year to the first of August in the next. The company elevator pays cash to the farmer and is paid cash when it sells to the miller, the terminal dealer, the shipper or the exporter. The money paid to the grower returns to the bank again within a few days, and the money paid to the country elevator company keeps its credit revolving.

The elevator company must give security to the bank for the loan, and the main part of this security is the grain itself. It assigns to the bank its purchased grain in the elevators, gives the grain paper—bills of lading, terminal warehouse receipts, etc.—to the bank, and the grain is good security because it can be sold for future delivery. One of the conditions of the loan is that the company shall hedge its cash grain purchases, that is to say, that as it buys from the farmer from day to day it shall sell an equivalent amount for future delivery.

It is not commonly appreciated that money, mainly in the form of bank credit, is as necessary as all other machinery described, for the movement of the huge Canadian grain crops into consumption.

In addressing the World's Grain Conference on this subject at Regina, in 1933, Mr. R. A. Rumsey, of the Canadian Bank of Commerce said:

In one recent year, 1928, when the crops of Western Canada were abnormally large, it was estimated that fully 200 million dollars was required from the banks for the production and marketing of grains this amount being at least 50 million dollars higher than was necessary in the preceding year. Since then smaller crops and lower prices have automatically reduced the financial needs of crop production and movement, but the initial requirements for a year like 1932 may conservatively be set at 75 million dollars, with the possibility ever present that a greater fund may be necessary, and if so, that it must be created in short order. Any delay in payment to the growers or in bringing the crops to the market would damage the whole economic organization of the country, in one way by retarding the flow of money through the many channels to which it is diverted after it is launched by the farmer, and in another, by curtailing the supply just at a time when shipping conditions are favorable and importing countries are in the mood to purchase heavily.

Under normal conditions, and with proper safeguards, the terms of the credit would require that the value of the assigned or hypothecated grain in country elevators and that covered by documents (bills of lading, warehouse receipts and certificates) would provide a margin of, say, 15 per cent over the loans. Owing to the sharp fluctuations that occur in the market values of grains, this margin is unusually small, and it is possible for a bank to grant this distinctly favorable term solely because it requires the company to hedge its grain holdings, and incidently protect itself against these fluctuations. I am sure it is unnecessary for me to describe in detail the hedging system, and that it will suffice to say that it enables a grain company to sell immediately for future delivery at a fixed price the grain it buys from a farmer on the track. The market for the purchase and sale of grain under contracts for delivery at future dates—in other words, hedging transactions—is on the Winnipeg Grain Exchange, and this is one of the most important functions performed by that body. The existence of a "futures" market not only serves to enable a grain company to borrow on a small margin of security, but is actually one of the foundations of the whole system under which a farmer is able to take his grain to a track elevator and obtain cash therefore at a price immediately in line with its market value. In view of the lengthy period which must elapse from the time the grain leaves the farm until it reaches the ultimate market, it is obvious that unless there were some machinery which would enable the dealer to protect himself against market fluctuations in the interval, some other system for the buying of grain, which would necessarily be less advantageous and more cumbersome than that now existing, would have to be evolved. I should like to emphasize the importance of the part which the Grain Exchange takes in this way in facilitating the financing of the marketing of our grain crops. The Exchange is a highly organized and efficient body which, through the operation of its associate company, the Winnipeg Grain and Produce Exchange Clearing Association Ltd., serves to protect the trade, the banks and the community at large, especially the farmer. By reason of this protection it is possible for the trading companies to operate on a capital small in relation to the magnitude of the transactions involved, with a saving which is felt by all parties, from the farmer to the consumer.

This expression of a banker's opinion as to the necessity of protection against the risk of price changes leads to some consideration of the function of the speculator.

ARTICLE II.

Since the conditions of the grain markets are never fixed but continually changing and the changes are frequently unforeseeable, or, at any rate, unforseen, risk or speculation is inseparable from grain marketing. This risk may be carried by any of the various branches of the trade in the degree in which hedging is not practised; it may be carried by professional speculators who make a business of endeavoring to foresee price changes; it may be carried by the non-professional speculators who takes a chance in the grain market; it may be carried by the exporter or the importer who tries to anticipate a rise in price and to make a profit by carrying stocks unhedged; it has even, in some periods, been carried by governmental or co-operative marketing agencies.

The risk is there and must be carried by someone. The function of the speculator is to carry this risk, and if he can obtain from it some measure of profit which he very commonly does not obtain—he has rendered in return for it a very real service and has removed the risk from those points in the machinery of marketing where its presence would create hardship and confusion.

In touching on this function of the speculator it should be added that a very important form of speculation in grain has nothing to do with the futures market, though it has considerable influence on grain prices. The holding of grain on the farms by the producers themselves is a form of speculation which must not be overlooked in any discussion of the subject.

The activities of the speculator and the existence of the futures market are not infrequently blamed for the fluctuations in grain prices. But it must surely be evident to any thoughtful observer, as it has been to the various Commissions of Inquiry, that the operation of the futures market tends to lessen these fluctuations and to increase the prices paid to the producers. So far as the speculator is concerned, the essence of his activity lies in the endeavor to foresee the course of the market. If the speculator is intelligent his forecast will be based on a close study of the many influences controlling supply and affecting demand. His endeavor is not to determine the course of the market but to anticipate it. Endeavors to determine the course of the market, as experience has repeatedly and bitterly proved, can have but one end. Where so many factors are humanly uncontrollable no speculator or group of speculators can hope to control them.

Breadth and elasticity is given to the futures market by the operations of speculators. The risk which the country buyer, the shippers, the millers and processors and exporters and importers of grain wish to evade is taken by the speculators. That is their business. The business requires the same specialized knowledge, skill and foresight as any other business. The taking of risks of prices changing between the time the grain leaves the farmer and passes into possession of the ultimate consumer is a legitimate economic function. The removal of these risks enables all other services to be performed more cheaply. Speculators are useful.

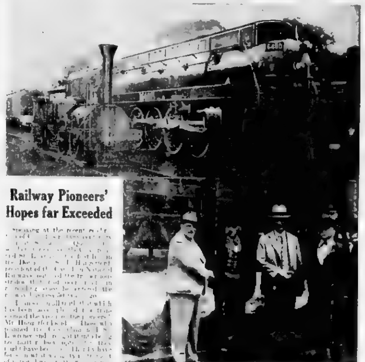
The complaint against speculation arises from two facts: (1) that so many people do not understand its usefulness; and (2) that many people become speculators who are ignorant of the conditions operating to make prices, and who buy or sell grain in the hope of a change in prices without having any solid foundation for their hopes.

The first cause of the complaint is hard to remove. Understanding of the factors which create the risk and render speculation by somebody inevitable is not easy. The idea of insurance against risk is now fairly well grasped by most people. But many still fail to see that futures trading provides for dealer in numerous commodities insurance against changes in prices.

The second cause of the complaint is equally hard to combat. Taking chances for the sake of an anticipated profit is common in other directions [illegible] on the grain markets. Little [illegible] heard of [illegible] but much is [illegible]. All the legitimate interests concerned would prefer speculation to be pursued, i.e., the risk of price changes to be carried only by those qualified by knowledge and training and equipped with the resources to perform the function. But the transactions of the one class are indistinguishable from those of the other, and meantime an indispensable service is rendered by a broad, active and liquid futures market.

Article III. will appear next week.

Canada's First Engine and World's Largest Streamliner Featured at Railway Centenary



At the ceremony at St. Johns, Quebec, commemorating the one hundredth anniversary of the operation of the first Canadian passenger train, a full-sized model of the "Dorchester", the first Canadian engine, was shown in comparison with one of the new 6400 type of the Canadian National Railways, the largest streamlined locomotive in the world. The "Dorchester", with tender, was 21 feet long; the 6400, with tender, 94 feet 7¼ inches. The 6400 is longer than the entire passenger train of 1836.

The lower picture shows (from left to right) Mayor Camillien Houde, C.B.E., of Montreal, George F. Moran, S. J. Hungerford, President, Canadian National System, and A. J. Shapter. Messrs. Moran and Shapter, retired Canadian National Railways engineers with over 50 years of service, impersonated the original crew of the "Dorchester" at the celebration.

TRAGEDY STALKS IN THE WEST

(From Alberta Wheat Pool Budget)

Every Canadian with any knowledge of events, understands that a disaster of the first magnitude has occurred in Western Canada in the way of crop damage through drouth. It is doubtful, however, if the extent of the calamity is generally realized. For nearly six weeks no general rain has been experienced in any large area of the west, and the areas with even fair crops are few and far between.

The collapse of the wheat crop, upon which the west always relies to a greater extent than anything else, is the great tragedy of course. But added to this is the wide spread failure of feed crops and pastures. The west is threatened with a dire famine of live stock provender.

There are thousands of farmers in Western Canada who will not have a bushel of wheat to sell this fall. There are thousands more who will have a pitifully small quantity. Wheat is the cash crop of the bulk of western farmers, and so multitudes of these farm people will have no income at all, or very little to carry them over to the new growing season. Most people do not realise the tragedy that is developing right now and the greater tragedy of want which is bound to come later on.

The western farmer has been the butt of the depression. He has been ridiculed for every effort his organizations used to get a little better prices for his commodities. He has been told that his wheat must go at world prices and it was even gently hinted that 40c a bushel was enough for him to make both ends meet. Every prating hireling of vested interests has been ridiculing the efforts of farm organizations to get living wages for the working farmers.

A year ago the West had something like 475 million bushels of wheat in store or in prospective supply from the current crop. A number of supposedly keen business executives urged that the whole amount be thrown on world markets regardless of price or any other consequence. By the end of this month a bare 125 million bushels will be left.

The Wheat Pools have urged upon governments for years that the sensible policy was to sell in world markets only that surplus supply which importers really wanted, and that at reasonable prices. The balance, it was urged, should be stored right in the farmer's bins to tide over bad years which come at irregular intervals.

Today the farm bins are empty and the bulk of surplus wheat supplies have been sold at returns insufficient to give anything further to the wheat growers.

Of course, the "wise men" say that the market is now in a healthy condition and big traders now feel free to take on large commitments, and that everything is going along smoothly. But how will that help the farmers who have no wheat? What good is a high price to them when they have to buy feed grains for their livestock, and possibly seed wheat for next spring?

A number of the States of the U.S.A. have suffered from drouth this year. The worst affected are Montana, North and South Dakota, Wyoming, Nebraska, Oklahoma and the eastern half of Kansas. The government of the United States has already grappled energetically with the problem and is prepared to spend 50 million dollars as a starter in looking after and re-habilitating the farm families who have suffered.

The United States government has made arrangements to supply 25,000 jobs in the "dust bowl," make loans to at least 50,000 persons, buy up one million head of cattle, and go into such schemes as soil conservation, shelter belt development, irrigation and dam projects, and resettlement schemes to help the afflicted areas.

What is going to be done for Western Canada in its dilemma? An awful fuss was raised about the loss of 15 million dollars for grain stabilization (which this year's events might possibly have averted) which covered five years of that operation, but surely Canadian spirit will be less niggardly in the face of the calamity which has befallen the west.

Western agriculture is now balanced on a very thin edge which might easily crash into disaster which would shake Canada to its foundations, for after all is said and done, Canada's economy is based on agriculture.

In the current issue of the Farm and Ranch Review, C. W. Peterson says, "Canada, in spite of her abject dependence upon agriculture, has done less for her farmer than any other country, and she has much to learn on the subject. Agricultural subsidy in Canada is not a cost, it is an investment and a good one. . . . The most urgent problem of Canada today is to keep her agriculture intact. She can afford to spend her last dollar on that objective."

THANK YOU

TWO CHIEF PHASES OF MARKETING POULTRY

There are two principal phases in connection with the marketing of poultry in Canada that require very special attention just now, according to the report of the Special Poultry Conference held in Ottawa recently. These two phases are:—

1. The weights and grades that are most in demand in Canada for the domestic and export markets.

2. The best means of transportation of live birds from the producer to the market so as to avoid unnecessary loss in weight or deterioration in quality while the birds are in transit.

Ordinarily Canada's chicken crop is marketed for the most part in two weights—broilers (2 1-4 lbs. and under), and heavy chickens, (4 1-2 lbs. and over.) Neither of these weights fit the largest demand of the British market and during the last few years, the quantity produced in Canada has not been readily absorbed by the home demand.

It is suggested that poultry producers throughout Canada produce one-half of their leghorn and other light weight breeds to market them from 2 1-4 to 3 lbs. each, and during the three weeks immediately preceding the time they are to be marketed, pen feed or crate feed the birds in order to have them qualify for A or at least B grade in the milkfed class. A similar practice is advised for barred rocks or other heavy breeds. A proportion of these breeds should be sent to market in August, September and early October, when they weigh alive around 4 lbs. each. Premiums are recommended for those that qualify for A or at least B grade in the milkfed class. A similar practice is advised for Barred Rocks or other heavy breeds. A proportion of these breeds should be sent to market in August, September and early October, when they weigh alive around 4 lbs. each. Premiums are recommended for those that qualify in the milkfed class. The premiums suggested by the Dressed Poultry Committee of the Canadian Produce Association for birds in the milkfed class are: 3 cents per lb. for milkfeds over selects; 2 cents per lb. for milkfed A over milkfed B; 3 cents per lb. for Selected A over Selected B and for Grade B over Grade C 4 cents per lb.

The fact is that marketing poultry of indifferent quality results in a substantial loss to poultry producers throughout Canada. Neither the domestic nor the British market, which is available for millions of pounds of Canadian dressed poultry can get a sufficient supply of quality birds. The biggest money for poultry producers in Canada is to be made with milkfed A and milkfed B birds. The market is too often glutted with low grade birds, never with those of quality which always command a premium.

Welcome First Train

The cowcatcher of old Engine 371 makes a fitting platform for these costumes of the 80's adorning belles of 1936 who took part in the pageant at Port Moody July 3, celebrating the fiftieth anniversary of the first C. P. R. train from Montreal to the Pacific. The old engine, driven by the original engineer, hauled into Port Moody a string of six old-style wooden cars handled by the original conductor of the first train in a colorful re-enactment of the event. More than 6000 visitors, including scores of rail veterans in service in '86, flocked to Port Moody for the celebration.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else.

(Continued from front page)

rural ridings Wednesday.

Conservatives under Errick F. Willis have captured 14 seats in an assembly of 55 and are leading in two others.

Government forces counted victory for the government alignment was submerged in the backwash from belated counts in 10 city seats and four in only 21 ridings and barely held the preferred position in two others. Fortunes in 11 constituencies were divided between C.C.F., Social Credit, Independents and Communists. Voting has been deferred in two ridings.

Voters went back to 1922 to find a parallel to the confused political state. In that year Premier Bracken was chosen to lead a newly-formed Progressive party that elected 24 members and held office for four years without straight majority.

Future of the government was a moot question. The premier elected to pin the chances of party survival on vote transfers in rural districts. What his party would do should a working majority be denied them would be considered when that eventually arrived, he said.

'THE TOFIELD MERCURY

Vol. XVII., No. 27 — Thursday, August 6th, 1936 — $2.00 Per Year. To U.S.A. $2.50

KETCHAMOOT

Mr. Angus Campbell, pioneer of the Kingman-Ketchamoot district, passed away on Friday, July 31st, at an Edmonton hospital at the advanced age of 88 years. Funeral service was held at Round Hill on Sunday, conducted by Bishop Roth and Rev. McLean and burial took place in the Tofield cemetery. We will try and have a fuller account of his life next week.

The Ladies' Aid meeting and Sunday school picnic will be held this Friday, August 7th at the home of Mrs. E. Coolman of Woodlawn. All are cordially invited to attend.

Miss Marguerite Whillans returned home Saturday after a week holidaying in Edmonton. She was accompanied home by her grand-mother, Mrs. Sheppard.

Mr. and Mrs. Roy Fleming and family, Mr. and Mrs. Herman Lawson and family, and Mrs. Marshall, were guests of Mr. and Mrs. Sam Stirritt Sunday evening.

Mr. John and Son Henry McGinitie returned home one day last week from their trip to Fresno, Cal., and other points. Mr. McGinitie's sister was detained at the boundary until the necessary papers can be procured and made out.

The Coombes family are leaving on Wednesday on a trip to Athabaska. They propose to do some berry picking.

Mrs. Marshall of Saskatoon attended the funeral of her father, Mr. Campbell and visited a few days with relatives.

Miss Mary Ingram left Saturday evening for a two week's visit at the home of her cousin, Mr. Percy Owen of Holden.

Mrs. Geo. Larsen and daughter Mabel left on Sunday for a holiday at Vancouver and will visit at the home of her daughter and sister Mrs. Harold Smith and family.

Mr. C. A. Ingram is building a new cow barn. Mr. McSporran of Ministik is head carpenter.

Mrs. Thomas and family of near Edgerton are visiting at the home of Mrs. Thomas' mother, Mrs. Peter Lee.

Mr. Howard Lee hold the record of being the first to cut wheat this year and any other year. He finished his field last week, July 29th.

Several from our district attended the sports day at Bardo on Wednesday of last week.

Saskatoon picking was the main past-time the past two weeks. They were very plentiful back in the hills, and all have put up many quarts for winter use.

LINDBROOK

We are glad to be able to report that Mrs. Frank Gould who was rushed up to hospital last week in a very critical condition was operated upon and so far is progressing favorably. We hope the recovery will be speedy and sure and that Mrs. Gould will soon be home again.

Mr. and Mrs. Freeman and family of Calgary have been spending a holiday at the home of Mr. and Mrs. Gould here.

Haying is general here now, in fact nearing completion. Ideal haying weather has prevailed throughout, although at times a shade too warm for those engaged in it. Opinions differ as to the crop of hay this year, according to localities.

The monthly meeting of the L.C.-C. took place at the home of Mrs. E. Wilson last Wednesday afternoon. There was a good attendance and the "show" opened up with the theme song by all present, after that lots of fun was caused by playing games. A short verse was read by Mrs. E. W. Hooper. It was also proposed to arrange for some flowers to be sent to our patient Mrs. Gould, in the Alexandra hospital, Edmonton. A dainty lunch completed another afternoon well enjoyed by all present. The next meeting will be held at the home of Mrs. August Jenson on the last Wednesday of the month, when, it being "pickling" time in dear old Lindbrook, ladies are asked to bring their favorite recipes for pickle making, so dinna forget, the more the merrier.

Mrs. W. C. Swift, Mrs. Weatherill sr., Mrs. Geo. Weatherill, Mrs. Letourneau sr., and Master George Weatherill paid visits to their Lindbrook friends this week, one day at Mrs. A. Whibley's and another at Mrs. E. Hooper's.

We note the Journal, in one of its columns wrote upon some old English newspapers owned by Mr. E. W. Hooper here, and in one instance mentioned one called the "Englishe Mercurie" so the Tofield Mercury has a good name to go on, the old paper is either of the 16th or 17th century. Goo! Mercury! Shades of your ancestors.

LOCAL AND PERSONAL

Mr. and Mrs. C. Patterson returned home this week after spending their honeymoon at Banff. They have taken residence in the house formerly owned by Mr. H. Hicks.

Mr. and Mrs. Bill Chapman returned home from their holidays this week.

Miss M. Rodig spent the week end at her home in Lacombe.

Muriel Malcolm spent the week end in Edmonton.

Rev. and Mrs. Wallis and Mr. and Mrs. Coutts and Doris returned after spending their vacation at the coast.

Mr. and Mrs. H. Greene returned after spending some time at Pigeon lake.

Mrs. Frank Dunn left this week for a trip to the coast.

Mrs. Bert Calvert visited her sister, Mrs. Seale over the week end.

Mr. McFadzean spent the week end visiting in Edmonton.

Miss Pat Burnett is holidaying at Sylvan Lake and Calgary.

Mr. Matchmoss returned this week from a two week's trip to the coast.

Mr. and Mrs. McCauley visited their daughter Helen, who is training in the Ponoka hospital, over the week end.

Mrs. Swift and Arnold left on Sunday for a trip to Summerland, B.C.

Mr. and Mrs. Dever of Toronto are visiting Mrs. Malcolm for a few days.

Mrs. Church of Wainwright spent a day in Tofield this week.

Mrs. Forman who was injured in an auto accident last Friday is progressing favorably. She was quite badly hurt and has been confined to bed, but hopes are held that she will be up next week although unable to assume her daily tasks. Fortunately, Mr. Forman or Mr. and Mrs. Anderson were not badly hurt.

PROSPERITY CERTIFICATES ARE ISSUED

First Alberta Prosperity Certificates were released for circulation on Wednesday by Hon. Lucien Maynard, minister without portfolio and in charge of the certificates branch. Through the public works department certificates are being mailed to the workmen in all parts of the province for highway construction work done during July.

Numbered numerically, starting at 1000, the certificates are for one dollar each and the first issue totals $220,000, which was the commitment for the month over the entire province, on the basis of $3600 for each constituency.

The first certificate issued was to Hon. W. A. Fallow, minister of public works, who received 1001 and paid out $1 for it.

Hon. Mr. Maynard then sold several to newspapermen, who also paid over $1 in their hard-earned cash for each certificate.

The certificates are approximately the same size as the Dominion one dollar bills.

The first issue bears the date of issue as August 5.

Each certificate bears the signature of Premier William Aberhart; Hon. Charles Cockroft, provincial treasurer, and J. F. Percival, deputy provincial treasurer.

Printed on the certificate is the agreement that "The Provincial Treasurer will pay to the bearer the sum of one dollar on the expiration of two years from the date of issue hereof upon presentation hereof, provided there are then attached to the back hereof one hundred and four one cent stamp certificates."

The certificates are being mailed to the foremen of various works crews, who will distribute them to the workmen, who will sign for receipt of the amount. A maximum of $40 a month will go to each man, with the balance being retained until the work ceases and the balance will be paid at the rate of $40 a month until the amount owing the man is exhausted.

Hon. Mr. Maynard said that the cabinet ministers had not yet decided the proportion of their salaries to be paid in certificates, but this would be arranged on the August commitment, the whole July printing having already been arranged for.

Demand from firms is heavy. While newspapermen were receiving their certificates from the minister, one firm phoned in for $250 worth and said a cheque was on the way down for payment.

Names of additional merchants and wholesalers agreeing to take the certificates are still coming in, said the minister and a revised list will be issued in the near future.

SILVER WEDDING ANNIVERSARY CELEBRATION

Quite a number of residents from this district attended the silver wedding anniversary of Dr. and Mrs. McPherson of Ryley on Sunday last. About 500 guests were present. Several speakers voiced appreciation of Dr. and Mrs. McPherson's citizenship and community labors and Mr. Johnston Ferguson presented the guests of honor with a lovely silver tea service.

Mr. and Mrs. Cary and family of Viking attended the Anglican garden party at the Robinson home on Wednesday of this week. Mrs. Cary is staying for a short time being a guest at the McCarthy home.

WAR BETWEEN CHINA AND JAPAN INEVITABLE SAYS HIGH SCHOOL PRINCIPAL HOME ON FURLOUGH

(Camrose Canadian)

Rev. Palmer Anderson, principal of a high school for the children of missionaries in the province of Honan, China, who is home on 15 months' furlough, after having been in the Orient for the past seven years, in speaking to the Canadian expressed the opinion that war between China and Japan is inevitable. The present conciliatory attitude which Gen. Ching and his government are charged with holding towards Japan by some sections in China, is probably due Mr. Anderson suggested to two main causes—first China is not sufficiently consolidated or equipped with men and arms to wage war, and secondly Communistic interests would immediately take advantage of the situation were the government's attention diverted by conflict. Gen. Ching was referred to by Mr. Anderson as a truly Christian leader, as capable, patriotic and strong as any leader China has had. Communism, he was sorry to say, was finding a very fertile field in China. Like all Christian workers there, he is heart and soul against Communistic teaching, since it is felt that it is divorced from all Christian sentiment.

On the other hand missionaries to China have never found the people more receptive. They are "hungry" for the gospel of the Saviour, and a crusading spirit is manifest in recent years indicating the Chinese are recognising the vital worth of the Christian religion, Mr. Anderson said, going on to remark that in the great awakening taking place that China is being transformed. Staffs and appropriations have been cut down by the church organizations sending workers into the Chinese field but this lack is being made up by the voluntary move on the part of the Chinese people to accept greater responsibilities for the missions and as a consequence the work is expanding rapidly.

Speaking of Japan's encroachment in China, Mr. Anderson said the invader's sphere of influence had been extended both south and west. In the cities of Peking and Tientsen, the Japanese are virtually policing those large centres and rule with an iron hand wherever they have established, suppressing all expressions of Chinese national feeling. While Mr. Anderson admitted that the Japanese have brought law and order to Manchukuo (and by the way he does not think much of our western pronunciation of the word) he was far from prepared to say they were right in the policies they are pursuing.

Asked if he thought Russia is getting ready to take issue with Japan in her policy of aggression, Mr. Anderson said it seemed altogether probable the Soviet would take action. Many border clashes have taken place already. So far as China is concerned, Russia's chief interest there seems to be to turn it into a Communistic state.

The province of Honan is not in the area where the Japanese have taken over control and that section of China is quite peaceful at present, the disturbing Communists having been ousted two or three years ago. Mr. Anderson expressed sympathy for the Chinese rural classes saying they are hard working in a degree unknown in many other lands, willing to do with exceedingly little, and peaceable in disposition, but they have been so exploited by war lords, communists, bandits, and others that they are seldom able to live in any sort of contentment.

His headquarters in China are at Hankow in Hupeh province and the school is located in the mountains, reached by way of Peking-Hankow railway. A government school for boys in the same vicinity accommodates 800 students. Mr. Anderson said his family expect to be in this locality for a month, having arrived a week ago Friday. They will spend the winter in Minneapolis, headquarters of the Lutheran church.

B.C. WHEAT MAY BE SHIPPED TO ALBERTA

CALGARY, Aug. 5—For the first time in many years, British Columbia wheat may be shipped to southern Alberta. Seed wheat may be obtained from a 12,000 acre farm near Creston, B.C. for drought districts in the south.

Edith Robinson and Clifford Appleby, school fair short course winners, returned from Vermilion last Saturday. They reported a very enjoyable and interesting week and are hoping to attend the winter courses at some future date.

Mr. Thomas Heathfield, a former resident of Tofield, over 22 years ago was a visitor at the Robinson home on Thursday. It was interesting to recall Tofield's boom days when brickyards and other businesses were flourishing.

H. Bowick is visiting near Barrhead for a week or more.

SOMEBODY TO SEE YOU

IF EVERYBODY with something to interest you should come and ring your bell, what a nuisance it would be. Think of the swarming, jostling crowd: the stamping of feet on porch and carpets.

Every day we know of many callers who come to see you. They never jangle the bell—they don't take up the whole day trying to get your attention. Instead, they do it in a way that is most considerate of your privacy and your convenience. They advertise in THE TOFIELD MERCURY.

These callers don't clutter up your steps or fill your mail boxes with large, untidy circulars. They don't annoy you by having their merchandise advertised in circulars which are thrown carelessly on your porch or in your automobile. They are considerate of your patience and your time. Instead, they gain your good-will, friendship, and respect by advertising in THE TOFIELD MERCURY.

In this way you have only to listen to those whom you know have something to interest you. They make it [illegible] rather quickly just what you want to know. You can receive and hear them all in a very few minutes and without noise and confusion or annoyance.

In fairness to yourself, look over all the advertisements in THE MERCURY every week. The smallest and the largest—you never can be sure which one will tell something you really want to know.

THE MERCURY

Marketing of Canada's Grain

By A. E. DARBY, Secretary, Winnipeg Grain Exchange.

The articles here reproduced formed part of a review of the machinery of grain marketing in Canada, presented to the Special Committee of the House of Commons on the Marketing of Wheat and Other Grains on April 21, 1936, on behalf of the Winnipeg Grain Exchange by its secretary, A. E. Darby.

Article III.

This article explains the methods of shipping and grading grain.

To return to the part played by country elevators in the system of grain marketing:—if the farmer does not wish to sell but prefers to ship his grain he can use the elevator as a public warehouse. The procedure covering the reception of this grain is carefully controlled and standardized by the Canada Grain Act. There are three different methods of warehousing called: (1) Graded Storage; (2) Special Binning; (3) Graded Storage Subject to Inspector's Grade and Dockage.

If the farmer elects to store according to grade, the country agent of the elevator company and the farmer must agree upon the grade and the amount of allowance for dockage that must be made to clean it to a standard grade. With respect to determining the grade, this is a matter of judgment on the part of the agent. If he exceeds the official grade there will be a loss to the elevator since the latter is compelled to return to the farmer the quantity and quality marked upon the receipt.

Dockage may be described as foreign matter, cracked grain, etc., which must be removed to bring the grain up to standard. Dockage is determined by the use of dockage testing equipment approved by the Board of Grain Commissioners. A sample of grain is cleaned and the broken grain, foreign matter, etc., removed, weighed, and expressed in terms of percentage giving the dockage. The farmer and the elevator agent agree upon the grade and dockage. The Board of Grain Commissioners has established allowances for shrinkage, based upon experience in handling each class of grain. A special shrinkage table is supplied by the Board and displayed in each elevator.

After the grade and dockage have been determined, a graded storage receipt can be issued. This receipt sets out the details of grade, dockage, shrinkage, and the net amount of grain. It provides that a quantity of grain of the same kind, grade and quality will be delivered either at the elevator or in carload lots at a terminal elevator point upon the receipt and payment of charges.

Maximum charges are authorized by the Board of Grain Commissioners for receiving, elevating, spouting, insurance against fire, storing for the first fifteen days, and putting into cars on track; and the Canada Grain Act provides that a tariff, lower than the maximum, may be filed with the Board by any licensee.

Where grain is specially binned the receipts issued by the elevator guarantee the weight and identity. Samples of the grain are drawn and retained until the grain is shipped out and the official grade is received by the shipper from the Inspection Department of the Board of Grain Commissioners. If the shipper is not satisfied with the grade, the sample is sent forward to the Chief Inspector of Grain, who compares it with the official sample drawn from the car. The inspector decides whether or not the identity of the grain has been preserved by the elevator company. His decision is final. By this method the farmer who chooses to special bin his grain protects himself with a view to receiving the identical grain from the elevator that he delivered. Although the authorized maximum rate for special binned grain is higher, the effective rate is the same as for graded stored grain.

Where the farmer does not wish to sell his grain at the local point but wishes to put it in store at a terminal, the usual method of handling is on the basis of a graded storage receipt. If there is a disagreement between the agent and the farmer with respect to the grade and dockage of his grain, the sample which has been drawn from each wagon-load at the time of delivery is sent to the Chief Inspector of Grain for official grade. After receiving the inspection certificate the agent, who has already issued an interim receipt, recalls same and issues a new receipt, basis the official grade.

There were in the three Prairie Provinces in 1935, according to the Board of Grain Commissioners, 5,729 country elevators with a total capacity of approximately 190,000,000 bushels.

The loading platform plays a certain role in the shipping of country grain. By concerted action farmers may secure a platform from which railway cars may be loaded from their wagons or trucks, thus avoiding the use of the country elevator. While in actual practice, the advantages offered by this means of shipment is not great, yet at some points the shipment of grain loaded over the platform is considerable.

The grain so loaded into cars over the platform may be immediately sold to a track buyer on the basis of government grade and the car will then be shipped forward to an interior or terminal elevator. After the car is unloaded the track buyer makes final settlement with the farmer.

Or alternatively the farmer may consign his car to a terminal selected by him in the care of some commission merchant or elevator company. The commission merchant or elevator company usually makes an advance to the farmer. When the sale of grain has been negotiated in accord with the instructions received from the farmer and after receipt of the official weight and grade, settlement is made with the farmer.

Both commission merchants and elevator companies operate on a commission or price margin of 1 cent per bushel on wheat, barley, rye and flax and ¾ cents per bushel on oats, these being the minimum rates of commission under the rules of the Winnipeg Grain Exchange.

The farmer is thus enabled, if he wishes to do so, to load his grain direct into cars, to secure government inspection and grade, and have it sold to a miller, exporter or other buyer on the Winnipeg Grain Exchange at not more than the margins mentioned.

The operations of country elevators, commission merchants and track buyers are largely governed by the provisions of the Canada Grain Act and by the regulations made by its authority by the Board of Grain Commissioners. The Board of Grain Commissioners also regulates the operation of terminal elevators and is responsible for the inspection and grading of Canadian grain.

Grading of grain is for the purpose of determining quality and to fix a basis of valuation, and is based upon the scientific knowledge of qualities according to physical appearance, together with the weight per bushel; mixtures of other varieties, or other cereal grains and seeds; freedom or otherwise from disease and its effects; the percentage and severity of damage or immaturity; freedom from foreign odors; and the moisture content. Grading and inspection are governed by the Canada Grain Act together with the regulations of the Board of Grain Commissioners.

For grain inspection purposes Canada is divided into two divisions; Eastern and Western. The Eastern Division includes all that part of Canada east of the City of Port Arthur, with inspection points at Toronto, Montreal, Sorel, Quebec, Saint John and Halifax. The Western Division includes all that part of Canada west of and including the City of Port Arthur, with inspection points at Port Arthur, Fort William, Superior, Winnipeg, Churchill, Moose Jaw, Saskatoon, Medicine Hat, Lethbridge, Calgary, Edmonton, Prince Rupert, Vancouver, New Westminster and Victoria.

Grain produced in the Eastern Division is largely used for home consumption and very little is exported; consequently only a small percentage passes through inspection points, and the number of inspections, therefore, is small in relation to the total production. The Grain Act requires that all grain passing through an inspection point in the Western Division shall be inspected and graded.

Committees on grain standards for the Eastern and Western Divisions, appointed by the Board of Grain Commissioners, establish standard samples for all statutory and commercial grades. The Western Committee also establishes standard export samples for statutory and commercial grades.

Standard samples are used as guides by inspectors and, in conjunction with the grade definitions contained in the Grain Act, govern the grading at all primary inspections.

Standard export samples govern the grading of any Western grain delivered out of terminal elevators, including overseas shipments.

All dockage is removed from the grain before being shipped out of terminal elevators. All outward shipments are sampled, inspected and certificates issued for the same. Each sample obtained is examined as to its cleanliness and quality, which are judged by comparison with the corresponding standard export sample established by the committee on grain standards. Inspection officers see that the grain is delivered into the proper car or hold of the vessel, thereby assuring the identity of the grain and grade.

A certificate issued on grain out of terminal elevators in the Western Division is known as "Certificate Final", as this is the final inspection certificate issued on this grain in Canada. These certificates accompany the grain to its destination.

Article IV. Will Appear Next Week

PRESERVE HEALTH WHEN YOU CAN

Fruits and vegetables every day in the year and every meal in the day are necessary to perfect health. To assure this one must look ahead and prepare now for the coming winter. Canning is one of the labors of the home which show results, and successful food preservation depends on destruction of bacteria, yeasts and molds, and prevention of further development. To accomplish this the food must be thoroughly heated to destroy the organisms and must be kept sealed and air tight to prevent the entry of other organisms.

Sugar, salt, vinegar are all aids to preservation of foods but years of experiment have shown that sterilising the food in jars or cans in which it is to be stored is most successful method of home canning. This is really an easier way of canning than the old open kettle method, also, the product keeps its natural colour, shape and flavor better. Elaborate equipment is unnecessary if care is exercised. Some housewives use a steamer, others like the heat controlled oven, still others prefer to use the water bath. Of course, the pressure cooker is quicker and sure, but every housewife does not possess one.

There are a few points which should be emphasized, rather than the usual "don'ts."

1. Use fresh products.

2. Handle small quantities at a time, pack and sterilise as soon as possible after blanching or pre-cooking.

3. Test all jars before using.

4. Buy new rubbers each year. Test each one before using. Be sure that the rubbers fit the type of jar. Wide rubbers for spring top jars—narrow ones for screw top jars.

5. If the water bath is used keep jars covered with water—2 inches over the top.

6. Keep the water boiling or the oven heat regular.

7. Use approved methods and allow full time for sterilization.

8. Remove the jars at the end of required period.

9. Seal jars tightly at once.

10. When cool, store in dry, cool, dark place.

Full directions for canning are given in the new Bulletin 534 "Canning Fruits and Vegetables," which is in the press and will be available in a few weeks time from the Publicity and Extension Branch, Dominion Department of Agriculture, Ottawa.

C. PATTERSON, Prop.

Quadricentennial of the Conversion of Menno Simons

1536—1936

(By Ezra Stauffer, Tofield)

EDITOR'S NOTE:—This year marks the four hundredth anniversary of the Mennonite Church. Therefore we requested Mr. Ezra Stauffer to write an article dealing with the history of the movement which he very kindly and efficiently has done, and for which our thanks are due. The article is published in its historical sense only and is not to be mistaken as a "boost" for or a "knock" against any body or anything.

In 1496 there was born in the village of Witmarsen, in Friesland, Holland, a boy, whose name, Menno Simons, was destined to be immortalized in the name of a church, which has been known for nearly 400 years as the Mennonite Church.

While it is true the name may have been given at least in part in derision, nevertheless, like other instances in history, it is to-day a name held sacred and in honor.

Strictly speaking, Menno Simons was not the founder of the church which bears his name, others having started the work; nevertheless he was a capable organizer and it was largely through his efforts that the Mennonite Church in Holland prospered as it did in the 16th and 17th centuries. In a somewhat similar manner North and South America received their names from the first name of Amerigo Vespucci rather than from Christopher Columbus.

Menno Simons (1496—1561), it is interesting to note was a contemporary of Martin Luther, (1483—1546), and like him was originally a member of the Church of Rome. To properly understand the age in which these men lived it is necessary to study the History of Europe, especially that part dealing with the reformation and its relation to the church. There was much that had crept into the Roman Church at that period in her history which is quite generally conceded to have been corrupt.

Perhaps the best way to understand Menno Simons' break with the Roman Catholic organization is to quote his own reasons as he has given them. Owing to lack of space, however, it is necessary to largely abridge his statements.

"In 1524, being then 28, I undertook the duties of a Priest in Pingjum, Friesland. My knowledge of the scriptures was practically nil. Two others of about my age served at the same station. The one was my pastor, quite well learned. The other succeeded me."

"The following year as often as I handled the bread and wine in the mass, the thought occurred to me that they were not the flesh and blood of the Lord. I thought it was the suggestion of the Devil and so confessed it often but I could not be freed from the thought."

"My two companions and myself wasted our time in drinking and frivolity and the few times we spoke of the scriptures, I could not speak a word without being scoffed at."

"At length I resolved that I would study the new Testament carefully and had not proceeded far ere I discovered we were deceived. Afterwards I heard that a God-fearing man, Sicke Snyder was beheaded at Leeuwarden for being rebaptized. It seemed strange to me to hear of a second baptism and so I consulted with my own pastor on the question of infant baptism but finally he admitted there was no scriptural foundation for infant baptism. Then I consulted others who said that infants were to be washed by baptism from their original sin, however, on comparing this argument with scripture I found that such a thought would make baptism take the place of the blood of Christ. Later on I consulted Luther, then Bucer, also Bullinger; each giving a different reason and each following his own opinion, but again in comparing their arguments with scripture I became convinced that we were deceived in baptizing infants."

"But still, although I had now acquired a considerable knowledge of the scriptures I was unregenerated, sinful and led a covetous life."

The severe persecutions taking place against those who differed with the Roman church at this time in Menno Simons' life had a profound effect upon him.

He adds, "Reflecting upon these things, my soul was so grieved that I could no longer endure the hypocrisy, the impenitent life, the perverted form of baptism, the false worship of God, etc."

Accordingly about 1536, or 400 years ago, Menno Simons renounced his priesthood and began publicly to preach true repentance and to organize believers into churches or congregations.

From then on, like the apostle Paul after his conversion, Menno Simons had to suffer severe persecution and often had to flee for his life having to hide not only himself, but his family as well. A price was placed upon his head and anyone found giving him shelter was severely persecuted. In 1539 Tjaert Reyndertz was martyred for secretly harboring Menno in his house. Menno Simons, himself, however, always escaped and died a natural death in 1561, aged 66 years.

It is interesting to note that Menno Simons was of Dutch, not German nationality and that his labors were in Holland and Northern Germany. His writings were written in Dutch and were later on translated into German and finally English.

The origin of the main body of the Mennonite Church was in southern Germany and Switzerland and at that time were known as Anabaptists (againbaptizers), or simply Swiss Brethren. Among the leaders were Felix Manz and Conrad Grebel, who suffered martyrdom for their faith.

For several generations the two bodies, i.e., the one in Holland and the other in Switzerland knew practically nothing of each other. Their similarity in faith resulted almost entirely from the fact that they both taught and accepted the Bible, especially the New Testament teachings literally.

While emigrating to America, largely at that time to Pennsylvania, the group from Switzerland and Southern Germany passed through Holland and as a result the name Menist or Mennonite was given to them as well.

So while some people here in the Tofield district may wonder why the two Mennonite bodies in the Tofield district are not united the above explanation gives the reason why these are not now and in fact never have been united but have a separate and distinct origin.

The congregation south of Tofield traces its origin back to the body of believers from Southern Germany and Switzerland. Also what German they speak is really a dialect known as Pennsylvania German. This congregation's services is now practically all in English, but what little German there is, is then of course in High German.

The congregation of Mennonites in the district, composed largely of immigrants from Russia since the Communist regime, trace their origin ultimately back to Holland and Northern Germany and so the language they speak among themselves is Low German. Their services are, however, in High German.

As stated previously, the faith of both bodies is largely similar.

The history of both branches has been largely one of persecution and for this cause they have emigrated from country to country. Also while parts of the faith and practises of the church may seem somewhat peculiar to the world at large, there is usually a sound reason back of each. The Church emphasizes her doctrines not primarily because they are Mennonite teachings, but first of all because they are Bible teachings and doctrines.

The following statistics of membership of various branches of the Mennonite church may be of interest:

MENNONITES (17 groups) 112,554

(A)	
1.—Mennonite Church	47,253
2.—Mennonite, Old Order Amish	8,500
3.—Mennonite, Conservative Amish Mennonite (2 groups) Defenceless	2,281
4.—Defenceless Mennonites	1,500
5.—Conference of Defenceless Mennonites	1,059
6.—Mennonite, Old Order (Wisler)	1,587
7.—Mennonite Reformed	1,200
(B)	
8.—Mennonite General Conference	25,561
9.—Mennonite Brethren of North America	8,150
10—Mennonite: Church of God in Christ	2,100
11.—Mennonite Brethren in Christ	7,600
12.—Mennonite Central Conference	3,127
Mennonite:	
13.—Hutterites	
14.—Stauffers.	
15.—Kleine Gerneinde.	
16.—Weavers.	
17.—Unaffiliated	926

(A).—Organization to which the church near Dodds belongs.

(B).—Organization to which the Mennonites, recently immigrated from Russia, largely belong.

LITTLE PIGGY DISHES

By Betty Barclay

Don't stick to fried ham and pork chops when serving "Piggy Dishes." Try these for a change and see how delightful they are!

Baked Spareribs With Apples

Wipe fresh spareribs carefully with a cloth which has been wrung out of hot water. Arrange the meat in a dripping pan and place in a hot oven which should have the temperature lowered gradually. Baste with drippings occasionally. When the meat is well browned place apples, which have been cored, in the pan with the meat. Fill the cavity of each apple with brown sugar and let bake until tender. In serving arrange the apples in a border around the spareribs.

Southern Pot Roast

[illegible] pork shoulder
1 medium onion sliced
2 cups canned tomatoes
Salt and pepper
2 tablespoons flour

Fry out the trimmings in pan suitable for the roast. Remove cracklings and all fat leaving but one [illegible]. Add flour. Brown slowly. Add onion. Brown slightly, then add tomatoes. Season the meat and add. Cook in fireless cooker four hours.

A Good Beverage—Nova Scotian Punch

1 quart water
2 cups sugar
2 cups chopped pineapple
1 cup orange juice
1/2 cup lemon juice

Boil water, sugar and pineapple 20 minutes. Add fruit juices, cool, strain and dilute with iced water if necessary. Either fresh or canned pineapple may be used.

Garnished Platter

[illegible] sliced ham, French fried potatoes, green peas and a slice of tomato make an excellent platter for [illegible]. Place the tomato on a crisp leaf of lettuce and surround it with a trio of pickles—an onion, a piece of cauliflower and a small whole cucumber—and you will make the platter far more attractive.

Furthermore, you will have added to its piquancy and to its food value.

Scalloped Potatoes

Into a well buttered baking dish put a layer of thinly sliced potatoes, salt, pepper and a thin scattering of finely cut cheese and [illegible] white sauce (1 tablespoon flour, 1 tablespoon butter to 1 cup milk). Repeat and cover with [illegible] crumbs. Bake in a [illegible] oven [illegible] until the white sauce bubbles through and the potatoes are well done. [illegible] cheese is omitted add small pieces of butter to each layer of potatoes. In order to save time of making cream sauce a small amount of dry flour can be sprinkled over layers of potatoes and milk added to cover the potatoes.

Cream of Pea Soup

What tastes better any time than a dish of home-made soup? Many make this the main dish of the meal. Others serve smaller portions before the meat course.

1 pint peas, fresh or canned
1 quart milk or part [illegible]
2 to 3 tablespoons flour
2 to 3 tablespoons butter
Salt and pepper

If fresh peas are used cook with least possible amount of water until tender, take out half of them and pass the remainder through a sieve together with the water in which they were cooked. There should be about one cup of this liquid. Make a white sauce of the butter, flour and milk. Add the pea puree. Just before serving beat with egg beater, add remainder of the peas, and season with salt and pepper.

"How did you make your neighbor keep his hens in his own yard?"

"One night I hid half a dozen eggs under a bush in my garden and the next day I let him see me gather them. I wasn't bothered after that."

EDMONTON PIONEER, 80 TAKES BRIDE, AGE 83

While startled clerks and stenographers heard the news with open-mouthed astonishment, 80-year-old John Zeigler, Edmonton old-timer and pensioner, and Maria Porter, 83 year-old widow, were joined in the bonds of matrimony by Assistant Registrar Packford in the marriage license office at the Administration building Tuesday morning.

With the old gang gone, Zeigler didn't think it would hurt if he were to forsake blessed singleness for wedded bliss. "I've steered clear of marriage for 80 years, so I figured I might as well take a chance," he said.

The sprightly and youthfully married couple don't look anything like their age, and Mrs. Porter claims that she would look younger still if she hadn't put her teeth in the store with a bunch of papers just a few days ago. "They make me look a lot older," she said with a smile.

The assistant registrar was a little startled when they appeared, and took them into conference to see what it was all about. But the couple had their minds made up and the ceremony was carried out. Mr. Zeigler doesn't hear very well, so it was necessary to repeat the ceremony a little louder than usual, but it counts just as much.

They assured reporters that they were completely happy. "We love each other, and that is all that matters," said the new Mrs. Zeigler, who is to be the family banker.

Zeigler was born in Germany, and Mrs. Porter was born in Ontario. Both have known each other for about thirty years, and for the last ten years Zeigler has been boarding with Mrs. Porter. But the friendship, ripened into love and the old couple decided to take the plunge.

They blushed a little, the same as others, when they applied for the license, and seemed just a little nervous. But when the knot was tied they went happily on their way hand-in-hand.

NOTICE

Tofield School District No. 1369

Owing to the prospective large enrolment of high school students, it is requested that parents resident outside of the Tofield school district hand in to the Secretary the names of students wishing to enrol in grades 9, 10, or 11. As only a limited number of non-resident high school students can be accommodated Preference will be given those whose names are first handed in.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour one two pounds of liquid bile into your bowels daily. If this bile is not flowing freely your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else.

Crop Testing Plan Field Days

During the next three weeks over one hundred "Crop Testing Plan" field days will be held throughout Western Canada. Dates and points are advertised daily over the radio and in the public press. Farmers and others are cordially invited to attend the meetings to observe how this work will improve their welfare. See the nearest Searle Agent.

GIRL FINDS SHE IS LIVING WITH WRONG FAMILY

Atlanta, Aug. 5.—Louise Madeline Pittman chose a Macon family [illegible] after [illegible] 17 years with [illegible] the man and [illegible] are [illegible] give up the pretty [illegible]

[illegible] get her back," [illegible] Pittman today.

[illegible] Garners in an Atlanta [illegible] hospital on successive days in May, 1919. By error the babies were mixed.

Finally hospital authorities gave [illegible] to the Pittmans and the other [illegible] Macon railroad engineer and his wife.

The Garners, not satisfied, took the case to court. Meanwhile the child given to them died.

Louise said she planned to go to Atlanta tomorrow with the Garners to "straighten things out" with the Pittmans.

NEW TAR SANDS ARE ANALIZED

Analysis of samples from the tar sands in the Lac Ste Anne and Lac la Nonne areas has been completed by Dr. James A. Kelso of the University of Alberta, Hon. W. A. Fallow, minister of public works announced Thursday.

The government, said the Minister hopes to develop these deposits.

Dr. Kelso states that the samples in question are very similar to the proven McMurray tar sands, both as to quality and quantity.

The analyses shows bitumen 13.2 per cent, mineral matter and sand [illegible] per cent, gravity of bitumen 1.020 per cent, and moisture 4 per cent.

LITTLE GIRL, 5, VICTIM OF SCALDING TUB

Rosalind, Alta., Aug. 6.—Stepping backward into a tub of scalding water while playing, five year old Jeannette Schwecher of Heisler received burns which resulted fatally while a visitor at the farm home of Frank Shulte, near Heisler.

The child's parents were on a holiday fishing trip at Jasper and Mrs. Shulte was caring for the children during their absence. With her sister Mrs. Shulte was steaming canned vegetables in a boiler in the separator house and the children had been warned to keep away. Apparently the five year old, absorbed in her play, walked backwards into the boiler. Her screams brought the two women and the little girl was rushed to Daysland for medical aid.

Mrs. Shulte did not know where to locate the parents and it was only by chance that a friend met them on Jasper avenue in Edmonton and informed them of the accident. They arrived at Daysland before the little girl died.

CARD OF THANKS

I wish to avail myself of this medium to sincerely thank those who by their generosity made it possible for me to take a recuperative rest at Banff.

E. McLAUGHLIN

Cream of Celery Soup

1 quart milk or part milk and part water
2 tablespoons flour
2 tablespoons butter
1 quart chopped or diced celery
1 bay-leaf
Salt and pepper

Cook the celery, onion, and bay-leaf in just enough water to cover, until the celery is very soft. Mash through a sieve. (This should make about a pint of pulp.) Make a white sauce of the milk, flour, and butter. Combine the sauce and vegetable. Season with salt and pepper, reheat, beat with egg beater and serve.

Vol. XVII, No. 28 Thursday, August 13th, 1936 $2.00 Per Year. To U.S.A. $2.50

KETCHAMOOT

Mr. and Mrs. A. F. Schultz were Sunday dinner guests of Mr. and Mrs. C. A. Ingram.

Mrs. Sorenson of Edmonton is spending her summer holiday with her friend Mrs. Chas. Williams, also Jackie McDowell of Edmonton.

Mrs. T. A. Owen visited at the Paul Thomas home in Tofield and at the home of her niece Mrs. T. D. Ferguson last week.

Mr. and Mrs. Thompson of Tofield and Mr. and Mrs. Williams were Sunday evening guests of Mr. and Mrs. Sears.

The Ladies Aid meeting and Sunday school picnic was held at the Cookson home in Woodlawn district on Friday last. Dinner was served cafeteria style at one o'clock; fried chicken with all the trimmings, which all did ample justice to. Races were then run off by the children, and while soft ball was being played the ladies adjourned to the home to hold their meeting which was well attended. $75.00 was paid on the minister's salary, $25.00 on the missions and maintenance fund. After the meeting they all gathered at the picnic grounds for ice cream and cake. The children, too, were treated to candy, nuts and lemonade. Needless to say we all enjoyed the day immensely, while the youngsters had a delightful time.

Miss Edith Davison and Uncle William Stairs returned home Tuesday after homesteading several months on their homesteads at Drayton Valley.

Mrs. Brick, brother Ed. Ratigan, and Les. Ovaldson spent Monday and Tuesday in Edmonton.

Misses Marie and Evelyne Lawson are staying at the home of their uncle, Martin Lawson.

Messrs. Ernie Brick and Frank Ratigan are doing carpenter work at Red Deer.

Open air services were held at the Tollefson home Sunday afternoon. The speakers were from Camrose.

Mrs. Geo. Lawson and daughter, Miss Mabel, are expected home on Wednesday after a ten days holiday as guests of Mrs. Harold Smith of Vancouver.

The Coombes family and Henry McGinitie returned home from their blue berry picking excursion with very poor results as the late freeze in the spring seemed to have killed the blossoms.

AMISK CREEK

Several from this district attended Dr. and Mrs. McPherson's silver wedding celebration held in Ryley on Sunday, August 2nd.

The Misses Agnes and Magda Annebo left for Grande Prairie first part of last week to visit their uncle and other relatives and friends for a couple of weeks.

The Misses H. Annebo and Thora Haugen returned home from Edmonton last week. They attended the summer school at the university.

Mr. and Mrs. E. A. Moen, Myrtle Hilmar and Evelyn Hillerud motored to the city and attended the field day held at the university last Thursday.

Mrs. E. Pearson visited with Mrs. J. Annebo one day last week.

Several around here have started the harvest and if this warm weather keeps on the harvest will be general next week.

Miss B. Berild is going to teach Miquelon Lake School next term.

Alice, Lilly, Olaf and Arthur Haugen and Olaf Stokkan motored to Moose Lake last week on a fishing and berry picking trip. They returned Saturday.

Most of the young people and some older ones were picnicing at Lakeview last Sunday.

Rolf and Marvin Ward from Shonts were guests at their grandmother's place and other relatives at Ohaton last week. They returned home on Sunday.

Marvin Moen spent a week at the Agricultural School in Vermilion. He won a scholarship last year at the school fair. He had a nice time and liked it very much.

Ladies' Aid will hold their monthly meeting at the R. O. Berg home on Tuesday of this week.

Alfrida Berild assisted Mrs. J. Jacobson with the house work last week.

Mrs. D. Dordeck and her brother were callers at the P. O. Finston home one day last week.

LOCAL AND PERSONAL

Mr. G. A. Trout has rented a half section of land to Mr. Lewis Dale, of Hayter, Alberta, for next year. Mr. Hayter is bringing up 100 head of sheep and other stock.

Miss H. Law of Innisfail visited at the Law home here for the week end.

Miss Jean Baptist and Mrs. Baptist's mother of Edmonton are at the Baptist home here.

We regret to report that Mrs. Imler is a patient in an Edmonton hospital.

Mrs. McLeod, who has been visiting her daughter in Hallkirk returned home last week.

Wes Taylor, who underwent an operation for appendicitis in Edmonton returned home Sunday.

Mr. and Mrs. Bob Lane and family of Edmonton are visitors at the Googhin home.

Mr. George McFadzean spent the week end visiting in Edmonton.

Mr. and Mrs. Johnston Ferguson are holidaying at Banff.

Mr. and Mrs. L. W. Smith of Trochu, formerly of Tofield are camping at Lakeview.

Mr. and Mrs. A. B. Clutterham returned from a trip to the states this week.

Miss Jean Hall spent a few days visiting in Tofield.

Mrs. Provost and small son of Edmonton are visiting at the Allan home.

Gwen and Pat Firth and Jack Beirnes returned from a trip to Banff.

Miss V. Ball of Edmonton is spending a week visiting relatives and friends in Tofield this week.

Mr. and Mrs. Dover, visitors of Mrs. Malcolm, left for the coast on Thursday.

Miss Nina Bell of Edmonton is visiting her sister, Mrs. Scott here.

Mrs. Bert Calvert visited her sisters in Tofield one day this week

The Misses Anne Swift, Myrtle Bethel and Katie McAllister returned from summer school last week.

Mrs. Ed Hicks is spending a short time visiting in Edmonton.

Mr. and Mrs. Rollins of Viking spent the week end at the Wood home.

Mr. Matchmuse and D. Brown motored to Edgerton for the week end.

Mrs. Swift and Arnold returned from a short visit to Summerland this week.

Mr. Bill Stairs and Miss Edith Davidson returned from Drayton Valley this week.

Miss Maudie Redig left on Saturday for her holidays.

WEST PACKERS LACK CAPACITY NOW REQUIRED

Packing houses of western Canada have not the capacity to process sufficient cattle during the present autumn season to make the reduction estimated necessary to meet the situation confronting livestock men as a result of the drought. Hon W. N. Chant, minister of agriculture, declared on his return on Wednesday from Ottawa, where he interviewed the Dominion government on relief for the situation.

Hon. Mr. Chant, who was accompanied by H. A. Craig, deputy minister, stated that discussions were held with both the Dominion government and the railways regarding disposition of cattle from the drought area and the feed supply for wintering.

"Negotiations with the Dominion government were hampered owing to the fact that several Dominion ministers were in the Old Country, including Hon. J. G. Gardiner, minister of finance, both western men," said the minister.

"Several discussions were held with the acting minister of agriculture and his deputy. Several proposals were made to deal with the matter."

The president of the Canadian Council of Meat Packers, Norman McLean; John Burns, president of the P. Burns company and Frank Baker, fieldman for the council met the Dominion and provincial representatives and it is expected that most of the cattle will be processed into tankage, as there is a limited market for boneless beef at present. Packers are negotiating for a market and have promised to advise the government within a few days as to what price can be paid for lower grade cattle.

Vice presidents of the railway companies in charge of traffic, were interviewed in Montreal and they agreed to the following:

One-third reduction in freight rate, on the shipment of fodder and feed grain into the dry area from parts of the province where feed is available; one-third reduction on the shipment of lower cattle grades to [illegible] boneless beef or tankage; one-third reduction on the shipment of cattle from the dry area for fall and winter feeding, with a similar reduction for return in spring.

All these reductions are contingent upon the Dominion and provincial government assuming the other two-thirds, making it free shipment.

The minister stated that he was calling a conference of the advisory committee appointed by the members caucus to deal with the matter of policy and the meeting would be held on Thursday at the legislative buildings. This committee consists of D. B. Mullen, Edmonton; W. R. King, Cochrane, and Solon Low, Warner.

Mr. Leonard Hansen, Albert Kallal, and Vincent Becker of Carrollton, Ill. are visiting friends and relatives in this district.

IN MEMORIAM

In loving memory of Father, who passed away on August 17th, 1932.

We missed him when we need a friend
On him we always could depend;
He cheered us in sickness and soothed our pain
God grant some day we will meet again.

Always remembered by Leo and family.

MRS. ED HILL PASSES AWAY AT WETASKIWIN

It is with sincere regret that we report the passing, on Thursday, August 13th, of Mrs. Ed. Hill, aged 23, at the home of her parents, Mr and Mrs. Geo. McLaughlin, at Wetaskiwin, Alta.

Mrs Hill, the former Miss Ruth McLaughlin, grew up here at Tofield, and was in former years a well known and popular member of the young people here. For quite a long time she was unwell and receiving every care possible, to a large extent regained her health. In the early part of 1935 she was united in marriage to Mr Ed. Hill and after residing at Tofield for some time, left for Drayton Valley, where again her health failed her. For some time Mrs. Hill has been staying with her parents at Wetaskiwin.

She leaves besides her husband and parents, one brother, Don, and a sister, Enid, both at home.

The sympathy of the residents of this district will go out to the bereaved husband and parents in their sad loss.

The funeral, we understand, will take place at Edmonton on Saturday.

NEW BANK BUILDING STARTED

The preparatory work for the erection of the new Bank of Montreal building is now underway, a Calgary firm having been awarded the contract. At present excavation work for the foundation is being done, the foundation going down seven feet to be below the frost line. The building will be one storey, stucco, and is being erected on the corner lot across from Taylor's store.

Mr. Floyd Howard and family of Carrollton, Ill., are visiting at the C Kallal and Joe Hansen homes. Mrs. C. Kallal and Mr. Joe Hansen are sister and brother of Mrs. Howard.

The exceptionally long spell of warm, dry weather, is hastening harvesting operations. Quite a number have had binders in the fields this week, and should next week be fine, harvesting will be general. North of Tofield the crops are quite good considering the dry season, south of town towards the west they are a little lighter, while towards the east they are a little lighter still. However, considering the plight of some districts, we are fortunate, though our crop could not be classed as a bumper one.

FOR SALE OR TRADE.—One Good Model T Ford Coupe, 1926. Good mechanical condition.—Apply to W. Swinton, Tofield.

ARCTIC NURSE WEDS MINISTER

OTTAWA, Aug 12—Details of an Arctic wedding at which a Guelph, Ont., nurse was married to an Anglican missionary came over the air today to the radio branch of the Marine department.

The wireless operator at Coppermine, a government post in the far north, turned news reporter for a few minutes today and he made a good job of it.

Here is his report of the wedding: "White wedding celebrated quietly Monday evening last when Rev. J. Harold Webster, St. Andrew's Anglican minister, Coppermine, united in marriage Anna Rossell, nurse of Guelph, Ont. and Howard Rockaby Thomas, Anglican missionary of Cambridge Bay, N.W.T. Bridesmaid Miss Kipston, visitor from London, England; best man, Sergt. J. T. Makenson, R.C.M.P.; bride given away by pilot Matt Berry, Canadian Airways. This first account of event sent out."

SOMEBODY TO SEE YOU

IF EVERYBODY with something to interest you should come and ring your bell, what a nuisance it would be. Think of the swarming, jostling crowd: the stamping of feet on porch and carpets.

Every day we know of many callers who come to see you. They never jangle the bell—they don't take up the whole day trying to get your attention. Instead, they do it in a way that is most considerate of your privacy and your convenience. They advertise in THE TOFIELD MERCURY.

These callers don't clatter up your steps or fill your mail box with large, untidy circulars. They don't annoy you by having their merchandise advertised in circulars which are thrown carelessly on your porch or in your automobile. They are considerate of your patience and [illegible]. Instead, they gain your good-will, friendship, and respect by advertising in THE TOFIELD MERCURY.

In this way you have only to listen to those whom you know have something to interest you. They make it [illegible] quickly just what you want to [illegible]. You can receive and hear them all in a very few minutes and without noise and confusion or annoyance.

[illegible] yourself, look over all the advertisements in THE MERCURY every week. The smallest and the largest—you never can be sure which one will tell something you really want to know.

THE MERCURY

Marketing of Canada's Grain

By A. E. DARBY, Secretary, Winnipeg Grain Exchange.

The articles here reproduced formed part of a review of the machinery of grain marketing in Canada, presented to the Special Committee of the House of Commons on the Marketing of Wheat and Other Grains on April 21, 1936, on behalf of the Winnipeg Grain Exchange by its secretary, A. E. Darby.

Article IV.

This article describes the facilities for handling grain at terminal elevators and for exports.

Grain for export out of Canadian Pacific ports and Churchill, Manitoba, is delivered directly into ocean vessels. Grain for export out of Fort William-Port Arthur, Ontario, and Superior, Wisconsin, is loaded into lake vessels. Shipments destined for United States Atlantic ports are transferred in bond to elevators and railway cars at Buffalo. Those taking the all-Canadian route are transferred to canal boats or railway cars at Canadian lower lake and bay ports for the Canada Atlantic seaboard, where each lot loaded on ocean vessels is again sampled and checked by officers of the Inspection branch. These samples are preserved and are used for checking and comparison in case of overseas complaints. It is because of the efficient service given by the Canadian grading system that Canadian grain is bought and sold in foreign markets almost wholly on the Certificate Final basis.

Bulk handling of grain lends itself to economy both in transhipment and in storage and is accompanied by surprisingly low percentages of waste or loss. The first cost of elevator buildings and equipment is naturally considerable but is offset by the saving in labor cost of handling the grain into and out of the storage bins.

The operation of the system as a whole may best be compared to that of a river. The great network of branch railway lines covering the grain growing areas of the west, with country elevators dotted at short intervals along them to act as primary collectors of the grain hauled to them from the farms in wagon or trucks, provides the tributaries feeding two main streams which converge at Winnipeg in the east and discharge themselves through the terminal reservoirs at Fort William-Port Arthur into a channel reaching to the sea coast, provided by a great fleet of grain carrying steamers. A similar stream flows westward from the prairies to Vancouver, with smaller streams discharging at Prince Rupert and to the north-east through Port Churchill on the Hudson's Bay. The present provision of country elevators is ample to take care of present needs, supplemented as it is by a number of interior transfer and storage elevators capable of storing some 18,000,000 bushels.

These interior transfer and storage elevators are situated at important points in Western Canada and were built by the Dominion Government for the purpose of cleaning and storing grain. From these elevators this grain is forwarded either to mills throughout Western Canada or to Fort William-Port Arthur or to Pacific seaboard ports or the port of Churchill for export to the markets of the world.

Coming now to the discussion of terminal elevators, those at Fort William-Port Arthur have a combined capacity of 93,000,000 bushels; at Vancouver and other Pacific coast ports over 20,000,000 bushels; and at Port Churchill 2,500,000 bushels.

By far the largest proportion of Western Canada's grain moves out of the country by what is known as the Eastern route. Navigation on the Great Lakes is closed from about the end of November until the end of April each year. These two factors combine to make it necessary to have a much larger elevator capacity at the head of the lakes, and during the winter months large quantities of grain are stored there awaiting shipment at the opening of navigation.

Vancouver and other Pacific coast terminals handle the grain of Western Canada which moves by the so-called western route through the Panama Canala to the markets in in the United Kingdom and Europe. As navigation is open the year round at these ports, and also as the volume of grain shipped by this route is not as large as the volume of grain shipped by the eastern route, the terminal capacity at Vancouver and Pacific coast ports is not required to be as large as that at Fort William-Port Arthur, and the capacity at these ports is at the present time fully adequate.

Churchill handles the grain of Western Canada which moves by the Hudson's Bay route. Navigation at Port Churchill is open approximately for two months in the summer. The shipment of grain by the Hudson's Bay route is as yet in its infancy.

The function of the terminal elevators is to receive grain in carload lots from shipping points throughout Western Canada and to clean and prepare this grain for shipment by boat. These elevators are known as Public Terminals. This does not mean that they are owned by the public, for, while some of them are provided by the Government, they are alrgely and generally owned by private companies. They are called public terminals because they are licensed by the Board of Grain Commissioners to receive, store and handle grain for any shipper who wishes to use them; that is, they are for the use of that section of the public who are interested in the handling of grain.

The charges for cleaning, storing and handling grain are under the control of the Board of Grain Commissioners, and are published each year by the Board so that everyone pays exactly the same price for the use of the facilities of these elevators.

Another class of elevators is known as transfer elevators, and these have been provided at various points in Eastern Canada to receive grain in transit for storage or transshipment to the seaboard, and for distributing the quantities required by the eastern flour mills for domestic consumption and export in the form of flour. The capacities of these elevators at the lower lake ports total some 50,000,000 bushels. They are located at various ports on the lower lakes and on the St. Lawrence river. They are also, generally speaking, privately owned and operated as public elevators, although the Government has provided one or two of them.

At St. John and Halifax there are seaboard elevators connected by railway lines with the lower lake port elevators, and during the winter months, when navigation is closed on the St. Lawrence river, these are used in the export of grain to the markets of the world. The combined capacity of these elevators is about 3,700,000 bushels.

At Montreal, Sorel and Quebec during the open season of navigation which is from about the end of April to about the end of November, the seaboard elevators there handle the largest proportion of grain that moves out on the eastern route. There is a combined capacity of 30,500,000 bushels at these ports and they receive grain from lake vessels and railways for storage and transshipment into ocean-going vessels which carry the grain via the St. Lawrence route for export to world markets.

An alternative to the St. Lawrence route for the export of Canadian grain is provided by the facilities for storage at Buffalo and Erie, N.Y., through which Canadian grain is transhipped to U.S. Atlantic ports.

The evolution of this system of handling grain is the result of many years of experience. The elevators have been constructed from time to time by private capital or by Government expenditure and, viewed as a whwole, comprise buildings of the most modern and up-to-date type. They are provided with every device which can be used in the economical handling, storage and treatment of grain. In a country producing such large quantities of grain as Canada does, elevator accomodation must be a most important factor in the successful marketing and handling of the grain production of the country, and it is difficult to imagine any system which, all things being considered, could be more efficient and less costly. The expense of handling and the wastage of grain have been reduced to the minimum.

As in the case of country elevators grain held in storage at terminal elevators, grain in course of transhipment to seaports, and grain held in Canadian and United States ports in readiness for loading upon ocean vessels, is nearly always hedged in order to protect the owners against price fluctuations and to obtain the necessary financial credit.

Article Five will appear next week.

108,747,050 BUSHELS WHEAT IS CARRYOVER

Figures By Ottawa

Ottawa, Aug. 12.—Dominion bureau of statistics Wednesday issued complete figures for the nation's wheat carry-over at the end of the crop year, July 31, placing it at 108,747,060 bushels, a decline of 94,525,957 since the end of the 1934-35 crop year and the lightest figure in seven years.

SPARKLING JELLIES

"Pound for pound and boil an hour" was the recipe given in our grandmothers' day for making sparkling jellies and delectable jams, and so sweets her "preserves" were a triumph. Modern knowledge of foods, however, demands methods by which equally pleasing jams which also retain the nutritional value of fresh products, can be produced.

"Add pectin and boil one minute" has taken the place of the old slogan, and gives attractive jams and jellies with very little effort, very little fuel consumption, and all the beautiful variety colour and flavour in various fruits just as nature made them.

Pectin is a chemical substance obtained from ripe fruits, particularly apples and, in the right combination with acid, is necessary to form a jelly consistency. Some fruits contain pectin in large quantities, others have very little. Some have not sufficient acid especially if fully ripened. Apples, particularly the crab variety, red currants, and grapes usually make jelly of good consistency without the addition of other pectin, but seed fruits, such as peaches and strawberries will never "jell" without it. Commercial pectin is usually made from apples, made in clean factories and under careful supervision, and therefore may be used with confidence. Follow the directions given with the pectin which may be either liquid or in powder form.

Apple juice may be prepared for use with non-jellying fruits, and for this purpose "Wealthy" apples, just a little under-ripe, seem to be best. They yield a juice with little colour and no distinctive flavour. Crab apples provide a juice which jellies excellently but their flavour is predominant when used with mild flavoured fruits.

Some of these combinations make jelly of excellent quality:—

Raspberry and red currant

Raspberry and gooseberry

Choke cherry and apple

Blueberry and apple

Equal quantities of juice from the two fruits may be used.

WIT And WISDOM

Repitition

A very methodical Scotsman staying at an hotel used to read 20 pages of his book every day, recording his progress by a marker.

A wag put the marker back 20 pages every night.

At the end of a week they asked the reader how he liked his book. He replied, "It's verra interesting book, but there's a certain amount of repitition in it."—Tit-Bits.

THE COVENANTS—

THERE IS one thing about the covenants that is highly satisfactory—they are printed in black and white for all to read. The daily press have printed them in full and whatever motives they had in mind, doing this was a sure enough generous gesture towards those desirous of having them signed by the people. The interest of this paper, circulating as it does chiefly among rural people, lies in the covenant farmers are asked to sign, and the potent part of this solemn agreement is that the signatory agrees to sell at least 50 per cent of his products over that required by himself or his immediate dependents, within Alberta for Alberta credit when called upon to do so. There is no mention as to who will be the buyer or any explanation as to exactly what Alberta Credit is, consequently one is left to assume that the government, through its agents will be the purchaser and with Alberta Credit it will be possible for citizens to purchase Alberta produced goods from other Albertans.

Now, it is generally conceded that a man is privileged to spend his money where and when he pleases providing it is spent lawfully; and by the same token it should be conceded that a man is privileged to sell his product where and when he pleases, providing it is sold lawfully. Therefore, we consider it no affair of ours whether a farmer chooses to sell a portion of his product one place for money or another place for Alberta Credit—that decision solely rests with him.

Nor should political affiliations have any bearing on whether one becomes a signatory or not. A person could be greatly opposed to the government and view the covenants favorably or could be a dyed in the wool Socred and refuse to sign them. The one and only viewpoint which farmers should take, in our opinion, is: are they fair and acceptable contracts? Are both parties by the wording of the agreement, equally bound to perform the obligations contained therein? Is it an agreement of mutual guaranteed benefit to both parties? and finally, in the event of either party failing to live up to the agreement, is there a court of law in which both parties could be forced to live up to the agreement to the full extent of their resources.

As we understand it, signing one of the covenants is a formal act of registering for the Alberta Social Credit dividend, tentatively set at $25.00 per month. If this assumption is correct, the agreement resolves itself into the government agreeing to pay a dividend and the citizen agreeing to co-operate with the government in all particulars. If this interpretation is correct, we would like to see the signature of a responsible officer of the government as well as that of the farmer, upon the document.

TWENTY YEARS AFTER—

LESS THAN twenty years from the war that was to end war, the British Government has asked for $4,500,000 with which to issue a poison gas mask free to every man, woman and child in the country.

A factory is to be set up and, as soon as completed the masks will be distributed. To prevent loss, destruction or deterioration through careless handling, they are to be kept at convenient, central points, readily available, however, upon signal.

Meanwhile, everybody is to be instructed in their use.

What a commentary on the present state of international diplomacy! The world peace machinery, purchased at the price of 37,000,000 casualties in the last war, has been scrapped. Peoples are snarling at each other like savages ready to spring.

Only, more's the pity and the irony of it, being "civilized," they will not fight each other like savages. Instead, they are planning to poison one another, whole nations at a time.

Such is the true, the ghastly implication of the news from Britain. And it should cause us all . . to hang our heads in shame.—Pittsburgh, (Pa.) Press.

"THE ENEMY OF THE WORLD"—

OUR PEOPLE, or at least the vast bulk, are too provincial-minded to comprehend the meaning of the Greiser incident at Geneva. . . .

I thoroughly agree with Dr. Robert McElroy, famed historian of Oxford, who said only the other day: "The enemy of the world—of all the world—is not Hitler; it is not Mussolini, nor Stalin—no, the enemy of the world is the provincial mind. The woes of the world are not due to immovable economic forces, they are due to removable politicians, Republicans, Democrats, Socialists, Bolsheviks, Fascists, Nazis. The world is weary of their ways of narrow partisanship; of scheming promises, made only to deceive, by men too small for the problems committed to them for solution. . . Today, we face the grave need of the international mind."—Marlen Pew, in Editor & Publisher.

ALBERTA POOL MAKES PAYMENT TO GOVERNMENT

A payment totalling $453,025, was made to the Alberta government by the Alberta Wheat Pool on August 1st, this being prepayment of the year's installment of principal and interest on the amount due Sept. 1st on the 1929 overpayment.

It will be recalled that the Alberta government issued bonds in 1931 to the banks to meet the Pool overpayment. In turn the government took security from the Pool and arranged for amortized repayment over a twenty year period. Alberta Wheat Pool has promptly made payment of both principal and interest on each due date since the arrangement was entered into.

DOLLAR WHEAT

A couple of years ago J. H. Thomas, at that time Secretary for the Colonies in the British government, ridiculed the idea that dollar wheat would occur in the near future. He said that wheat production had developed to such a degree that a price of a dollar a bushel was unthinkable. But right now dollar wheat is in the offing, and it is quite noticeable these days that the British millers are among the keenest buyers. When wheat, the great food of the nations was plentiful, buyers did not want large quantities of it no matter how low the price went, but now that it has become a rather scarce commodity, a very decided change of mind has taken place.

PROFITABLE PLUM PRODUCTION

(Experimental Farms Note)

The production of plums on the Prairies is increasing. The general knowledge of varieties and culture is becoming more complete, resulting in greater interest being taken in plum growing at the Indian Head Experimental Farm many varieties selections from the Manitoba Native plum have been giving the best results.

The plum trees should be planted inside an adequate shelter belt if possible. Only recommended varieties should be planted. Many varieties of good quality are listed but are not recommended due to lack of hardiness or lateness in maturing. The plum is self sterile. Therefore it is necessary to plant at least two varieties together that cross pollination may take place. These should be of the same blooming period. A good practice is to have a row of plum seedlings for this purpose and a row of sandcherries if plum-sandcherry hybrids are being grown. The plum-sandcherry hybrids are not generally as hardy as the plums. Since they are more inclined to be bush type in habit of growth, it is beneficial to bend the branches down that they may be afforded some protection from the snow covering. If this practice is not followed furit will very likely be borne only on the lower branches that have received some protection.

An economical method of making a start in plum growing is to plant the pits. This is also the way to originate new varieties as every seedling produces distinctly different fruit. It is often erroneously believed that seedlings grown from Assiniboine, for example, should also carry the same name. This is not so and each seedling is entitled to be named separately, if worthy. Pits should be planted, preferably in the fall, in rows, three inches deep and about six inches apart. After the seedlings are two years old they may be transplanted to a permanent location. Samples of pits are sent out in limited quantities to interested parties free of charge.

GROWING GRASS SEED

(Experimental Farms Note)

Each year a large acreage is sown to grass in the Prairie Provinces, yet relatively little of the seed used is produced by the farmer sowing the seed. He grows his own seed grain, why not his grass seed? It can be done easily and has two distinct advantages. First—no new weeds are introduced onto the farm, and second—it eliminates cash expenditure for seed.

More care is required when growing grass for seed purposes than when growing it for hay, if a satisfactory product is to be produced. To begin with, clean seed and clean land are imperative, otherwise the labour and time involved in attempting to clean both the standing crop and the threshed seed will be so great that little or no profit is derived from the seed.

The original seed sown should be of the highest grade. Here cleanliness is more important than germinability. Only a small quantity of seed is needed for a start as it can be increased rapidly. At Brandon Experimental Farm, from one pound of Sudan grass, sown in rows, over 150 pounds of seed were harvested. It pays to start with the best seed obtainable.

It would be folly to sow clean seed on weedy land for not only do the weeds interfere with the growth of the crop but it is difficult and often impossible to separate weed seeds from grass seeds with the farming mill. For this reason, clean summer fallow land is recommended.

While the seed block may be sown broadcast, in close drills or rows, 3 to 3½ feet apart, the row seeding has much in its favour. This method of seeding requires less seed for sowing and permits intertillage, therefore affording a better opportunity to remove weeds and [illegible] plants which may be in or between the rows. It is easier to remove the weed plants from the crop than weed seeds from the threshed material.

NOVA SCOTIA HAS SEA SERPENT: HUNDREDS OF BATHERS VOUCH FOR IT

LIVERPOOL, N.S., Aug. 11 — Nova Scotia has a sea serpent and hundreds of bathers from Summerville beach near here will vouch for it.

The "reptile fish," bearing striking resemblance to British Columbia's "Caddy," and Ogopogo and Scotland's Loch Ness monster made its first appearance Monday in the ocean off Summerville beach.

It was described as [illegible] from 80 to 100 feet long, with the girth of a half-barrel and a small head arched above the water [illegible].

Witnesses, including a number of prominent Liverpool business men, said the serpent travelled through the water with an undulating motion. It bobbed up and down and occasionally showed several large vertebrae. [illegible] that of a motor [illegible].

When the creature was first sighted [illegible] and a party of men [illegible] in a 28-foot motor boat [illegible] tried to head it toward shore but the canny beast dived beneath the boat and reappeared only after it was hundreds of yards away.

At one time it headed directly across the bow of a large steam yatch owned by Dr. J. L. Brinkley of Del Rio, Texas. Finally after playfully leading the hunters a merry chase across the water, it tired of play and disappeared in deep water far off shore.

NOW A NEW BIGGER BAR

SUNLIGHT SOAP

MORE SOAP AT NO EXTRA COST

● Now a bigger bar in a single carton. The 4 small bars in one carton will no longer be obtainable.

A PRODUCT OF LEVER BROTHERS LIMITED

New Locomotives Poems in Steel

Canada's newest railway locomotives are poems in steel, graceful light-weight, semi-streamlined, machines capable of 110 miles an hour.

Radical departures in construction have been made in the Canadian Pacific Railway's five new "3000" engines, the first of which was taken over on Monday, July 27, at a brilliant ceremony which was broadcast on a nation-wide radio net-work through the facilities of the company's Communications Department and which included addresses by Sir Edward Beatty, G.B.E., K.C., LL.D., chairman and president, Canadian Pacific Railway; His Worship Mayor Camillien Houde of Montreal; William C. Dickerman, president of the Montreal Locomotive Company, where the new locomotive was built; and J. N. Burke, Canadian Pacific veteran.

The new Jubilee Locomotives, so named because they will go into operation in the jubilee year of the company's transcontinental passenger service, will pull a completely new type of train, lighter than the ordinary, [illegible]. The new coaches are under construction.

COMMUNICATION

[To the Editor]

Sir:

Having lately returned from a tour of Northern Saskatchewan, in the vast area stretching from Lloydminster on the west, through Lashburn, North Battleford, Saskatoon and Prince Albert to Melfort we think that our reactions may be of interest to the public of the Prairie provinces.

In the first place it is worthy of note that, in spite of economic reverses, the people in that area, as elsewhere, while [illegible] and perhaps surely concerned at present and past crop conditions, yet have an abiding faith in the future of our country—a faith [illegible] has been upon the ability of the soil to produce, and upon a reasonable distribution of those farming products at fair and remunerative prices. For several years now in certain areas because of drought the soil has not produced in its wonted manner, the distribution of products has fallen [illegible] and has been found wanting and employment. certainly the returns in a financial way have been unprecedently low. Withal, these people feel and know that there is yet a great and abundant future for Saskatchewan. Hence, excepting some who are too hurriedly [illegible] there is a general desire [illegible] proposals [illegible] which will initiate [illegible] revival.

[illegible] the above we are not unduly surprised at the [illegible] of a resolution [illegible] British Immigration Land Settlement [illegible] also in [illegible].

As a result [illegible] we received [illegible] may be interesting. [illegible]

(1) There is evident concern on [illegible] and distribution [illegible] the general [illegible] Saskatchewan and [illegible] particularly [illegible] the four major [illegible] debt, Railway Deficits and un[illegible]

(2) An absorbing interest in the idea, or ideal, of British Immigration was everywhere manifest.

(3) There is a definite conviction that there is a distinct relationship between British immigration and trade with the United Kingdom.

(4) The feeling is widespread that Canada is badly underpopulated and that early steps to improve such a condition are warranted.

(5) It is stated that, in all future Immigrant Land Settlement, three [illegible] are essential

(a) Adequate finance

(b) Proper and sufficient supervision

(c) Prevention of repatriation of [illegible]

(6) [illegible] definite that, in any [illegible] credits or capital for selective British Immigrant Land Settlement [illegible] credits or capital should be advanced by the Province of [illegible]. Public opinion is that Canada has already built up and developed at great expense the framework for such a settlement, i.e. Railway [illegible] lines and highways, [illegible] and marketing facilities, schools and universities; etc. Canada having developed all essential [illegible] for a population many times greater than that which we have at present it is felt that Britain should furnish the capital for establishing new immigrant families in self supporting homes on the land.

(7) There is a wide spread interest in the proposed Immigration and Settlement Convention, scheduled to take place in Saskatoon September 23rd, 24th, and 25th, where, it is realized, for the first time in the modern history of Canada there will be submitted for study and approval a clear cut "plan" for selective British Immigrant Land Settlement.

(8) It is felt that in the present state of world unrest and trade isolation, a gesture of good will towards the United Kingdom will perhaps be of great assistance, especially when the Ottawa Trade Agreements come up for revision.

(9) There is a manifest desire to see something "tried", having as its objective the increasing of our population, with the bettering of trade possibilities, as well as at the same time removing some of the present economic pressure.

Yours faithfully,
G. C. Neff, Chairman,
J. R. Garden, Member
Organizing Committee.

CROP TESTING PLAN PROVES FARM BENEFIT

Holden, Alta., Aug. 11.—Many farmers of the Holden, Viking, Poe, Bruce and Haight districts were able to see the kind and quality of wheat they are growing on their own farms at the Crop Testing Plan field day held here on Saturday afternoon. The Crop Testing Plan is a method for the improvement of farmers' crops on the prairies and although the work is carried on for all cereals it is primarily concerned with the wheat crop. The plan is sponsored by the Northern, Searle, British-American, National, Midland and Pacific, and Alberta Pacific elevator companies, and assistance in the work is given by the Dominion Experimental Farms, the Dominion Seed Branch, the provincial departments of agriculture, the provincial schools of agriculture and the three prairie [illegible]

These institutions supply trained cerealists who visit these field days and analyse each individual farmers' sample growing in the crop testing plot. In the fall of the year when the farmers are hauling their grain to any of the elevators who are associated with the plan, a small sample of wheat from the wagon or truck is selected by the agent. These are numbered and grown the next season and analysed on a given field day.

Unanswerable!

Cold logic would suggest that every grain grower in the vicinity of an Alberta Pool elevator should deliver his grain thereto.

This organization is conducted on the basis of pure co-operation, a movement that has been tried and proven sound over a long period of time.

The co-operative movement is the one sure way of preventing exploitation, assuring fair business methods and overcoming the possibility of the accumulation of private fortunes at the expense of the growers.

Every wheat producer in Western Canada benefited materially as the result of the formation of the Wheat Board last year, a direct accomplishment of the determined stand of the Wheat Pools.

The Pools are the one force working exclusively for the benefit of the grain growers, on an aggressive, forward looking basis.

Pool elevators should get your grain.

THE TOFIELD MERCURY

Vol. XVII., No. 29 Thursday, August 20th, 1936. $2.00 Per Year. To U.S.A. $2.50

LINDBROOK

Cutting is fairly general here now in between showers but almost everyone is very glad to see the rain although it may cause a little inconvenience, we certainly can do with it.

Mr. and Mrs. Joe Ellis of Vancouver motored up from there last week visiting old friends and relatives here. A picnic was held at Mr. Norman Ellis's beach last week in their honor but we guess the showers must have turned it into a "house party, and we'll bet it was no "Oxford Group" house party either, not if we know the genial Joe and his wife. More likely musical comedy, etc.

Mr. and Mrs. E. W. Hooper left last Saturday on a visit to friends and relatives at the Coast.

Mrs. F. Gould returned home from hospital in Edmonton last week, much improved in health and we hope the improvement is permanent.

Mr. Jean Corbin, one of our oldest settlers, who lately lost his wife, has sold his farm to Mr. Funs who until lately was with his family on one of Mr. Trent's farms near Tofield. Mr. Funs is of the Mennonite community.

Miss Gladys Lisslemore who has been spending a short visit with her relatives, Mr. and Mrs. Bracegirdle and family, returned to her home at Wainwright last week.

JOE AND ED KALLAL BUY OUT HOLDEN MOTORS LTD.

Joe and Ed Kallal, sons of Mr. and Mrs. Ed Kallal of Tofield have recently purchased the business at Holden known as the Holden Motors Limited. With the business goes the Ford Motor agency for that district.

Both young men are well known locally, having been raised here. They have been particularly active in what could be termed educational farming, having won honors both in livestock and grain fields of action.

Their many friends will wish them every success in their new venture.

LOCAL AND PERSONAL

Front quarters of good Beef 5c per pound. All cut up for you if you wish. Central Meat Market.

Mr. J. Cookson returned after a short trip to the Coast.

Jean Hull returned to Edmonton after visiting in Tofield.

Mrs. Wilmore, who has been visiting with her parents, Mr. and Mrs. H. Kendall, returned to Edson this week.

Mrs. A. E. Calvert visited relatives in Tofield over the week end.

Mrs. W. Hay of Edmonton spent a few days visiting at the Kendall home.

Mr. and Mrs. Harold Green spent the week end in Viking.

Miss L. Ross spent the week end visiting friends in Edmonton.

Miss Pat Burnett returned home last week after spending her holidays at Sylvan Lake and Calgary.

The Misses Nina and Myrtle Ball returned to Edmonton after visiting with their sister Mrs. Scott for some time.

Mrs. Bell and Bobbie Leming of Edmonton spent a few days here visiting at the Norman Scott home.

Mrs. McQueen and son Clarence of Calgary are visiting with Mrs. Appleby and Mrs. E. Seale.

The Misses Marian and Gladys Haines of Wainwright were visitors at the Burnett home on Wednesday.

U.F.W.A. MEET

The U.F.W.A. met at the R. C. Phillips home on Aug. 12, with 16 members and 8 visitors present. Mrs. McConkey, president of the Edmonton Branch of Women's International League for Peace and Freedom, addressed the meeting, which proved to be very interesting. Mrs. McConkey and party, Mrs. Shortcliffe, Mrs. Riley and Mrs. Schruman motored from Edmonton. The hostesses were the late Mrs. Phillips, Mrs. Anderson, Mrs. Bigland, Mrs. Johnson and Mrs. Haukedahl.

AMISK CREEK

In spite of the gloomy weather, over one hundred persons and between fifteen and twenty cars turned out last Sunday to help Mr. and Mrs. J. Berild celebrate their 25th wedding anniversary. The bride and groom of twenty-five years ago were seated at a table centred by a three tier wedding cake, baked by Mrs. E. A. Moen. Mr. and Mrs. J. Jacobson and Mr. and Mrs. Branes were also seated at the table with them. A short program was given by the Haugen young folks and a song by Mrs. Jacobson and Mrs. Johnsrie. Mr. E. A. Moen then gave a short address and presented Mr. and Mrs. Berild with a small purse of money as a token of esteem from their neighbors. Mr. and Mrs. Berild responded, thanking one and all for coming. Several pictures were taken. The bride looked very handsome in the gown she was married in twenty-five years ago. Mr. and Mrs. Berild received many congratulations from their many friends and many good wishes for the years to come.

The Ladies' Aid held their monthly meeting at the R. O. Berg home on Tuesday of last week. Nearly all of the members and many visitors were present. Mr. and Mrs. Anderson, missionaries from China were present, Mr. Anderson taking the devotation part of the meeting. Mr. and Mrs. Anderson both talked of their work in China.

The new school is now nearly finished and is the nicest building around here.

The Ladies' Aid and Young People of this district have paid for the repainting of the church, inside and outside. Mr. J. Berild did the work.

Arnold Berg is painting the Annebo house.

Evelyn Hillerud is assisting with the housework at the Erickson home during the harvest and threshing period.

Mr. and Mrs. P. Anderson and family have been visiting at the I. C. Olson home. Mrs. Olson and Mrs. Anderson are sisters.

Pearl Patterson, Edna Moen and Lily Berg had their tonsils removed at Tofield last week. They are all doing as well as can be expected.

Missionrry Anderson held a service in the church here last Sunday evening. Due to the rain and slippery roads the attendance was small.

Ole Berild returned from Rocky Mountain House last week.

The Misses Agnes and Magda Annebo returned from Grand Prairie Saturday evening. Mr. Annebo and Robert O. Berg motored to Edmonton to meet them. Agnes returned to Camrose to take up her duties again on Monday morning.

Mrs. P. O. Flasten visited with Mrs. Olson on Wednesday of last week.

Beulah Hillerud visited with her sister Mrs. C. Patterson in Tofield for a few days last week.

COVENANT REGISTRATION FORMS NOW AVAILABLE

Those citizens who desire to obtain Alberta government registration forms in Tofield may do so by calling at the office of A. J. H. McCauley. It is not necessary to sign the forms at once, they may be taken home, studied, and if the citizen desires to do so, returned signed in the course of a day or so.

DROUGHT-STRICKEN CATTLE WILL MOVE EAST PROVINCES

OTTAWA, Aug. 20—Movement of 200,000 head of feeder cattle from drought-stricken prairie farms to eastern Canada is contemplated in plans being worked out by officials of the department of agriculture, it was learned today. The normal movement is around 100,000 and this season's total will depend largely on the response of farmers in the east to the government's offer of assistance in freight rates.

When questioned about the possibility of moving 200,000 head, Hon. James Gardiner, minister of agriculture, said no definite announcement could be made for a few days. The movement of cattle to Eastern Canada would have to be solely a Dominion undertaking. Under the provisions which came into effect on Aug. 1, an eastern buyer will get free transportation to the prairies if he buys a carload of cattle. Further assistance in bringing the cattle back is planned. The extent of the assistance has yet to be announced.

In former years much of the finishing of feeder cattle was in the feed lots of western Ontario. While there has been a fair crop of hay, the hot weather since haying has made it unlikely the normal number of cattle will be fattened there this winter. Eastern Ontario allotment will likely be up to normal and Quebec has had good crops which may encourage the farmers there to go into the business of fattening western Canada cattle.

The minister when in the maritimes recently suggested that with the good crops their prairie cattle could be taken into those provinces. They would have the advantage of being close to Atlantic harbors for shipment to United Kingdom markets. He had not yet been advised of the reaction of the maritime farmers to the scheme, Mr. Gardiner explained.

During the drought in 1934 it cost $12 a head to move fodder into the burnt-out districts. This did not include the movement from stations to the farmers which the farmers did themselves.

The view here is that any increase in the movement of feeder cattle to the east will reduce the relief for the western provinces.

Natives of the Solomon Islands wear necklaces of beetles' legs as love tokens.

PERMITS NEEDED TO BURN STRAW

In view of the serious feed shortage in this province, permits to burn straw stacks must be obtained from the Royal Canadian Mounted Police or other authorities in the district, Hon. W. N. Chant, minister of agriculture, stated.

An Order-in-Council necessitating obtaining a permit has been passed.

Word has been received by the minister from W. A. Flamme M.L.A. for Cypress, that straw stacks have been burned in some of the southern irrigation districts.

Enquiry at Mr. McCauley's office on Thursday afternoon elicitated the information that between fifty or sixty forms had been taken out. These mostly went to towns people. Since the forms have been available locally, comparitively few farmers have been in town. Over the week end no doubt quite a number of farmers will take out forms for study. Those returning signed forms should do so by Aug. 25th as it is hoped to have registration completed by the end of the month.

Mrs. R. C. Phillips Passes to Reward Sunday

The death occurred on Sunday, August 16, of Mrs. Nellie Zoe (Plants) Phillips, well known and highly respected citizen of the Lakeshore district.

The late Mrs. Phillips has resided in Tofield since 1907 and leaves a very wide circle of friends. Even though suffering from poor health, Mrs. Phillips has always taken an active interest in all home and community affairs, she was president of the Lakeshore Ladies' Aid for several years, secretary of the Lakeshore school district for years and was also secretary of the Tofield U.F.W.A. and helped in many, many untold ways with all Junior activities. She was a quiet unobtrusive, sincere friend of any in trouble or sickness. She took a keen interest in present day affairs and had during the past few years done much interesting and thoughtful writing on these numerous problems.

Lakeshore has lost a valuable and an exceptionally broad-minded friend and neighbor.

Mrs. Phillips was born in Winfield, Iowa, on Jan. 22, 1893, coming to Tofield with her parents in 1907. She attended the Tofield High school and on April 11, 1911, was united in marriage to Reuben C. Phillips, a young farmer of the Lakeshore district.

The funeral was held on Tuesday, August 18, at 10:30 a.m. from the United Church, Rev. Allan officiating. The hymns sang were: "Just as I am," "Nearer My God to Thee," and "He Leadeth Me." Mr. Murray sang "In the Garden." A large number of friends and relatives were present to pay their final respects. The floral tributes were beautiful and numerous. Interment took place in the family plot of the Tofield cemetery.

She leaves to mourn her loss a loving husband, three sons, Neil Lynn and Donald; her parents, Mr. and Mrs. Plants of the Woodlawn district and one brother Clifford. She was pre-deceased by three brothers; Gerald, killed in action overseas, and Arlo and Irvine passing away at home. The pallbearers were Mr. J. Johnston, L. Wood, G. Francis, L. Graham, W. Abernethy and J. Warner.

The floral tributes were

Loving husband and sons; Father, Mother and Clifford; Gladys, Winnie; Owen, Ellen and family; Mr. and Mrs. MacKinnon and Grace; Mr. and Mrs. Henry Tiedeman and Henry Tiedeman jr.; Mr. and Mrs. L. H. Graham and family; Mr. and Mrs. George Francis and family; Watson (Scotty) Johnston; Mr. and Mrs. J. H. Johnston; Mr. W. G. Reed; Mr. and Mrs. Clifford Reed and family; Mr. and Mrs. J. Woods, Maggie, Mel and Lloyd; Bertha and Miriam Seale; Mr. and Mrs. T. R. Murray and family; Mr. and Mrs. J. B. Warner; Mr. and Mrs. Haukedahl; Lakeshore Ladies' Aid; Mr. and Mrs. M. C. Hammond; Tofield U.F.W.A.; Beaver Lake Mutual Telephone Co.; Mr. and Mrs. G. B. Brace and Jim; Tofield Mercury staff; Mr. and Mrs. Lattimer

(Mrs. R. G. Bailey; Mrs. V. Moss, Mrs. M. Eaglesham and Jean; Mrs. T. Jones; Mrs. Julius Jacobson; Mrs. Harold Weatherill; Mrs. Weatherill sr.; Miss Katie Desjerlais; Mrs. E. J. Anderson)

(Mrs. Owens; Mr. and Mrs. C. A. Ingram; Mr. and Mrs. G. W. Sears; Mrs. McMullen.)

(Mr. and Mrs. O. Barnes and family; Mr. Frank Hull; Mr. and Mrs. James Ingram and family.)

(Mr. and Mrs. Ralph Barnes; Mr. and Mrs. Oscar Barnes; Mr. and Mrs. Earl Carlisle; Mr. and Mrs. Lewis Carlisle; Mr. Frank Hull.)

COUNCIL MEETING

A regular meeting of the Tofield Town Council was held at the Council chamber on Monday night of this week. Only business of a routine nature was transacted.

SCHOOL OPENS MONDAY AUGUST 31st

As if in harmony with an early season, the Tofield public and high schools will open on Monday, August 31st, for the Fall term.

The staff will be the same as last year with the exception of Mr. Broughton, who has been appointed to the Bardo school. The staff for the coming term is Miss Forster, Miss Wingrove, Miss Stuart, Mr. W. P. McIntyre and Mr. Thomas, principal.

CARD OF THANKS

We wish to thank all those who, in our recent sad bereavement, have expressed their sympathy in floral tributes. In particular, our gratitude goes out to Mrs. L. H. Graham, Mrs. George Francis, Mrs. R. H. Phillips who gave unsparingly of their services, Mr. Murray for his beautiful solo, the choir, Mr. McCauley, organist, the pallbearers and Rev. D. K. Allan.

Reuben C. Phillips, Neil, Lynn and Don.

MONSTER'S BONES ARE DUG UP

EASTEND, Sask.—Aug. 17—A 25,000,000-year-old monster is being dug up near here by George Beane, Eastend editor, and C. Jones, town policeman.

The bones, they say, are in a good state of preservation.

This animal, they declare, was as "big as a house," so big his legs were bowed, and he had a huge head and a mouth big enough to swallow a tree without gulping. He had three big horns in the front of his head

The Hum of the Binder The Roar of the Tractor

Each year, as the daylight hours noticeably become shorter, and we realize another summer is on the wane—a chorus is heard throughout the land. Not musical, as we understand the music of men; not even nature's music of wind, trees and water, but a chorus of frenzied activity.

Ripened grain has been cut and stooked, and men, to procure the golden kernels have come with huge machines that do not permit defeat.

With a roar that is welcomed by those who know it best, the tractor driving the separator starts up a song from within the separator's vitals—a battle song which shrieks of victory. Thresh, Thresh, Thresh, from early morning until evening. Thresh, Thresh, Thresh, and the golden grain comes down the spout adding its particular note to the crescendo of noises. The time of hustle and hard work, but withal a pleasant time—the time of reward.

There is another noise with which we are familiar, we, in the Mercury Office, hear it frequently. Not once each year, but once each week—the noise of the printing press.

Not the roar of the city daily press of course, but if you feel inclined to call it so, the pleasant song of a country print shop. A song that sings of events, local events, personal events. Singing bards of long ago were never so prolific of thought, the songs of marching armies were never so numerous as the items published.

Two dollars a year, the old press sings, Re-new promptly, renew promptly, re-new promptly.

Yes! September brings a western chorus. A chorus of noises on the farm, while each Thursday brings its own particular noise to the Mercury Office. Can we, dare we, hope that both noises will be harmoniously blended, which simply expressed means that each and every Mercury subscriber will pay his or her subscription this Fall.

We thank you.

THE MERCURY

Marketing of Canada's Grain

By A. E. DARBY, Secretary, Winnipeg Grain Exchange.

The articles here reproduced formed part of a review of the machinery of grain marketing in Canada, presented to the Special Committee of the House of Commons on the Marketing of Wheat and Other Grains on April 21, 1936, on behalf of the Winnipeg Grain Exchange by its secretary, A. E. Darby.

Article V

This article deals with the methods of selling and shipping export grain.

The activities of shippers and exporters form the next important link in the machinery by which grain is conveyed from the producer to the overseas importer and consumer.

When grain is delivered to the country elevator by the farmer, that part of the grain will ultimately be exported to foreign countries is shipped by rail to Fort William-Port Arthur or Vancouver and other Canadian ports on the Pacific and also to Churchill, where it is stored in various terminal elevators.

In the case of Fort William-Port Arthur the shipper or exporter buys the grain in store in the terminals there and ships it to various ports in Eastern Canada or the United States depending upon where, in the opinion of the exporter, the grain may at that time be in the best position for export.

When the shipper or exporter purchases this grain he places a hedge upon it by selling the same quantity of futures. This hedge is kept on the grain until the grain is sold abroad to importing countries at a stated price. The hedge is then lifted by buying back the futures. At times the exporter may make forward sales abroad, and in such cases he protects himself by the purchase of futures which later are exchanged for cash grain necessary to complete the sales. The shipper or exporter may ship the grain to such ports as Montreal, Sorel or Quebec, where it is in a position to be loaded into ocean boats, or to Bay ports such as Midland, Goderich, Owen Sound or Sarnia, where it can be moved by rail to Halifax, Saint John or other ocean ports, or he may also ship to Buffalo, where the grain can be moved to New York via the Erie Canal when navigation is open, or by rail to various United States Atlantic ports during the winter months.

When shipping grain from Fort William-Port Arthur the shipper or exporter must first charter his vessel space to the port to which he wishes to ship, and to the freight must add elevator loading charges at Fort William-Port Arthur, as well as vessel brokerage, insurance and banking charges. These charges are all added to the price paid for the grain in store Fort William-Port Arthur, and when the grain is moved across the lakes the shipper or exporter has his grain c.i.f. Montreal or c.i.f. Buffalo or c.i.f. Goderich, whichever the case may be. C.i.f. means plus all other charges, insurance and freight. It is important to note that the exporter uses all of these ports and keeps a large quantity of grain stored in the east so that he is able to offer abroad any grade of grain at any time of shipment that the foreign buyer may require.

When the grain is thus in position the exporter must endeavor to sell it to importing countries abroad. This is done in the following way: First, the exporter must charter or get offers of space in ocean freighters at some given freight charge. To this must be added elevator charges for loading the grain in the ocean boat, together with insurance charges. Then by taking the price of the grain c.i.f. the ocean port, plus this ocean freight and loading, shipping and insurance charges, he has the value in cents per bushel c.i.f. foreign ports. If offering to the United Kingdom he must convert the price in cents per bushel to sterling per quarter, or, if to the Continent, the price is usually converted to other foreign funds per hundred kilograms.

Between the close of one day's market and the opening of the next exporters offer abroad at a stated price for different grades of grain c.i.f. various United Kingdom or European or other ports for acceptance before the opening. These offers are made to millers or merchants or agents located in different countries and cities abroad. Each exporter has many connections abroad and covers practically every place where there is any demand for Canadian wheat. It is clear, therefore, that with the many firms engaged in the exporting of Canadian wheat every probable buyer abroad is well supplied with offers, at a very narrow margin of profit, each exporter working in close competition with other exporters. As mentioned above offers are usually made to importers in foreign countries at a stated or outright price, therefore if the offer is accepted the exporter must buy futures to take off the hedge which was originally sold when the exporter purchased the grain.

Offering the grain at outright prices is usually the biggest risk that the exporter takes. If, for example, May wheat closes in the Winnipeg market at 80 cents, the exporter must decide at what price he will base his overnight offers. He may base these offers at 80 cents or perhaps ¼ cent or ½ cent higher. In any event, if the offer is accepted he buys in his hedge the next morning at the best possible price. The amount an exporter may offer overnight depends on the condition of the markets and his judgment as to his ability to buy in his hedges next morning. The exporter then ships the grain on the ocean boat, according to the terms of the contract, from the port in which he has the grain stored, and invoices the buyer, accompanying the invoice with the ocean documents attached to a sight draft to secure payment.

Exporting Canadian grain from Vancouver and other Canadian Pacific ports is handled in the same way except that instead of buying grain in store Fort William-Port Arthur the exporter buys it in the store or f.o.b. Vancouver, and he then adds freight and other shipping charges to the foreign port, and cables abroad giving firm offers at a stated or flat price for reply the next morning. The Pacific ports in Canada are particularly valuable in exporting Canadian grain during the winter months when navigation is closed on the Great Lakes and the lake ports are frozen over.

In exporting from Churchill the exporters buy the grain in store or f.o.b. Churchill and, after adding freight, insurance and shipping charges, offer abroad at an outright price in the same way as from Atlantic and Pacific ports.

Millers, maltsters and feed merchants in Canada constitute an important part of the grain marketing system and utilize all the machinery here described for filling their requirements and hedging their purchases and sales.

Article six will appear next week.

TRUCK RODEO

This is the story of two big horses. One of them likes trucks and the other does not. The one which seems to have a genuine affection for modern transport is King Solomon, owned by P.O. Peterson and Sons, Black River Falls, Wisconsin. The Petersons bought a General Motors truck to haul the King around the countryside, and that seemed to have been an error, because now the King won't stay in his stall in the barn. One morning he was missing and after a long search was found standing happily in the truck rack, and now he jumps in there whenever he gets loose, and disdains a ramp or loading platform. Fortunately he disembarks just as readily, at a word of command from his owner. The other horse is a very bad horse, indeed. It was being driven in a Chevrolet truck by its owner, D. Maclean of Cache Bay, Ontario, when it decided to stage a protest demonstration. After breaking its halter, the animal hurled its 1500 pounds on top of the driver's cab, finally rolled out in front of the truck. Said the driver MacLean: "Only for having such a strong cab we might have been badly hurt or killed."

MORE AUTOMOBILE FOR YOUR DOLLAR, NOW

"Back in 1916, a customer in Regina would have to pay about $700 for a Chevrolet four-cylinder touring car. Today for that sum, the factory lists a sedan, with six cylinders, steel turret top, safety glass, and dozens of other items which even the most expensive cars of 1916 could not boast. The reasons for the improvement are two: first, increased volume and second, the tremendous advance in research and factory methods. There were 6200 Chevrolets sold in Canada in 1916; already in 1936, domestic shipments are over three times as great as that."

The automotive sales organization has travelled a long way since 1916.

"There was practically no used car problem in those days. Nearly every sale was a 'straight deal'. There was, on the other hand, a big service problem, because dealers were still trying to sell cars as a side-line, and well-equipped service floors were few and far between. We have changed all that. The retail car business is today a business in its own right, and a big one. Factory-trained mechanics, and modern equipment are to be found in dealer premises everywhere."

"Is that a factor in sales?"

"Unquestionably. Good dealers, a good products, and a friendly factory are the successful combination."

"Are Canadians buying as many cars as they should?"

"Not until they buy 100,000 a year and we are still a little under that. It takes that many to take care of obsolescence alone. By that I mean not the merely outmoded cars, but the actually worn-out, the kind that paralyze traffic and take an untold accident toll."

"What are the 1937 prospects?"

"Excellent, I would say", Mr. McTavish concluded, "still better motor cars, more Canadian than ever, and more Canadian buying power to keep the factories busy."

HEALTH

by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

THE VALUE OF PAIN

We all hate pain. We would do practically anything to get rid of it and would take anything that comes in a bottle or as a pill to kill it. But we seldom stop to think that pain is really one of the best friends we have! Why?

All around us in our everyday life we are surrounded by signals. Bells and wigwags at the railroad crossing, red lights at the "no thoroughfare" sign, indicators for the oil, the gas and the radiator on our dashboard. These are danger signals. We may grumble volubly when we see a detour sign or have the crossing gates block our pathway, but deep in our hearts we are thankful for these warnings.

So should we feel pain, for pain is Nature's danger signal that something has gone wrong. Instead of smothering it at once, we should endeavour to find out just why we have that pain.

The time to detect a gastric ulcer, or an inflamed appendix, or a decayed tooth is early—before irreparable damage takes place and something can still be done to correct the trouble.

The old proverb "out of sight, out of mind" might have been written "out of pain, out of mind" for all too often the individual forgets about his resolution to see a doctor the moment the pain eases up. Doctors who have diagnosed some urgent surgical condition, such as a perforated stomach ulcer, or a gangrenous appendix, and realize that only drastic measures can save the patient, often face the predicament that the patient, as soon as the pain has been relieved by opiates, refuses to go to hospital or to submit to surgery.

Unfortunately—and we mean unfortunately—pain is not always an early symptom. This is frequently noted in cancer and the result is that the disease may have made considerable progress before the patient notices the other changes or makes up his or her mind that these other symptoms or signs are sufficiently serious to see a doctor. Therefore we must remember that we are not always justified in waiting for pain to appear. If there is a lump, or there is unusual bleeding, or any change which cannot be readily explained by some simple cause—see your doctor. And even if the explanation does seem obvious, go to him if there is any doubt in your mind at all, for it is better to be safe than sorry.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

SCIENTISTS SEEK FIRE-RESISTING SHIP TO COMBAT GREATEST MENACE OF OCEAN

NEW YORK, Aug. 17.—Scientists aboard a steamer anchored in the James river, near Norfolk, Va. expect to complete this week an answer to the sailors most dreaded problem—fire.

Marine experts said Monday that from the smoke-blackened cabins of the S.S. Nantasket, the test ship, will emerge a new era of marine construction by which the dangers of fire at sea virtually may be eliminated.

It was indicated that all passenger-carrying ships built in the United States in the future would be completely fireproof.

For seven months the experts have been setting fire to the interiors of specially constructed cabins, aboard the Nantasket, burning material representing beds, closets, cupboards, sheets, mattresses, rugs, and passengers' clothing then making careful calibrations of just what happened.

"We must stop underestimating the intelligence of the average person."—John Erskine.

THE TOFIELD MERCURY
A Weekly Newspaper Published At
Tofield, Alberta
W. Werton, Publisher

MRS. ZOE PHILLIPS—

THE EDITOR of this publication feels that mention of the services rendered this paper by the late Mrs. Zoe Phillips is right and proper. A small country weekly is dependent, to no small extent, as regards reader interest, upon its community correspondents. For many years, just how many we do not remember, possibly fifteen, Mrs. Phillips, from time to time, with unfailing regularity, performed the duties of community correspondent. It was a purely voluntary service, the satisfaction of having performed a service for her community being her only reward. Never at any time while acting as correspondent enjoying robust health, and always having the ordinary duties of the busy farm woman at hand, she found time and energy to keep people posted as regards her district and to assist this publication. We take pride in our community correspondents, practically all of them have stayed with us since the commencement of the Mercury eighteen years ago, almost to a week, and we feel a distinct sense of loss with the passing of Mrs. Phillips. On behalf of the other correspondents, readers generally, and all that "The Mercury" implies, we extend sympathy to the family in the loss of a loved one.

KNOWLEDGE AND TECHNIQUE—AND STILL MORE KNOWLEDGE—

WHILE THE daily newspapers of the world have headlines about this or that political camp, stories of civil war, economic upheavals etc., there is going on in a less ostentatious manner, advances in the mode of living equally as important to mankind as political developments.

A great many years ago chemists analyzed fruits and vegetables and the knowledge that these things contained so much of this and that element became fairly common. So did the knowledge that the various elements therein were drawn from the soil and air by process of the plant's growth. Consequently more advanced thinkers conceived the idea of growing a number of fruits and vegetables without soil. The very early experiments along this line were not outstanding successes and it remained for Dr. W. F. Gericke, of the University of California at Berkely, Cal., to perfect a process whereby enormous yields per acre of certain fruits and vegetables have been produced. While the process is developing and large yields per acre of various fruits and vegetables have actually been produced, it is still more or less in the experimental stage. In addition to the knowledge of what chemicals to use, there is a technique required which varies with climatic conditions and amount of light available.

The process, which in principle is comparitively simple, consists in first procuring a shallow basin of concrete, wood or metal, about six inches in depth and of any area. Over the top of this is placed a wire screen on which is placed a layer of excelsior and sawdust. This layer serves as a seed bed and seeds placed thereon, being kept moistened germinate and thrust their roots down into the basin into which has been placed a solution most suitable for the kind of plant seeded. In most cases there are eleven elements mixed in a certain proportion and this mixture added to the water provides the plant with nutriment which normally is provided by a highly fertile soil.

The system can be equally well adapted to inside or outside growing. Fruit or vegetables out of season can be grown in a hot house kept between 70 and 80 degrees, but in countries where the climate permits the system is workable out of doors. The yields have in actual practice been larger and the quality of the product better than ordinary soil grown crops. In a tomato growing experiment five basins of 25 square feet were used. The variety, an English greenhouse tomato—Sutton's Best—yielded 301.3 pounds of tomatoes and the other basins were near that figure.

Potatoes, also, grown under this system, gave large yields. In proportion to the actual area used in the experiment, the yield amounted to 2500 bus. per acre. A yield of 500 bushels of potatoes per acre would be considered good on an ordinary farm. It is not to be expected that such phenomenal yields would be general in actual commercial production, but it is safe to say that yields far in excess of ordinary soil grown crops would be possible.

Up to the present, crops that are termed water crops, that is those things that are high in water, sugar and starch content are most easily grown and it is expected that before long, in many cases of vegetable production, the soil, man's age-old ally will be forsaken for the cleaner, easier handled chemical solution basin. Already in certain areas limited commercial crops have been produced under this system and if expectation and anticipation bloom into realization, where water, chemicals, temperatures and light can be made to combine, abundance should be possible. The chemical elements necessary can be had in abundance, there are ample natural resources available for their production.

Up to the present, experiments in grain growing with this process have not been satisfactory.

ALBERTA CROP REPORT No. 6

Issued by Alberta Department of Agriculture, Edmonton.

Harvest is general in southern and central districts and wheat cutting has commenced in northern areas and the Peace River district.

In the southern and east-central portions of the province, no material change has occurred in the general crop situation. Conditions have continued to be extremely dry, the feed shortage becoming more acute as the season advances. Wheat yields in the dry area vary widely. The crop is a total failure in the more distressed districts, but yields of from 5 to 15 bushels are reported from many points, especially in the more western sections. Coarse grain yields in the south will be exceedingly low and many fields have already been cut for green feed. Shortage of water is reported in the southern irrigation districts and even crops under irrigation have suffered to some small extent.

From the Olds district north to the Edmonton area, crops have had some benefit from scattered showers, and on the whole are somewhat more promising than formerly anticipated. As this report goes to press rain is general in the Edmonton district and good showers are reported south to Calgary. Yields throughout this territory will range from light to average, both for wheat and coarse grains, depending upon prevalence of showers of the past month. Severe hail damage was recently suffered in the Olds, Didsbury area, also from Lacombe west to Rimbey, with lesser damage reported at other scattered points.

Conditions in the Peace River District continue to be very favourable. Harvesting of a good average crop is just getting nicely under way.

Federal-Provincial conferences have been in progress during the past ten days relative to the stock and feed situation in the drought areas of the Province.

Summary of Reports from Correspondents

Medicine Hat: No rain since last report, wheat average under 5 bus. feed situation serious.

Lethbridge: Harvest well advanced, dry land yields exceedingly light, hay crop and grain under irrigation appreciably reduced.

Cardston: Harvest general, yield wheat 4 to 5 bus. for total seeded acreage, average grade three, feed situation grave, water shortage domestic and live stock.

Vulcan: Cutting general, fields patchy and wheat from 3 to 10 bushels, saving straw for fodder, serious feed shortage.

Brooks: Irrigation grain crops good but hay light. Good seed pea crop harvested. Little return from dry lands crops.

Calgary: Wheat on summerfallow up to 10 bushels, some higher. Coarse grains being cut for feed. Shortage of water for livestock. Feed supplies low.

Rockyford: Wheat harvesting general, 5 to 12 bushels, some wheat and coarse grains cut for green feed.

Empress: Harvesting general, yields 2 to 9 bushels and much acreage cut for feed.

Youngstown: Hailstorm on 8th severely damaged the little crop there was. Very little feed.

Stettler: Wheat yielding 5 to 10 bus. on stubble, 10 to 20 on fallow, coarse grains poor, some saw-fly damage.

Olds: Moisture conditions improved but hail damage severe south to Didsbury and east to Drumheller. Wheat harvest well under way.

Red Deer: Wheat cutting general, average 11 bus., coarse grains improved with showers, patches of hail no great surplus of feed.

Lacombe: Cutting general, wheat yield fair, severe hail damage this season at several points.

Vermilion-Lloydminster: Harvest general, wheat 5 to 10 bus. fair quality, coarse grains poor and some cut for feed, some feed shortage.

Willingdon: Cutting commenced, not well filled hence yield reduced, feed should be adequate.

Smoky Lake: Harvest general soon, wheat average about 18 bus., oats 30, barley 25, pasture good and plenty of feed.

Athabasca: Wheat cutting started, about 20 bus. and good quality. General crop prospects fair to good.

Grand Prairie: Harvesting started, good aver. crop with wheat 22 to 25 bus.

Berwyn: Wheat cutting general and some barley cut. Conditions generally favourable.

Especially in Leap Year

Easterner: "And you mean to say that you have 365 days of sunshine in California?"

Westerner: "Precisely so, and that's a mighty conservative estimate."—Whitsitt Impressions.

THE U.K. AS A WHEAT PRODUCER

Many years ago the United Kingdom was faced with a decision of great importance. The choice lay between agriculture and manufacturing, whether to go ahead and seize the opportunity of becoming one of the greatest industrial and trading nations in the world or to encourage agriculture at the expense of industry. The decision was in favour of industrialism, and Britain achieved ascendency in that line. The United Kingdom farmers were sacrificed in the process and wheat growing in particular was heavily hit. Then the war came along and the German submarine campaign came very close to starving the British people. During this fateful period the country's leaders gave the farmers every inducement to increase wheat acreage. By 1918, two and a half million acres were devoted to wheat. Then came peace with declining wheat prices and domestic wheat growers suffered to such a degree that in 1931 the acreage was half of what it was in 1918.

Then because of unrest throughout the world and threats of war in Europe and Asia, the British government finally decided to give some consideration to her wheat growers. So in 1932 the Wheat Act was passed which guaranteed $1.36 to the wheat growers for every bushel of millable wheat they produced. The administration of the Act was placed under a Wheat Commission and every wheat grower who desired to participate was registered. A carefully drawn up plan was put into effect which provided for payment at the time of delivery of the wheat of the current price on the open market and then a further payment of the sum required to make the total of $1.36 a bushel. The deficiency payments are raised from a levy known as the wheat quota payment, payable by millers and importers of flour in respect of all flour whether home milled or imported by them into the United Kingdom. The chief Canadian trade commissioner in London, England, reports that the present levy is 2s—2-5c per 112 pounds of flour. In response to this improved price acreage was increased in 1934 to 1,860,000 acres which was 616,000 acres above the low figure of 1931. Production in 1934 was 66,450,000 bushels. Last year acreage increased by about 16,000 acres, but less favourable crop conditions brought the yield down to 62,330,000 bushels. This year the weather has been unfavourable and the yield will be substantially lower.

A wheat seeded area of less than two million acres seems comparatively small to Western Canadians. Alberta alone seeds eight million acres a year and the whole of the west better than twenty-four million acres. But British acres produce bountifully as compared with the per acre production of this country. Last year the yield was 32 bushels to the acre in the United Kingdom and less than 10 bushels to the acre in Western Canada.

SOUTH AFRICAN MINER THINKS HE HAS FOUND DIAMONDS IN EDMONTON

Lady Luck has smiled on Ferdinand Pomahac, local contractor, who has found within the city limits what he believes to be diamonds and rubies. Mr. Pomahac, who has been in South Africa in the diamond fields district and who has studied geology in Germany is convinced that the rough crystals in their natural state are genuine diamond stones.

The crystals will cut glass in the same manner as a diamond glass cutter and have all the geological indications of being the real thing, Mr Pomahac points out.

The sample of ruby which he showed a Bulletin reporter is genuine, according to an Edmonton Jeweler, Mr. Pomahac indicated.

Certain that there is hidden wealth where he found the samples Mr. Pomahac is acquiring the rights to the property and intends to develop his claims.

Mr. Pomahac is guarding the exact location of his find carefully in order that nobody else will beat him to it. He figures that he has a valuable find that may mean thousands of dollars to him and he isn't going to be beat out of it.

If it comes to anything he expects to use part of the returns to help sick children at the University hospital and other hospitals in the city.

The Talkative Sex

A married man buttonholed another and imparted some neighborhood news. "Don't let this go any further, George," he said.

"No, certainly not!" said the other. "But how did you happen to hear it?"

"Oh, from the wife, of course!" was the answer. "She's just like all women—can't keep a secret!"—Grit

FUR SUSPECTS GOING ON TRIAL

FORT ST JOHN, B C., Aug. 17. J. M. Abbott, local magistrate, returned yesterday from Fort Nelson. With him were H. Courvoiser and Bert Shaffield, suspects of Fort Nelson fur robbery.

They were taken on to Prince George for trial. Henry Curvoiser has a diary from July sixth and at that time they, according to the diary, were 18 miles from Fort Nelson cutting the line.

G. Coote was stationed at Henry Lake waiting for the return of the police. He had been two days without food when two trappers with horses and dogs walked up to him and asked him "What the devil he was doing there." Coote told them and asked them if they knew the men. They said they certainly did. The men waited for two more days for the police and divided their food with Coote.

One of the men was wearing a black sweater at time of the arrest and one of the hold-up bandits was wearing a black sweater. Coote returned last night from Prince George and is going to Nelson to bring out the police now stationed there.

NEW PACKING PLANT OPENS IN OCTOBER

Newly constructed Edmonton plant of Canadian Packers Ltd., will be opened officially in mid-October although activities on a small scale are expected to commence on Sept. 1, states W. D. Tranter, manager of the Edmonton branch of the firm, who arrived in the city from Winnipeg over the week-end.

Approximately 150 Edmonton men will obtain employment with the packing plant. Hiring will commence Sept. 1 and will continue until the full staff has been engaged. Only executives and more experienced help will be brought here from Winnipeg.

Plant superintendent will be C. J. Long of Winnipeg. Mr. Long has been in Edmonton for some time in connection with construction of the plant.

E. Dewton and T. Boles, both of Winnipeg will be office and sales managers respectively.

A number of important executives are expected here to attend the official opening. Final plans for the event have not been completed.

Mr. and Mrs. Tranter and their 13-year-old daughter will take up residence in the city immediately.

"Human progress is largely a record of overcoming difficulties."—Alfred M. Landon

SAFE-CRACKERS GET $90 LOOT

Ninety dollars in cash was the loot obtained by safe-crackers who sprung the strong box at Nichol Brothers' Machinery shop, 10103 95 street, Edmonton, late Sunday evening.

Entrance was gained through the rear window where the thugs removed a pane of glass. According to police the job was the work of experts and they didn't slip up on anything. The dial was sprung and an iron bar inserted to work the tumblers.

The job was done on similar lines as the two recent safe-crackings at the Crescent Furniture store and the Army and Navy departmental store early this spring. More than $7,000 was obtained in these two hauls.

Although no arrests have been made police have a good idea as to who the thugs are that pulled Sunday evening's job, and expect an arrest shortly.

Roughing It

"Did you do any roughing at your camp."

"Yes sir! why, one day we were without our refrigerator, electric lights and radio for a couple of hours when our power went off."

LEFT—For Trucks—The new Goodyear Lug Tread that bites deep with a caterpillar action—then cleans itself as it revolves.

BELOW—For Cars—The new Goodyear Studded Tread proven by tests to pull a car through the worst possible conditions—from gumbo roads to deep snow.

TWO NEW TIRES to keep wheels MOVING

Where the going is hardest these tires will pull you through while other tires slip, clog, stall and let you down.

The Lug Tire is designed for trucks, tractors, graders, etc. It gives maximum traction forward and backward in deep mud or snow without sacrificing smoothness, comfort and silence on improved roads.

The Studded Tire is designed for the cars of farmers, doctors, mail carriers or for anyone whose duty takes him into the mud and clay of unimproved roads and into snow on any road.

Come in and let us show you these remarkable new Goodyear Tires.

With its wonderful grip the Goodyear Lug Tire pulls through mud or gumbo.

Unless axle actually buries itself the Studded Tread Goodyear will pull through the worst of roads.

In snow the Goodyear Lug Tire avoids delays, prevents loads, allows faster, safer speeds.

GOODYEAR

On Getting On

By H. L. Gee in The Ampthill News, Yorkshire, England

It is a pagan land in which we live. We bow down every day of our lives to idols. We worship, among a host of false gods, a mere ladder, a poor thing of rotten wood, a ladder with a few rungs leading nowhere, and we gather round it and venerate it, and whosoever there be who climbs it and stands a moment [illegible] on the highest rung (though he gets nowhere from it but down again) him we clothe in purple and fine linen, him we exalt and praise exceedingly. He is great among us.

The peril of school and college and university examinations is at hand. Up and down our land are thousands of scholars and thousands of homes where there are parents urging their children or their young people to direct all their energies towards passing these examinations in order that they may "get on."

They must get on. In the evening of your life to have a son who has got [illegible] establishment [illegible] that he is now something at Whitehall or a director of education, or a manager of a firm, or a successful potentate in commerce or industry, earning let us say a thousand a year [illegible] and proud. To have a daughter who has beaten your neighbors' daughter and is now private secretary to Lord What's-His-Name [illegible] M.P. for somewhere: this is to hold one's head in the air.

Get on! You must get on. You must succeed. Success is everything and failure that is something shameful. Not to pass your examination, not to be in the short list, not to get the high position of responsibility, all this is a clear proof that a man or woman is not worthy of our highest respect. Polish up the knocker on the big front door as Gilbert and Sullivan remind us—and keeping on polishing hard and [illegible] glory beyond all glory ever seen, you may be an admiral of the king's navy! An admiral, mark you, not a worthless, useless, ordered about able-bodied seaman but an admiral! Get on—work, strive, keep at it, win through, achieve at any price, get on!

I think nothing of a young fellow who does not aim high. I think nothing of a man who does not want to get on—wants it with heart and soul. Is there any man or woman worth their salt who does not cherish ambition? But is this all? Is getting on everything? Is the end so vitally important, so comprehensive that it justifies any means? Is the top of the ladder so important that it is the only end of life? Are we to get on so earnestly and so selfishly that we elbow every competitor out of the way and never have time to help lame dogs over stiles? Is every other interest in life subordinate to this? God forgive us and God help us—if it ever is so.

I write this that I may remind you of the dangers of this business of getting on so fearfully. It is a fine thing but it must not become our religion. Get on by all means but it must not be all in all. If it is, you at once whittle life into something small and cheap, you become absorbed in one narrow piece of life, and you go elbowing your way to the end in a manner which makes living harder and less comfortable for other people. The true artist in living is always aware of this, always trying to keep some sort of balanced interest in mind so that while he goes, as we say, all out for one ideal, he keeps life abroad and strong in another direction.

SOMETHING LESS

And I want very gently, to say something which may at first seem absurd. I am a hero worshipper, and there is never a man or woman who succeeds but what I am ready to praise them, for success means grit and determination and sacrifice and possibly genius. But, so strangely mixed is life, I rather think that [illegible] success is really failure, and I think that often what seems failure is success. To have reached the top of the ladder and find nothing there, [illegible] magnificent [illegible]. To be pretty near the bottom of the ladder, and to have and hold the love of one's friends, to share in the breadth of an obscure life, to have a heart singing like a bird—is not all this, commonplace, ordinary though it be, count for [illegible]? For who is the truly successful man? In the last analysis, is he not he who has the fewest and [illegible] the most?

The best men and women are not necessarily conspicuous. They may be. Some of them are. But it is not necessary. The greatest man who [illegible] garden beautiful; the woman who stays at home and brings children into the world, loves them with gladness and dies with a smile on her face: these are magnificent artists in life; these are the saints of God who fail to get on as the blind world thinks of getting on, but succeed in making and keeping life rich, pure and sweet and strong.

Let us help our young people to get on in the truest and highest sense. From examination to examination let them proceed, and all honour of those who reach the top of the ladder of fame, and get the best posts and the biggest incomes. But God give us more failures—men and women who have graduated in that greatest of all universities—life, and have learnt how to bring the splendour of simple lives, finely consecrated to God and to man, without name, content to do what lies close at hand, and to do it with heart and soul.

DUCKS DEVASTATE WHEAT FIELDS OF NORTHLAND YIELD

PEACE RIVER, Aug. 12.—Wheat cutting is general in this district and in spite of late seeding grain has matured rapidly through favorable weather conditions all through the summer. Tame and upland hay was garnered in large quantities without interruption and feed will therefore be in abundance this winter.

Many farmers have other troubles however to contend with and that is the mallard duck, and these are feeding in ever increasing bunches much earlier than other years so that it has become necessary for some farmers to get out their guns to try and scare them off as many acres of high yielding wheat has already been destroyed.

Some ducks killed show very poor, pin feathers and decidedly lousy and it is believed that these ducks are finding their way back from the northern breeding grounds.

The Invisible Man

"What sort o' minister hae ye got [illegible]?"

"Oh, weel, he's no muckle worth. We seldom get a glint o' him. Sax days o' the week he's invessible, and on the seventh he's incomprehensible."—Vancouver Province.

MCMURRAY PLANT WILL OPEN SEPT. 1

Opening of a new 250-ton tar sands separation plant at Fort McMurray is scheduled for Sept. 1, states A. J. Smith, vice-president and managing director of Abasand Oils Ltd., who arrived here from Kansas City, Mo., Thursday and is a guest at the MacDonald.

Some 35 men are employed at present at erecting buildings and the installation of machinery. Boilers and auxiliary equipment have been delivered at the plant site at Fort McMurray said Mr. Smith.

J. M. Cleave, official of the company who developed the separation process to be used at the plant, has reached Fort McMurray.

In about two weeks Max Ball, president of the company will be here on his way to the plant.

Mr. Smith plans to leave by aeroplane Friday for the scene of construction operations, accompanied by his wife and daughter who motored here with him from the States.

DUCK SHOOT SEASON TWO WEEKS SHORTER

Reduction of bag limits and shortening by two weeks over previous years of Northern Alberta duck hunting season, are salient features of amendments to the provincial game regulations, issued on Saturday by J. A. Hutchison, game commissioner. It is stipulated that bag limits of ducks and geese are reduced in line with recent regulations formulated by the Dominion government under provisions of the Migratory Birds Protection Act.

The regulations provide for a closed season on prairie chicken as well as pheasants and grouse. Hungarian partridge can be shot south of the North Saskatchewan river between Oct. 1 and Nov. 30, whereas last year the season opened on Sept. 16.

North of the Clearwater and Athabasca rivers the duck and goose hunting season will open Sept. 1 and close Oct. 31, instead of closing on Nov. 14 as it did last year. South of these two streams, the ducks and geese can be shot between Sept. 15 and Nov. 14. Mountain sheep and goats can be shot in September and October as last year, while deer, moose and caribou can be shot from Nov. 2 to Dec. 14, except in closed areas by special license. The bag limit for geese is five a day, as against 10 last year, and 25 for the season.

Bag limits for ducks has been set at 12 a day, a reduction of three from last year and 100 for the season. Hungarian partridge can be shot to the extent of 15 a day and 200 for the season to the south of the North Saskatchewan river.

PEACE RIVER CROP FALLING BEFORE BINDER

Cutting is well under way in the Peace River territory and no damage has been reported by frost, according to the crop report of the Northern Alberta Railways for the week previous to August 10, released on Thursday by authority of John Callaghan, general manager.

Dawson Creek reports crops in good condition with cutting well advanced.

Weather at Pouce Coupe has been mostly fair with a few heavy showers. Cutting has started and no damage has been reported.

Hythe reports that cutting which has not started will be general by the first of next week. Weather has been showery and a slight damage from hail has been reported from the Tupper district.

Unsettled weather has delayed Beaverlodge harvesting, but wheat cutting is now fairly general. Crops are ripening fast at Wembley and cutting has commenced. No damage has been reported.

Weather at Sexsmith has been warm and dry. Crops are excellent and no damage reported. Cutting has been delayed at Sexsmith, by showers but is expected to be general by the first of the week.

Other sections of the area are similarly situated with the cutting proceeding rapidly.

ALBERTA'S SCRIP GETS STUCK ON ONTARIO STREET

LINDSAY, Ont., Aug. 17—"Prosperity Certificates" might have been in circulation here today if it had not been for some glue.

Two young printers took a newspaper cut of the Alberta Provincial government's "Prosperity Certificate" and printed a few on green paper. Trimming them the proper size, they glued them to the Main street pavement.

Several pedestrians stooped to pick up the greenbacks. One individual became quite excited. Rushing into his home he obtained a bottle of hot water, and with this tried to raise a "Prosperity Certificate" intact.

SOVIET SEES RECORD CROP

MOSCOW, Aug. 17—Soviet Russia worked today to complete a wheat harvest ranging from "spotty" to conditions described as a world record for production. The harvest was 64 per cent completed on Aug. 10, with 142,000,000 acres of grain cut.

The Glad Return

A grandfather visited a household in which he had a little grandson who had spent part of the summer at a boys' camp. The lad talked so enthusiastically about the camp that his grandfather offered a slight reminder. "After all, though," he remarked, "you were rather glad to get home, weren't you?"

"Well," replied the lad thoughtfully, "not especially." Then after a bit he added: "Some of the fellows were—those that had dogs."

OTTAWA PONDERS ROLE OF BOARD IN WHEAT SALE

OTTAWA, Aug. 20.—The role to be played by the Canadian Wheat Board in the marketing of this year's crop is a matter now engaging the attention of the dominion government, it is learned. No immediate decision is expected, however.

Soon after the wheat board was established last summer by the Bennett government, a minimum price of 87½ cents a bushel was fixed as the return assured farmers who sold their wheat to the board.

After the new government took office in October the wheat board personnel was entirely changed but the fixed [illegible] price remained effective.

In the meantime the picture has been greatly altered with wheat prices ranging around [illegible] above the dollar mark and the carryover at the end of the crop year greatly reduced.

It is understood the government, on the advice of the board, will consider not only the new minimum price to be fixed but the wisdom of fixing any price so long as the market [illegible] its improved position.

With the return shortly of Hon. W. D. Euler, minister of trade, from a commercial mission in Europe, the wheat sub-committee of the cabinet will probably announce the future policy on this question.

Constable Davis is Transferred

After having successfully represented the Force here at Tofield for the past two years, Constable Davis has been transferred to duty at Edmonton.

While in the performance of his duty here he became well known and well liked and general regret will be felt at his leaving.

On Wednesday evening a number of friends gathered at the Davis home to bid him goodbye and have a social time. A presentation testifying to the esteem in which he was held was made. Constable Davis together with Mrs. Davis and family left today (Thursday.)

Constable Clark from Vegreville took over the duties of the detachment on Thursday.

AUNT HATTIE DIES AT 104

A life that passed the milestone of 104 years and eleven months came to a close Tuesday when Mrs. 'Aunt' Hattie Thompson well known negress of this city died at the home of some friends at 9226 110A avenue.

Mrs. Thompson was born a slave in Louisville, Kentucky and passed her girlhood in serfdom. She came to Alberta 40 years ago and has lived in Edmonton for the past 14 years. For some time she was a patient in the Misericordia hospital where her thrilling and vivid stories of her early life as a slave were known to the nurses. She left the hospital a few weeks ago to stay with friends. Her only known relative in the city is her granddaughter, Miss Alice Thompson, herself over 60 years of age.

Funeral arrangements are in the hands of Foster & McGarvey.

KETCHAMOOT

School will reopen next Monday, August 31, with Miss Nellie Lindsay of Innisfree as teacher.

Mr. and Mrs. Maurice McGinitie have taken the contract to repaint the inside of the school house and all other cleaning so everything will be spic and span for the reopening.

Little Miss Cleone and Ruth Coombes returned to their home in Red Deer one day last week after a month's holiday with their grandmother, Mrs. E. McMullen.

The many friends of the Phillips family were very sorry to hear of the death of (Sen) Mrs. Phillips, and will truly miss her and the Lakeshore news. We hope some one else will volunteer to send them in to the Mercury in the near future. Our sympathy is extended to Mr. Phillips and sons.

The regular monthly meeting of the Ketchamoot's Ladies' Aid will be held next Wednesday, Sept. 2nd, at the home of Mrs. C. A. Ingram. A cordial invitation is extended to all.

Next Sunday, August 31, the minister from Round Hill will take the Ketchamoot services in place of Rev. Allan. Both for S.S. and preaching services, a large congregation would be very much appreciated.

Misses Janet and Ethel Brown were Sunday guests of the Norman Lawson family.

Mr. Howard Lee has purchased a small poultry farm at South Edmonton. He is moving his poultry, of which he has several hundred white leghorns.

Mr. Milton Ray met with a painful accident one day last week when in breaking for John Brown. The tractor slipped back on his foot necessitating the removal of two toes and a badly bruised foot. Jimmie Ingram also had the misfortune to get his face cut on the binder, a few stitches were taken by Dr. Law.

Mrs. Owen entertained a few girls on Monday afternoon to a bridge party. Those present were the Misses Hazel Sears, Mildred and Kathleen Ingram, Ethel Coombes and Mary Ingram.

Mr. Adrian Wildman of Portland, Oregon is returning to his home on Wednesday after a two week's visit with his cousin Miss Maude Wildman at the W. A. Mitchell home.

Mr. and Mrs. Percy Owen and family of Holden, Mrs. Owen, Mrs. Davison and William, Mr. Stairs and Misses Mary and Kathleen Ingram were Sunday guests of the Sears family.

Mr. and Mrs. Bailey and two children of Edmonton and Messrs. Joe and Ed Kallal were Sunday guests of the Schultz family.

Mrs. Abbott and mother Mrs. McKerran of Tofield were guests of Mrs. W. A. Mitchell on Thursday for dinner.

Miss Margaret Mitchell was an Edmonton visitor on Monday and Tuesday of last week.

Mrs. Owen, Mrs. Sears and family motored to Elk Island Park on Sunday of last week. Owing to the heavy rain they returned home by way of Edmonton.

Mrs. John Brown entertained the Social hour club at her home August 12th.

LOCAL AND PERSONAL

Mrs. Joe Wiltzen, Joyce and Joel spent a few days visiting in Camrose.

Miss Esther Wick of Viking visited her sister Mrs. H. Green here last week.

Mr. McFadzean spent the week end in Edmonton.

Sheik Bowick and Doug Brown motored to Edgerton for the week end.

Mrs. G. Roher of Edmonton is visiting at the Thompson home.

Mr. and Mrs. McHeffey and small daughter of Edmonton are visiting with Mr. and Mrs. F. McHeffey here.

Mrs. Firth and Pat returned this week from Gull Lake.

Mr. and Mrs. Stewart Humphrey, Wallace Alaric and Mr. and Mrs. J. McAlpine of Unity, Sask. were visitors at the Malcolm home.

Miss M. Redig returned this week after spending her holidays at Edmonton and Lacombe.

Mr. and Mrs. L. C. Hay of Edson spent the week end at the F. Scott home.

Mrs. Carter of Edmonton spent the week end visiting with her daughter, Mrs. Thomas.

Mr. and Mrs. W. P. McIntyre returned from their holidays.

Mrs. Scott and daughter Dona, left on Thursday for Duluth. Mrs. Scott has spent the summer months with her parents, Mr. and Mrs. Griswold here.

Mr. and Mrs. Beirnes and Donald returned on Wednesday from a trip to the states.

Mr. Glover of the Alberta Government telephone staff is taking his holidays now.

The Anglican W.A. will meet at the home of Mrs. C. Baptist on Thursday, Sept. 3rd, at 2:30 p.m.

The new bank building is in course of erection, the vault foundation is now completed and the building of the vault underway. The framework of the main structure is also well advanced.

1000-BOY THEATRICAL TROUPE

Added to other record-breaking distinctions the huge "company" of 1,000 boys and leaders who put on the play "Boy Scout" one of the last London theatrical season's biggest successes, was notable for its discipline. The boy actors were handled as a gigantic "Scout Troup" with Ralph Reader, the producer-director, in the role of Scoutmaster. "Boy Scout" played to packed houses on four successive nights at Albert Hall, one of London's largest auditoriums.

UNITED CHURCH NEWS

Mr. Robt. McLaren, B.A. will conduct the services in the United Church on Sunday, August 30th.

The Rev. D. K. Allan will visit the student's "field" of Dodds and Round Hill on the same day.

Mr. McLaren is an interesting and convincing speaker.

Miss Maude Wildman and cousin Adrian were guests of Mr. and Mrs. Schultz Saturday evening for supper.

Mrs. Henderson and son Jason, Mr. and Mrs. W. A. Mitchell were dinner guests of Mr. and Mrs. C. A. Ingram Sunday of last week.

Sad Drowning Fatality At Ministik Lake

Word has been received of the death by drowning of Fred R. Williams, aged 22 years, son of Mr. and Mrs. H. E. Williams of the Ministik district. Information to hand indicates that the fatality occurred on Monday of this week.

The young man had left home riding a horse and was intending to round up some cattle on the reserve near Ministik Lake. He did not arrive home at night as expected but the family was not unduly alarmed, believing him to have not located the cattle as soon as he expected and having stayed overnight at some neighbor's home. Later they became alarmed and communicated with the police. They tracked his route to the lake and saw where he had attempted to cross the narrows there. At one point in the narrows there is quite a deep drop and it is believed the horse plunged and threw him at the same time striking him, as when the body was located by dragging an injury to the side of the head was apparent.

Mr. H. E. Williams, father of the unfortunate lad, is fish warden and several years ago was a member of the Municipal District of Cornhill Council. The sympathy of the district goes out to the family in their sad loss.

LEGISLATURE, POMP SHORN, OPENS TODAY

Shorn of customary pomp, circumstance and ceremony by reason of the emergent nature of problems to be dealt with, the second session of Alberta's eighth legislature—a special session—was formerly opened at 3 p.m. on Tuesday by His Honor Lieut. Gov. W.L. Walsh.

Deliberations are expected to continue until Friday, or Saturday.

Although no invitations were issued to the floor of the house and none save members and officials were on the floor, galleries were crowded and many who were unable to gain seating accomodation within remained in the corridors.

Practically all members were in their places, but two cabinet ministers were missing, namely, Hon. Charles Cockroft, provincial treasurer, and Hon. W. N. Chant, minister of agriculture, who are at Ottawa conferring with the Dominion government regarding drought relief.

Two private members were also absent, L. A. Giroux, Liberal, Grouard, and D. B. Mullen, S.C. Edmonton, both of whom are suffering illness.

Doors of the galleries were opened at 2:30 p.m. and soon all available space was occupied as the Speaker's and Members galleries filled rapidly. The public gallery was also filled within a few moments.

Opening ceremonies were brief, and within a few minutes the House adjourned until 3 p.m. on Wednesday, when sessional business will proceed with all possible speed.

Promptly at 3 p.m. R. A. Andison, clerk of the Legislative Assembly, rose in his place and read the proclamation calling the members to the session.

Escorted by Sergeant-at-Arms, H. S. Newby, Mr. Speaker Nathan E. Tanner entered the chamber immediately after and took his seat on the platform on which rests the throne.

Mr. Andison, on request of Mr. Speaker then read the certificate of election of Dr. Walter Morrish, Liberal Edmonton, who was elected at the by-election of June 22 to fill the seat left vacant by the ascension to the supreme court bench of Mr. Justice W. R. Howson.

As this formality was concluded, Sergeant-at-Arms Newby announced "His Honor the Lieutenant-Governor."

The Lieutenant Governor was accompanied by Capt. C. V. Dacre, A.D.C.

His honor read the Speech from the Throne, the text of which follows.

"Mr. Speaker and members of the legislative Assembly:

I welcome you to the second session of the Eighth Legislative assembly.

Since the last session, the Province of Alberta has been honored with a visit from His Excellency, the Rt. Honorable Lord Tweedsmuir, Governor General of Canada and the Lady Tweedsmuir. On that occasion, our citizens most heartily welcomed these distinguished visitors and enthusiastically showed their loyal admiration and respect for them.

Later in the year, my Government and the people may be privileged again to entertain Their Excellencies on their return to the province.

On account of the calamitous drought which has occurred this summer throughout the south and the east of the province and because of the grave economic conditions resulting therefrom, my Government decided to call this special session of the legislature to deal with the distressing conditions prevailing and to consider such legislation as will place the province in a position to

The Hum of the Binder The Roar of the Tractor

Each year, as the daylight hours noticeably become shorter, and we realize another summer is on the wane—a chorus is heard throughout the land. Not musical, as we understand the music of men; not even nature's music of wind, trees and water, but a chorus of frenzied activity

Ripened grain has been cut and stooked, and men, to procure the golden kernels have come with huge machines that do not permit defeat.

With a roar that is welcomed by those who know it best, the tractor driving the separator starts up a song from within the separator's vitals—a battle song which shrieks of victory. Thresh, Thresh, Thresh, from early morning until evening. Thresh, Thresh, Thresh, and the golden grain comes down the spout adding its particular note to the crescendo of noises. The time of hustle and hard work, but withal a pleasant time the time of reward.

There is another noise with which we are familiar, we, in the Mercury Office, hear it frequently. Not once each year, but once each week—the noise of the printing press.

Not the roar of the city daily press of course, but if you feel inclined to call it so, the pleasant song of a country print shop. A song that sings of events, local events, personal events. Singing bards of long ago were never so prolific of thought, the songs of marching armies were never so numerous as the items published.

Two dollars a year, the old press sings, Re-new promptly, renew promptly, re-new promptly.

Yes! September brings a western chorus. A chorus of noises on the farm, while each Thursday brings its own particular noise to the Mercury Office. Can we, dare we, hope that both noises will be harmoniously blended, which simply expressed means that each and every Mercury subscriber will pay his or her subscription this Fall.

We thank you.

THE MERCURY

Marketing of Canada's Grain

By A. E. DARBY, Secretary,
Winnipeg Grain Exchange.

The articles here reproduced formed part of a review of the machinery of grain marketing in Canada, presented to the Special Committee of the House of Commons on the Marketing of Wheat and Other Grains on April 21, 1936, on behalf of the Winnipeg Grain Exchange by its secretary, A. E. Darby.

Article 6

In this article the facilities for trading provided by the association of traders in grain known as the Winnipeg Grain Exchange are discussed.

Up to this point little has been said of the Winnipeg Grain Exchange, though there have been frequent references to the hedging of grain by country elevator operators, terminal operators, exporters, millers and all others who buy and sell grain in order to assist in its transference from producer to consumer. It is now necessary to describe the Winnipeg Grain Exchange and its functions in facilitating the processes already mentioned.

The functions of the Winnipeg Grain Exchange in the marketing of the grain crops of Western Canada are indispensable parts of the complex and delicate machinery which has been created to record the relations of supply and demand throughout the world for wheat and other cereal grains.

These relations determine the value from time to time of these grains. Whatever arrangements may exist or may be made for the distribution of grains for human consumption and for the feeding of livestock, the final determinant of their value will always be the relation of effective demand to available supply. The collection and publication of such information and the instant and accurate recording of prices as they change in response to it is one of the chief purposes of grain exchanges wherever they exist. And since it is of supreme importance to producers, to distributors and to processors and consumers to endeavor to foresee the course of prices and to protect themselves as far as possible against probable future changes in them, the exchanges record not only the price of grains for immediate transfer or delivery but the price at which they bought or sold for delivery at various times in the future.

Such information is of interest to those who produce, handle, manufacture and consume grain in all countries at all times. Whether a country is an importer of cereals or an exporter, whether its people produce more or less grain than they consume or are entirely self-satisfying in this respect, this information is necessary to the intelligent direction of their agriculture and the economical satisfaction of their needs. For an exporting country like Canada, which must find markets abroad for as much as five-sixths of its wheat crops, the information is peculiarly necessary.

A grain or commodity exchange is primarily a market place; a market place of a distinctively modern type. Market places have been required ever since men have produced more of any product than their families or communities could consume. They have existed throughout historic time.

Perhaps the first thing to be understood in connection with the Exchange is that it does not itself buy or sell, handle, transport or process grain. It simply provides a meeting place where those who do all these things in connection with grain transact their business with one another.

The need for such a meeting place was felt in Western Canada some forty-six years ago and at that time in 1887, very early in the history of this western country, the first steps were taken to meet the need. The association of traders in grain then formed was the parent of the present Winnipeg Grain Exchange, which now has some 463 members, resident not only in Canada but in the United States and in many European countries.

Unlike most other similar bodies the Winnipeg Grain Exchange is not incorporated either by charter or by special legislation. It is a voluntary association. Its members are bound together by a constitution, by-laws and regulations which each voluntarily accepts and which may be changed from time to time by majority vote. There is no limitation upon membership other than that imposed by character and responsibility and the necessity to acquire a certificate of membership by purchase either from a member or from the Association itself. It may be interesting to note in this connection that certificates of membership have almost invariably in recent years been purchasable from existing members, indicating that the number issued by the Association has been adequate to admit to the Exchange all properly qualified and responsible persons who have desired to obtain membership.

Not only is the Winnipeg Grain Exchange not engaged in trading it does not as an institution know or record the business dealings of its members individually. It simply records the prices at which transactions are made. The members have assented to the rules and regulations which govern their transactions in grain and it is only when these rules are broken, or when disputes arise, or complaints are lodged with the Association as to the conduct of business transactions that the records and dealings of the members come under examination. Furthermore, the members of the Exchange are daily, hourly, in fact momentarily in trading hours, in keen competition. The Association stands in relation to them of an umpire or referee, interested only in securing the observance by all members of the rules, regulations and constitution of the Exchange.

But these 463 members, representing all the various branches of the grain and milling trades and in addition the shipping interests, banks and railroads, for purposes of convenience, have certain common needs. They require to be informed of the state of other grain markets, of the changes in prices registered on those markets from minute to minute. They require the latest statistical information relative to imports by consuming countries, exports by surplus producing countries, the quantities of grain shipped, held in storage, and delivered by farmers to primary markets. They require to know what is the condition of crops in many countries, what climatic and other advantages or disadvantages they are experiencing, what are the estimates of production compiled by governmental and private agencies. They must be informed of the state of money exchanges and of the changes in tariffs and import regulations affecting grain and grain products. And in order to satisfy these requirements they have formed this Association.

The Exchange provides them, of course with a trading room equipped with all the conveniences for conducting their trading and for receiving and posting the price quotations and other information by which they guide their actions as traders.

The trading room is connected by telegraph and telephone with all parts of Canada and, indeed, with all parts of the world.

By means of direct telegraph wires and ticker service the price quotations in other markets are recorded without delay in the Exchange trading room and Winnipeg prices are communicated to other markets with equal despatch. The quotations upon which the cash prices for grain at all country points are based are communicated by radio several times a day to farmers and elevator operators. The information received and disseminated by the Exchange is public information equally available to everybody who will take the trouble to get it.

It has been said that the members of the Exchange agree upon being received into membership to observe its rules and regulations. These regulations are designed to secure fair and honest dealing between all the persons and interests trading on or through the Exchange. The minimum rates of commission and brokerage chargeable by members, whether acting for other members or for non-members are prescribed by by-law. Rules governing the conduct of members and providing penalties for improper or unethical acts in connection with grain trading are strictly enforced.

The trading which takes place in the wheat and coarse grain pits on the Winnipeg Grain Exchange is entirely concerned with the buying and selling of grain for future delivery. That does not mean that trading in actual grain is not carried on very extensively. But the purchase and sale of grain for immediate delivery is largely conducted through the agency of cash grain brokers, whose operations are conducted directly with the buyer and seller. Such sales and purchases cannot in the nature of things be conducted at the trading in futures is conducted. They are concerned with the need or desire of the individual members to obtain or to dispose of definite quantities of grain classified in one or other of the very numerous grades which have been established by law or by the authority of the supervisory body created by law for the purpose. Since the grain sold and purchased for cash through the cash grain brokers is al- [illegible] invariably hedged, however, these transactions are accompanied by the exchange of futures. As a matter of fact, the prices paid for cash grain are based on the prices recorded in the futures market.

Each day the cash closing price committee establishes the official cash price for the various grades of grain as of the close of the futures market. This committee secures from the cash brokers, shippers, and exporters the sales prices of the last actual transactions which have been made or bids on the various grades of grain. These bids represent what the exporter, shipper or broker would pay for the grain if it were offered to him. The cash closing prices so obtained are posted in the trading room.

Article 7 will appear next week.

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

THE EFFECT OF PROLONGED STARVATION

What is the effect upon the human body of prolonged starvation? Since time immemorial fasting has been observed for many purposes. In former years its significance was largely religious; in recent years prolonged fasting, except in India and certain other oriental countries has been largely associated with the theories held by various cultists that fasting is a cure for many diseases.

During starvation combustion of body material naturally continues. This is essential to life, to the production of body heat. The excretion of nitrogenous and carbonaceous waste continues through the kidneys, the skin and through the lungs. In the absence of food the body tissues are themselves burnt and there is a definite loss of weight. If water be available the loss of weight is not so rapid and life may be prolonged.

Occasional one day fasts may be beneficial, but prolonged starvation means more than a rapid combustion of body tissue. Were that all, prolonged starvation might be freely recommended to all overweight people. The danger lies in the development of acidosis.

If a coal fire be lighted with insufficient kindling, it will smoke rather than burn clearly. Like coal, body tissues do not burn readily and require the kindling, certain properly assimilated starches and sugars, to produce perfect combustion.

Imperfect combustion, as when the intake of readily burnt or metabolized food is cut off liberates so-called "acetone bodies." These are found in the blood and urine in certain diseases such as severe diabetes or uremic poisoning, but appear in normal individuals during starvation about the fourth or fifth day.

About this time the desire for food dwindles. This may be because of the beginning acidosis, which may explain also the temporary stage of mental acuity said to be experienced by those fasting for supernatural insight or power.

The presence of acetone or such abnormal acids as diacetic acid in the blood is not particularly dangerous if the cause be promptly corrected, but if they remain and increase in concentration as in prolonged starvation, considerable damage may result.

In one instance observed by the writer of voluntary starvation, except for water, extending over a period of fifty-one days, the patient was practically unconscious from toxemia. Intravenous injections of glucose and insulin corrected the acidosis, but too late; there were gangrenous areas through the liver. Do not be a fanatic in fasting.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

GRAIN KING TO SHUN CONTEST

STAVELY, Alta., Aug. 26.—Frelan Wilford, winner of the world's wheat king title at Chicago in 1935, won't defend his crown this year because, he says, he won't be threshing any wheat good enough for show purposes.

What he termed the "Most serious drought I have witnessed in the 33 years of my residence in Alberta," has cut his wheat crop on his farm, near this Southern Alberta town, to 11 bushels an acre. His wheat, he said, probably will grade only No. 2 Northern.

Stone Money in the Isle of Yap

(By WILLARD PRICE in "Forest and Outdoors")

Perhaps the strangest and largest coins in the world are those to be found in isolated Yap, a small group of islands about eight hundred miles east of the Philippines.

It would doubtless cause surprise on Broadway if a man were to come down the street rolling a coin as tall as himself. But in Yap such coins are common. Some are indeed twice this size. Place one such on edge and a tall man must stand on a tall man's head to reach the top.

In the centre of each coin is a round hole. In an important coin, this is as large as a manhole. When the coin is to be paid, a tree is thrust through the hole and a crew of men partly lift and partly drag the coin over the ancient stonepaved jungle trails to the creditor.

In the port town Japanese money is used—for Yap is under the control of Japan. But in the jungles of the main island and in the outlying islands of Map and Rumung Japanese money is rarely seen. The ancient stone money is still current.

While living in the thatch hut of a native king in a jungle village, studying native customs, I was amused to see how shopping was carried on by the use of stone money. The queen, when she wished to go to the trader's, did not sally forth with a pocketbook. She went down the shore path under the palms followed by a husky slave sweating under the weight of a three-foot disc of stone supported on the shoulder by a bamboo pole thrust through the hole.

The village trader accepts such currency cheerfully. Of course he cannot exchange it for foreign goods. No bank in Tokyo, London or New York would recognize his slab of rock as collateral. But he can pay it to some other native for coconuts.

A chief admired one of my hats. "May I have one?" he asked. "I will pay for it."

"Please take it—as a gift," I urged.

He would have none of that. He paid and paid handsomely. Four slaves groaned into our courtyard with a coin measuring four feet and weighing two hundred pounds. My bewilderment as to what to do with it was soon relieved. The next day the chief took it back and returned the hat. His friends had made too much fun of him in his outlandish headgear. For hats, and most other articles of clothing, are strange to the natives of Yap.

Of course the difficulty and danger in securing the stone kept up its value. There could be no counterfeiting, for there was no similar stone to be found in Yap. It is calcite or crystallized carbonate of lime which forms in veins filling the cracks in limestone or other rock. There is nothing inherently precious about it. It has value to the Yap native only because it is hard to get and because it is the accepted medium of exchange.

Since this monolithic money is so cumbersome, barter is used for most small transactions. Goods are traded for goods. There are accepted values, recognized as standard. Two coconuts sell for one match. Ten nuts will buy one roll of bread. Ten nuts are the equivalent of one pack of Golden Bat cigarettes. The man who has brought his nuts from a great distance may demand and get one or two cigarettes extra. Ten leaves of tobacco buy twenty-five nuts. One cider-bottle of petroleum is paid for forty nuts.

The natives sell chickens, eggs, pigs, in the same way—for petroleum phonographs, harmonicas; not for money. They do not understand money in the form of small silver and copper pieces so insignificant compared with their majestic coins of stone. They cannot get the values through their heads. Too much mathematics is involved. Besides who knows how long this foreign money will be good? First Spanish money came. Then German money and the Spanish money was no good. Then Japanese money, and the German money was no good. But Yap money is always good. It goes on forever.

Stone is not the only form of Yap money. Shells of the pearl oyster are strung together and used as currency. Bags of cobra are used. Also the remarkably fine lava-lavas produced by the artists of the neighboring island of Mokomok. A sack of these lava-lavas was kept as one of the chief treasures of the "All-Men-House" (council house) in our village. There was no thought of opening it and using the garments. It was kept intact to be paid sometime to another village for a canoe.

But barter and these lesser currencies are used for only small deals. For a great one, stone money comes into play.

The foreigner who regards these stones as of little value will be sharply disillusioned when he tries to buy one. He must pay goods to the value of about seventy-five dollars for a wheel from Guam a foot in diameter! The Pelew wheels cost less. A poor specimen, waist-high, is valued at four thousand coconuts, worth in the island about twenty dollars. A stone as high as a man is worth many villages and plantations, and the stones two-men-high are considered to be beyond price.

The great stones are not owned by individuals but by communities. They are displayed outside the All-men House which thereby acquires the native name, "Febai" (Money House).

Private homes are flanked with smaller pieces from two to five feet high. The Yap resident would consider it just as strange to take his money inside the house as we would to leave ours in the yard. "How," he would say, "can anyone see your money if you keep it in the house? Moreover, there would scarcely be room left for the family."

However, the small pieces, six inches or so in diameter are kept indoors. Not only because they would be too easily carried away if left out but because the householder would be ashamed to show them. It would be like displaying pennies. He would be thought a poor man.

Therefore large stones are in demand. Rather than accept small wheels, the creditor prefers to let the bill mount until he can be paid with a handsome wheel great enough to attract real attention as it leans against his house or against the stone platform upon which his house is built.

Such coins are rarely stolen. It is hard to slip away with half a ton of rock. Still it could be done while the people of the house are absent. But where could one take the booty? It would be futile to remove it to some island outside of the Yap group because such currency is not used elsewhere. If it were kept in the Yap islands it would be traced. There are no inscriptions on these coins by which to identify them; but the details, irregularities, and measurements of every wheel are memorized by the owner. He would recognize his wheel anywhere. The larger wheels even have individual names and are known by name and appearance to everyone in the islands. They are even better known than people; for people come and go, are born and die, but these familiar faces remain from generation to generation. Every wheel has its story, usually a story of blood, of fighting between villages for possession of the piece of rock, or of feuds between families, or of attempts to steal and hide the money, or of the killing of its owner by poison or a spear-thrust. Most of the tales of trouble and terror in Yap seem to cling like moss to these old stones. There are records of half the men, women and children of the island being slaughtered in a money foray.

Today the mint is idle. No more stone money is being "coined". This may be due partly to the growing competition of Japanese money. There is a greater reason. The population has shrunk to half its former size while the supply of money has remained the same. So there is more than enough to go around. In other words, Yap's currency is inflated. Also, the value of labor has risen, so that it would cost more to go to Pelew and dig out new wheels than the wheels would be worth.

Although the use of the wheels as currency is slightly decreasing, the hoarding spirit will long keep up the value of the old stones. As each family dies out its stones are quarrelsomely claimed by others, still giving delight perhaps to the malicious god aloft. As house after house is abandoned, the wheels pile up around the homes of the survivors. As a result of wars, dissension, and disease, the race may die out. But the great stone wheels will remain, odd monuments to the evil of the love of money.

HAILSTONES KILL 500 SPARROWS

SEYMOUR, Ill., Aug. 25.—Clarence Keller heard an unusual burst of chirping during a sharp hail storm at his farm.

When the hail stopped falling he went out and looked. He said he counted 500 sparrows, killed by the icy stones.

SUAVE YEGG WEARS CLERGYMAN GARB

ROCHESTER, N.Y., Aug. 25—Dressed as a clergyman, a suave holdup man overpowered the night watchman at the Rochester Ice Cream Company plant here early today and calmly worked for over two hours in an unsuccessful attempt to open the company safe. He finally gave up.

PLANNING FOR INCREASED WHEAT CONSUMPTION

The Wheat Advisory Committee, a focal body for the twenty-two world nations who entered into the London Agreement in 1933, seriously considered a proposal on the part of H. E. Senor Don Augustin Edwards, Chilean Ambassador to London, England, that an inquiry be made as to ascertain the possibilities of creating an international revolving wheat reserve controlled and financed by an international body, the reserve to be drawn on from time to time to meet the needs of regions and countries which cannot afford to pay the current commercial price.

The proposal was canvassed at the committee's meeting in London, in July and received the approbation of those present. The Chilean ambassador in outlining his plan mentioned that, while crop disasters have brought down the world wheat surplus, the danger of a reaccumulation of burdensome wheat supplies has not been averted; it has merely been postponed.

He said that international trade in wheat and flour which averaged 800 million bushels a year from 1923 to 1932 had dwindled until now it is about 600 million bushels. Despite this enormous reduction in the demand for imported wheat no appreciable reduction has taken place in the area sown to wheat in the exporting countries. Consequently it seems inevitable that burdensome world surpluses will result, accompanied by unremunerative prices to producers, when normal crops are again harvested in North America and the Southern Hemisphere. To combat this, the Chilean ambassador proposes that an international organization should be set up to obtain at a low price part of the burdensome surpluses which will probably be accumulated in several countries during the next few years. The services of the Bank of International Settlements might be obtained to finance the proposal. The reserve thus set up should be used solely for the purpose of relieving grave emergencies such as a shortage due to drouth and for satisfying demands which could not be met because of lack of purchasing power under normal commercial conditions. The latter suggests the disposal of wheat to such countries whose people could not afford to buy it under ordinary conditions, such as the people in certain populous portions of Asia.

Comments on the proposal by delegates were as follows:

Mr. McDougal (Australia) welcomed the initiative of the Chilean Government, which harmonized with the proposals made by the Australian delegation at the 1935 League Assembly concerning the simultaneous improvement of health by better nutrition and of agricultural activity by increased consumption. He urged the desirability of making a thorough study of the question during the respite afforded by the present easier world wheat situation.

Mr. Steere (U.S.A.) spoke of the dangers inherent in the long-term wheat situation. To guard against a future wheat crisis, the Committee would be well-advised to study the international application of all measures for the disposal of wheat surpluses, some of which had already been applied nationally within certain countries, notably the United States of America.

Professor Laur (Switzerland) referred to similar proposals he had himself made some years ago. The practical difficulties would be great, and it appeared that control of wheat production and of exports would be a necessary part of an international wheat reserve system, of which he wholly approved.

Dr. Garcia-Arias (Argentina) welcomed the Chilean Ambassador's suggestions, which his Government would gladly examine.

Mr. Devinat (France) was also grateful for the Chilean initiative. He urged that the present respite be used for study of all suggestions, such as this one, capable of ensuring a fuller realization of the world's wheat resources in the future.

Mr. Enfield (United Kingdom) welcomed the Ambassador's suggestions, and stressed the vital importance of studying the factors affecting the rate of human consumption of wheat, which was low or declining in a number of European countries and which in many countries was not a function of price.

The Chairman (Mr. F. L. McDougal, Australia) thanked the Chilean Ambassador for his initiative, which all members of the committee welcomed. Recent research has shown the high value of wheat as a supplier of vitamins useful for disease prevention and for maintaining health; if as a result of the proposed study measures could be recommended which led to an increased consumption of wheat in the populous regions, especially of Asia, where it was at present little used, a great service would have been rendered to mankind. —Alberta Wheat Pool Budget.

WALKING ON ALL FOURS AID TO THINKING, U. S. PROFESSOR FINDS ON EXPERIMENT

Hamilton, N.Y., Aug. 25.—Man in his evolution may be headed for an all-fours posture. Or for a survival of only the slim-wasted. Or for a race that forgets its three square meals and eats frequently and lightly.

The reasons were advanced Tuesday by Dr. Donald A. Laird, professor of psychology at Colgate university, in the medical record.

He reports that after finding that office workers slowed down and made increased errors the first hour after lunch, he experimented with Colgate students to learn whether blood drawn form the head by digestion explained the dullness.

Students did mental arithmetic after eating and while lying with their heads lower than their feet. In this position they were better than with heads higher than feet.

Digestion, he stated, draws blood from the brain to the splanchnic reservoir temporarily. Feet above head drain it back to the brain.

"In the assumption of an upright position through evolution," Dr Laird state, "man has gained advantages and suffered losses. If mankind went around on all fours the blood supply to the brain would be better."

DEATH AT WHEEL ON WILD CAR RIDE

FREDERICKSBURG, Va., Aug. 25.—Double killing, which authorities said they were told was a murder and suicide, terminated early Tuesday a wild automobile ride in which a woman participated as an unwilling third-party passenger.

The two dead are Gilmer L. Snyder, 26, of Washington, and Clifford B. Thomas, 27, estranged wife of Thomas was the third person during the ride

Two officials said Mrs Thomas related that her husband jumped up on the side of the car as she returned from a ride with Snyder in Washington

Holding a revolver against Snyder's side with his left hand, he took over the wheel and drove with his right hand out of Washington to Woodlawn, six miles south of Alexandria, Va. She was quoted as saying her husband then shot Snyder through the heart while the automobile was in motion

Mrs. Thomas told the officials she begged her husband to take Snyder to a hospital, but that he drove on through Fredericksburg and 23 miles east of that city to King George courthouse. The body remained upright between them.

Mrs Thomas said that when the car finally stopped, she jumped out and ran to the house of a sister-in-law, Mrs. Elmer Morris. Thomas got out of the car, she said, walked 50 yards and shot himself through the head, dying instantly.

Tut! Tut!

The teacher had made an appeal to the children in her kindergarden class to bring old clothing for the flood sufferers.

Bobbie hurried home and said: "Mother, teacher wants us to bring our old clothes for the blood suckers!"

Responsible Borrowers
ALWAYS WELCOME
At Canada's Oldest Bank

Ample facilities for personal loans to individuals as well as loans for business purposes to farmers and manufacturing and mercantile firms are, and always have been, provided by the Bank of Montreal.

People in every walk of life take advantage of these facilities for obtaining funds for personal or business use — some for small amounts and some for large. Applicants prepared to meet the usual requirements of sound banking practice are invited to discuss their problems with the local manager of the Bank of Montreal.

THE WORLD'S LARGEST STREAM-LINER

LOCOMOTIVE No. 6400 of the Canadian National Railways, the largest stream-lined steam locomotive in the world and Canada's first stream-lined engine has been delivered to the National System for test runs. No. 6400 is the first of five locomotives built to special stream-lined design evolved after exhaustive wind-tunnel and other tests by the National Research Council at Ottawa and officers of the Motive Power Department of the Canadian National Railways.

More than 94 feet in length and capable of an estimated speed of more than 100 miles an hour, the new locomotives, constructed by Montreal Locomotive Works, present many interesting features. Conspicuous by their absence at first glance are such familiar locomotive "gadgets" as a cowcatcher, smokestack, bell and automatic coupler. The cowcatcher is replaced in the stream-lining of the front which extends to just above the rail; the smokestack and bell are present but located within the stream-lining which covers the array of pipes and domes found on the ordinary locomotive. The automatic coupler is arranged to perform a disappearing act, behind a steel door, when not in use.

The new locomotives also feature a new semi-disc type of wheel, stronger and more lasting than the familiar spoke type so long used by engine builders.

A new color design, black, green and bluish-grey planished steel, with bronze numbers on the running board and the Canadian National crest in gold on red background give the new locomotives a pleasing as well as striking effect.

Photographs show the first of the new engines during her inspection by Canadian National Railways and Montreal Locomotive Works officials.

WIFE OF C.N.R. OFFICIAL DIES

MONTREAL, Que August 27 — News was received with deep regret in transportation circles in Canada last week end of the death of Mrs S J Hungerford, wife of Samuel J Hungerford, President of the Canadian National Railways. Mrs Hungerford passed away at the family residence, 1100 Elgin Terrace, Upper Peel Street, Montreal, on Sunday following an illness which had extended over several months. With her at the time of her death were her husband and her two surviving daughters and son.

Mrs Hungerford's health gave cause for anxiety in the spring of this year and on the advice of her physicians Mrs Hungerford took her residence for the summer months at Farnham, Que near Mr Hungerford's boyhood home, but returned to Montreal within the past three weeks as her condition showed no improvement.

The late Mrs. Hungerford was the only daughter of the late Jesse [illegible] and his wife Alice Brown and was born near Port Perry, Ont., in 1871. Her family moved to Winnipeg in 1876, her grandfather having already established himself as one of the pioneer Red River farmers. Her marriage to Mr Hungerford took place at Winnipeg in 1893 and they made their home at various points in Eastern and Western Canada in the succeeding years as Mr Hungerford's railroad duties required.

There were four children (three surviving), Miss Alice Hungerford of Montreal, Mrs W B Schon, formerly of Halifax N S now of M[illegible], Mrs A E R[illegible] de [illegible] and Stewart J Hungerford of the Canadian Industries Limited of Montreal. The late Mrs Hungerford is survived by four brothers, Arthur [illegible] of Regina, Karl [illegible] of Moose Jaw, Sask, Fred [illegible] of Prince Albert and Herbert [illegible] of Empress, Alta.

A [illegible] whose life centred in her home rather than in outside activities, Mrs. Hungerford had nevertheless a large circle of friends throughout the Dominion.

The difference between the clerk who spends all his salary and the [illegible] who saves part of it is the difference in ten years between the [illegible] and the man out [illegible].—John Wanamaker

More About Legislature

(Continued from front page)

cope with this difficult situation.

At this session, further action in regard to the introduction of the Social Credit principles, the Debt Adjustment legislation, the reduction of interest, and such matters as may be deemed necessary for the good and welfare of our people, will be submitted for your careful consideration.

I leave you now, with confidence that you will faithfully discharge your duties and your responsibilities with wisdom and despatch, praying that Divine Providence will guide and bless your work."

As soon as His Honor had completed the speech, he left the chamber, accompanied by Capt. Dacre.

The next ceremony was the introduction of Dr Morrish. He entered the chamber through the main door escorted by George H Van Allen, K C and C Gerald O'Connor Liberal members for Edmonton.

The trio walked round by the opposite side of the house as the centre aisle is blocked by government benches.

Approaching the Speaker's throne the three members paused before Mr. Speaker Tanner.

Mr. Van Allen said, "Mr. Speaker, "I have the honor to present Dr. Walter Morrish, a duly elected member for the electoral division of Edmonton, who has taken and subscribed on the roll the oath required by law and now claims the right to take his seat."

Mr Speaker then shook hands with Dr Morrish, welcoming him to the assembly and Dr. Morrish took his seat with the Liberal group.

Turning to sessional business, Premier William Aberhart then introduced the first bill of the session, a bill to amend the Mother's Allowance Act.

A Swedish farmer who wanted to make his permanent home in this country appeared for his naturalization papers.

"Are you satisfied with the general conditions of this country, Mr. Olson?" he was asked.

"Yah, sure," answered Olson.

"And does this Government of ours suit you?"

"Well, yah, mostly," stammered the Swede," only I lak to see more rain."—Bee-Hive.

TOWN OF TOFIELD

Notice to Relatives of Persons on the Assessment Roll and to Tenants

Notice is hereby given that during the months of September and October, applications may be made under the provisions of Section [illegible] of the Town and Village Act, for inclusion in the Voters List of the Town of Tofield by the following persons, namely:

The wife, husband, father and mother and every son and daughter of any person whose name appears upon the assessment roll who are entitled to be placed upon the said list:—

a. If he or she is resident with the said person within the town, or assists him in a business in respect of which he is taxable.

b. If he or she is of the full age of twenty-one years.

c. If his name or her name does not already appear on the roll.

Tenants who have rented an assessed parcel for a period of twelve months immediately preceding the last day of August of this year.

Dated at Tofield, this 20th day of August A.D. 1936.

J. W. CHAPMAN,
Secretary-Treasurer.

This Should Be Appreciated

Every grain grower who has kept abreast of the events of the day must know that the Wheat Pools have been the organizations large and strong enough to fight for the farmers' rights.

All should know that the Pools have faithfully done this. The wheat Board, minimum price, improved Canada Grain Act, etc. are a few of the objectives realized.

Every grain grower must be impressed with the need of the Pool organizations being maintained and strengthened in order that they remain a bulwark in defence of the farmers' interests.

This can be accomplished by all delivering every bushel of grain to

New School Opened at Amisk Creek

Teacher and pupils of the Amisk Creek school started their studies in a smart new school building on Tuesday. Replacing the building which was burned down last winter, the new building is an attractive modern school structure. Of what might be termed cottage style, the outside finish is of stucco. There is plenty of light, the east side of the classroom having large, almost floor to ceiling windows. There is a full basement with cement floor. The heating will be done by a modern furnace. Modern inside toilets have been installed, in fact nothing has been omitted that will add to the comfort and convenience of the pupils. Mrs E. A. Moen is secretary of the district who together with the school board are to be congratulated for providing such splendid educational facilities for the pupils of the district.

The U.F.W.A. will meet at the home of Mrs. W. H. Anderson on Thursday, September 10th. The ladies of the three financial groups to come prepared to give their reports. All farm women are invited to come.

Miss Jean Stenhouse of Gilbert Plains, Man., niece of Mrs. Beirnes, is visiting at the Beirnes home.

AMISK CREEK

Born.—To Mr. and Mrs. Carl Erickson, at the General Hospital, Edmonton, on August 31st, a son. Congratulations.

Harvest is well advanced and some have started threshing. Next week threshing will be general if the nice weather keeps.

School will start Tuesday, September the first. Doris Glasiner is the teacher for the coming term.

Rev. P. Anderson, missionary from China conducted a service in the church here on Sunday. The sermon was very inspiring and many from the surrounding district were present.

Berat Berild left last Saturday for her school near Miquelon Lake.

Doris Glasiner the teacher will make her home with Mrs. E. A. Moen this year.

Mrs. L. Watt and daughter, Doris, have been visiting with Mrs. Watt's mother Mrs. Olson sr., for a few days.

Mr. F. Elsworth from Rife, north of St. Paul visited at the Erickson home. He was on his way to Camrose. Coming back, Mr. A. Erickson went with him to visit friends around Rife for a few days.

Mrs. K. Olson and Mrs. L. Watt visited with Mrs. P. O. Flaaten on Tuesday of last week.

Mr. and Mrs. Sam Olson are spending a two week holiday with friends at Dinant, near Camrose.

Gladys Olson is again going to attend school in [illegible]. Pearl Patterson and Alfrida [illegible] are going back to Ryley school, Myrtle Moen is also attending high school in Ryley this year.

Thora Haugen left last Monday to teach school in the Peace River country.

Mrs. K. Olson, Mrs. L. Watt and Doris, Mrs. P. O Flaaten and Ralph Olson motored to Lavoy on Tuesday of last week and visited with Mrs. and Mrs. J. Blackburn and family on their farm near Lavoy.

The young people of Amisk Creek held their monthly meeting last Sunday evening in the church. Quite a number were present and a nice program was given.

Ruby Berg and Nils Sand motored out from Edmonton last Saturday evening. Mrs. Sand and daughter were on their way back from Viking. They visited at the Berg and Flaaten home Sunday.

Mr. and Mrs. E. A. Moen accompanied Mr. and Mrs. O. Barnes to Lindbrook district last Sunday.

Mr. and Mrs. A. Patterson and Lillian visited at the A. Finljes home south of Ryley last Sunday.

The Swedish Consul, Mr. and Mrs. Skarin from Edmonton and Mrs. Johnson from Calgary, were visitors at the Berild home last Sunday.

Mr. and Mrs. T. Horte and their two sons and Mrs. Haugen from Kingman, were visiting with the P. O Flaatens last Sunday.

KETCHAMOOT

Threshing wheat in several rings started on Monday, included among which were Tom Scholtz and Mr. Lee.

Mr. Oscar Barnes held a threshermen's meeting at his home Monday. Their ring will start on Wednesday.

Our high school girls went back to school on Monday. Miss Maude Wildman is taking grade ten at Eastwood school in Edmonton; Miss Marie Lawson her grade ten at Kingman; and Miss Mary Ingram, grade ten at Westmount school, Edmonton. Success to them all.

Miss Mabel Lawson returned to Camrose Monday to take up teaching again at the Normal little school.

Mr. and Mrs. A. R. Thompson, daughters Lois and Betty and son Harland of Tofield, Mr. and Mrs. G. W. Sears, sons Stanley and Charley and Miss Mary Ingram attended the Spanish American war veterans picnic at Riverside Park, Edmonton on Sunday. They also attended the social credit meeting at the arena in the evening.

Mrs. Radebaugh and little son who are here on a visit from Oregon, visited their friend Mrs. F. A. Owen on Monday afternoon.

Four generations of the Haugen family were visiting old friends, Mrs. Owen, Mrs. McMullen and Mrs. Sears on Friday afternoon of last week. These were Mrs. Haugen sr., Mrs. Thor Horte of Kingman, Mrs. Moen jr., and little son of Bardo, also Mrs. John Moen and Miss Irene Horte.

Dr. and Mrs. Morison and sons were Sunday evening guests of Mr. and Mrs. W. A. Mitchell. Miss Maude Wildman accompanied them home where she will make her home while attending school.

Mr. and Mrs. Younie, daughter Mabel, sons Bill and George of Edmonton and Miss Kathleen Ingram were Sunday dinner guests of Mr. and Mrs. W. A. Mitchell.

LOCAL AND PERSONAL

Mr. and Mrs Radebaugh and two children of Portland, Ore., are on a visit at Mr. and Mrs. L. Nolands.

Miss Ethel Baynes of Gadsby, Alta, visited over the week end with Miss M. Wood.

Mr. Matchmous visited his home at Strome over the week end.

Miss Aileen Allen and Gwen Firth left for Edmonton to attend the Fall term at Alberta College.

Mrs. Bertha Seale and daughter Miriam spent the week end in Edmonton visiting Mrs. Bert Calvert.

Mr. George McFadzean who had charge of the drug store while Mr. Beirnes was on his vacation, left for his home at Stettler on Saturday evening.

Mr. and Mrs. Green motored to Viking for the week end.

Miss Myrtle Bethel who has been visiting her mother returned to Sedgewick this week.

Mr. and Mrs. Murray McHeffey returned to Edmonton Sunday after visiting at the McHeffey home here.

Mr. and Mrs. Johnston Ferguson returned from Banff last week. They left again on Friday for the Pacific Coast.

Mr. and Mrs. Griswold and daughter, Mrs. Armstrong, returned this week from a vacation trip spent at Banff.

John Swift left for Camrose this week where he will take grade 12.

Mr and Mrs. Doc Morrison were Tofield visitors on Sunday.

Mrs. Kendall and children of Edmonton were visitors at the H. Kendall home here last week.

Mrs. MacCowan and son Clarence left for Calgary on Saturday after visiting friends and relatives here.

Mr. Beirnes senior, left for a visit to the Pacific coast on Friday of last week.

The Misses Edythe Barden and Margaret Whyte left this week to train as nurses in Edmonton hospitals.

SCHOOL RE-OPENED MONDAY LAST

With the holidays now but a memory, the Tofield schools re-opened on Monday this week. Without fuss, books under arms, students entered school and in a few hours the regular routine of school work was under way. With the exception of Mr. Broughton, who was appointed principal at Bardo the staff is the same as last year.

STERLING SAMUEL STALTER DIES

A sad occurrence occurred in the Bardo district on Tuesday, when Sterling Samuel Stalter, son of Mr. and Mrs. Stalter of that district succumbed from a complication of diptheria and pneumonia, at the early age of 21 years. The funeral which was quietly observed was held the same day, interment taking place in the Salem Mennonite cemetery. J. E. Stinson was the funeral director.

Lindbrook Community Club

Editor's note: The following report of the meeting of the L.C.C. was sent in by Mrs W. L. Gill in the absence of the regular reporter, Mrs. W. Hooper.

The monthly meeting of the L.C.C. was held at the home of Mrs Aage Jensen on Wednesday, Aug. 26th. Twenty two members were present, also five guests being, Mrs. W. Lancaster, Miss Adele Gill, Mrs. G. Burland, Mrs J. Bracegirdle, Mrs. G. Mackenzie. As usual the members opened the meeting with the club song, after which business was soon attended to. Members answered the roll call with favorite recipes.

A letter of thanks was read, received from Mr Frank Gould on behalf of the club donating a plant to his wife whilst in the hospital recently.

Thanks were also received from Mrs. Foreman for the little remembrance given her whilst recuperating from her recent accident.

The next meeting, Ladies, will be held at the home of Mrs. John Pruden. Roll call to be answered by Helpful hints. Mrs. Evans finished up the business by reading a poem well chosen for the occasion. A delightful luncheon was served after which members visited till home time.

"SPORT" PASSES IN HIS CHECK

"Sport" the dog owned by the Clutterham family and familiar to every resident of town and many in the district, passed in his checks on Wednesday of this week. About twelve years ago a hobo travelling on a freight train brought Sport to town, and with canine sagacity, he knew a good place when he saw it, and refused to ride the freights anymore. Still using canine sagacity, he chose the Clutterham home for a domicile and the choice once made he remained faithful to the end. He He soon became a familiar figure around the post office and was accepted almost as a part of the institution. Around this time the Worton family had a dog also, Snap, and for some reason unknown to mortals, Snap and Sport became inveterate enemies, staging a fierce battle whenever they met and keeping their owners on the verge of hysterics. Many a time have they been separated only to resume the feud at the first opportunity. Both owners have been bitten separating them and on one occasion Constable Carr, who never lacked for nerve, waded in and separated them by booting one dog one way and the other dog the other way. On one occasion, just after the Mercury had been taken to the Post Office, Sport gave them a sniff and started to growl and fuss, but it was not displeasure at the Mercury, but the scent of Snap that raised his ire. How the feud would have ended, we do not know but Snap met an untimely end by being shot, leaving Sport no doubt to mourn the loss of a worthy adversary. Now Sport has gone and quite likely in the heaven exclusively provided for faithful dogs, they will talk over the excitement they caused on Tofield main street.

Every dog owner has a favorite story about his dog, we could recount several about Snap, but one will suffice. One very cold January afternoon just before dark, we were in the yard and watched Snap perform what we considered a smart piece of work. There was a stray cypress cat around the alley, homeless, and judging by its cries very cold, the temperature was away below zero. Snap could always obtain admission to the house by scratching on the door, and somehow sensing the cat was cold he gently nudged it towards the back outside stairs. Then step by step, the cat rather reluctant to go, he nudged it up the stairs to the door which he scratched to be let in. When the door was opened he pushed tabby in and looked up and wagged his tail.

Dogs come and go and while Sport and Snap are gone, the Rovers, Dukes, Neros and Tarzans are with us still.

The Hum of the Binder
The Roar of the Tractor

Each year, as the daylight hours noticeably become shorter, and we realize another summer is on the wane—a chorus is heard throughout the land. Not musical, as we understand the music of men; not even nature's music of wind, trees and water, but a chorus of frenzied activity

Ripened grain has been cut and stooked, and men, to procure the golden kernels have come with huge machines that do not permit defeat.

With a roar that is welcomed by those who know it best, the tractor driving the separator starts up a song from within the separator's vitals—a battle song which shrieks of victory. Thresh, Thresh, Thresh, from early morning until evening. Thresh, Thresh, Thresh, and the golden grain comes down the spout adding its particular note to the crescendo of noises. The time of hustle and hard work, but withal a pleasant time—the time of reward.

There is another noise with which we are familiar, we, in the Mercury Office, hear it frequently. Not once each year, but once each week—the noise of the printing press.

Not the roar of the city daily press of course, but if you feel inclined to call it so, the pleasant song of a country print shop. A song that sings of events, local events, personal events. Singing bards of long ago were never so prolific of thought, the songs of marching armies were never so numerous as the items published.

Two dollars a year, the old press sings, Re-new promptly, renew promptly, re-new promptly.

Yes! September brings a western chorus. A chorus of noises on the farm, while each Thursday brings its own particular noise to the Mercury Office. Can we, dare we, hope that both noises will be harmoniously blended, which simply expressed means that each and every Mercury subscriber will pay his or her subscription this Fall.

We thank you.

THE MERCURY

Marketing of Canada's Grain

By A. E. DARBY, Secretary, Winnipeg Grain Exchange.

The articles here reproduced formed part of a review of the machinery of grain marketing in Canada, presented to the Special Committee of the House of Commons on the Marketing of Wheat and Other Grains on April 21, 1936, on behalf of the Winnipeg Grain Exchange by its secretary, A. E. Darby.

Article Seven

This article deals with the grain futures market provided by the Winnipeg Grain Exchange and the value of the system of "hedging" grain purchases and sales.

Perhaps the most important and valuable service of the Winnipeg Grain Exchange, or of any similar institution, is that of providing the facilities for futures trading. Under the bylaws of the exchange, contracts may be made by members for the purchase and sale of grain for delivery in the future in certain specified months. Thus contracts can be made contemplating the delivery of grain in May, July, October, November and December. The contracts call primarily for the delivery of wheat of the grade of No. 1 Northern in store at Fort William or Port Arthur in units of one thousand bushels. But it is permissible also to make delivery on the contracts in the grades of No. 1 hard, 2 Northern, 3 Northern, 4 Northern, 1 C.W. Garnet and 2 C.W. Garnet under discount of fixed amounts per bushel according to the grade delivered. No. 1 Hard is deliverable without discount, 2 Northern is deliverable at 3 cents discount, 3 Northern at 8 cents discount, 4 Northern at 12 cents discount, 1 C.W. Garnet at 3 cents discount and 2 C.W. Garnet at 8 cents discount. These grades are called the contract grades, and delivery on a futures contract must be made in one of them. Delivery is made through the Winnipeg Grain and Produce Exchange Clearing Association. The trading carried on between members is cleared through this Association.

Trading in grain for future delivery in the months mentioned is authorized as necessity and convenience dictate by the Council of the Exchange and the quotations of the prices at which they trade are continuously posted thereafter until the last trading day of the month specified.

On the floor of the Exchange are two trading places or pits, one devoted to coarse grains—oats, rye, barley and flax—and one to wheat. The transactions in these pits are all sales and purchases of grain for future delivery. In the wheat pit for example, members buy or sell some stated quantity of October wheat, or December wheat, or May wheat, and as the prices change, records of the changes are posted on the quotations board placed above the pit in full view of all the traders.

This constitutes the futures market, and it is this futures market which enables the indispensable operation known as hedging to be performed.

The ability of grain traders to buy and sell grain for future delivery lends stability to grain prices by discounting those changing factors in the supply of, and the demand for grain which otherwise would cause violent and disturbing fluctuations in the current prices. Traders endeavor to foresee the probable course of prices and to anticipate the potential scarcity or plenty in supply, or of apathy or urgency in demand. So long, in fact, as there is a broad market for grain futures operating with the least possible restraint or interference the fluctuations in price great as they may seem on occasion, will always be considerably less than they would be were no such market in existence. This conclusion received its most recent and perhaps its most authoritative confirmation in the report of the Royal Commission under the chairmanship of Sir Josiah Stamp which inquired in 1931 into the workings of the futures trading system.

The process known as hedging has been recognized by numerous royal commissions and practically all authorities on economics as indispensable in any sound and economical system of grain marketing.

Hedging consists in selling for future delivery quantities of grain equal to the cash purchases of the trader or in buying for delivery in the future of quantities equal to that presently sold by the exporter, miller or processor. Fluctuations in price downward would cause the buyer of grain loss when he came to sell at a later date. Since the futures which he has sold as a hedge has also declined in price it can be bought in at a profit. The loss on the one transaction is offset by the gain on the other.

A miller, having sold grain in the form of flour for delivery at a future time, hedges his sale by buying futures. If the price of the grain he requires to fill his order rises he would incur a loss. But the price of the futures has risen also and the sale of that will compensate for the loss incurred on his flour sale.

Hedging is price insurance and removes in large degree the speculative character which would, without it, belong to every purchase and sale of the actual commodity. The risk of loss arising from inevitable price changes would undoubtedly have to be allowed for in determining the prices grain dealers could pay the growers and would render the financing of the whole trade more precarious and costly.

The existence of the futures market and its use for hedging purposes undoubtedly result in increasing the price received by the producer and in maintaining the market for cash or spot grain on a more stable basis.

It is commonly overlooked in discussions of the subject that hedging involves the buying of grain futures as well as the selling of them. It is reasonable to assume that, if the quantity of grain purchased in the primary markets, was exactly equal day by day to the quantity absorbed by the consuming markets, the selling hedges and the buying hedges would exactly balance. Unfortunately, the current or flow of grain into the markets can seldom or never be exactly equal to the current or flow of grain out of them into actual consumption. The element of risk is never entirely absent and this risk must be borne by someone.

Risk is inseparable from human existence and human activities. Risks arising from accident, fire, storm and earthquake, and many other causes of death and destruction, are insured. The form of price insurance embodied in futures trading is as useful and as legitimate as other forms of insurance and it has been developed to meet the needs of the case just as certainly as the other forms of insurance which escape criticism.

The End

VETERANS MAKE PRESENTATION TO RAILWAY

Toronto, Ont., Aug. 27th.—A gray haired veteran of the steel highway, face lined by long years spent in a locomotive cab, but once a youthful fireman who rode his engine into Ottawa on that historic day of Confederation in 1867, was typical of approximately 300 Canadian National Railways veterans who gathered this afternoon in the Oak Room of the Union station to signalize the anniversary of their railway entering upon its second century of service to the public.

Inscribed with the names of more than 6,000 men and women on the pension lists of the System, veterans presented to the Canadian National Railways a Loyalty Roll, encased in a walnut chest, suitably engraved, and surmounted by a silver working model of a modern, mammoth passenger engine, made itself by a veteran who has 52 years of active service to his credit. Supported enthusiastically by every veteran in the Canadian National Railways and its lines in the United States, the memorial was truly international in character and wrote a page in railway history which, for loyalty and uniqueness in nature, has never been duplicated before.

The presentation address was beautifully decorated in colors and depicted the growth of land transportation from the days of the stage coach to the present titan of the rails, the streamlined "6400". Each district of the vast National System was represented pictorially, Quebec by the little "Dorchester", which a century ago inaugurated the railway epoch in Canada, the Maritimes by their pioneer locomotives, the "Albion", Ontario by the "Lady Elgin" of 1853, and the United States lines by the motive power of 1870, Western Canada by the prairies type of 1900, and the entire system united by No. 6400.

The address read: "We, the veterans of the Canadian National Railways and associated companies, desire to give expression to the goodwill which we bear to the railroad and its staff. As it enters upon its second century of service to the public, the Canadian National carries with it the sincere good wishes of the great army of veterans—more than 6,000 men and women—who have completed their years of active railroad service but whose hearts remain loyal to their railway. To our nation-wide transportation system and to the 80,000 men and women employed upon it, we pledge our loyalty and support, confident that the years ahead will bring to the enterprise full measure of success. Six thousand two hundred and seventy names are inscribed on the accompanying roll of Canadian National veterans."

T. Muirhead, President of the Canadian National Veterans' Association, Toronto district No. 1, who presided, read a letter of regret from S. J. Hungerford, President of the National System, who, owing to a recent family bereavement, was unable to be present. Mr. Hungerford wrote in part:—

"We have learned with a great deal of pleasure of the action which the veterans of the Canadian National System have taken to mark the inauguration, 100 years ago, of railway service in Canada and the form which the expression of good will is taking is a happy one. The railway will feel honored in accepting the loyalty roll." The presentation to the railway was made by A. J. Shapter, of Montreal, who made the locomotive model decorating the chest. He drew attention to the engraved plates, one of which read, "Greetings from 6,000 C.N.R. veterans to their railway" and another inscribed with "Canadian National Enters Second Century of Service." He voiced the sentiments of all present when he declared that "My memory and that of many of us present goes back to the days of the small wood burning locomotives and we are proud to have been actively associated with the work of supplying this System with what is undoubtedly the finest motive power to be found on any railroad in the world."

High tribute to the spirit which prompted the great army of veterans in making this striking demonstration of their affection for the road was voiced by E. P. Mallory, Assistant to the President, speaking in behalf of Mr. Hungerford. "This loyalty needs no such symbol or token," he said, "It has been expressed in a multitude of ways during past years. It has been shown by the work which veteran employees have continued to perform for their company, as its champions and as the supporters of its cause.

"Every business and industry, taking stock of its assets, places a high value upon that something known as good will. I say to you there can be no finer asset of any industry than the continued good will of the men and women who have given years of their life and worked faithfully to make that industry a success. Having completed their years of service, our veterans have not lost interest, but they continue to be members of that great family of workers who go to make up the organization of the Canadian National Railways and Associated Companies.

"We are proud that we have on this System an all-embracing contributory pensions plan, one which ensures that every employee of a certain number of years standing, who has taken advantage of the pension-building facilities afforded, is provided for in the latter years of his life. That is an important feature in the conduct of any industry and it is one which will have a tremendous bearing upon the future comforts of those who, in later years, will join you, their active service completed and proud to be known as Veterans of the Canadian National."

Brief addresses of appreciation were also given by W. A. Kingsland, vice-president of the central region, J. B. McLaren, comptroller, Montreal, J. P. McTaggart, general superintendent, Canadian National Telegraphs, W. E. Norman, general superintendent, Canadian National Express, F. J. Bailor, regional treasurer, J. P. Aichison, regional auditor, H. C. Bourlier, general passenger agent, F. R. Porter, foreign freight agent and F. Ferguson, assistant superintendent of pensions and relief, Montreal, W. G. Graham, general chairman, Brotherhood of Locomotive Firemen and Enginemen, spoke in behalf of the employees of the road, while the veteran officers were represented by C. R. Moore, formerly general superintendent of transportation and J. C. Garden, formerly general superintendent of motive power and car equipment.

A roll call of the various delegations of veterans present showed large numbers from Port Huron, Sarnia, Portland, Me., Hamilton, London, Stratford, Montreal, Belleville, Brockville, Palmerston and Lindsay, while numerous towns and cities from long distances were represented by a member of the Association Executive. Some hundreds of telegrams covering every division on the System were either read by the chairman or were on display on the wall of the room.

At the conclusion of the ceremony, Mr. Muirhead announced that the Loyalty Roll and its cabinet would be placed in the Canadian National Railways display at the Canadian National Exhibition and subsequently would be shown in various towns and cities throughout the Dominion.

THE TOFIELD MERCURY
A Weekly Newspaper Published At
Tofield, Alberta
W. Werton, Publisher

A BUSY WEEK—

ONE MUST congratulate the present Alberta government on knowing what it wants and how to get it. In just one week the legislature met and passed bills, quite a number of them, radical in nature, far reaching in importance and cosmopolitan enough to touch the lives of all Albertans. One must assume that the legislators working as hard as they did had only the welfare of the people of this province at heart, consequently any comment upon the bills, certainly adverse comment, would be both uncharitable and futile.

The bill designed to implement Social Credit, or perhaps it would be more correct to say Alberta Credit, is an entirely new departure in the way of provincial legislation and with the exception of the section requiring registration in order to receive benefits, runs fairly true to pre-election promises. Whether the bill will work as well as social credit enthusiasts believe it will, only time will tell. Certainly the payment of the first dividend will be heralded with glee and if the present provincial government, can make "two dollars grow where only one grew before," a good many of the doubting Thomas' will have to eat humble pie. Undoubtedly the present government still enjoys the confidence of a large section of the people and it will be extremely interesting to watch the effect of the social credit legislation when it actually is working.

DEBTS LEGISLATION—

THE DEBTS legislation concerning municipal debts is of particular interest to the Town of Tofield. For many years the town has been paying six per cent interest on a large debenture indebtedness. Delegations have waited upon and conferences have been held in the past with the Finance Board in Edmonton, and it is not until quite recently that there were even signs that an adjustment embodying a reduction would be made. Quite recently there were definite signs that an adjustment might be made which would result in a reduction of both principal and interest payable by the town. However, the new legislation makes it impossible for bond holders to collect more than three per cent on debenture indebtedness, which to the town of Tofield means a saving of between two and three thousand dollars a year. However, the act does not come into effect until it is proclaimed by an order in council and it is quite possible that as far as the Tofield debenture debt is concerned plans already under way will be brought to a completion. The act is really a visible sign to municipal bond holders, that where an adjustment is wise and necessary, they should view the plight of the municipality sympathetically. While undoubtedly it will not find favor with municipal bond holders, it is not nearly so drastic as it appears. All through the depression six per cent interest, together with a portion of the principal has been paid by this town, the money being obtained from people, many of whom have suffered severe financial reverses. We do not subscribe to a slack system of financing, but there are times when a review and adjustment of debts are necessary and it is the duty of the creditor as well as that of the debtor to realize this. This applies more to interest than to principal.

The act dealing with private debts will, we imagine be largely viewed in the light of its effect upon an individual's private fortunes. Undoubtedly the debt harrassed farmer or home owner is given a respite to re-arrange his or her fortunes. The general effect of the legislation will probably be beneficial to those living in Alberta though with such a sweeping order there will likely be individual cases of hardship. There are times when a creditor is in a worse plight than a debtor.

One phase of such legislation that should not be overlooked is the general outlook towards debt on the part of the people. Legitimate debt is an obligation to pay, and if that obligation be treated lightly by a whole people, little good is likely to come from it.

THE HOE—THE FORERUNNER OF DIVIDENDS—

IT IS something of a relief to get away from matters concerning government and politics and become interested in matters equally important, if not quite so spectacular. It has been our privilege during the past two weeks to visit two farms in this district where genuine progress has been made towards the growing of fruit. The first one visited was on Sunday evening of last week and we were pleased to inspect (inspect doesn't seem quite the right word but we will let it go) an orchard of no small dimensions. To a large extent this one is in the making as while there were quite a few bearing plants and bushes, notably raspberries, sand cherries and strawberries, there were crab apple trees and plum trees that had not reached the bearing stage. In a fresh plantation where the land was as mellow and free from weeds as land could possibly be, rows upon rows of raspberry bushes were planted, and providing nothing happens to them, will be bearing in a year or two years. One patch of garden soil caught our eye. About an acre and a half,

(Continued on back page)

WEAR AND TEAR

Study thou the Dominion of Thyself, and quiet thine own Commotions.

Sir Thomas Browne.

Health and Life Enemy No. One for the whole world may be hard to designate, but the wise detectives who follow endless clues through the masses of modern living have no doubt that the one Chief-suspect or Runner-up for the title, is—have you guessed it?—FATIGUE. Fatigue! that common-place, every-day, matter-of-fact thing to be found along all mean streets and in all high houses, in human groups of all kinds. Yes, and surely the more common-place and every-day, the worse. I don't know if fatigue is even classed as a disease, though, if not, a many syllabled Greek name could easily be found for it. But, whether disease or not, there can be no doubt that it is a prime Preparer for Disease, and a constant complicator of diseases, especially in the wearing-out half of life.

More than half a century ago, a wise physician, who could write a poem or a novel almost as easily as a prescription, Dr. Weir Mitchell, wrote a warning booklet on "Wear and Tear". Wear is the natural and legitimate effect of lawful and right uses of brain and body, or machine. Tear is hard, wrong uses of body, brain, or machine, such as using a chisel for a screw-driver or a pen-knife for a gimlet. Wear is forty horsepower work for a fifty horse-power engine, always a margin on the right side. Tear is sixty horse power work for a fifty horsepower engine, always a margin on the wrong side, piling up with compound interest toward catastrophe. Wear is a full-powered, smoothly oiled, promptly repaired, wisely engineered machine; tear is a scantily-powered, spasmodically-oiled, seldom repaired, carelessly-engineered machine, likely enough with grit and dirt in its bearings. In the long run the man who knows his weakness will beat out the man who doesn't know his strength; the wise and persevering tortoise wins from the fleet but erratic hare. Know Thyself, are wise words.

Many wears and some tears are easily seen and estimated, but some are deeply hidden and defy the ergometer. Another wise physician of an earlier day than Weir Mitchell, better known by his pen than his lancet, though handy with both, Oliver Wendell Holmes, warns that it is safer to tire a muscle or even bleed a vein than to tap a nerve. If he had lived in this day he might have warned us not to run on our batteries. We have invented the word "nerve-racking", and have evolved plenty of uses for it. It is remarkable the loads muscle power can bear if there are no nervous frictions sapping and wearing unseen.

Relations with people give all the best of the joys of life, though some voluntary Crusoes and hermits run away from them, but they supply most of the frictions of life also. People—even most excellent people, wise people, charming people, gentle people,—can get on nerves. Living too closely and constantly even with the world's very best, even with the world's best children, may leave us without the quietness, the silences, the rest places the retreats within ourselves that we must have for health of body and soul. These things can be, even in ample homes. How life can be lived, or even existence existed, by half a dozen bodies and souls shut up in a squalid room or two, with all the inevitable noise and jar and ugliness, and all the lacks of quiet and aloneness and beauty, can any of us even imagine who are fortunate to live in more spacious ways? Even the prisoners of the law have each his separate cell. Muscles can wear down to extreme tiredness, but while the nerve batteries have still some reserve we are not absolutely "done". In one of Nelson's battles, when the fleet drew off to refit, a burly sailor found himself so exhausted that he could not raise his handspike to the level of his shoulder. But when the attack again was sounded, and they closed in, he could run out one side of a heavy gun like a giant, against two or three men on the other side. His batteries had not gone flat.

Away beyond muscles, nerves wear down to sheer exhaustion, and then we have spent far beyond wisdom or safety; it may be all we have. There are times when a quiet hour alone will be hungered for more than food, and bring more refreshment to body and soul. Work is good, but overwork is not. Play is good, but over-play is not. Fatigue cripples and kills.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

CANADIAN WHEAT BOARD

The following bulletin, dated August 17th, has been received from the Canadian Wheat Board:

"The Board requests all elevator companies to advise their agents of the Board's position on the following matters:

Result of the Board's Operation in Connection with 1935 Deliveries

The board's holdings of 1935 crop are nearly all disposed of and while the final results are not yet definite to be any possibility of a further payment on account of 1935 wheat delivered to the Board. This position results from the fact that during the greater part of the past crop year the market price was below the Board's fixed price

1935 Producer's Certificates

These certificates are clearly marked 'for surrender to the Board when required.' The Board has not called for these Certificates, and producers should retain them in their possession. Under no circumstances should these Certificates be forwarded to the Board."

CANADIAN HORTICULTURE

(Continued from page three)

it had been summerfallowed for two years and was absolutely black. We doubt if a better garden spot could be found anywhere. After having scratched in a combination of worn out soil and gumbo for several years, this spot to us was good to look upon. While there we tasted sand cherries, raspberries, strawberries and saw beans that as regards size must have got their inspiration from the giant in Jack the Beanstalk fable. Oregon pole beans they called them and there were plenty of good fat bean pods almost a foot long.

On Wednesday of this week we had the pleasure of tasting plums taken directly off the tree, of fair size, ripe and juicy. As regards sweetness and flavor it is quite true to say that never have we tasted better, regardless of where they were grown. This was in a Tofield farm garden where strawberries, raspberries, currants, cherries and corn, besides all the regular Alberta vegetables were or had been growing. We mentioned corn, not so much because it is unusual to grow corn in this district, but because the lady who showed us around broke off an ear of one variety of sweet corn that for sheer size was larger than anything we had seen before. But the plums were the tid-bit of the garden, with a nice cherry a close second. Besides supplying the table for ten at each meal, this garden has supplied material for 500 quarts of various fruits and vegetables for winter use. In a recent issue of "The Saturday Evening Post", an American magazine with over two million a week circulation, there was an old-time farm scene under which read, "When down on the farm meant barrels of potatoes in the cellar, hams and bacon in the smoke house and a net to keep the flies from Dobbin's skin." We here in Alberta can go one better, if it be possible, by saying "Down on the farm means 500 quarts of fruit and vegetables in the cellar." At the first farm we visited, the owner had ingeniously rigged up a motor cultivator, using a motor cycle engine and an assortment of wheels and gadgets gathered from here, thither and yon. Remembering this, we asked the lady at the second farm we visited how the garden was cultivated, and she replied "Oh, mostly with a hoe." It is a pretty good hoe that pays dividends to the tune of 500 quarts of fruits and vegetables. In fact when you come to think about it, as a dividend producer a garden hoe is a hard thing to beat.

REGISTRATION PROCEEDING

Registration and signing of the covenants with the Alberta government will continue until the end of September. Enquiry at the office in Tofield where the registration forms are available elicitated the information that at this point some 400 individuals registered.

This sounds Familiar

Guide—"This castle has stood for 600 years. Not a stone has been touched, nothing replaced."

Visitor—"Um, they must have the same landlord we have."

NEED AGGRESSIVE SELLING POLICY

A more aggressive sales and [illegible] policy for Canadian products in the British market is essential if Canada is to take advantage of her opportunities there, and keep abreast with other Dominions in the search for increased sales, Hon. J. G. Gardiner, Minister of Agriculture, [illegible] as a result of his tour of the United Kingdom. Mr. Gardiner spent [illegible] weeks on a mission which had a main object to see whether, by agreements or agreements, it was possible to increase our shipments of agricultural products to the United Kingdom.

The Minister came back with specific proposals which will be discussed with his colleagues. If [illegible] are adopted it will mean a considerable enlargement of Canada's [illegible] staff in Britain at present which, in the opinion of the Minister, is not large enough to carry on the kind of aggressive advertising and interest [illegible] which should be going on.

Not only is there a need for more and better advertising, but the department here, and the producers of Canada, should be kept more continuously and intimately informed about the peculiar needs and desires of the British buying public.

CHRISTIAN SCIENCE

At all Christian Science Churches next Sunday, the subject of the Lesson-Sermon will be "Man." The following is one of the Scriptural quotations contained in the Lesson-sermon: "And God said, Let us make man in our image, after our likeness: and let them have dominion over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth. So God created man in His own image, in the image of God created he him; male and female created he them" (Genesis 1:26,27). One of the correlative passages from "Science and Health with Key to the Scriptures" by Mary Baker Eddy, is as follows (page 94): "Man reflects infinite Life and Love. The nature of man, thus understood, includes all that is implied by the terms 'image' and 'likeness' as used in Scripture."

Daughter of a Philanthropist

A young American woman wanted to be presented at court. The high officials having inquired into her social standing at home, objected. It was explained to her that the honour of a state reception could scarcely be allowed to the daughter of a [illegible].

The young woman cabled home [illegible] her father the situation.

She received the following reply:

"Can't call it selling. Practically giving them away. See advertisement."

That solved the difficulty. She was presented as the daughter of an "eminent philanthrouist."

FAREWELL PARTY

On Friday evening last, the Curling rink was the scene of a farewell party held in honor of the Misses Margaret Whyte and Edythe Barden, both of whom were leaving Tofield to train in Edmonton hospitals. Dancing was the order of the evening, the Tofield Rangers supplying the music. The hall was well filled with the Tofield and district young people, all of whom wished Edythe and Margaret the best of luck in their new venture. After lunch Jean McLeod, in her own inimitable manner, presented the girls with small tokens of friendship. Both girls responded, thanking their friends and expressing their appreciation for the party and gifts.

On Saturday afternoon, Miss Edith Davies was the hostess at a tea held in honor of Edythe Barden and Margaret Whyte. Bridge was supplied for those who cared to play and others enjoyed a social afternoon. A delicious lunch was served.

A large number of guests responded to an "at home" at the home of Rev. and Mrs. Wallis on Wednesday afternoon. Tea and refreshments were served and a pleasant afternoon was spent. The occasion was Rev. and Mrs. Wallis' first anniversary.

HOLY TRINITY CHURCH

11:00 a.m.—Holy Communion.
7:30 p.m.—Evensong (Shortened)

Evensong will be followed by service of song, when anthems and solos will be sung by the choir and favorite hymns by all.

MORE POWER
This tire gives you higher average speeds in field or on open road.
SELF CLEANING
The only tire that actually cleans itself as it revolves.
TRACTION FORWARD & BACKWARD
Truck, tractor, or grader does more and better work.
GET THROUGH
..slippery mud deep snow
GOODYEAR

The new Goodyear Lug Tire for trucks (above) bites into soft going with a caterpillar action — gives traction forward and backward — cleans itself automatically—pulls you through. Yet it is fast, smooth and quiet on pavements. The tread is tough and long wearing.

The new Goodyear Studded Tire (left) is designed for cars that must face the mud-holes of unimproved roads, the hazards of cross-the-field driving, and deep winter snowdrifts. Come in and see this tire. Tried and proven on gumbo roads and through deep snow. It is the same low price as the Goodyear All-Weather Tread.

The Central Meat Market
WALTER BELLAMY, Manager

Grain Trade and Minimum Price

The Western Producer in its issue of September 3rd, referring to the decision of the government in regard to the minimum price for wheat and its reception by Western farmers, says:

"To them and to many of those whom they elected it must have come as a cruel disillusionment to find that their government chose TO LISTEN TO AND BE GUIDED BY THE GRAIN TRADE and other reactionary elements in their midst while refusing even to acknowledge the submissions of organized agriculture."

The implication that the grain trade or any section of it has at any time made representations to the Government, or to the Canadian Wheat Board, or has tendered advice to those bodies, relative to the establishment of the minimum price for wheat at 87½ cents per bushel or any other figure, IS ABSOLUTELY FALSE. ....The interests of wheat producers and of the grain trade are identical in regard to grain prices. The prosperity of the grain trade in Canada is bound up with the prosperity of producers. It has no interest in keeping prices down. The figure at which the minimum price should be set is a matter to be decided by the Government having in view the loss which it might be prepared to sustain in the event of a decline in world wheat values. The grain trade has repeatedly stated its belief that producers must be assisted to overcome the adverse conditions resulting from drought and excessively low prices. But it has been opposed to attempts to fix the price at which Canadian grain should be offered in the export markets or to hold Canadian wheat at prices above its relative value in world markets because such attempts must result in (a) loss of markets and diminution of sales, (b) the creation of burdensome surpluses, (c) eventual loss both to producers and taxpayers, and (d) encouragement of uneconomic and high-cost production by our competitors.

In the continuance of the open market for grain and the preservation of every available channel through which Canadian grain can be sold are to be found a guarantee of the best returns to Canadian producers. To maintain such returns is as much the desire and interest of the grain trade as of the producers themselves.

There is room for honest difference of opinion as to what the minimum price should be. But there is no justification for false imputations of motive and act.

Local Line Elevators

LOCAL AND PERSONAL

Mr. and Mrs. R. Whyte of Wetaskiwin spent the week end at Tofield.

Miss Lorett Rees spent the week end at Alberta beach.

Mrs. Pether of Camrose, formerly Miss Mary Easton, visited at the Barden home and other friends on Tuesday of this week.

Mr. and Mrs. G. McLaughlin and Enid were visiting friends here on Monday.

Miss Kathie MacLeod, from Edmonton spent the week end at home here.

Mrs. Nomeland and Miss Hilda Nomeland visited Edmonton over the week end.

Mr. Lee Burnett of Wainwright spent the week end at his home at Tofield.

Mrs. McClaren of Vancouver, relative of the Malcolm family is visiting at the Malcolm home here.

Mrs. Armstrong, daughter of Mr. and Mrs. Griswold, left for her home in California by motor on Wednesday.

Mr. (Barney) Kendall of the Tofield Creamery staff returned from his holidays on Wednesday.

Mr. Currie, manager of the local creamery is now on holidays. Mr. and Mrs. Currie will leave on Saturday for a stay at Vermilion.

Alfred Matchmann, Bill Taylor and Adam Hummel visited at Strome on Sunday and Edmonton on Monday.

F. O. Ball of Edmonton was in Tofield on business last week.

Mr. and Mrs. Ted Davis were visiting friends in town on Monday.

Mr. and Mrs. Jevons left on Wednesday by motor for the coast, where he intends to resume his tailoring business.

Born.—On Tuesday, September 8, to Mr. and Mrs. Sam Mansbon, a daughter.

Mr. Pat Moen of Vermilion spent Sunday in Tofield.

Mrs. Hamilton of Calgary is visiting Tofield for a few days. Mr. Hamilton is the contractor on the new bank building.

Mrs. Ellis, Jean and Raymond were visitors at the Malcolm home over the week end.

WEDDING

On Thursday, September 10th, at the Holy Trinity Church by the Rev. Wallis, Mr. Russel Edgar Bertrand of Calgary and Miss Lillian Susan Morrell of Provost were united in holy matrimony. Miss Morrel is an old time friend of Rev. Wallis.

CONFIRMATION SERVICE

Thirteen candidates were confirmed at Holy Trinity Church on Thursday afternoon, Rt. Rev. Bishop Burgett of Edmonton officiating. Mr. Timms, also of Edmonton acted as Bishop's Chaplain. The church was suitably decorated with flowers for the occasion, the service being an inspiring one.

FAREWELL PRESENTATION

The choir of the Anglican Church assembled at the home of Rev. Wallis on Wednesday evening, the occasion being a farewell gathering in honor of Mr. Blake Clutterham who is leaving on Saturday for California. A pleasant social evening was spent during which Blake was presented with a lovely scarf as a token of the esteem in which he is held. While in California he will undergo treatment for his foot and also take a course in mortician work.

ENGINEERS OF ABASAND ARE IN EDMONTON

After having completed successful test runs of the newly-installed separation plant which "breaks down" tar-sands and washes out crude oil, Fred W. Sage, field superintendent of Abasand Oils, Limited, and J. M. McClave, chief engineer of the plant came to the city Monday from Fort McMurray.

Messrs. Sage and McClave had the plant in operation and gave a demonstration before Sir Edward Beatty, president of the Canadian Pacific Railway, and his party, who visited the development last Friday.

Mr. McClave, chemical engineer who invented the separation process used in the plant, is bound for Denver, on company business.

LAKESHORE

Threshing was well underway in this district until the rain Sunday night put a damper on operations. Some of the crops are yielding very good and others are not so good. R. C. Phillips threshed 96 bushels of wheat from 2 acres. This is an exception though, because the average yield is approximately 20 bushels per acre. The grain is of a good grade this year, grading either No. 1 or 2.

The weatherman has been kind to the gardens in this district. There is an abundance of cucumbers as well as other vine plants such as pumpkins, tomatoes, marrows, etc. Mrs. Graham has a watermelon in her garden that seems to be matured. So far there has been no damaging frosts, but it won't be long now.

Miss E. Baines has been visiting Miss M. Wood.

Miss Ethel Graham is teaching school near Mannville this year.

A number of students from this district are taking grade nine in Tofield. They are Marjorie Ferguson, Margery Murray, Vivian Shaw and Calvin Phillips. Lorene Wood is taking grade nine at Garneau High in Edmonton.

LINDBROOK

Sunday's rain halted the threshing operations around here, which were going on well until the rain came. The returns so far are better than expected.

The meeting of the L.C.C. having been reported and well reported too, we won't need to repeat.

Mr. and Mrs. E. W. Hooper returned from the Coast last week.

School re-opened last week with Miss Y. Phipps of Strome, Alta., as teacher.

Weslake school also reopened with Miss Burns of Edmonton as teacher.

Quite a jolt was received by many on opening their tax notices last week and the general concensus of opinion is that they are too high, and many are asking why the jump? What's it for and where is it going, and lots too would be glad if they knew where its coming from as well. Maybe a little explanation would soothe the minds of many of our taxpayers. After all, they're entitled to it, they have to pay it.

Mr. and Mrs. J. Whittle and Mr. and Mrs. T. Livermore of Wainwright spent the week end at the home of Mr. and Mrs. J. Bracegirdle and family here. Mrs. W. Arkwright of Wainwright also spent a few days with them here last week.

A birthday party was given at the home of Mr. and Mrs. T. Koritzman in honor of their son Richard on Saturday evening last week. We assure everyone it was a real party and many happy returns of the day, Richard.

Miss Isobelle Herbert who was rushed to the hospital in Edmonton suffering from appendicitis is well on the way to recovery and hopes to be home soon.

BEARS BECOME "EDUCATED"

Jasper Park Lodge, Alta., Sept. 7.—For many years Jasper Park Lodge has been noted for its bears. Throughout the summer they mooch around the "dump" looking for bits of food and many of them spend much of their time gamboling around the first fairway of the golf course, wrestling and playing, to the keen delight of the picture-taking guests.

This year, no doubt because of the many weeks of dry weather, the bruin travelling troupe has added another act to their varied repertoire. Not finding their usual pools to quench their thirst one big playful fellow has discovered how to turn on the big tap valves and let loose the water in a heavy stream. Others have now joined him and each day they can be seen heading for the tap. They play around gleefully in the spray of water until Greenskeeper Bill Brinkworth turns up. Bill and the veteran Professional, Charlie Duncan, make daily enquiries at the reception desk as to whether any animal trainers have registered. They ar looking for some one to teach the bears to turn the taps off again; then their troubles will be over.

TEACHERS ATTENTION! SCHOOL FAIR SEPT. 19th

Entries for singing must be forwarded to Miss MacKinnon by Wednesday, September 16th; entries for recitations to Mr. Broughton by the same date and entries for sports to Mr. McIntyre, also by Wednesday, September 16th.

In singing and recitations, two only are permissible from each grade.

Livestock entries are eliminated this year.

A Meeting of those interested will be held in the Town Hall on Tuesday evening next.

UNITED GRAIN GROWERS LIMITED

A Dividend at the rate of three per cent has been declared on the paid-up capital stock of United Grain Growers Limited, for the financial year ending July 31, 1936.

Cheques will be mailed on September 15, 1936, to shareholders of record at the close of business, July 31.

By order of the Board of Directors.

R. S. LAW,
President.

Winnipeg, Manitoba,
August 22, 1936.

A Matter of Principle

IF GRAIN GROWERS DO NOT FIGHT FOR THEIR OWN INTERESTS, WHO WILL AID THEM?

THE ALBERTA WHEAT POOL IS CONTINUALLY STRIVING TO IMPROVE THE LOT OF THE GRAIN GROWERS.

BETTER PROTECTION AND BETTER PRICES IS THE OBJECTIVE SOUGHT.

THE POOL IS THE ONLY GRAIN HANDLING ORGANIZATION KEEPING UP THE BATTLE. IT FIGHTS ALONE, AMONG COMMERCIAL CONCERNS, FOR A LIVING WAGE FOR GRAIN GROWERS.

THE GRAIN GROWERS CAN MOST EFFECTIVELY HELP BY DELIVERING THEIR GRAIN TO—

Alberta Pool Elevators

The Hum of the Binder The Roar of the Tractor

Each year, as the daylight hours noticeably become shorter, and we realize another summer is on the wane—a chorus is heard throughout the land. Not musical, as we understand the music of men; not even nature's music of wind, trees and water, but a chorus of frenzied activity.

Ripened grain has been cut and stooked, and men, to procure the golden kernels have come with huge machines that do not permit defeat.

With a roar that is welcomed by those who know it best, the tractor driving the separator starts up a song from within the separator's vitals—a battle song which shrieks of victory. Thresh, Thresh, Thresh, from early morning until evening. Thresh, Thresh, Thresh, and the golden grain comes down the spout adding its particular note to the crescendo of noises. The time of hustle and hard work, but withal a pleasant time—the time of reward.

There is another noise with which we are familiar, we, in the Mercury Office, hear it frequently. Not once each year, but once each week—the noise of the printing press.

Not the roar of the city daily press of course, but if you feel inclined to call it so, the pleasant song of a country print shop. A song that sings of events, local events, personal events. Singing bards of long ago were never so prolific of thought, the songs of marching armies were never so numerous as the items published.

Two dollars a year, the old press sings, Re-new promptly, renew promptly, re-new promptly.

Yes! September brings a western chorus. A chorus of noises on the farm, while each Thursday brings its own particular noise to the Mercury Office. Can we, dare we, hope that both noises will be harmoniously blended, which simply expressed means that each and every Mercury subscriber will pay his or her subscription this Fall.

We thank you.

THE MERCURY

[illegible] MINIMUM WHEAT PRICE

Calgary Herald, Sept. 1st.

[illegible] of the Alberta Wheat [illegible] meeting in Calgary for their [illegible] monthly session passed a resolution protesting against the fixed [illegible] and also the enactment [illegible] prevents the wheat board accepting deliveries until the price level [illegible] 90 cents a bushel.

[illegible] words of the resolution the [illegible] considered tantamount [illegible] withdrawal of the wheat [illegible] fulfilling the function for [illegible].

[illegible] expressed the opinion [illegible] the pre-elect[illegible] market wheat at [illegible] to the grow[illegible] price commensurate [illegible] move was [illegible] the Pool direct[illegible] to the west[illegible] financial [illegible]. What other class in [illegible], outside primary producers [illegible] treated?

[illegible] feel that the policy of the [illegible] is reactionary and that [illegible] of the wheat grower [illegible] consideration [illegible] particularly [illegible] treatment [illegible] every other [illegible] country in [illegible].

[illegible] obtained a wheat Board [illegible]. The word wheat [illegible] and [illegible].

EXPORT POSSIBILITIES OF CANADIAN WHEAT

[illegible] Farms Notes

[illegible] Cereal Technologist, [illegible] Central Experimental [illegible] returned from a [illegible] Great Britain, [illegible], Holland, and Germany [illegible] a study of [illegible]. The value [illegible] machines and chemi[illegible] developed in Europe [illegible] few years for the [illegible] wheat quality, were [illegible]. What he [illegible] will be helpful in testing [illegible] of new selections [illegible] plant breeders of the [illegible] Experimental Farms and other institutions. He also brought [illegible] observations [illegible] export possibilities for Canadian wheat. While wheat from the [illegible] recognised in Britain [illegible] countries as the [illegible] the principal fac[illegible] so far as [illegible] concerned, [illegible] of the larger [illegible] from Canada [illegible] [illegible]

[illegible]

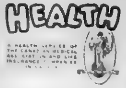
[illegible] becomes general [illegible] an effect on that [illegible] for Canadian wheat [illegible] white bread [illegible] Canadian wheat [illegible] importation is great [illegible], but if and when the [illegible] fully in that country [illegible], the information [illegible] Mr. Miller from his [illegible] France, will be useful [illegible] the people eat white [illegible]

[illegible]

[illegible] little immediate chance, [illegible] of Canada increasing her [illegible] wheat to Holland, principally for the reason that the Netherlands [illegible] trade agreement with the United States, imports flour from [illegible] of which, on account of [illegible] conditions in U.S., may be made from Canadian wheat. Night baking in Holland and Germany is not allowed and no bread must be delivered in Holland before 10 o'clock in the morning.

In Germany rye bread is consumed to a great extent, this being made from the home-grown cereal. Most of the wheat flour used goes into the production of breakfast or morning rolls that are so well known to travellers on the continent. The [illegible] breads are usually made from [illegible] wheat rye mixtures. Scarcely [illegible] Canadian wheat finds its way into Germany at the present time. The [illegible] Policy favors the use of rye bread [illegible] rye is grown abundantly [illegible] and is a very productive [illegible].

Mr. [illegible] says that wherever he [illegible] shown marked courtesy [illegible] the most ready co-operation [illegible] the kindliest feeling [illegible] Canadians on every [illegible], and the work of the Dominion Experimental Farms that is being [illegible] only in cereal, but in agriculture generally is quite familiar [illegible] people he met in the countries visited.



HEALTH
A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

REST AND REPAIR

"Our foster nurse of nature is repose." Shakespeare.

Now if the prime damager of health is fatigue it is easy to believe that the prime repairer and restorer of [illegible] REST. Impairment of health [illegible] disease, rest is the case. [illegible] the specific and almost [illegible] remedy is rest. Nothing will [illegible] if rest be not applied. [illegible] the illness, whenever in the world's history and whoever the physician the most universal prescription for sick people the world over and down all the ages has been rest in bed. It was after the paralyzed man was cured, and when he was no longer sick, that he was told to take up his bed and walk. We can imagine a world without gravitation almost as easily as a world where [illegible] without rest. [illegible] and steel re[illegible] to rest, and a hard-worked [illegible] after a month in the [illegible] even without repairs [illegible] motor engine.

[illegible] is put at rest, a [illegible] bone is splintered, an inflamed [illegible] kept in the soothing dark, [illegible] vocal cords hushed and a tu[illegible] being given a pleural cush[illegible] general symptoms de[illegible] rest, rest of body in all [illegible] and rest of the mind as [illegible]. If cough is troublesome, or the [illegible] rapid, if there is fever, the nervous system unstable, or [illegible], if there is pain, weakness or undue loss of weight,—for each and all the sovereign remedy [illegible]. For the half-starved war victims in Belgium rest was almost as important as diet. Indeed "our foster nurse of Nature is repose". "The best of rest is sleep." It is "tired nature's sweet restorer". [illegible] the ravell'd sleeve of care, [illegible] labor's bath, balm of [illegible] great Nature's second course, chief nourisher in life's feast."

Not [illegible], but very often, a sick man is one who has "gone broke", over-spent his daily supply of physical energy not one day but many days, and so depleted his reserves, piled up debts and mortgaged that original asset commonly called his "constitution". Mortgage is a particularly suitable word since it means death pledge. Our bankrupt may have spent half what his neighbor has spent, or less; the revelent matter is he has spent more than he could spare. For all men are not [illegible] in health and strength reserves [illegible] than they are in property [illegible]. The bank and [illegible] may seem equally prosper[illegible] that does not [illegible] one, may put the oth[illegible].

[illegible] disastrous over-spending may [illegible] for the best of purposes, [illegible] may have helped to [illegible] a world, or to ruin [illegible] woman's over-spending [illegible] keeping a home [illegible] another's in crack[illegible]. Whatever the [illegible] Nature as banker [illegible] but grimly [illegible] accounts and in due time [illegible] her mortgages. She can [illegible] cheated nor cajoled and high financial kite flying she will have none of. The one way we must deal with her is the slow and unexciting way of honest repayment.

What can be done with such bankrupt spendthrifts? Some may respond to milder measures, but for many the only salvation is the bailiff; the only plan to take away purse and cheque-book. In other words, they must be put to bed and kept there, with their savings and spendings in the hands of a capable and tactful administrator. Energy spending must be cut down until it is nearly out, and energy making boosted in all ways. Hospitals are debtors' prisons where there are always some who have scattered life-wealth as children let sand run through their fingers, until they have been arrested on Mother Nature's warrants to serve a few of her indeterminate sentences. At length income over-balances outgo, debts begin to be paid, a surplus accumulates, some interest is paid on mortgage (death gage) and foreclosure staved off.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

THE WHEAT SITUATION

Broomhall has estimated that the international trade in wheat will touch 512 million bushels this year, but advices from various other authoritative sources suggest that the volume will be greater than that figure. In spite of the ebb from the high prices of a few weeks ago, the basic facts of the world wheat situation suggest that the balance between supply and demand will be closer this year than at any time in the last eight years. Many European authorities are convinced that that continent will have to buy more freely than it has for a number of years, as reserves there are light and crops are comparitively small.

Buyers have been keeping off the market of late in hopes that the hedging pressure in Canada will force down prices. They have also been watching the progress of the crops in the southern hemisphere very closely. Damage reports from Argentina or Australia would certainly cause a flurry.

Last year world trade totalled less than 500 million bushels, and to date this year shipments have been running from eight to nine million bushels a week. There is general expectation that this volume will be increased. Certain European countries notably Italy and Germany have been buying rather freely from the Balkan states, which is unusual at this time of year as the customary thing for them to do is to use their own crops first.

Wheat is being delivered freely in Western Canada and hedging pressure is having some effect. The federal government's decision to make a minimum price of 87½c a bushel, effective only when wheat dropped below 90c, was construed as a bearish factor. The quality of this Canadian crop is high even if the quantity is low. The Sanford Evans Statistical Service estimates the wheat crop on the prairies at 227 million bushels.

The crux of the wheat situation rests on the development of overseas demand, the out-turn of the growing crops in the southern hemisphere and the extent to which wheat will be used as cattle food in the United States. There is no doubt but that present prospects are for higher prices, but readers will understand that the wheat situation can change very quickly.—Wheat Pool Bulletin.

OVERWEIGHT? ARTIC WILL TAKE DOWN AVOIRDUPOIS

New York, Sept. 8.—Overweight High blood pressure? Dr. Victor Levine of Omaha, Neb., prescribed the Artic Circle last night.

He pictured the possibility of a vast, healthy, Arctic region people with millions of white persons living in comfort.

Of 3,000 Eskimos he has examined in three trips to the Arctic, Dr. Levine told the American congress of Physical Therapy only one woman was overweight.

A few old Eskimos have high blood pressure, but the average Eskimo had a blood pressure considerably lower than that of the white person of the same age, he added.

"That the Eskimo as a rule has low blood pressure is a direct refutation of the argument that excessive meat eating has a tendency to produce high blood pressure," he said.

"The Eskimo is a great meat eater. The low blood pressure of the Eskimo bears out the findings of Stefansson, the great Arctic explorer, with reference to the healthfulness of meat eating.

"The Eskimo on the average weighs less than the white person. It is only the clothes that give the Eskimo the appearance of obesity."

DIFFERENCE IN PUBLIC SERVICE—

EVERY LITTLE while the cables carry a bit of news from England which reads strangely to Americans. Such, for example, is the report of the dismissal from office of Sir Christopher Bullock, permanent secretary of the Air Ministry, because he had attempted to use his official position for his personal benefit.

"What does a man take a government job for if not for his personal benefit?" is the natural question of any American familiar with the political methods.

We look upon all public offices as political. The British system leaves the Civil Service entirely out of politics. Cabinet ministers are, of course, politicians; but the men under them, who actually run the affairs of the Empire are what we would call "career men", who cannot be dismissed so long as they do their work, never for political reasons, and who make administration their life work. Nobody asks in England whether a public servant belongs to this party or to that. He is above and outside of party and political influences.

In his official conduct, moreover, he is bound by a code of honor, which though unwritten, is as rigid and as high as that of the Army and Navy. Never, by word or act, may the British Civil Servant violate that code. Especially he may not use his public office as a springboard from which to jump into private employment

Sir Christopher Baldwin was tried and convicted of "interlacing the public negotiations intrusted to him with the advancement of his personal interests," which, the trial board bointed out, was completely at variance with the tenor and spirit of the Civil Service Code.

Perhaps, some day, we shall succeed in America in establishing an equally high standard of honor and devotion to the public interest. The present Civil Service system in England was established about 100 years ago. Previous to that, graft, inefficiency and partisanship were even more than they have ever been in America. The British Civil Service had an uphill fight for many years.—American Exchange.

PORK IN ANCIENT POLITICS—

SOME 3500 YEARS ago Mayor Kushshiharbe was on trial in Nuzi for corruption in office.

"He removed me from my threshing floor," testified one witness, but "two shekels of gold, one ox and two male sheep I gave to Kushshiharbe and he allowed me to return."

"He accepted one pig," testified another, "and released my brother."

This might seem a modest ransom to a modern kidnaper, but in Mesopotamia, 1500 B.C., pigs were not "just pigs."

Nuzi had no newspapers. But scribes kept a record of current events in cuneiform and some of their tablets have survived the city and been recently translated by Prof. Robert H. Pfeiffer, curator of the Harvard Semitic Museum. So the ancient mayor gets his headline in a modern newspaper.

The conclusion of the trial so far remains lost, but it appears more than likely, as things were going before the judges, that for some time thereafter honest citizens were safe in their pigs.

The real news for many readers, however, will be that even in ancient Mesopotamia an aroused public opinion could get after a dishonest public official and bring him into court.—Christian Science Monitor.

BE VIGILANT—

THE FIRST step—and to take it would reduce our national differences to matters of mere method—is to recognize the existence of an ideal higher not merely than the ideal of the state in the authoritarian sense, but higher even than national patriotism as we know it in this country at its best. For the ideals of Christianity transcend all national frontiers.

They impose the theory of trusteeship in its... most honorable interpretation; they prohibit absolutely the retention of territory or the subjection of peoples from motives of self-interest, even if the motives be dignified by some such phrase as the welfare of the Empire. Sacrifice is more consonant with the teachings of Christianity than aggrandisement, and to school a subject people to the exercise of political freedom is a greater achievement for a civilized power than to rule it against its will for its material good. These are plain and uncontested truths, and this country has recognized and acted on them in the past. All that need be asked is that it shall be both vigilant and honest and, if need be, self-sacrificing in its application of them in the future—The Spectator (London)

SOLID FARE

The vicar was appealing from the pulpit on behalf of a poor people's pudding fund. He wound up his appeal with these words:

"What we want, my friends, is not abstract sympathy, but concrete plum puddings."—The Tatler.

AGRICULTURAL POLICY IN GERMANY

What the German Nazi Government has done for Agriculture is set out in a report prepared by E. C. Donaldson Rawlings, commercial counsellor to the British Embassy in Berlin. Germany, the report says, is now producing 80 per cent of her food supply at home. The country is divided into five corporations or estates—agriculture, industry, handicrafts, transport and labor front. It is under agriculture that the greatest progress has been made

For the purpose of developing agriculture the government has:

Created nearly 700,000 entailed farms which cannot be distrained upon.

Sent former agricultural laborers back from towns to the land;

To stimulate grain growing maintained the internal price of wheat above the world level;

Divided some big estates for the benefit of small holders;

Adopted as a slogan the transformation of the land worker into the yeoman farmer.

German returns show that agricultural unemployment has fallen from 227,000 in 1932 to 52,000 in 1935. During this period German farmers repaid $250,000,000 of their debts. A vast marketing organization has been evolved. Every form of scientific farming is encouraged. It is claimed that four out of five German farmers now have access to electrical power, compared to one in eight in the United States.—The Manitoba Co-operator.

THE WORLD'S GREATEST PUBLIC SERVICE GOOD TURN

What is described as the world's greatest Boy Scout public service good turn is contained in a report on the Solar Eclipse "Mela" at Kurukshetra, India, of June this year, attended by over 300,000 pilgrims.

Normally Kurukshetra is a village, and its increase to the proportions of a large city by the arrival of Hindu pilgrims presents many serious sanitary and other problems. One of these is the control of the excited throngs during the progress of the eclipse, when the pilgrims are rushing for bathing places.

In earlier years there were many drownings in the "tanks", or lakes, and deaths from crushing, and from snake bites and cholera. Since 1928, when the Boy Scouts began to assist the authorities, the casualties have steadily declined, until this year not one fatal accident, or death from cholera was reported.

The organization included an information bureau, life saving brigade at the tanks, cholera mobile and mobile health brigade, water supply, fire brigade and a traffic brigade. Preliminary work included clearing snakes from the ground where the people camped.

The 200 trained Scout life savers constructed 25 rafts, each of which was manned by two Rover Scouts, with ropes and tackle. A number of drowning pilgrims were rescued

The tremendous rush to the bathing tanks at the time of the actual eclipse previously the cause of numerous deaths, was controlled by the maintenance of one-way traffic between the tanks

The Mobile Cholera and Health brigades were credited with exceptional service. Each Scout was equipped with pint bottles of strong phenyl solution and kerosene for burning infected clothes, and a disinfecting station dealt with the clothes of Scouts who came in contact with suspected cholera cases. Previously each boy had been inoculated against cholera.

The information bureau in addition to supplying pilgrims with all manner of information and advice, took care of lost women and children and lost property.

A significant feature of this public service feat of Indian Scouts is that it is shared by boys of all creeds,—Sikh, Hindu, Muslim and Christian,—disregarding the caste lines of their elders and working together in complete amity under the banner of Scouting.

STATION OFFICIAL COOL, SAVES CHILD

BANFF, Sept. 8.—While others were stiffened with fear, Station Master Reg Darcy dashed in front of the locomotive of the first section of Canadian Pacific train No. 1 late yesterday afternoon and jerked an unidentified Calgary youngster from certain death.

As the train came roaring into the station the youngster fell from the platform which was crowded by about 400 holidayers. The screeching of the brakes attracted the attention of the crowd and with only three feet to spare Darcy jumped to the [illegible]

As he threw the child to the platform the front wheels of the engine came to rest several feet beyond the point where the youngster had laid across a rail.

PROVINCE TO ASSIST POULTRY RAISERS

As an encouragement to the poultry raisers in the Province of Alberta who undertake Record of Performance under Federal jurisdiction, the Poultry Branch of the Alberta Department of Agriculture, will provide free flock approval and blood test service this year to all flocks entered and in good standing, in R.O.P.

Full particulars with respect to making entry in R.O.P. and details of the work, may be obtained from the Dominion Live Stock Branch, Department of Agriculture, Ottawa. As the period for receiving entries closes early in the fall, those interested are advised to get with as little delay as possible. G. M. Cormie, Poultry Commissioner, in making this announcement, points out that each year shows a decided increase in the demand for R.O.P. stock and this is another means whereby Alberta poultrymen can create additional markets for their products

UNITED GRAIN GROWERS DECLARE DIVIDEND

A Dividend at the rate of three per cent has been declared by the Directors of United Grain Growers Limited, for the financial year ending July 31st, 1936. Cheques will be mailed on September 15th, 1936, to shareholders of record at the close of business, July 31st.

HIS MAJESTY SEES HEARING SPECIALIST

VIENNA, Sept. 8.—His Majesty the King, accompanied by an equerry, was reported to have consulted Prof. Heinrich Neumann, noted ear specialist, for almost an hour Tuesday. [illegible] said the King would receive Wednesday treatment similar to that given him last September. The King visited Prof. Neumann then and was treated for an inflammation of the middle ear

YOUNGSTER KILLED IN GUN ACCIDENT

IRMA, Sept. 8.—Accidentally shot by a rifle he was carrying while riding home on a horse, the body of William Prior, Jr., was found on the road near Orbindale school, 15 miles north-east of here, late Saturday.

Jacob Myer passed a riderless horse going toward the Prior home and later found the boy's body lying on the road with a bullet wound in the back of the head. R.C.M.P. from Wainwright announced death was accidental after they had conducted an investigation.

William was the third son of Mr. and Mrs. William H. Prior, old-timers of the Orbindale district. He is survived by three brothers and two sisters in addition to his parents.

FIRST FROST HERE, BUT GRAIN IS SAFE

Doing slight damage to flower gardens in the city first frost of the season struck early Tuesday when the thermometer reached 32, the freezing mark, as a "ground reading". Temperature of the air fell to 33. Grain in this district and the north is beyond the danger stage.

Frost came this summer over three weeks later than last year when the mercury fell to the freezing mark Aug. 16 and registered two degrees of frost Sept. 3. Last frost was two degrees on June 7. The season is about one week longer this year, the weather bureau reported.

In Edmonton .27 of an inch of rain fell overnight Monday. The temperature reached a high of 64 Monday after dipping to the frost line had risen to 51 at 9:00 a.m. Tuesday.

"Fair and quite cool" weather was forecast.

LOW FARES TO EASTERN CANADA

With the approach of fall, a pleasurable travel time, announcement is made by Osborne Scott, general passenger agent of the Canadian National Railways, of another popular bargain excursion to Eastern Canada. Tickets will be on sale from September 19th to October 3rd and will bear a generous return limit of 45 days. These fares will be in effect from British Columbia, Alberta, Saskatchewan, Manitoba and Ontario as far east as Port Arthur and Armstrong, to all stations in Eastern Canada, Port Arthur, Armstrong and east. Stopovers will be allowed at any station Winnipeg and east.

With these excursions being operated at a most attractive time of the year for travel purposes, it is anticipated that the low fares will prove an added inducement for those desiring to visit Eastern Canada.

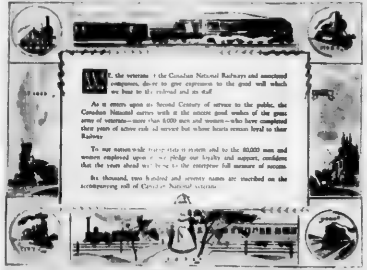
Canadian National Veterans Present Their Railway with Loyalty Roll



WE, the veterans of the Canadian National Railways and associated companies, desire to give expression to the good will which we bear to the railroad and its staff.

As it enters upon its Second Century of service to the public, the Canadian National carries with it the sincere good wishes of the great army of veterans—more than 6,000 men and women—who have completed their years of active railroad service but whose hearts remain loyal to their Railway.

To our nation-wide transportation system and to the 80,000 men and women employed upon it we pledge our loyalty and support, confident that the years ahead will bring to the enterprise full measure of success.

Six thousand, two hundred and seventy names are inscribed on the accompanying roll of Canadian National veterans.

Canadian National veterans from all over Canada and System points in the United States met in the Union Station, Toronto, on August 27th, in a unique ceremony to commemorate their old railway's entrance upon its Second Century of Service to the public. Some hundreds of veterans from all sections of Canada and from the United States attended the event while several hundred telegrams from veterans on every division of the National System, unable to attend the event, were received assuring the railway of their continued interest and support, in spite of the fact that their days of active service have ended.

The presentation took the form of a Loyalty Roll, on which were inscribed the names of 6,270 men and women on the Pension list of the System. Encased in a walnut chest, suitably engraved, and on top of which was a working model, in silver, of a big modern locomotive made by a veteran with 52 years of service to his credit, there was a decorated address which read:

"We, the veterans of the Canadian National Railways and associated companies, desire to give expression to the good will which we bear to the railroad and its staff. As it enters upon its Second Century of service to the public, the Canadian National carries with it the sincere good wishes of the great army of veterans — more than 6,000 men and women — who have completed their years of active railroad service but whose hearts remain loyal to their Railway. To our nation-wide transportation system and to the 80,000 men and women employed upon it, we pledge our loyalty and support, confident that the years ahead will bring to the enterprise full measure of success. Six thousand, two hundred and seventy names are inscribed on the accompanying roll of Canadian National veterans."

President S. J. Hungerford, of the Canadian National System, while unable to attend, owing to a recent family bereavement, was represented by E. P. Mallory, Assistant to the President, who received the presentation. Other headquarters officers, and W. A. Kingsland, Vice-President of the Central Region, were present.

President Hungerford, in expressing regret at his inability to attend, said that he was proud the Canadian National System is one of the great enterprises to have a contributory pension plan to enable all members of the staff to join with the Company in a mutual undertaking to provide for old age.

SPECIAL SESSION PROV. LEGISLATION SITS WEEK, PASS 17 OUT OF 20 NEW ACTS

His Honor Lt.-Gov. W. L. Walsh prorogued the second session of the eighth legislature of Alberta at 10.06 p.m. on Tuesday night last week just one week after the opening of the house.

Summoned specially to deal with emergent measures, the house witnessed His Honor give his assent to 17 bills which had passed through the various stages of sessional procedure.

Galleries were crowded with spectators as His Honor entered the chamber in his Windsor uniform to perform the concluding ceremony.

The entire evening sitting was devoted to discussion of the bill which reduces interest collectible on private indebtedness to five per cent and spread payments over a ten-year period.

As Hon. J. W. Hugill, K.C., attorney-general moved and received third reading for this bill, the legislative program of the session was completed.

Immediately after Sergeant-at-Arms H. S. Newby, announced the arrival at the chamber door, of His Honor who then entered accompanied by Capt. C. V. Dacre, A.D.C.

Just outside the chamber door they had been joined by Premier William Aberhart and Hon. Mr. Hugill, who proceeded to the Speaker's Throne with him.

His Honor then gave Royal Assent to 17 bills. The session had seen 20 bills introduced of which two had been defeated on second reading and one died on the Order Paper.

The bill left to die on the Order Paper was a government bill, an act to amend the Fuel Oil Licensing Act which transferred administration of the act to the trade and industry department.

The two bills defeated were: one introduced by D. M. Duggan, Alberta Conservative leader, to make Alberta Savings Certificates negotiable and one introduced by George H. Van Allen, K.C. to have the crown subject to suit and to be able to sue.

The acts to which assent was given were:

Bill No. 1—An act to amend The Mothers Allowance Act.

Bill No. 2—An act to amend The Minimum Wage Act 1925.

Bill No. 3—An act to amend The Male Minimum Wage Act.

Bill No. 4—An act to amend The Factories Act, 1925.

Bill No. 5—An act respecting the interest payable on debentures and other securities of the province.

Bill No. 6—An act limiting the hours of work in industrial undertakings.

Bill No. 7—An act to amend the Department of Trade and Industry Act.

Bill No. 8—An act to amend The Licensing of Trades and Businesses Act.

Bill No. 11—An act to provide the people of Alberta with additional credit.

Bill No. 13—An act respecting prosperity certificates.

Bill No. 14—An act to amend and consolidate the Debt Adjustment Act, 1936.

Bill No. 15—An act to provide for the reduction and settlement of certain indebtedness.

Bill No. 16—An act to amend the Legislative Assembly Act.

Bill No. 17—An act respecting sessional indemnities in respect of the second session of the eighth legislative assembly.

Bill No. 18—An act to amend The Teaching Profession Act, 1935.

Bill No. 19—An act to amend The Judicature Act.

Bill No. 20—An act respecting the interest payable on the securities of municipalities.

Following his giving of assent to the various bills, His Honor, addressing Mr. Speaker and members of the assembly said:

"In bringing to a conclusion this the second session of the eighth legislative assembly, I desire to express my appreciation of the earnestness and thoroughness with which you have applied yourselves to your public duties.

"A number of important measures have come before you for decision. I have noted with much satisfaction the careful attention you have given to all of these, keeping steadfastly in mind the promotion of the welfare of our province.

"In relieving you from your duties and declaring the assembly prorogued, I pray that under Divine Providence our province will soon advance too the attainment of the fullest measure of prosperity and happiness for all the people."

Immediately following this, Hon. Ernest C. Manning, provincial secretary, declared that "It is His Honor, the Lieutenant Governor's will and pleasure that this Legislative Assembly is now prorogued."

The members for the most part dispersed to their homes by late trains.

THE GOODYEAR STUDDED TIRE FOR CARS
Where the going is hardest, this tire will pull you through while other tires slip and clog. It is built for the cars that travel over "no man's land"—for it has been tried and proven on gumbo roads and in deep snow.
This tire has maximum pull both ways—going ahead, and backing up—plus greatest resistance to side slipping.
2 NEW TIRES BY GOODYEAR
TO HELP YOU PULL THROUGH QUICKLY WITHOUT CHAINS
THE GOODYEAR LUG TIRE FOR TRUCKS
It bites into soft going with a caterpillar action. Then—as it revolves—it cleans itself of mud, snow, etc., automatically. It does not clog or gum up and it gives you maximum traction both forward and backward.
The tread is designed so that there is always a smooth surface on the road—for easy, quiet riding.
If you have trucks that frequently need extra road grip, see the Goodyear Lug Tire now.

For a well-earned thirst

Fall is Renewal Time

Canada's Newest Trains

Keeping thoroughly abreast of the times, the Canadian Pacific Railway is putting into commission four semi-streamlined lightweight trains which will operate on the day runs between Montreal and Quebec, Toronto and Detroit, and Edmonton and Calgary. At present these de luxe trains are on tour for public inspection in Ontario, Quebec, and Western Canada, where they will be seen by many thousands of residents.

Economical in operation, and approximately only half the weight of a regular standard train of the same equipment, the trains, which consist of the Jubilee 4-4-4 type locomotive (3000 class) mail and express car, baggage and buffet car and two first class coaches, mark a distinct forward movement in modern transportation in Canada. Thoroughly air-conditioned the cars at all times are supplied with clean fresh air and will be found comfortably warm in winter, and pleasantly cool in summer. In the pictures above are shown the new train, and parts of the first class coach, buffet car and ladies lounge.

THE TOFIELD MERCURY

Vol. XVII., No. 33 Thursday, September 17th, 1936 $2.00 Per Year. To U.S.A. $2.50

LAKESHORE

Old King Winter has been giving us a gentle reminder that winter is not far off. Only the reminder does not seem very gentle early in the mornings when fingers are so stiff that they will hardly grasp a fork handle.

Mrs. Plante and daughter Gloria, Miss Winnie Stoddart, R. C. Phillips and Donald Phillips were guests at the J. H. Johnston home on Sunday.

The school children in this district are busily preparing for the school fair to be held in Tofield on Saturday. Here's hoping the school fair doesn't bring a storm as it usually does.

Quite a number of people in this district are suffering from stomach flu.

Last week I omitted to mention that Miss Marie Graham is taking grade eleven at Alberta College in Edmonton.

AMISK CREEK

Threshing has been delayed for a few days on account of rain but has now been resumed. The wheat is yielding fairly well ranging from 6 to 22 bushels per acre, the latter from a 120 acre field of E. A. Moon.

Mrs. P. O. Flaaten left for the Coast on Monday, September 7th, for a three weeks holiday. She was accompanied by Mrs. Thor Horte of Kingman.

Miss Ruby Berg is at home from Edmonton for a three weeks holiday.

Miss Agnes Annobe spent Labor day at home returning to Camrose in the evening.

Schools, closed on account of diphtheria have re-opened.

Mr. and Mrs. J. Berild and son, Gle, visited at the Berg home on Sunday.

Mrs. C. Erickson and infant son returned home from the General hospital on September 8th.

Mrs. Berg, Ruby, Arnold and Lloyd motored to Edmonton Tuesday September 8th.

Hilmar Moen left on Monday for Wasketna to assist in the Pool elevator.

Miss Merle Hillerud is attending Normal in Edmonton.

Jack Rogers while threshing at Berge Helgeland's had a severe attack of sunstroke. He will be unable to work and will return to his home in Edmonton.

LOCAL AND PERSONAL

The W.A. will hold a tea and sale of home cooking and vegetables in the Institute rooms on Saturday, September 26th.

Miss F. Kendall of Edmonton spent the week end at her home here.

Mr. and Mrs. Holland and Mr. Bolton of Edmonton, visited at the M. Kendall home on Sunday.

Mr. J. James Brenneman left on Tuesday to attend Nebraska University. He will take classes at the Medical school at Omaha, Neb.

Born.—To Mr. and Mrs. W. F. Odierne, on September 6th, twins, a son and daughter.

Dr. and Mrs. J. L. Hammond of Detroit, and Mr. Livingstone of Ontario, were visitors at the M. C. Hammond home here for a few days this week. Dr. Hammond practiced his profession here 23 years ago and is a brother of Mr. M. C. Hammond. Mr. Livingstone is an uncle.

The Misses Helen and Margaret McCauley were home for the week-end. Margaret is a nurse at the Lamont hospital and Helen a nurse at the Ponoka hospital.

Mesdames McCauley, James and E. W. Rogers motored to Ponoka on Friday, Helen returning with them.

Mrs. Malcolm, Mrs. McLaren, Muriel and Wes Taylor motored to Edmonton on Sunday.

Miss Patricia Burnett spent Saturday in Edmonton.

Mr. Ed. Kallal jr., of Holden visited his home here on Sunday.

Mr. and Mrs. O. Letourneau are on holidays in Calgary.

Mr. and Mrs. Lovel and family spent Sunday in Edmonton.

Mrs. J. Whyte has been visiting Mr. and Mrs. R. Whyte at Wetaskiwin.

Miss Gwen Firth was home for the week end.

Mrs. Hensell, an aunt of Mrs. Lovell is a visitor at the Lovel home here.

Mr. Doug. Brown who has been working at the local creamery has been transferred to the Edgerton creamery.

Mr. and Mrs. George Glover of Edmonton visited at the Glover home here on Sunday.

Mr. and Mrs. Johnson Ferguson returned from the coast on Sunday.

RALLY DAY AT UNITED CHURCH SUNDAY

Rally Day will be observed in the United Church on Sunday, September 20th.

The United Church Sunday School at 11:00 a.m. is having a special program; the junior choir will render an anthem. In the evening Mr. Cowell will sing.

A cordial invitation is extended to all.

TOWN COUNCIL

A regular meeting of the town council was held in the Town Hall on Monday evening September 14th. Present were Mayor G. B. Bruce, Councillors Coatta, Lovell and Swift.

Business was mainly of a routine nature. Secretary reported that he had completed cancellation proceedings of Tofield Heights sub-division, and that this land containing 130 acres was available for sale. Sale of a portion of S.E. 2-51-19-4, described as parcel A, to Mrs. L. Pollock, for the sum of $400.00 was approved. Statement of receipts and expenditures for the month of August were considered and ordered incorporated in the minutes of the meeting.

FOR SALE.—Purchasers equity in C.P.R. farm improvement contract. About eight miles north west of Tofield. $350.00 buys purchaser's equity.—Apply to J. E. Stinson, Tofield.

KETCHAMOOT

Miss Jean Dickson of Edmonton a former school teacher of Ketchamoot was a week end guest of her friend, Mrs. A. F. Schultz; also was renewing acquaintance with other old time friends.

Mr. and Mrs. Patterson of Amisk Creek were Sunday guests of Mr. and Mrs. C. A. Ingram on Sunday of last week.

Mrs. Owen spent several days visiting at the home of her nephew, Wm. Ingram last week.

Mr. and Mrs. Wesley Ingram arrived from Victoria, B.C. on a business trip and to visit friends and relatives.

Mr. and Mrs. A. R. Thompson and family of Tofield were guests of Mr. and Mrs. Schultz for Sunday dinner.

A pleasant afternoon was spent at the C. A. Ingram home September 2, when Mrs. Ingram entertained the Ladies' Aid.

A silver tea will be held at the Schultz home at the October meeting, providing the threshing is all done, to entertain the residents of the community also friends from town.

Mrs. Gretz of California, mother of Mrs. Maurice McGinitie and Mrs. J. Brown arrived one day last week. She will make her home with her brother, Mr. John McGinitie.

Messrs. Wesley and James Ingram made a business trip to Edmonton on Monday.

Mr. and Mrs. Milton and two children of Edmonton visited at the Schultz home on Sunday of last week.

A real old timer of the Ketchamoot district, Mrs. James, passed through Tofield one day last week. She made some 'phone calls but was unable to stop longer. Mr. and Mrs. James lived just north of Mr. McGinitie, some 35 years ago.

900 UNMARRIED MEN MAY GET BID ON FARMS

Approximately 900 single unemployed registered on provincial relief may take advantage of the Dominion-provincial plan for farm settlements, according to A. A. MacKenzie, chairman of the Alberta Relief Commission.

Details of the plan are not yet available, as Hon. Charles Cockroft, provincial treasurer is at Ottawa, completing negotiations. Until these arrangements are completed such matters as remuneration will not be settled.

Since harvesting commenced the number of single unemployed registered on provincial relief has dropped from 2,800 to 900. As threshing finishes the number is likely to increase again.

Under the scheme of placing unemployed on farms in the winter in previous years, the farmers have boarded the men and have been entitled to receive a certain number of hours work each day. The government has paid the workmen $5 a month, but no cash is received by the farmer. It is likely a similar provision will be made this year.

Every single unemployed registered here is considered as fit to participate in the scheme. Calgary has 1000 single unemployed available for participation.

In past years some difficulty has been experienced in this scheme of sending suitable workers to the right farmers. In many cases it has been found that the men, on arrival at the farms, have expressed inability to perform the type of farm work the farmer desired, which has resulted in an unsatisfactory arrangement.

Officials are seeking to overcome this in the current year's arrangements.

It is pointed out by officials that national registration of single unemployed commenced on September 1, and single men now in provinces other than their own, are urged to return there for registration at the earliest possible moment, as they are then in a much more favorable position to receive relief than if they remain in another province.

Commercialism

Commercialism has even invaded the jungle. A wild animal photographer reports that his latest pictures were spoiled because the elephants charged so much.

The intellectual needs a wife. Nobody else can make him get a hair cut.

SCHOOL FAIR EXHIBITORS PLEASE NOTE

All exhibits are to be in place by 10:00 a.m. sharp on Saturday. No exhibits will be accepted after this time.

Vegetables and grains will be exhibited at Scout Hall, one block north of Curling Rink on east side of street.

Cooking, sewing, school work and poultry will be shown at Curling Rink.

Music will be adjudicated in room 3, Tofield school at 1:30 p.m.

Recitations will be adjudicated immediately following music in room 3, Tofield School.

Sports will start at 10:15 a.m. sharp on fair grounds.

Winners of trips to Vermilion will be announced immediately after judging is completed.

Admission to see exhibits 10 cents. Tickets at the door of curling club.

The Way to the Exit

Mike was going to Dublin for the first time, and his friend Pat was giving him a few hints on what to do and where to go in the big city.

"What do I do when I go to the Zoo?" asked Mike.

"You be careful about the Zoo," advised Pat. "You'll see foine animals if you follow the words, 'To the lions,' or 'To the elephants,' but take no notice of the one 'To the exit.' Mike, it's a fraud, and its outside I found myself when I went to look at it."—Dublin Evening Post

THE CROP TESTING PLAN

As in past years the Companies associated with the "Crop Testing Plan" will again accept samples of wheat from farmers for testing for trueness to variety, free of charge, in growing plots next summer. Thousands of farmers have increased their incomes by having their grain tested by us under this plan.

See the nearest Searle Agent about having YOUR wheat tested. It will be to your benefit.

A Matter of Principle

IF GRAIN GROWERS DO NOT FIGHT FOR THEIR OWN INTERESTS, WHO WILL AID THEM?

THE ALBERTA WHEAT POOL IS CONTINUALLY STRIVING TO IMPROVE THE LOT OF THE GRAIN GROWERS.

BETTER PROTECTION AND BETTER PRICES IS THE OBJECTIVE SOUGHT.

THE POOL IS THE ONLY GRAIN HANDLING ORGANIZATION KEEPING UP THE BATTLE. IT FIGHTS ALONE, AMONG COMMERCIAL CONCERNS, FOR A LIVING WAGE FOR GRAIN GROWERS.

THE GRAIN GROWERS CAN MOST EFFECTIVELY HELP BY DELIVERING THEIR GRAIN TO—

Alberta Pool Elevators

The Hum of the Binder The Roar of the Tractor

Each year, as the daylight hours noticeably become shorter, and we realize another summer is on the wane—a chorus is heard throughout the land. Not musical, as we understand the music of men; not even nature's music of wind, trees and water, but a chorus of frenzied activity.

Ripened grain has been cut and stooked, and men, to procure the golden kernels have come with huge machines that do not permit defeat.

With a roar that is welcomed by those who know it best, the tractor driving the separator starts up a song from within the separator's vitals—a battle song which shrieks of victory. Thresh, Thresh, Thresh, from early morning until evening. Thresh, Thresh, Thresh, and the golden grain comes down the spout adding its particular note to the crescendo of noises. The time of hustle and hard work, but withal a pleasant time—the time of reward.

There is another noise with which we are familiar, we, in the Mercury Office, hear it frequently. Not once each year, but once each week—the noise of the printing press.

Not the roar of the city daily press of course, but if you feel inclined to call it so, the pleasant song of a country print shop. A song that sings of events, local events, personal events. Singing bards of long ago were never so prolific of thought, the songs of marching armies were never so numerous as the items published.

Two dollars a year, the old press sings, Re-new promptly, renew promptly, re-new promptly.

Yes! September brings a western chorus. A chorus of noises on the farm, while each Thursday brings its own particular noise to the Mercury Office. Can we, dare we, hope that both noises will be harmoniously blended, which simply expressed means that each and every Mercury subscriber will pay his or her subscription this Fall.

We thank you.

THE MERCURY

DOUGLAS FIR STANDS GREAT STRAIN

When the giant liner "Queen Mary" was building, she rested on keel blocks of Douglas fir from British Columbia. Under great pressure from the weight of the enormous hull during the years she lay on the stocks awaiting a turn in the financial tide to go forward with the work of completion, these keel blocks showed no signs of deterioration other than would have to be expected from the traditional wood used for keel blocks, pitch pine, according to the Industrial Department of the Canadian National Railways. Douglas fir is experiencing a rapid growth for shipbuilding purposes in Britain such as keel blocks, launching timber and ships' decking.

STATION MASTER HAS VARIED DUTIES

The function of a station master is varied, for instance, capturing a swarm of bees which escape from a hive, chasing a dog which escapes from the leash and other activities too numerous to mention. Recently, J. C. Webber, station master at Bonaventure depot, found that a little bird had taken refuge in the skylight of the station concourse. Realizing its perilous position, Mr. Webber secured a ladder and with a butterfly net caught the bird, which was given its liberty. "It is my experience that very often in bad weather little birds take refuge in the station," stated Mr. Webber "and I have found a long-handled net very handy to catch them."

PURCHASERS OF SCHOOL LANDS TO BENEFIT

In an interview granted to the press by the Honourable C. C. Ross, Minister of Lands and Mines, he mentioned the problems confronting the purchasers of School Lands, many of whom bought at a time when the financial returns from farm produce was very much in excess of to-day's prices.

The Minister stated that since taking charge of the Department he has been giving considerable thought to the situation and having decided upon the necessity of granting some specific form of relief, action has been taken by proclamation to reduce the interest on the undue instalments of the contracts from six per cent to four per cent, and interest on the arrears from seven per cent to five per cent.

The Minister stated that the most outstanding part of the proclamation deals with the assistance that will be given to the purchasers who bought at the peak of prices and who find that through depletion of their resources, they are unable to comply with the terms of the contract. Such purchasers will have the right to make application to the Registrar of the Farmers' Creditors Arrangement Act for a compromise, and the Minister explained that the Department would write each contract holder as to how the purchaser should proceed if he wishes to take advantage of the legislation.

The Minister pointed out that this action is consistent with the stand taken by the Government at the recent session in dealing with the reduction and settlement of outstanding debts. Those settlers wishing to obtain advantage of these concessions would, he stated, be well advised to take immediate action so that they may secure the full benefit offered by these amendments.

IMMIGRATION CONFERENCE TO BE HELD AT SASKATOON

The Immigration and Settlement Convention, scheduled to take place at the Bessborough Hotel, Saskatoon, on September 24th and 25th, is a new departure after several years of "Taboo" of this subject. While some people express doubts whether the time is yet ripe for a resumption of immigration, the organizers of this Convention argue that it is lack of population which is holding the country back from prosperity; they maintain that immigration, in conjunction with a policy of organized, financed, and supervised settlement on the land, would increase employment, produce new wealth, create demands for manufactured goods and services, and act generally as a fillip to trade and business; and they advocate that steps should be taken to resume British Family Settlement in Canada as soon as possible. The object of the coming Convention, according to a circular recently issued by the organizing Committee, is "to discuss social and economic aspects of new British Family Settlement in Saskatchewan, properly organized and adequately financed, and also to decide on a definite Plan of Settlement to be offered to Overseas Settlement Organizations in the United Kingdom."

Undoubtedly the population problem is one of the most important—if not the most important—question facing Canada today. To discuss it, can do nothing but good. And it is certain that, in the highly organized world of today, nothing worth while or permanent can be accomplished without organization and planning ahead.

The finance of settlement is one of the difficulties in the way of the adoption of a comprehensive long-range plan. Finance is a necessity. In the past all settlement has been financed—but in a piecemeal and insufficient way, and for personal gain, very expensive to the settler, and often ineffectual because of its inadequacy and expensiveness. There has recently been considerable discussion in the Old Country on the subject of the finance of overseas settlement, where several important, though unofficial, Committees and Conferences have recommended more generous governmental support, and have drawn attention to the financial, economic, and human waste of the present system of maintaining large numbers of idle workers at home, instead of assisting them to migrate and to establish themselves in self-supporting homes overseas.

Many intricate economic and social considerations are involved in the migration problem. If the coming Convention helps to throw light on them, and to consolidate public opinion in a definite direction, it will serve a very useful purpose.

BRITISH COLUMBIA WIDENS SCOPE OF MOTHERS' PENSIONS

Victoria, B.C.—The scope of mothers' pensions in British Columbia is to be widened by the provincial government, under a program announced by Dr. G. M. Weir, provincial secretary. To advise the Government on a broadening of the pension scheme for the benefit of destitute mothers, the Government is setting up a non-partisan board of citizens interested in social welfare work.

This board will suggest new regulations designed to make the pension scheme more generous to deserving women, and to eliminate some of the present restrictions which prevent many such women securing pensions.

CANADA AT PEACE WITH ALL—PREMIER KING

Quebec, Sept. 14.—Prepared to extend an open hand to all other nations, Canada's delegates to the autumn assembly of the League of Nations were enroute to Geneva Monday.

Attitude of the Dominion was outlined by Premier King, leader of the delegation, comprised of Senator Raoul Dandurand, Labor Minister Rogers and Dr. O. D. Skelton under secretary for external affairs.

The prime minister paused in the sun that beamed through a porthole and turned to newspapermen.

"You know," he said, "this bright sunny day seems to me to be symbolic of Canada's position today in contrast with some countries of Europe. Of course, there are many reasons and explanations. But for Canada, we are going to the League of Nations as a country whose relations with the rest of the world are absolutely free from enmity or discord. Consequently, she should be able to offer a valuable contribution to peace of the world.

$14,000 SALARY CUT TO DOLLAR

QUEBEC, Sept. 14.—The Union National economy axe, which has lopped more than $2,000,000 off annual expenditures in three weeks may cleave deeply into government commissions next, political circles believe.

The Quebec Liquor Commission felt the bite of the Duplessis axe Saturday when salaries of the five commissioners were sliced down to $1 a year. The chairman, L. B. Cordeau, received $14,000 annually, vice-chairman E. Bedard of Quebec $9,000 and others, Gerard Power of Quebec and E. M. Desaulniers and W. Hodgson of Montreal, $8,000 apiece.

Sales that have been cancelled since September 20th, 1930, may be reinstated if the land is available, and such settlers will have the same privilege to bring their cases before the Registrar for a compromise or reduction in the terms of the contracts.

NORWAY AVALANCHE TAKES TOLL OF 73

Loen, Norway, Sept. 14.—Seventy-three residents of this famous tourist area were killed Sunday when a rock avalanche plunged into Loen lake and sent a wall of water sweeping over the town.

The slide from the 6,000-foot Ragne mountain with its resultant flood left little but death and destruction to greet would-be rescuers. They rushed to the town, awakened by the roar of the falling rock.

The catastrophe, at 5:30 a.m., left not a single house standing. Even the fields were scoured clean of soil, leaving bare rocks to show where the waters had rushed and then subsided.

Rescuers found about 20 survivors but many of them were severely injured and some expected to die.

One woman, who had risen early to milk her goats pastured in a high field, saw the flood envelop her home and drown every member of her family, she said.

A farmer, who had worked late in the field, slept in a small field-house and was carried 1,300 feet by the flood, but survived.

"My wife, four children, my father and mother are all gone," he said dazedly. "My house, which was one of a group of nine, has been swept away so entirely that I cannot find where it stood."

A battered steamboat, which since the catastrophe of 1905 in which 60 were killed had perched 350 feet from the water, was carried another 300 feet up the mountainside

Not a single family escaped at least one death.

Tourists who have visited the scene of the catastrophe always marveled at the temerity of the inhabitants, living under the constant threat of death.

Avalanches, minor ones, except for that of 1905 and Sunday are not uncommon here.

Fourteen families at Nesdal, three quarters of a mile away, were awakened by the roar of the avalanche and fled their homes. They were overtaken by the water and only one survived.

The flood wave was so immense that one house standing on a high ridge two miles up Ragne mountain was demolished and its inhabitants killed.

TRIED TO SLAY WIFE TO SAVE SUFFERING

London, Sept. 15.—Mr. Justice Greaves-Lord Tuesday sentenced Hilla Shipley, 34, a naturalized Russian, to 10 years for attempting to murder his wife.

Shipley and his wife were married in 1929. They were devoted to each other but always in financial difficulties, the court was told. To spare her misery and poverty Shipley decided to kill his wife. He struck her on the head with a hammer, the injuries depriving her of speech.

"I can only attribute what you have done to a kind of sloppy thinking which unfortunately is encouraged in some quarters," said the judge.

"The idea of a person being allowed to evade the normal circumstances of life in a cowardly way cannot be allowed to exist for a moment in any well-ordered state."

WOMAN KILLS APE IN NEW YORK HOME

NEW YORK, Sept. 15.— Miss Martha Schmidt, quiet and 28, who says she never before handled firearms, brought down a 65-pound ape with one blast of a shotgun. Shooting occurred not in the jungles but at Miss Schmidt's home in Suffolk county, Long Island, Monday.

The ape escaped from a roadside refreshment stand five days ago, killed two dogs and did some general terrorizing before it showed up at Miss Schmidt's door.

COWS SAVE CALF FROM WOLF

ENILDA, Sept. 15.— Ferocity of three cows which promptly went on the attack saved a young calf on the farm of E. H. Smith, a mile west of here, from death recently. The wolf, which had lunged at the calf, was chased away by the cows. About three weeks ago a calf belonging to H. F. Jackson was slashed so badly by a wolf that it died. Colts were attacked in this region last winter.

AUSTRALIA CAN DO IT— WHY CAN'T WE?

ONE OF THE peculiar features of political life in this country is that to really appeal to the people a party must be of the crusading type. Years ago in Federal politics the Liberals gained much support by claiming they were fighting "big business" on behalf of, we presume, "small business". Yet "big business" as it existed in Canada in those days was to be found among the ranks of the Liberals as well as in the ranks of Conservatives. Later, in this province the U.F.A. continuously "waged a fight" against those forces that were crushing the farmer, despite the fact that, whatever the ultimate outcome, farmers have learned to look upon those years as some of the most prosperous they have seen. Now we have the Social Credit forces in battle against "entrenched finance." It all may be to the ultimate good—we don't know, but it seems to us a more quiet, thoughtful and less antagonistic spirit would accomplish, in the end, just as much. It really should not be necessary for former friends to be estranged over matters of government affairs—surely there is room for a policy of give and take in matters of state.

The following editorial taken from a recent issue of the Christian Science Monitor tells in a brief way, how Australia as an agricultural export nation, handled the depression problem. Are we to be forced into the belief that they have better administrators "down under," or are the people of this country determined to have the spice of conflict injected into their political affairs. We feel that if Australia could quietly and efficiently work out a plan of economic salvation, Canada should have been able to have done the same.

One of the economists at the Harvard symposium on social problems has the distinction of having seen his theories put into practice by an entire people. He is the Australian economist, Prof. D. B. Copland. In the United States he would be dubbed a "brain truster." For when Australia had had enough of the depression to demand expert advice, he and a few of his fellow economists were called in for consultation. They evolved what came to be known as the Premiers' Plan, which was agreed upon in May, 1931.

Dr. Copland insisted at Harvard that the plan was "unorthodox." But one might better describe it as an inflation-deflation plan, or orthodoxy plus unorthodoxy. Australia's problem had to do with falling world prices for its wool and wheat. If her producers were to remain in business at all, their costs had to be brought down correspondingly. So wages were reduced. And the interest laid on all forms of indebtedness was likewise reduced. This was the deflation part of the program. To "coat" the pill of the deflation the sugar of inflation was added. And this was obtained both by depreciating the currency and by borrowing outside the budget.

What, however, made the plan acceptable was not the sugar coating. It was, first, the depth of the crisis which persuaded all Australians that desperate measures to cope with it were necessary; secondly, the quality of sacrifice provided by the plan. The second factor was decisive. The wage earner proved the less unwilling to see his wages reduced when he saw that the bondholders also had to suffer a cut.

In the spirit of co-operation the nation accepted the plan. That it has worked is proved by the figures. Australia was the first country to be plunged in depression, and the first to rise out of it. And in consequence, Dr. Copland has won world laurels as an economic surgeon.

At Harvard he assumed another role—an economic doctor. He pleaded for the insulation of our economic system from the necessity of such surgical operation as Australia had to undergo. He is, in short, a planner. His remedy is an increase in the power of Government over economic life.

In the United States this remedy will be the less grudgingly conceded after the lessons of the drought. Individualism has been too rugged in the agrarian West. It has run riot. If left to itself, it would sooner or later translate fertile regions into Saharas, as, in point of fact, it is doing in Australia no less than in the United States. Planning by Government is indeed necessary to prevent such catastrophe.

The real issue is how much government intervention is necessary if the whole of private capitalism is "to continue to yield its best fruits." Dr. Copland is vague in his bill of particulars. One of the succeeding speakers slightingly, indeed, called his generalized panacea the "Copland cocktail." There is a vast difference between planning and a planned economy—between the planning that, say, restores and conserves agriculture and the kind of planned economy which seeks to vest economic control in Government. Of the former, there has been too little. Of the latter, there may easily be too much.

SUCCESS OF FARMERS' CO-OPERATIVE EGG MARKETING ASSOCIATIONS IN OTTAWA VALLEY

Anyone travelling along the main railway lines in eastern Ontario recently may have noticed a new and interesting development at some of the stations en route—the operation of a local producers' co-operative egg shipping association. These associations were formed for the purpose of bringing increased revenue to egg shippers by two means: first, by returning to shippers the Montreal selling price less handling charges, and, second, by selling the eggs in Montreal on the basis of the association's grading at shipping point.

The first of the nine farmers' co-operative associations now operating started in business at Oxford Mills on December 19, 1934. The ninth link in the chain was formed at Casselman on May 14th of this year. The other seven associations have their headquarters at Finch, Moose Creek, Kemptville, Manville, Cobden, Plantagenet and Eganville.

The statement of business of the combined associations as at August 1st of this year discloses their efforts have so far been successful. The total volume of eggs handled was 506,507 dozen or 16,884 cases of thirty dozen each with aggregate receipts at $112,379.40 of which $98,312.54 was paid in cash to the producers and $14,067.86 or 2.77 cents per dozen was the cost of express shipments, manager's commission, and other overhead charges.

This co-operative enterprise has provided some encouraging revenue to the railways for they have been paid a total of $5,224 in the period under review for the transportation of eggs by express to Montreal. With only one exception—Kemptville—the railway station is the receiving and shipping centre for each association.

It is interesting to note that each association has enjoyed a steady seasonal increase in receipts since it was formed in spite of not only healthy competition, but some opposition. Each unit is controlled by a president and board of directors, all farmers. This directorate appoints a manager, who is a qualified grader, to grade, pack and ship the eggs and conduct the general business of the association for which he is paid one cent per dozen. The volume which the manager by himself can handle satisfactorily is around seventy-five cases weekly. At stations where a larger volume is received the manager employs, and pays from his one cent per dozen commission, additional qualified graders.

Not only has there been no cause for complaint from the wholesalers about the grading of these eggs, but it is generally recognized that because of the method, assembly, packing and prompt shipment the eggs from the associations are among the finest packs being received on the Montreal market.

As a reliable estimate, the operations of the associations have brought prices which the farmers in the districts concerned have received for their eggs at least three cents closer to Montreal prices than was previously the case. On the 506,507 dozens handled by the associations this has meant an aggregate increased revenue to members of $15,215. And not only the farmer members of the associations have benefited from this co-operative enterprise but farmers in the districts, who are not members, have been paid a higher price, with the result that in the aggregate they have received several thousand dollars more than otherwise would have been the case had not the associations been in business.

Prior to the formation of the associations, practically all the farmers in the Ottawa Valley sold their eggs either to stores or itinerant buyers often not on grade as required by the regulations of the Dominion Department of Agriculture, but on an average price and without troubling about the current price on the Montreal market, the governing factor in the sale of eggs in Eastern Ontario. Many of the farmers either had no means of learning of the price in Montreal on the day of sale or didn't bother to find out.

RAIL GRADED HOGS AND WORLD MARKETS

The product of two and one-third million hogs is the Canadian quota, or proportion of output mutually agreed upon between Canada and Great Britain, for export to the British market. But Canada is falling short of this quota because a sufficient number of high quality of hogs are not being produced in the Dominion. In round figures Canada exports the product of only one million hogs annually and the British market is waiting for more than twice that amount. Competition in marketing Canadian field and animal products in the markets of the world is exceedingly keen, and Canada's competitors, so far as bacon is concerned, place their faith on rail grading, otherwise known as carcass or dressed grading of hogs. This method made a modest start in Canada in 1934 and this year up to the end of August, 108,019 hogs have been carcass graded. Over 21 per cent of all hogs marketed in the Province of Ontario will be carcass or rail graded.

The purpose of marketing hogs on a rail or carcass graded basis is to give the producer the proper value for his high quality and high yielding hogs as related to the whole volume of hogs produced. In other words, the producer is paid for exactly what he delivers. For example, two farmers bring in two hogs, each weighing 200 pounds. When these hogs are killed, one weighs 150 pounds dressed, while the other weighs 160 pounds dressed. The owner of the 160 pound hog receives the most money. The marketing of hogs on a rail-graded basis not only gives the producer a premium on his select hogs but also pays him on a basis of yield. Hogs properly fed and looked after yield the most money to the producer. A circular on this subject, entitled "Dressed Grading of Hogs" has just been issued by the Dominion Department of Agriculture, Ottawa, and may be obtained from the Publicity and Extension Branch on application.

TRANSPLANTING PEONIES

(Experimental Farms Note)

September is the best time to transplant peonies. If the plants have grown large and the flowers are fewer or smaller than they used to be it is probably time for the roots to be taken up.

To divide a large plant, dig it up carefully, shake off the loose earth and leave the plant exposed to the sun and air for an hour or two. This will make the tubers less brittle so that they will not break so easily when handled. Wash off all the soil with water and cut off the foliage, just leaving a few inches of stem above the crown. Examine the root and try and find out where it can be divided with as little damage to the tubers as possible. A division with five eyes is a good size but larger ones can be used if desired.

If a bed of peonies is going to be planted, it is a good plan to prepare soil a few weeks before by digging deeply and adding some well rotted manure at the base of the trench. If the peonies have to be replaced in the same place, the old soil should be removed and replaced by some good soil to which bone meal at the rate of a handfull for each plant has been added. In planting, place the tubers so that there is only two inches of soil above the crown. Too deep planting is frequently the cause of peonies not blooming.

For the first winter, it is advisable to mulch the beds so as to prevent the alternate freezing and thawing that is so harmful in some districts.

THE COMING CHANGE

"It must be obvious that any system which provides a relatively small number of the world's citizens with a far larger share of the world's wealth than they need, while millions of other citizens, as capable and as worthy as themselves, are faced with periodic or constant unemployment, has the seeds of dissolution in it, and must finally come to an end. The coming change will not, in my view, be brought about either through Communism or Socialism, but by the recognition of a spirit of World Brotherhood and by the determination that this will increasingly express itself through world co-operation."—Angus Watson, in a "Forecast of the Future."

WHEAT FARMER MAKES A FORTUNE

The Western Canadian grain farmers apparently have come to the wrong country in which to make fortunes for themselves. A news despatch from London, England, tells of how George Baylis, a Berkshire wheat farmer, made $1,250,000 in grain farming. He raised no livestock at all, the only animals on his farm being some 300 work horses. Some 12,000 acres were farmed, half of which was owned outright.

Mr. Baylis, who recently died, started farming in 1866 in the traditional "mixed" method, raising grain and roots with cattle and sheep. He lost $3,000 in six years and then decided on straight grain farming which gained him the success outlined above.—Wheat Pool Budget

VANCOUVER MAD AS CATS RETURN WITH KITTENS

VANCOUVER, Sept. 15 - Cats were coming back to Vancouver Tuesday in an annual invasion that prompted Humane Society Inspector George Hood to appeal for public co-operation in dealing with the feline hordes

Inspector Hood had some pretty rough things to say about cats that go to the woods in the spring, live on birds and wild rodents all summer, breed litters and then return to the city with the cold weather to impose themselves on any family that will take them in

LIE CONFESSION FREES FARMER

A perjury confession made by Walter Sear, New Norway, while serving a sentence for theft of ten pigs, was the means of freeing Arnold Trussler, New Norway district farmer from a sentence of four months. The sentence of Mr. Trussler was quashed in the Appeal court Monday morning.

Counsel R. F. Jackson read extracts from a confession made by Sear to the effect that evidence given at the preliminary hearing of the Trussler case was false and was given because of a grudge against Mr. Trussler. This evidence was to the effect that Mr Trussler had planned with Sear to steal and dispose of the pigs. The confession was made to the Warden of Fort Saskatchewan prison.

In his confession Sear said, that instead of plotting the theft, Mr. Trussler had strongly advised him to refrain from committing the act

A Campaign of Falsehood

The opponents of the present methods of grain marketing are using freely the weapons of abuse and misrepresentation in endeavors to discredit the grain trade, to force their own policies upon the country and to obtain an unfair advantage for the Pools at the country elevator points.

The Following Facts Are True:—

1. The Western Pools are and have been since their inception members of the Winnipeg Grain Exchange. They continually use the facilities of the Exchange for the benefit of their customers.

2. When representatives of the grain trade were called upon to give advice to the Dominion Government in 1935 concerning the establishment of a Wheat Board, they appeared publicly before a Parliamentary Committee. On that occasion, as the first witnesses called, they advised the Government to appoint a Wheat Board, to provide a minimum price for the protection of farmers and to use every available channel to market Canadian wheat and to maintain Canada's place in the wheat markets of the world. The representatives of the Western Pools on the same occasion, demanded the Wheat Board Bill in its original form under which no provision was made for a minimum price but only for the establishment of a compulsory marketing system.

3. The Winnipeg Grain Exchange is one in the chain of world's grain markets. It is a meeting place for all buyers and sellers of grain. The grain trade has no quarrel with those who think a better method can be found, but up to date no one has discovered a method of marketing that will better serve the interests of the farmer.

4. It is the interest of the grain trade that the farmer should obtain the best possible price for his product and the maximum Government support in the hour of his need. The interest of the grain trade is not thus at variance with that of grain growers, on the contrary, the grain trade realizes keenly that the prosperity of agriculture is essential to the well-being of the Dominion and all its industries, including their own.

5. No line elevator company, any more than a Pool elevator company, designs to make profit from the fluctuation of grain prices which are determined by numerous causes that are not and cannot be controlled by the grain trade, the Wheat Board or the Pools.

6. As has been stated before on numerous occasions, in the plainest possible terms, the grain trade and the Winnipeg Grain Exchange have made no representations to the Government against the fixing of a high minimum price nor in favor of the dis-establishment of the Wheat Board or the curtailment of its activities.

The Following Quoted Statements Are False:—

1. The Western Producer, which is the organ of the Saskatchewan Pool, states in its issue of September 10, 1936, that the Government has decreed the death of the Wheat Board and thereby has complied with the express desire of the grain trade. THIS IS FALSE. The grain trade has expressed no such desire.

2. The same paper, in the same issue, states, "The work of a generation is to be scuttled and if its present intentions are carried out next year, and for many years thereafter, the farmers if they have a crop, are to be thrown to the wolves of the Grain Exchange." This statement is merely abusive and its implications libellous. If it is intended to mean that the members of the Grain Exchange, which comprises all the elevator companies (including the Pools), the mills and merchants, both foreign and domestic, who compete for the sale of the Western Canadian crop, are organized for the purpose, not of service to the producer but to prejudice his interest, this statement is not only false but must be known to be false to the editor and owners of this paper.

3. The following statement is contained in a circular forwarded to various organizations throughout Western Canada by the Saskatchewan Provincial President of the Co-operative Commonwealth Federation: "The Government, by setting the pegged price at 87½c. basis No. 1 Nor Fort William—73c. to the farmer—has taken money from you and given it to the Grain Exchange." This statement is false and can only be based upon complete ignorance or extreme malice. No line elevator company, any more than any Pool elevator, designs to make any profit from the fluctuations of grain prices. The grain trade challenges the gentleman who made this statement to explain it and to prove it. It is inconceivable that the Western Pools and the elevator companies who have served the producer of Western Canada for so many years, efficiently and honourably should be willing to continue to belong to an institution which is organized for any such evil purpose.

4. The numerous statements being made throughout the country by propagandists that the grain trade is desirous of anything but the welfare of the farmer, or has brought pressure upon the Government with reference to the Wheat Board or the wheat policy of Canada, is untrue.

NOTE: It is understood that a Commission will shortly inquire into the grain marketing system. The grain trade invites those who have made the above statements and similar misrepresentations of fact to appear before the Commission and support their statements by evidence and argument.

Local Line Elevators

ROOSEVELT RETURN NOW UNCERTAIN

Faced with the assurance that he won't carry one of the New England states, President Roosevelt's bid for a second term as president of the United States is in doubt, in the opinion of Henry E. Williams, of Boston, special Canadian Correspondent for the Christian Science Monitor, who is a visitor here, a guest at the McDonald.

Party led by Dr. Townsend is a strong factor in the forthcoming presidential election, says Mr. Williams. One reason is that this party is making a strong appeal to the radical vote and to people suffering from effects of the depression who see in this party's policies a way out of their difficulties.

Just what would be the outcome was hard to say at the present time, said Mr. Williams. Though the Literary Digest poll showed that the Republican candidate, Governor Landon, had a two to one lead in the key states of Pennsylvania and New York the Democrats were out in front in Michigan and Ohio.

Mr. Williams said he had heard many expressions of opposition on the part of business men to the New Deal. What people were concerned over was the effect of these policies on the constitution, which they held dear, and not to the results upon business.

Great interest was shown in Social Credit support for which had been voiced by Father Coughlin. A Social Credit bill had been introduced into congress last year but had been shelved. It was along the principles of Douglas Social Credit, he said.

Appointed recently as special Canadian correspondent, Mr. Williams plans to make periodical trips across the dominion to familiarize himself with conditions.

It was in recognition of growing interest in the Canadian field, where Social Credit and a number of other interesting experiments were being made that the Christian Science Monitor had named a special correspondent to cover this field which was rich in news sources, said Mr. Williams.

CURING HAY BY ARTIFICIAL HEAT

Research work in matters of feedstuffs is bringing about great changes in livestock feed. Over in Britain the grasslands produce the major part of the food requirements of livestock during the summer and a considerable quantity of hay which goes toward winter maintenance. In the winter it is necessary to supplement the maintenance ration, chiefly hay and roots, with large quantities of concentrated foods mainly imported from overseas, particularly those rich in protein, roots and ordinary hay being deficient in this essential ingredient. Experiments have been going on in England for the past ten years on drying of grass and it has been discovered that if cut at the young stage, say 5 to 8 inches long, and properly dried, the grass is very rich in protein and represents a material of high feeding and cash value, according to the Agricultural Department of the Canadian National Railways. It is estimated the annual loss in the United Kingdom due to present methods of haymaking amounts to approximately $27,500,000. The process consists of subjecting the grass within the drying chamber to currents of heated gas, the drying medium, produced by the use of [illegible] coal, coke or oil. The drying operation lasts for from 20 to 25 minutes, depending upon the amount of moisture in the grass. In a recent demonstration, for every ton of dried grass obtained four to 1 of water were evaporated.

LOCAL AND PERSONAL

Mrs. Stewart of Edmonton is visiting Mrs. McCauley.

Miss Kathie McLeod of Edmonton is spending her holidays at her home here.

On Friday of last week Kathrine Moon held a handkerchief shower in honor of Miss Lola Wilson who is attending university in Edmonton this term. Many lovely handkerchiefs were given to Lola and everyone wished her the best of luck for the coming term. Lola thanked all her friends for remembering her. Tea was served by the hostess.

Lola Wilson left on Sunday for Edmonton where she will attend the University of Alberta.

Aileen Allan and Gwen Firth spent the week end at their homes here.

Miss Murield Malcolm spent the week end in the city.

Miss Esther Wick of Viking visited Mr. and Mrs. Harold Green over the week end.

Arthur Beirnes left this week for Edmonton where he will attend the University of Alberta.

Max Rogers returned from Stanford University in the States, where he took a summer course, last week. He has now returned to Edmonton to continue his studies at the University of Alberta.

Mr. and Mrs. C. R. Currie returned from Vermilion where they have been visiting for the past week.

Mrs. Malcolm entertained the two bridge clubs in honor of Mrs. McLaren on Friday evening. Mrs. McLaren is Mrs. Malcolm's sister-in-law and is visiting here from Vancouver.

Mr. George McLaughlin was a business visitor in town on Tuesday.

Mr. McKenzie, superintendent of the Crown Lumber Co. Ltd. is a business visitor in town this week.

Mrs. Lovell was a visitor in Millburn in connection with the Rebecca Lodge.

Dr. and Mrs. Law returned this week from a trip to the coast.

Dr. Pete Gordon of Edmonton, who relieved here while Dr. Law was on his holidays, returned to Edmonton.

Mr. and Mrs. J. O. A. Letourneau returned home after visiting Mr. and Mrs. Adams of Calgary for some time.

Beryl Edwards left last week for Ryley where she is working.

Mr. W. Worton left Wednesday morning for Saskatoon where he will attend the Saskatchewan Immigration and Settlement convention to be held in the Bessborough hotel

Mary Burnett left on Monday for Edmonton where she is working.

Miss Isabel Robinson who is attending Edmonton Normal was home for the School Fair on Saturday.

WALTER BELLAMY, Manager

U.F.W.A. Notes

The September meeting was held at Mrs. Andersons' home. Thirteen ladies were present. The roll call was answered with a recipe for "an economical dish."

The President voiced the feeling of all in her expression of regret at the loss of a valued member and friend, Mrs. Phillips.

Mrs. McConkey and Mrs. Schuman, president and secretary of the Edmonton Branch of the Womens' International League for Peace and Freedom, together with Mrs. Riley and Mrs. Shortcliffe of Edmonton, had attended the August meeting of our local. Mrs. McConkey gave a talk on the work of the W. I. L.-P. F.

At the last meeting several of the ladies stated their intention of accepting the invitation of the Edmonton ladies to attend a meeting of the W.I.L.P.F. in the near future. It was decided to postpone the decision regarding the question of affiliating with that organization until later.

The Secretary read a report of the conference held in Lamont.

A supply of cook-books were ordered including some with the new style of binding which will allow the book to lie flat when open. These will sell for one dollar each. Reports were given by the three directors who were group leaders in a fund-raising competition. Mrs. Erickssons' group, S.E. of town were winners. Mrs. Baptist's group, Tofield vicinity, struck a happy medium and just

(Continued on back page)

BARDO ELEVATOR BROKEN INTO

Sometime during last week end, thieves broke into the Bardo elevator, which is managed by Mr. Thompson of Tofield. As far as can be ascertained nothing was taken, the thieves apparently looking for cash, for the grain tickets were left untouched. The thieves gained admittance to the elevator through the engine room window, went through everything, but failing to find any cash left empty handed.

RALLY DAY

On Sunday Sept. 20, Rally day services were held in the United Church. A good number of parents were present, which was very gratifying. The primary department went upstairs for the occasion and did their bit toward the program. Those children who were promoted upstairs from the primary department were welcomed by the upstairs pupils, and the prizes were awarded for attendance by Mr. Swift. Norma Scott very sweetly sang a solo and Shirley and Betty Stimson sang a lovely duet. A number of readings were given by Betty Thompson, Ida Jacobs, and Arnold Swift. Jean McGuire gave a recitation and Pat Firth read a story for the younger ones. Mr. W. Chapman spoke to the parents for a short time and then told the pupils a story

School Fair Held

Saturday dawned bright and clear for the Tofield and district annual school fair, and coupled with a good attendance made the fair a great success. The vegetables, grains etc. were exhibited in the Tofield Scout Hall. Due perhaps to the very dry season the vegetables were not quite as numerous as other years. Taken as a whole however, the vegetables and grains made a very good display.

In the Curling rink the cooking, sewing and school work was shown and the poultry was exhibited outside of the rink. The cooking made a very fine and tempting display, there being many fine cakes, pies, cookies, biscuits, etc. The school work was tastefully displayed, showing the excellent quality of work done by the students. The wood work entry was small but of very fine quality. One entry, an ink stand was both novel and very well done, and is deserving of special mention. The singing and recitations were held in the Tofield school, all those taking part showing considerable talent.

The sports were held in the morning, boys and girls from all districts taking part in the fun.

Those students winning the short course at Vermilion for the highest number of points are:

Margery Murray, 90 points; and Kenneth Baptist, 24 points. The alternate students are Euphemie McBratney, 20 points and James Imler, 24 points

A complete list of prizes awarded will be found on page three

NEED ANY POTATOES?

Saturday was a big day for the school children—the annual School Fair. Boys and girls could be seen coming from all directions with arms loaded with exhibits. One enterprising lad seeing his way of making a little extra money, after the fair walked into a local store, and inquired, "do you need any potatoes today?" Upon being told that they had a fair supply on hand, and asked how many he had for sale, the small boy very proudly said, "I have three potatoes and 5 carrots, and they won third prize."

2-YEAR-OLD GIRL IS MUTILATED BY 8 SAVAGE DOGS

HARRINGTON HARBOR, Que. Sept. 22.—Two-year-old Alice Shettler of nearby Mutton Bay today was reported making amazing recovery from wounds inflicted more than a week ago when she was attacked by eight savage sleigh dogs which attempted to eat her. Little hope was held at first for her recovery.

Hospital attendants said half her scalp was torn off and that there was scarcely a square inch of her body without a bruise or marks of teeth.

The animals subsequently were shot in case, once having tasted human blood they should attack other children.

CAMROSE, STETTLER CLOSED AS COURTS

Abolition of two sub-judicial districts in this part of the province is announced in the Alberta Gazette which contains various order-in-council passed by the provincial government.

Under this order, the sub-judicial district of Camrose is disestablished as from Oct. 1 and will be included in the district of Wetaskiwin

Also, sub-judicial district of Stettler is disestablished as from Oct. 1 and will be included in the judicial district of Red Deer.

LAKESHORE

Mrs. Gladys Plants spent the week end in Camrose visiting friends.

Mrs. L. H. Graham and Mildred were guests at the R. H. Phillips home on Sunday.

R. C. Phillips spent Sunday at the Plants home.

Quite a number in this district have finished threshing. Those who have not finished are either cutting late grain or waiting for it to dry. Monday night's rain will, no doubt, prolong the delay for a day or two.

Unless winter closes in too quickly everyone should have ample time to prepare for it, which will be somewhat unusual. To finish threshing in this district in September must be a record. Several of the old-timers in this district say that this is the

AMISK CREEK

Threshing is almost completed and the hunting season is in full swing, but the ducks seem to have disappeared.

Mr J. Annebo, Mr. J. Berild and Mr. R. Berg attended the auction sale on the Kelly farm north of Viking.

Erling Sand and Bud Bowtell of Heinsburg visited friends and relatives over the week end.

Ruby and Lilly Berg left for the city on Wednesday, the former to return to her office, the latter to attend university.

Rev. G. M. Trygstad of the C. L. B. I. at Camrose held services in Amisk Creek church on Sunday in interests of the C. L. B. I.

Visitors at the R. Berg home last Sunday were the Flaaten, Moen and Haukedahl families, Mr. and Mrs. C. Patterson, Evelyn Hillerud and Eric Liknes.

Berit Berild teaching school at Miquelon spent the week end at her home.

Mr. and Mrs. John Halte and son were dinner guests at C. Ericksons. Later Mr. and Mrs. Halte and son visited at the Sorenson home.

The W. A. will hold a tea and sale of home cooking and vegetables in the Institute rooms on Saturday, September 26th

Elevator Competition

The business of handling Western grain is not only the most highly regulated but also the most competitive business in Canada.

All country elevators, whether Line elevators or Pool, compete for business. Competition is as keen amongst Line elevators as it is between Line and Pool elevators. The service given by elevator companies is honest and efficient, as it must necessarily be.

The Alberta Pool advertisements refer to their competitors as a "family compact." There is not and never has been any "family compact" among grain companies any more than there is between Line and Pool elevators.

It is the habit of the Pools in their advertising for competitive business to claim credit for every improvement in agricultural conditions and to blame their competitors for the burdens that remain, whether they arise from world conditions, national conditions or geographical conditions, for which the Line companies are no more responsible than the Pools. Their claim is untrue and unfair.

The Line elevators are as keenly interested as any other organization in a good price for the farmer, in his prosperity and in the improvement of the external and internal conditions that affect his welfare.

LOCAL LINE ELEVATORS

MAKING UP A SHOPPING LIST

[redacted]

The hall needs a new rug. More towels are needed for the bathroom, and the kitchen floor could certainly stand a coat of paint. The children need shoes. The car will soon need tires. Well, we buy a hundred new things every year.

Scattered through Canada are manufacturers who make the very things we need. Their products are on sale in certain stores within easy reach. Certain of these products, and certain of these stores, are especially fitted to take care of our special need. But which products and which stores? Which can we afford, and which do we think best? We must look to advertising for advice.

Advertising is the straight line between supply and demand. It saves time spent in haphazard shopping. It leads you directly to your goal. By reading the advertisements, we can determine in advance where best values are to be found. With the aid of advertising, shopping becomes a simple and pleasant business, and budget figures bring more smiles than frowns.

From the pages of this paper you can make up a shopping list that will save you money.

AND SO

Be thankful, Mr. Tradesman, you don't have to rely on an "ol' town crier" to broadcast news of your bargains or services. You'd be a long time waiting to make a sale. Modern times call for modern methods in making your sales appeal to prospective buyers. And your best bet for PROFITABLE RESULTS is:

CONSISTENT ADVERTISING IN

[redacted]

THE MERCURY

POTENTIAL TRADE IN LAMP BLACKS

Carbon black is used in large quantities in Great Britain, with the United States the chief source of supply. Gas black is the most important variety used, principally by the rubber and printing ink trades, according to the Industrial Department of the Canadian National Railways. It is the opinion that there is a good opportunity for gas black from Canada, particularly in view of the extensive natural gas deposits in Western Canada. Already London traders and importers have made inquirys as to supplies from Canada.

ALBERTA POOL ESTIMATE OF WHEAT PRODUCTION

The Alberta Wheat Pool estimates wheat production in the province of Alberta this year at 65,400,000 bushels, which is an average of 8.6 bushels per acre sown. This compares with the dominion government estimate of 68,200,000 bushels.

It might be noted here, too, that the Saskatchewan Wheat Pool estimates wheat production in that province this year at 109,916,000 bushels. The dominion governments estimate is 117 million bushels.

THE FALLING BIRTH RATE

World population is now dropping out of the race with production and according to the dictum of eminent statisticians we are approaching a static condition or even a decline of population while food production has been going on practically unchecked. This phenomenon does not yet appear to find confirmation from superficial survey of world population development but a closer study reveals a declining population although an absolute increase is still going on. This increase actually continues in spite of the fact that the average, taking all countries together, of three children to a household the number calculated as essential for the maintenance at the same level as the world population has not for some time been attained. The explanation lies in the abnormal age grouping of the population in the countries important for the population movement as well as the diminishing death rate. —Alberta Wheat Pool Budget.

PROF. ROWAN LEAVES FOR ENGLISH STUDIES

Professor of zoology at the University of Alberta, Prof. William Rowan left via C.N.R. Wednesday for England where he will continue for one year zoological research commenced in the U. of A. laboratories. The trip was made possible by winning of a Carnegie Corporation award, one of the three presented annually in the British Empire. He was granted subbatical leave for the time will be absent by the university. Dr. Rowan's headquarters will be in London. He will work at several British universities. Mrs. Rowan and children are remaining in Edmonton.

12 MILLIONS LEFT TO N. Y. CHARITIES

NEW YORK, Sept. 17.—Mary Gardiner Thompson, 91-year-old philanthropist, left $12,827,737 of her estate of $14,914,031 to six New York charities, the appraisal showed today.

Miss Thompson, who died last April 22, was a descendant of Lord Gardiner, who in 1639 bought Gardiner's Island at the eastern end of Long Island from the Indians and obtained for it a royal grant.

FINDS $500 RETURNS IT

VANCOUVER, Sept. 17.—Fortune Wednesday awaited on a downtown Vancouver street for Orville M. Neumeyer, 24-year-old unemployed telegraph operator.

Neumeyer kicked a brown paper envelope on the sidewalk then picked it up finding inside 100 crisp new Bank of Canada $5 bills. Although he could have made good use of the money himself, Neumeyer took it to a bank whose name appeared on the envelope.

A department store to which the money was consigned rewarded Neumeyer for his honesty.

WILL BUY MACHINE TO STOP GANGRENE

Machine to prevent gangrene in limbs following frost bite, crushing or other serious limb injury will be purchased by the Royal Alexandra hospital, it was decided at the monthly meeting of the hospital board Friday. It will be the first machine for this purpose in the city.

The suction pressure therapy machine, costing approximately [illegible], will be a boon to trappers and prospectors flown out of the north suffering from frost bite. Limbs of injured miners crushed by rock and of motorists hurt in auto accidents may be saved by the apparatus it was stated.

"If we can prevent the loss of a limb for even one individual it will be compensation for the expenditure" observed Ald. E. East, chairman of the building and lands committee of the board which recommended purchase of the machine.

BALFOUR BACHELOR BECAUSE GIRL DIED

LONDON, Sept. 17.—Why Lord Balfour, great Conservative prime minister, never married was revealed Thursday in his biography by his niece, Blanch Dugale.

He was in love for five years with May Lyttleton, sister of the famous cricketing brothers of that name, one of whom, A. Lyttleton, became colonial secretary during part of the Balfour government's term of office, 1902-5.

Miss Lyttleton died when Balfour was about to ask her to marry him. He had delayed the question, fearing refusal.

Following her death Balfour walked for hours through the streets of London. He asked that an emerald ring left him by his mother, which he had hoped to give May as an engagement token, be placed in her coffin.

Balfour never divined her true feelings for him, says Miss Dugdale's biography. "I can recall May's happy face when A.J.B. had spoken to her in a way which she must have entirely understood," she writes.

U.S. [redacted] WHEAT SUPPLY

NEW YORK, Sept. 17.—A Washington correspondent of the New York Herald Tribune reports Thursday that department of commerce and bureau of agriculture estimates indicate the United States will import more wheat in 1936 than in any previous year in the country's history, and four times as much as was ever imported in a single year before 1934.

The correspondent says that while the nation will consume about 42,500,000 bushels of foreign wheat, it will export only about 500,000 bushels.

S.C. FEELING FORCES CLERIC TO QUIT POST

CALGARY, Sept 17.—Rev. P. Vincett, minister of the Mennonite church in Didsbury for three years has resigned his pastorate, he announced here today.

He resigned, he said in an interview, because he "roused his outspoken pulpit criticisms of the Social Credit movement" were not acceptable to a large section of his congregation.

"I have sough scripture in vain for substantiation of Premier Aberhart's social doctrines," said Mr. Vincett. "I see a wave of materialism sweep'n' Alberta to the detriment of the spiritual values.

"I am going to British Columbia. I have no other plans at present."

Lawrence Graham, Lakeshore ..	30
James Imler, Tofield, ...	34
Kenneth Baptist, Tofield, ...	34

SAFECRACKERS GET $600 AT ROUNDHILL

Safecrackers blew the safe of the Round Hill Trading Co. at Round Hill, 13 miles south of here Friday night and escaped with $600 in cash and a number of grain cheques. R. C.M.P. from Camrose are investigating. No arrests have been made. A couple of grain cheques were found on the road leading to Camrose Saturday.

AUTUMN WORK IN THE GARDEN

(Experimental Farms Note)

As soon as the tops of the plants are frozen or have died off, they should be removed and burned. If the tops of perennial plants are left on the bed all winter there is danger that they may harbour disease spores and insects which may have been present on the plants. As soon as the ground is frozen a mulch of old manure, straw or evergreen branches can be supplied to help hold the snow. Sometimes the stems of the plants are left for this purpose but it is not recommended. Some plants which are frequently attacked by slugs can be protected by covering the crown with old coal ashes. The same thing is useful around foxgloves and hollyhocks to prevent water standing in the crowns and then freezing. If the leaves of hollyhocks and foxgloves are very numerous some of them can be removed.

September and October are the months when spring flowering bulbs are planted and clumps of them in a perennial border are greatly appreciated in spring. Besides Daffodils and Tulips which can be obtained in many varieties and colours, there are other attractive bulbous plants such as Chionodoxa—Glory of the Snow, Scilla siberica—Siberian Squill, both of which have blue flowers, Crocus which can be obtained in white, yellow and purple varieties. These are amongst the earliest of flowers to bloom in the spring. Muscari—Grape Hyacinth with dark blue flowers like a hyacinth in miniature bloom a little later.

Lilies are also grown from bulbs which should be planted in October. Some of the best and easiest to grow are L. amabile, L. tenuifolium, L. regale, L. Willmottiae and L. Henryi.

MUCH TOBACCO USED IN GREAT BRITAIN

Of the tobaccos imported into Great Britain for pipe use, 82 per cent is from Empire sources. Nyasaland supplies the largest quantity, followed by Southern Rhodesia, British India, Canada, Northern Rhodesia and a considerable smaller quantity from Borneo, Cyprus and South Africa. Canada and British North Borneo are the principal sources of supply for cigar tobacco. With the rapid improvement in the quality of Empire tobaccos, especially bright flue-cured and particularly in the case of Canada, there is an increase in the use of such for cigarettes, according to the Industrial Department of the Canadian National Railways. The cigarette trade is a large one as is evidenced by the fact that of the 140 million pounds of tobacco used in Great Britain each year, from 125 to 130 million pounds is accounted for by the cigarette trade. The outlook for Empire tobacco is most optimistic. The United States, however, is still the chief source of supply for tobacco in Britain.

COSTS OF BREADS

In Australia the cost of bread to the consumer has been high in relation to the low price of wheat during a period of five years, according to the Primary Producer. The percentages of the final cost of bread accruing to the producer and the processors in Australia are given as follows:

	Percent
Wheat grower	37.5
Flour Tax	3.9
Flour Miller	3.7
Baker ..	55.6
TOTAL. ..	100.0

Of the baker's percentage 16.2 percent is the cost of delivery wages, and 6.2 percent the cost of up-keep of delivery vehicles, a total of 22.4 percent.

"It is very plain that if the cost is a barrier to the increased consumption of bread," The Primary Producer says, "any effort to bring about a reduction in that cost must be concentrated in the baking section."

As far as can be ascertained there never have been any authoritative figures recently issued showing the percentages of costs of a loaf of bread in Canada. However, the United States federal trade commission lists the proportion of costs of the various processes of making bread as follows:

	Percent
Wheat Producer	13
Transportation	4
Grain Handling and Storage ..	3
Miller	5
Baker	60
Retailer	15
TOTAL	100

In the 60c. obtained out of the dollar for the baker a further breaking down shows that 41½ percent is represented by service costs. Of the ingredient cost, material other than flour represented about one-third, so that the actual cost of flour in a loaf represents about 26 percent of the total cost.- Wheat Pool Bulletin.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

MY MACHINERY

I will praise Thee: for I am fearfully and wonderfully made — A Psalm of David

We are the marvels of the ages, with minds that span space and time, with capacities beyond the strongest engines, and niceties of adjustments beside which hair springs of watches are clumsy as cave-men's clubs. The strong smooth, adaptable, sweet running of such systems of intricacies is Health, and anything that mars the strength, smoothness, adaptability or sweetness of the running or wears out the works unduly, is either in itself disease or something that will lead to disease. An accident is a monkey wrench thrown into delicately adjusted works.

In life's first half organs and elements are at their best, except for hang overs of heridity which are like old parts put into new cars; the glory of young men is their strength. Yet in this glowing first half germs make mass attacks, and gross infections beset, that can destroy a machine utterly or do life-enduring damage. Measles, whooping-cough, scarlet fever, tuberculosis and all the colds and 'flus are rampant.

By the second half, while most of these may have spent themselves, new ones wax as the others wane, pneumonic, bronchitic, cardiac, renal and rheumatic types. And older tissues may get a craze of untimely youth and growth and go on the rampage in a group of diseases called cancer the crab. In the second half also, whether specially damaged or not, the tissues begin to show signs —that is symptoms— of wearing out. It may be that some one organ gives special trouble, and an oldish man will tell you he would be all right if he could only buy a few spare parts. On the whole mechanism may wear out fairly equally, like the deacon's one-hoss-shay, built in such a wonderful way that no part was stronger or weaker than any other; so, naturally, it went to pieces all at once, all at once and nothing first, just as bubbles do when they burst. And that was the end of the one-hoss-shay. One may come to the end in a full age, like a shock of corn cometh in in his season.

Touchstone the clown had a good idea of the two halves of life. The melancholy Jaques, the crabbed philosopher, thought "all the world's a stage," and dramatized man socially. "His acts being seven ages at first: the infant mewling and puking in the nurse's arms" and finally—

"Last scene of all
That ends this strange eventful history
In second childishness and mere oblivion
Sans teeth, sans eyes, sans taste, sans everything."

The clown thinking not of the social actor but the physical man, saw two stages, development and decline. "And thus (first half) from hour to hour we ripe and ripe; and then (second half) we rot and rot, and thereby hangs a tale."

When Pasteur found disease germs and the age of the microscope began; when Lister built on this foundation a new surgery, and men like Koch a new preventive medicine: and when these mysteries became popular knowledge, so that every housewife applied them hourly, death-rates were cut and life-spans lengthened almost as though we had at last eaten of the trees of life in the midst of the garden. Surgeons think of the Pasteur-Lister-Koch new dawn as an incalculable service to mankind through the new surgery; physicians as an almost greater service through new principles learned about many diseases, their care and cure. But the greatest service of all was the increase in knowledge of disease prevention and cure that came to ordinary people, to mothers and teachers, housewives and city councillors, butchers and bakers, and candlestick makers. A good housewife today, without special instruction could prepare a room for an operation better than the best of surgeons or the best of nurses could have done it before Lister. This wider spread intelligence about the ways of disease and health (and of course it should be much wider) is the best result of the new knowledge.

The first infection-ridden half of life has been indeed transformed by the new knowledge, but the second half of life much less, except for the advantages of the new surgery. The average life-span may reach new heights each decade because infants do not die of summer diarrhoea, or children of diptheria, and yet the middle-aged have not gone on smoothly to Methuselah ages, even when they ate what was put on their plate.

U. F. W. A. NOTES

Continued from front page

managed to come ahead of the Lakeshore ladies, led by Mrs. Anderson, who will have to provide the entertainment for the meeting in October, the [illegible] birthday month. Mrs. Anderson read a book review, a [illegible] told story of the "Willow Platter". Mrs. Graham read a bulletin on legislation by Mrs. Jean B. Laurent of Red Deer. She gave a brief summary of legislation passed both in the Provincial and Dominion [illegible] during the last session. [illegible] she says:

We find the following:

1 Three [illegible] more taxation.

2 Reduced services, health and [illegible] and [illegible] I just say [illegible] health services [illegible] by the U.F.W.A. [illegible] whose members had [illegible] themselves, and [illegible] had played [illegible] the best [illegible] province in [illegible].

[illegible] agriculture.

[illegible] Tax which has reduced the [illegible].

[illegible] makes it al- [illegible] any mem- [illegible].

[illegible] Amendment act in which [illegible] everywhere are taking [illegible] interest.

Regarding the House of Commons [illegible]:

Those of us who have been closely [illegible] the actions of the members [illegible] Ottawa fully realize the great loss [illegible] by the whole dominion [illegible] failed to return our Alberta federal members in the last election. At the beginning of the last session Mr. J. S. Woodsworth moved an amendment to the Address in Reply to the Speech from the Throne, indicating direct [illegible] with the Government program as inadequate to meet the economic condition of the people. Also Mr. M. J. Coldwell moved a [illegible] for the public ownership and control of the Bank of Canada and chartered banks in order to give effective control of currency and credit. Both these motions were defeated by a combined vote of Liberals, Conservatives and Social Credit members. The Budget increased the Sales Tax seriously but lowered certain duties which were welcomed by Western members.

The Bank of Canada Act was amended to provide for control of the majority of stock by the government.

A committee was set up to inquire into the activities of the new Wheat Board.

By request Mrs. Learned [illegible] sent information regarding Estates and Succession Duties. The Health Bulletin [illegible] closer co-operation with [illegible] and teachers in teaching [illegible] to children was read. Mrs. Torrie: Regret also was expressed that the Travelling [illegible] had been reduced $15,000.

A [illegible] interesting paper "Ed[illegible] [illegible] in Western Canada" [illegible] by Mrs. M. Seale. Mrs. B[illegible] and Mrs. Murray served tea.

TOT FOUND IN BUSH AFTER BEING LOST ONE WHOLE NIGHT

WETASKIWIN, Sept 22 — "I'm lost," said little Margaret [illegible] unconcernedly when she was found in the [illegible] bush near Malhurst [illegible] after having strayed away from [illegible] the [illegible] evening. When [illegible] left home [illegible] she left her and [illegible] direction the [illegible] had taken.

More than [illegible] people [illegible] search parties [illegible] R.C.M.P. Wetaskiwin detachment. Johnny Dowler [illegible] came upon the child in what hunters call a good moose country.

TWO MERCY KILLERS ARE GIVEN RELEASE

LONDON, Sept. 23.— Two sisters, who killed the imbecile brother they had nursed day and night for 20 years and who were given a "mercy" sentence, were released from the Broadmoor institution for the criminally insane.

The sisters, Cathrine Walsh, 40, and Mrs. Evelyn Constance Alexander, 36, were found insane by a court, July 17, 1935. The verdict spared them from a prison term or death on the gallows. According to custom in such cases, they were sentenced "to be detained during the King's pleasure."

The sisters were charged with killing Sylvester Walsh "by administering gas and tablets." They admitted killing him, declaring they had done it to fulfill a promise to their mother and "for love of our brother."

SNOW-WHITE CARS DELIVER NEW, CLEAN COAL PRODUCT

CHICAGO, Sept. 22 — Coal cubes "you can feed the furnace with them in your dinner clothes"—were put on the fuel market today.

The cubes were so clean, salesmen boasted at the American Coal Week Exposition, that:

Snow white trucks delivered them.

White liveried drivers carried them into the house.

Husbands tossed them into the furnace without smudging their clothes, or even their hands.

They were piled up beside the fireplace in the living room, and used instead of logs.

The secret of it all was that the cubes were wrapped in heavy paper.

Made of fine coal—known to coalmen as "screenings" or "slack"—mixed with water and glucose binder, the cubes were pressed into shape just as sugar cubes are.

Each package held six 3½ inch cubes and weighed 10 pounds. By the ton, the cubed coal cost slightly less than coke or anthracite, slightly more than other kinds of bituminous coal.

ROBBERS SHOOT FARMER, LOOT HOME OF $200

SASKATOON, Sept 19 —Highway robbers, striking twice Friday at widely-separated points in northern Saskatchewan, shot and wounded an 80-year-old farmer near Wakaw last Friday night to loot his home and escape with about $200 and robbed a Verigin service station operator of $4,200 in cash early Friday morning.

Infuriated when 80-year-old Wasyl Ferniuk, resident three miles east of Wakaw, refused to hand over his money at the point of a revolver, one of the two masked thugs fired point-blank at the aged widower. The bullet grazed the victim's temple, but the shock rendered Ferniuk unconscious, and he crumpled to the floor. This was between 11 o'clock and midnight.

Leaving Ferniuk where he fell the thieves ransacked the house and fled with about $200 in currency, leaving their victim for dead. Ferniuk recovered consciousness later and set to look for help.

Meanwhile Ferniuk's hired man returned from Wakaw, found the place in a turmoil, blood on the floor, and the old man gone. He hastened back to Wakaw, notified H. Ferniuk, a son of the victim and the police were notified. No trace could be found of Ferniuk until Constable A. Lilly with Lux, the trained police dog, tracked the wounded man over a wandering course. Ferniuk was found at daybreak today, near Wakaw.

The police rushed the aged man to Wakaw for medical attention. Ferniuk's condition was not serious. He was able to give police a detailed statement, but no clues to identity of the robbers were found.

At Verigin during bandits attacked George P. Chutskoff about 1 o'clock Friday morning and after binding him securely and gagging him they made way with $4,200 in cash and grain tickets. Mr. Chutskoff was going from his British American Oil Company office to his home when he was set upon.

Unable to move, when the assailants left him and unable to cry out for help, Mr. Chutskoff rolled himself to a nearby house where his groans awakened Mrs. A. E. Thomas, wife of a local grain buyer. She released Chutskoff from his bonds and he immediately called the mounted police from Kamsack.

Police are investigating this robbery which is the biggest that has been staged in this district. No arrests had been made at noon Saturday.

RADWAY WINS MALTING FIRM'S BARLEY AWARD

Obtaining the highest average score in the Canada Malting Company trophy competition for the best junior barley club in the province, the laurels have been awarded to the Radway club, it was announced Saturday by the provincial agricultural department.

Second place was won by Bellis, and Barrhead was third. In all 13 clubs took part.

Norman Knight of Radway and Alex Melnyk of Bellis tied for first place for the highest individual score with 90 points each. Hugh Bodie, Ashmont, obtained 89 points.

The sponsoring company provides registered seed for each club member. The boys grow their plots under supervision of agriculture department fieldmen. Several thousand bushels of improved barley seed will be available this year for sale in the districts where these clubs are located.

More than 200 boys between 15 and 21 are members of the junior barley clubs.

Other clubs in the order of highest average score are, after the first three above-mentioned: Vilna, Bon Accord, Andrew, Leslieville, Ashmont, Wood, Kimbey, High River, Lethbridge and Midnapore.

AUSTRALIA ASKED TO RECEIVE JEWS

The possibility of Jews, driven from Europe by Nazi persecution and economic pressure, being admitted to Australia as settlers, was suggested in London to Dr. Earle Page, Australian minister for commerce, by a private delegation from the Free Land League for Jewish Territorial Colonization.

It was not desired that group settlement schemes be undertaken. The hope was expressed that when migration to Australia was resumed, two per cent of the total might be reserved for Jews selected for their physique and suitability of vocation who would be absorbed into the communal life of the country.

The expense of sending and settling them would be borne entirely by Jewish organizations.

VISITING BAND SUBJECTED TO HOODLUMISM

HAMILTON, Ont. Sept. 17—Board of Education officials today ruefully considered what it might do about the outburst caused by 2,000 school children during a concert by the famous Kneller Hall band of England in the auditorium of the Memorial School yesterday.

The 2,000 children packed the hall, in high glee and hearty voice, armed with spitballs. In terrific confusion, Captain Harry Stares, Hamilton band leader, who brought the famous British organization here, pleaded that the children listen to Major H. E. Adkins, director of the visiting band.

The row continued unabated. Teachers who had come to keep order finally withdrew from the hall. The concert proceeded after Major Adkins failed in an attempt to speak to the children, but the music could scarcely be heard.

HALIFAX AND VICTORIA LOOM AS SUB BASES

HALIFAX, Sept. 19.—Halifax on the Atlantic and Victoria on the Pacific "are the two strategic points of the Dominion in any plan of coastal defence," Hon. Ian Mackenzie, Canadian Minister of National Defence said in an interview here today.

"Should the United States become involved in a war with some other nation Canada must be in a position to prevent establishment of submarine or air base on her coasts," the defence minister continued. "Otherwise," he declared, "she becomes a belligerent according to the international code."

Mr. Mackenzie, accompanied to Halifax by Major Gen. C. F. Constantine, adjutant-general, and Brigadier A. Clyde Caldwell, master-general of the ordinance department, was scheduled to speak before the annual dinner of the Canadian Infantry Association later today.

Canada, he said, has no thought of any aggression, "but must be in a position to fulfil her obligations as regards neutrality."

In the opinion of the minister any program of defence for Canada must be centred mainly on air and naval units. Today he planned a visit to Eastern Passage air base and other defence locations in Halifax and environs.

POTATO CURES RHEUMATICS OF BRITISH PEER

LONDON, Sept. 19. — Lord Strathspey of Rottingdean is a firm believer in the old superstition that a potato wards off rheumatism.

He has been carrying a potato about with him for years, and he says that he would never be without one. Some time ago he said, he was troubled with rheumatism in a knee which had been injured. But since trying the potato cure, he has never had a twinge.

The potato must be in good condition, he warns. Once it becomes soft, it loses its healing properties.

CRYSTAL PALACE BABY SHOW SURE WAS HOWLING SUCCESS

LONDON, Sept. 21—Five hundred babies were expected at the baby show promoted by Councillor [illegible], of Romford at the Crystal Palace yesterday.

Nearly 4,000 came, some from as far off as Scotland, Wales and Cornwall. Many were gate-crashers whose parents had not formally entered them in advance.

Only one doctor was in attendance as the judge. Competitors and their parents, bewildered, were wandering aimlessly about the Palace's vast spaces.

The promoter, at wit's end, telephoned London hospitals which sent along a score of junior medicos, with a sprinkling of modern Ben Allens and Bob Sawyers, to help in the judging ring.

YOUTHS SAVE RECKLESS DOG

Satisfying an urge to elevate himself in the world, a venturesome fox terrier climbed a girder under the south end of the high level bridge in Edmonton at 1 p.m. Saturday.

While parading along the girder, the dog lost his footing and slipped into a narrow opening formed by a cross bar on the girder. Several youths noticing the incident rescued the canine, risking falls by mounting the understructure of the bridge.

OWL WISE? POOH! HE'S A BIG FOOL SAYS BIOLOGISTS

WASHINGTON, Sept 21.— The United States biological survey gave the lie today to the ancient assertion that he owl is wise.

"The owl," said Col. H. P. Sheldon, "is a fool and you can quote me as saying so."

The Greeks—it was pointed out—started the story about the owl's brains when they assigned the horned owl of southern Europe to Pallas Athene as an emblem of her celestial wisdom.

"The whole thing is wrong," explained the colonel. "The owl is simply like a lot of people—he doesn't say much because he doesn't know anything to say."

"Many people," he continued, "give the owl undue credit for being able to see at night when the rest of us are using electric lights and lanterns. That's nothing for the owl to brag about. It's his natural equipment."

24-HOUR ERROR, TEARS PANTS

LONDON, Ont., Sept. 22.— A youngster was being helped by officials to disentangle himself from barbed wire on the top of the fair fence Saturday.

"What's the idea?" he was asked. "You could come in the gate. It's free for children on Saturday."

"Gosh," muttered the fence climber. "I thought it was Friday."

2 DEAD, $5,000,000 LOSS AS SWOLLEN RIVER RACES OVER RICH FARM LANDS

BROWNWOOD, Tex., Sept. 22 — Flood with a crest of more than 50 feet covered Monday seven miles of the richest land in Texas toward Austin, the state capital, adding steadily to more than 1,000 homeless and property damage in excess of $5,000,000.

The swollen Colorado—it took up the flood menace where the Concho river left off in San Angelo area last week—was at its greatest depth between Regency and Chadwick, more than 100 miles upstream from Austin.

The death list remained at two. Observers believed a greater loss of life was prevented by adequate warnings and effective work of rescuers.

Between 250 and 300 persons were driven from their homes in San Saba county. The little town of Bend was deserted, its score of stores and houses vacated. Residents fled as warnings were broadcast. Many homeless were sheltered in churches and schools.

Two coast guard aeroplanes flew low over the flood-threatened Colorado river valley Sunday and broadcast a warning to residents to seek safety as the rampaging river headed toward more populous regions to the south.

The river, its path strewn with death and destruction, was rising rapidly at Chadwick, south of here.

H. G. WELLS, 70, BUT DENIES IT

LONDON, Sept. 21.—H. G. Wells famous author, is 70 today according to reference books. But he denies it.

"It is not true," said Wells. "It is a false report spread by that fellow Shaw (George Bernard Shaw) to disguise his own age."

Shaw was 80 last July 26.

Wells has already written his own obituary, describing his death which he predicted would come when he is 97.

He started life as a shop clerk and then taught in school. The late Lord Northcliffe, newspaper peer, was among his pupils. He eventually won a scholarship in the Royal College of Science. Wells' literary fame began with the publication of "The Time Machine."

This Business of Immigration

Being a Resume of the Hornby Plan for Immigration and a Report of a Convention Recently Held

RESIDENTS OF this district will remember that about eighteen months ago, Brigadier General Hornby addressed the Tofield and District Board of Trade and outlined a plan of immigration from the British Isles to Canada. The plan known as "the Hornby Plan," has in the meantime received much publicity and has centred its activities in the Province of Saskatchewan. In February of this year the Saskatchewan government passed a resolution of which the following is a copy:

> "That this Assembly is of the opinion that the time has now come when the Canadian Government should get in touch with His Majesty's Government of Great Britain with a view to putting forward a scheme for the voluntary redistribution of the white peoples of the Empire and thereby creating a stimulation of shipping and trade under the flag."

The resolution was passed by 42 to 5—the total number of members in the legislative assembly being 55. One minister was amongst the eight absent. The other eight ministers, including the premier, voted in favour of the resolution.

Partly, one could say chiefly, on the strength of this motion, a Saskatchewan convention was planned and a convention committee of four, headed by Garnet C. Neff, K.C., of Grenfell, Saskatchewan, was appointed. The convention was arranged for and held on Wednesday and Thursday of last week. Knowing the convention was to be held and believing that Tofield was one of the Alberta districts chosen for the operation of the plan, the editor approached the town council for expense money to attend the convention, received it, and away we went.

The Plan

Before proceeding with a report of the immigration convention held at Saskatoon last week, we believe it would be better to refresh the minds of Mercury readers as regards the details of the plan, as completely as possible, and yet as briefly as possible.

It is proposed to form what may be termed Foundation Community Farm Settlements of selected British families throughout Canada. To do this, Voluntary Migration Committee of Counties and Towns in Great Britain will be formed. In addition to this there will be set up in Great Britain, a Parent Corporation, whose aim and purpose will be to encourage and promote British immigration into Canada and promote the formation of subsidiary corporations in Great Britain having the same purpose.

The British Government will be asked to assist the Parent Corporation:

> By paying an annual subsidy to carry out its objects and functions without seeking pecuniary gain out of its operations.
>
> By authorizing the Parent Corporation to raise a loan in London in order to enable the 240 Counties, Towns and other United Kingdom Organizations to acquire and develop their own Foundation Farm Settlements in Canada.
>
> By giving a guarantee of the service of the said loan so as to obtain a low rate of interest.
>
> By making an annual grant-in-aid to each county, town or other migration committee, for the annual up-keep and maintenance of its settlement in Canada, and for its general operations.

The maximum amount of capital required by each county town or other committee to be expended chiefly on land, buildings, and equipment is estimated at £250,000 or approximately $1,250,000.00. As there are 240 settlements planned the total amount required, to be mostly spent in Canada, will therefore be approximately $300,000,000.00. It is not expected that 240 settlements will be settled forthwith, but efforts to raise sufficient capital now will be made and that portion not required at present will be invested in United Kingdom and Dominion Government short and medium dated securities.

The Canadian Community Scheme

With the money raised by loan in Great Britain it is proposed to purchase outright 100 more or less, parcels of land of a size suitable for efficient working in the district in which it is purchased. A proper habitation, other buildings, machinery, stock, and other equipment will be placed upon the land, the purpose being to make it an improved farm and to give the settler every chance of success. Settlers, very carefully picked in Great Britain, a certain number from a certain district will be sent to a specified district here. Each committee in the United Kingdom will select a Settlement Manager or

(Continued on page three)

RUBBER TIRED TRACTOR DOES GOOD WORK

At a specially arranged demonstration of a rubber tired John Deere tractor at the farm of J. B. Warner on Wednesday, many farmers of this district were interested and surprised to see how easily it carried along more than ordinary loads. The normal load for a tractor of this capacity is four 14 inch plows, but in order to show the reserve power of the John Deere with rubber tires, seven 14 inch plows were drawn smartly at five miles per hour. Rubber tires for tractors are a comparitively new innovation up here in Alberta but we learn that in the United States they have been giving good service for the past seven or eight years. After seven plows had been drawn for some time three were unhitched and four drawn and their was no perceptable increase in speed of travel, showing that their was plenty of reserve power over that required to draw four plows. In addition to ordinary plowing, a disc cultivator was hitched on and the tractor handled this with the same amount of ease. Special advantages are claimed for the rubber tired tractor over the iron lugged tractor wheel. It is claimed the tread tire has equal pulling power of the lugged iron wheel but [illegible] power is required to drive the lugs in and pull them out of the ground. Certainly it was an interesting and successful demonstration. M. C. Hammond is agent for the John Deere tractor.

Here and There

Famous officers of the Canadian Pacific Railway and Sir John A. Macdonald, Prime Minister of Canada, arrived at Revelstoke recently and held a review of historic [illegible]. Among them were Donald A. Smith, George Stephen, James J. Hill, Van Horne and Shaughnessy, names associated with the half century with the construction of Canada's first transcontinental railway. The party actually comprised a group of film players portraying the historic characters in the tense board-room sequence of "The Great Barrier", Gaumont British picture depicting the strenuous railway construction days fifty years ago.

Says Gene Sarazen, one time world's champion golfer, writing of the Banff Springs Hotel course at the famous resort in the Rockies:—"That course of Banff is everything you said. Miss Helen Hicks and I played the match two guests [illegible] we were beaten. [illegible] gallery it may sound funny to hear we simply couldn't keep our minds on the game—the scenery was simply too much."

The first 1937 world cruise to set out from New York will be the Canadian Pacific liner Empress of Britain which will sail January 9 for a voyage of 123 days, covering [illegible] miles and visiting [illegible] ports in 22 different countries. Among these countries are Palestine, Egypt, India, Ceylon, Malay Archipelago, the Philippines, China, Japan, Hawaii and back to New York via California, the Panama Canal and Havana.

Canada's first complete semi-streamlined air-conditioned train, built for the Canadian Pacific Railway, now in operation with four units in different parts of the Dominion, has been placed on inspection at a number of points across the country and has aroused high praise and enthusiasm in the part of the hundreds of thousands of Canadians who have seen it. In Montreal alone 60,000 spectators went through it in the four days it was on inspection at the Windsor Station and the same interest was displayed everywhere else. These trains will be in operation between Toronto and Detroit, Montreal and Quebec, and Edmonton and Calgary.

Prime Minister Mackenzie King and other delegates to the League of Nations Conference at Geneva sailed from Quebec in September in the Canadian Pacific flagship Empress of Britain. Accompanying the Premier was Hon. Raoul Dandurand, Government leader in the Senate and Hon. Norman Rogers, Minister of Labor.

Captain George Goold, new skipper of the Empress of Russia, made his first trip as master of this vessel early in September. It is his first command of a Pacific Empress, though he has served the fleet in all official capacities from fourth officer to staff-captain during the past 23 years.

Last of three motor parties visiting Canada this year, 14 British automobiles arrived recently at Quebec on the Empress of Britain. The motorcade under the organizer Graham [illegible], drove from Quebec to Montreal and will visit Ottawa, Toronto, [illegible] Detroit, Cleveland, Washington and New York.

WORK ON SISTER SHIP TO QUEEN MARY HAS STARTED

NEW YORK, Sept. 21.—A wireless dispatch to the New York Times from Glasgow says work began on the Cunarder "No. 552" the sister ship of the Queen Mary.

The first consignment of keel plates were laid out on the floor of the designers' shop, where they will be prepared for drilling before being placed on keel blocks.

Six hundred plates will form the keel and double plates will be used for strengthening. The keel will be two inches thick, compared with the Queen Mary's 1½ inch thickness.

The new liner will also be higher and broader.

More than 250,000 wooden blocks of Canadian fir will be laid to support the liner during her construction.

TWINS BORN 4 DAYS APART

LONDON, Sept. 21.—Mrs. Ellen Abraham of London, is the proud mother of twin daughters—born at an interval of four days in different nursing homes.

The first baby was born in a Walthamstow nursing home and the other at the University College Hospital, eight miles away. Both children are perfectly healthy and the mother is doing well.

DON'T SPOIL YOUR SAVINGS ★

THE accumulated assets of the life insurance policy-holders of Canada are the largest—by far the largest—single class of investment holdings in the country. They include every type of non-speculative investment, but owing to the nature of the insurance contract the greater part of them consists of credit claims against property, with principal and interest payable in fixed dollar amounts, rather than ownership equities whose value and income depend upon earnings. The owners of these investments are only nominally the insurance companies themselves, some of which are wholly mutualized, and all of which administer total funds in which the shareholders' proportion is an almost infinitesimal part; the real owners are the policy-holders themselves. And in spite of the existence of a fair number of very large policies which may be regarded as a class of rich men's investments, the typical policy holding is a matter of a few hundreds or thousands of dollars, the chief asset and the metaphorical anchor to windward of some industrial, commercial or professional worker who has not accumulated and never will accumulate any other important asset.

No act of destruction or partial destruction of the value of any such credit claim, be it a government bond, a municipal bond, a public utility bond, a railway bond, an industrial bond or an ordinary property mortgage, can ever fail to impair the assets of the life insurance policy-holders of the country. Any widespread destruction of such values must necessarily render the assets of the policy-holders inadequate to perform the function for which those policy-holders rely upon them. The same is true of any tampering with the value of the unit of currency in which these credit claims are expressed. Policy-holders who have any real regard for the interests of their beneficiaries—the women and children for whose benefit the vast majority of life insurance policies are taken out—should set their faces immutably against all government tendencies leading to partial or complete repudiation of debt contracts, for such tendencies are destructive to the whole system of insurance.

The object of insurance is to make something sure. The effect of repudiation is to make everything unsure.

★ This editorial, taken from "Saturday Night", Toronto, is so timely and informative that it is reproduced here as one of a series of messages sponsored by Life Insurance Companies in Canada.

This Business of Immigration

(Continued from front page)

Agent from the district in Great Britain from which the settlers come. He will be responsible for the management of the settlement as a whole, for its finance and for its human or social side. In addition there will be an agricultural supervisor or field foreman with local Canadian experience. The settler on a fully equipped parcel of land will contribute a portion of the proceeds of the farm as rental. It is proposed that the land remain the property of the British Committee, and after five years, the settler then having gained Canadian experience and so it is expected, saved some money, would move off and make room for another settler family from Great Britain. It is estimated that the settler in five years would save $1,000 and with an additional $1,000 loaned to him by the British committee would be in a position to start up for himself. Thus throughout the years a steady flow of selected British settlers would be assured.

Progress Made

Movement regarding the "Hornby Plan" of British immigration into Canada has been active on both sides of the Atlantic for the past three or four years. Difficulties and obstacles to the plan have been met with in both Canada and Great Britain, but nevertheless those anxious for its adoption have made steady progress. Moreover, while economic conditions in Canada were anything but conducive to immigration when the plan was first broached, they are much better now, which makes the task of those urging a resumption of immigration easier.

In Canada Brigadier General Hornby personally visited a large number of districts explaining the plan, the result of which was a large number of resolutions passed by Town Councils, Boards of Trade, Chambers of Commerce, culminating in the resolution passed by the Saskatchewan government in February of this year. In addition letters containing copies of the resolutions passed were sent to federal members, some of whom were distinctly unenthusiastic: Our own federal member at that time, Mr. Luchkovich, was unimpressed. In August 1934, a report of the Inter-Departmental Committee on Migration Policy was issued. This report is very complete and consists of over ninety pages of close printing. The Committee, a British one, headed by Mr. Malcolm McDonald, was composed of distinguished civil servants, Mr. McDonald being the only member upon it who was not a civil servant. The report deals at some length with the "Hornby Plan" of settlement in Canada but does not endorse it. In paragraph 74, page 31, they say:

> "We do not feel able to recommend, therefore that the United Kingdom Government should be prepared to guarantee the capital and interest required in connection with the above scheme or other schemes on these lines, or to make direct advances to intending settlers under such schemes."

However, despite the non-endorsation of the Hornby Plan by the Inter-Departmental Committee on Migration Policy, those desirous of a resumption of migration from Great Britain to Canada, held a Voluntary Migration Conference at Newcastle-on-Tyne, England, on September 24-25 of last year. This conference was called by Councillor R. S. Dalgliesh, then Lord Mayor of Newcastle-on-Tyne. The convention had no connection with the Britsh government, being entirely unofficial, but was attended by some 54 delegates, many of whom were prominent personages in various walks of life in the British Isles and the various dominions.

A brief or statement of case, mainly comprising the details of the Hornby Plan was drafted and a committee or deputation was appointed by the conference to present the resolutions and statement of case to the Dominions' Secretary. This committee was headed by Councillor Dalgliesh.

The presentation of the Resolutions, with the "Statement of Case", by the Committee took place at the Dominions' Office, London, on October 24th, 1935. After delivery of the conference report by the chairman of the convention committee the Dominions' Secretary cordially replied, saying in addition to other remarks:

> "I express my thanks to you all for the great voluntary work and the great Empire work you are out to try and accomplish."
>
> "I do not think, in approaching the problem of migration, you must look at it exclusively from the standpoint of cost, because the benefits that will accrue and must accure from peopling the whole Empire with our own stock cannot be measured in a balance sheet of that kind. Therefore I say straight away that I not only attach importance to the subject, but I welcome your co-operation."
>
> "The spirit of adventure is not entirely lost in this country. There is a lot of talk about people being too spoon-fed, and that people will not take risks, but I want to remind you that for the past five years at least there have been over 50,000 people ready and willing to take their chance if they were given the chance to migrate —that shows conclusively that the spirit is there."
>
> "I speak for the Government as a whole when I say that if a proper scheme of co-operation, and I mean co-operation with the Dominions as well, if a proper scheme of co-operation can be worked out, the Government will be prepared to give every assistance...."
>
> "....I will say no more except that I welcome your offer of help, I welcome your co-operation."
>
> "I think the case has been well stated, and I shall see that my colleagues in the Cabinet not only have the Newcastle Resolution, but a full statement of what has happened today......"

In January of 1934, over 300 members of the British House of Commons signed the following resolution:

> "That this House is of the opinion that the time has arrived when active steps should be taken to consider schemes for the redistribution of the population of the Empire, and therefore urges the Government to consult with the Dominions and Colonies with a view to the promotion of organized Empire Settlement."

From the debate which took place on this resolution it was evident a considerable body of thought in the House of Commons was in favor of early attention being given to a resumption of immigration. During the discussions the House was informed by the Under Secretary of State for the Dominions that the Inter-Departmental Committee on Migration Policy would shortly issue its report and that when the committee had presented its report he would approach the Dominions as regards a resumption of migration.

The report as previously stated was of a negative nature. The British Government did not however adopt the report, nor have they expressed any opinion upon it; they have simply circulated it to the Overseas Dominions, and asked for their observations.

The Saskatoon Convention

The Immigration Convention held at Saskatoon last week was the latest move towards the resumption of carefully selected, organized and adequately financed immigration to and settlement in Canada. The Convention, however, was distinctly "Saskatchewan" in character, being sponsored by a committee of Saskatchewan origin. Two distinguished visitors were present from Great Britain, Mr. R. S. Dalgliesh, Chairman of the Dalgliesh Shipping Company and former Lord Mayor of New Castle-on-Tyne in 1935, and Sir Patrick Hannon, M.P., for the Mosely Division of Birmingham. Both gentlemen gave interesting and clever addresses and were keenly interested in the problem of Empire Settlement.

The convention opened with a short address by the chairman of the organizing committee which in turn was followed by an address of welcome by the Mayor of Saskatoon. Then followed election of chairman (Mr. J. C. Neff) and vice-chairman (W. Potter). The appointment of plans committee and resolution committee followed and the morning session was over.

The afternoon session featured outstanding addresses by Prof. W. W. Swanson, Mr. J. C. Neff, K.C., Mr. Kenneth Little, B. Comm., Prof M. Champlin, Director of Field Husbandry U. of S., and Hon. George Spence, Minister of Public Works, Province of Saskatchewan. Professor Swanson spoke of a vital necessity for a greater population in Canada and a widening of the fields of production and employment. "Canada's most exigent need was the way he described Canada's population problem. "The present texture of the population of the west indicates the necessity also of a steady infiltration of colonies of British stock to guarantee our institutions and traditions," he said. Careful colonization as apposed to indiscriminate immigration was stressed. "Colonists who produce a considerable part of their own necessities, while marketing their surplus products, are among the most vital assets of the nation. The strength of the nation is indeed to be found in such communities.

Mr. Neff's address was a plea for a greater influx of Britishers into the Dominion. He said Canada today, with her almost limitless possibilities has but started down the road of population. With a mere 10 millions of people, she stands as one of the great trading nations of the world. There is no doubt that Canada can absorb large numbers of new people of the proper type who are carefully selected and adequately trained.

Prof. Champlin, discussing the need for immigration of British settlers in Canada believed it was the alternative to defeat in Canada. There were two courses open. Either surrender to depression or to carry out the program of settlement and progress upon which the country's life had been based. With respect to the selection of incoming settlers the health histories of their families was a vital factor to be considered, since ill-health was one factor which more than anything else, would insure failure of the new settler. Low interest rates also were of paramount importance to insure success for the immigrant farmer. It was only fair that the new farmer should be given the opportunity of having a low interest rate so that all of his yearly savings need not be consumed with interest, but some at least applied to principal indebtedness. In the case of the tenant farmer, terms of rental should be low enought to enable the tenant to save money with a view of ownership later, he said.

William Harrison representing the Trades and Labor Council stated that the Hornby plan was the best his organization had as yet investigated. However experience with immigration schemes in the past had caused the T.L.C. to register their opposition to the scheme. It had been the sad experience in the past for farmers unable to support themselves on the land to drift to the cities and aggravate the labor situation there. He was of the opinion Canada needed a larger population but considered the present time inopportune to resume immigration.

The United Farmers of Canada in a brief to the convention were also of the opinion the Hornby Plan was the best plan that had as yet been worked out. Yet facts staring us in the face at this time necessitate that we criticize, not the plan itself, but its institution in Canada at this time. In Saskatchewan today, at least one-third of farm families with many years of experience were entirely maintained by government aid. Thousands of Canada's young men "wander the highways and railway tracks, some of whom are sons of farmers who chose to sleep in jungles rather than stay at home and share the meagre food allowance provided by government relief." British settlers should not be asked to share these "deplorable conditions" which would undoubtedly be the result following their five year period of security provided by British capital during the course of their agricultural training. More people in a country do not make prosperity. If that were true, thickly populated countries of Europe would have prosperity and contentment instead of economic upheaval and civil war.

The idea that "millions of pounds sterling coming into Canada to finance British settlers over the proposed five-year period of security here, will bring prosperity to Canada, is a fallacy." Most of that capital would be used to pay for farm property for the settlers at approximately $25 per acre, and most of it would be used to retire mortgages and other indebtedness. It would be well for prospective British investors to study debt conditions of Saskatchewan farmers, available in university surveys.

"Let Canada first put her own house in order before we invite others to share present disorder and uncertainty." Canada, it was recognized, could and would support a much larger population when the people here found a way to straighten out existing economic entanglement.

The Hon. George Spence, minister of Public Works in the Saskatchewan Government delivered an inspiring address. His entire theme could be well described as "Empire development." The Saskatchewan government, he said, had not suggested any plan for immigration but had based its plea to the Dominion house on three principles: that any proposed scheme be financed in Great Britain, that proper reception be given immigrants as well as adequate care after their arrival and that providing immigrants fail following a fair trial on Canadian farms, they be repatriated, rather than deported to their native lands. Criticizing his own personal view on the immigration subject, Mr. Spence believed that the standard of living of any nation depended on development of natural resources. The British Empire was especially adapted to the development of those natural resources. The British Empire was rich in both natural resources and the population necessary to development, and the keystone to the present situation was co-operation.

In past years, the minister stated, there had been a deplorable lack of co-operation on the part of Canadians with respect to the building of Empire. "Canada must start to accept its obligation as part of the Empire." The free movement of goods and services, of capital and credits, and of populations, was a vital factor in Empire co-operation and one of those factors which Canada had not in the past, been pleased to recognize.

Movement of populations was complementary to the movement of commodities and currency, Mr. Spence said. Depression conditions had been aggravattd when the free movement of these three had ceased several years ago. Correspondingly, the wealth and standard of living of the countries involved had been depreciated.

"Canada must not be selfish. We must make up our minds to either co-operate with other countries or to isolate ourselves, whether we like it or not." Canada, although boastful of its political independence, was the most economically dependent country in the world, and Saskatchewan was the worst Province in the Dominion in that respect.

Canada's big "pay cheque" came from wheat, and the Old Country was the Dominion's greatest market for that prime commodity.

To extend our markets is essential to progress in Canada. We cannot do that by sitting tight on our natural resources. Great Britain has money to develop those natural resources and the population to bring about development. What are we going to do about it? Unless something of an all-embracing character is done, we will never be rid of depression.

In the evening Councillor R. S. Dalgliesh, of Newcastle-on-Tyne addressed a gathering of some 400 people. After expressing his pleasure at being present in Canada, he went on to say that world trade was on the up grade. British shipping had increased by 14 per cent in the last two years. He paid tribute to the recent trip of His Majesty which he regarded as a goodwill mission to Turkey, the Danubian countries and to Austria. He went on to say, "you've only scratched Canada so far as natural resources are concerned," and urged Canadians to take the optimistic view and get on with development. There were "tons of money" available in

(Continued on back page)

THIS BUSINESS OF IMMIGRATION

(Continued from page three)

London for employment, he continued, but to release that money finance must be stable and confidence must be secured. Confidence could be had through co-operation, and co-operation within the empire was capable of attainment through movement of populations. The speaker mentioned the cost of freight rates stating that the cost per ton for shipping wheat from the prairies to Montreal was $6.26, whereas from Montreal to England the rate was only $2.60 per ton, the distance being much greater. Continuing, he said, Canadians have the peculiar habit of selling their wheat when the price is low. They sell their grain when the market begins to fall. That isn't the time to sell wheat, don't wait until you reach a peak, but sell when the price is on the up-grade. He said he had sent many ships to Montreal and kept them there idle because there was no wheat to ship to England or to other parts of the world. Canada, he said, was favored by low sea carriage rates on her industries. The distance between Canada and the United Kingdom, her greatest market, was less than Canada's main competitors.

Premier Patterson also addressed this gathering, saying in effect, that he believed a sound system of immigration could be evolved. He admitted also that some of the critics of the scheme had good reason in some of their arguments. The advisability of starting an immigration program was not unanimous in Saskatchewan, he stated. There were persons who argued that restricted markets and the struggle for existence of those already here were not conducive to the plan.. Similarly there were two camps of thought for finding a solution to the present problem. One camp believed restricted production would make the producer richer, and the other believed the wealth of any nation was in the volume of its production. Personally, he said, he favored the latter view. The world needed much more produce, for production had by no means overcome consumption, and even consumption needed greater development.

Thursday Morning

Thursday morning's session was devoted to five minute addresses by a number of speakers, some of whom were much in favor of the Hornby Plan and a resumption of immigration and others equally as much opposed to it.

Mr. Kerr of Regina spoke in favor, saying sooner or later the government will be bringing immigrants in. We should see to it now that they are good ones.

Mr. Walsh, secretary of the Anti-Immigration Association, attacked the plan on the grounds that it was not stable enough. An essential part of agriculture is the permanent connection of the farmer to the land. Under this scheme the settler is turned off after five years to shift for himself. He was at this time opposed to immigration. He read a resolution passed by his association stating that the present time is inopportune for immigration to Canada.

An officer of the Salvation Army who had seen considerable experience in immigration work spoke favorably towards the Hornby Plan and a resumption of immigration into Canada. He said there were three main considerations regarding immigration; (1) wise and careful selection; (2) efficient direction of the work; (3) the after care work should be good. These principles, he said, had been the basis of Salvation Army Work and had proved generally successful. Continuing, he said, the desire of the overseas dominion should determine the flow.

L. H. Hantelman, M.L.A. for Kindersley said one must consider averages and not individual cases. There were 11 different soil types in Saskatchewan and only by estimating the success of half section farmers on all types of soil could a fair conclusion be arrived at. He was not in favor of a resumption of immigration. He was of the opinion the Canadian government should do something for its own youth first.

Mr. Weese, secretary-treasurer of the Rural Municipality of Grandview said that at a recent meeting of his council they had discussed the merits and demerits of the Hornby Plan thoroughly. They had come to the conclusion the advantages outweighed the disadvantages and were in favor of a resumption of immigration under this plan.

Mr. Coldwell was very scathing in his condemnation of a resumption of immigration, saying until the government had raised the standard of living here we have no right to invite our fellow Britishers from the Old Land to share in the hardships we know here. Go to Loon Lake or to the Porcupine and see people living in sod shacks, their children starving and without proper clothing, he said. If the distinguished visitors had travelled through districts in Saskatchewan not supervised by railways they would witness abominable conditions here. During 1933 and 1934 Saskatchewan had deported twice as many British settlers as had come in.

Mr. Sefton, a farmer: The Porcupine district is not nearly so bad as Mr. Coldwell had stated.

Dr. Charles Endicott fully endorsed the Hornby Plan. There is no reason why we should wait for a suitable day to bring settlers here he said. If the pioneers had waited for a sunny day to come to Canada, there would have been no Canada. The Hornby plan will do no harm and the chances are that it will do a great deal of good.

Several other speakers addressed the morning session, both for and against the resumption of immigration, the tenor of their remarks being similar to the above.

At the noon luncheon on Thursday, Sir Patrick Hannon M.P., showered praise on Brigadier General Hornby, whom he likened unto Sir Horace Plunket whose name had gone down into history as a great name. Replying to the suggestion, made during the morning session that the tour of his colleague and himself had been supervised by the railways, he said emphatically that neither he or his colleague had contacted either railway as regards the tour and had seen districts here with dispassionate but intelligent observation without the influence of railweys or mortgage companies. He and his colleague would report in England conditions as we have found them here, on their own merits, he said. He advised his audience to think imperially, saying that, in England, thousands of men in public and private life would attempt to educate people to do that. The speaker referred to the speech of the Federal Finance Minister which indicated Canada's progress in trade during the past few months. While 24 countries had shown average increased trade of about four per cent last year, Canada's increase had been 11.3 per cent. Imports to Canada had expanded by $216,000,000 in 1935 and the total exports over imports had amounted to roughly $445,000,000. The productive power of Canada is on the up-grade. The speaker urged "a gentle opening of the door" by Canada to British products. Great Britain had taken 41.5 per cent of Canada's exports and the empire had increased purchases from Canada by 15.5 per cent on the average. Canada had gained a great deal in 1935 through Empire trade. But Canada's trade relations have not been as satisfactory from the British point of view as we would have liked, he said. Canada had imported only $2,000,000 worth more of British goods in the year ended February 1936 than in the previous year. Britain on the other hand had bought $40,000,000 worth more of goods during the same period. "From time to time there might be a little more gentle opening of the door in Canada. Canada had in 1935 purchased 50 per cent of her imports from the United States, but only 37 per cent of Canada's exports had been purchased by the United States as compared to the 41.5 per cent by Great Britain.

He agreed with Doctor Swanson that the British Government could provide British Capital and British people for colonization purposes, in that in so doing, markets could be extended and living standards raised. He continued, the thoughts and feelings of those interested in immigration in the Old Country were essentially in conformity with Brigadier General Hornby's scheme. But success cannot be assured without support here. Co-operation in Canada was immensely important in considering any scheme of immigration. The British Imperial Parley to commence next year would consider immigration seriously. He urged that the Empire be kept British, saying that, "while there is toleration for all under the British flag, it would be better to have a majority of our own race in the Empire, to carry forward the traditions upon which the Empire is based and to lend fortitude and courage.

The afternoon and final session of the convention was taken up with a consideration of the reports of the resolutions committee. This report included four separate resolutions, all favourable to the resumption of immigration and the Hornby Plan. Considerable discussion prevailed, there being two factions present, one favourable to the passing of the resolutions and the other not favourable. After considerable discussion, the moving of amendments, etc., Brigadier General Hornby was asked to explain some of the details of his plan. Consequently he stepped to the platform and after giving a general description of his plan, suggested that the audience ask him questions. This was done and finally resolution No. 3 was passed as was No. 1 and 2 previously.

The chairman then announced that the labors of the convention was at an end, thanked all for their support and adjourned the meeting.

The following are the resolutions passed:

1. RESOLVED that this convention is of the opinio that the time has now come when the Canac a Government should get in touch with His . ajesty's Government of Great Britain with a view to putting forward a scheme for the voluntary redistribution of the white people of the Empire and thereby creating a stimulation of shipping and trade under the flag.

2. RESOLVED that the provincial Government of Saskatchewan be and hereby is urged to move the Federal Government to take steps to give effect to the resolution passed by the Saskatchewan Legislature on February 27th, 1936.

3. RESOLVED that the Provincial Government of Saskatchewan be and hereby is urged to notify the Federal Government that Saskatchewan is prepared to receive at least five thousand British families to be settled in Saskatchewan under the Hornby Plan during the next five years, commencing early in the year 1937.

After the convention the writer arranged an interview with Brigadier General Hornby regarding the situation here at Tofield. As this article is now quite lengthy the details of this interview must be left over until a future issue.

New Silk Crepe Dresses

Long sleeve models featuring flower, fancy button and cord trims. Autumn shades include rust, tomato, scarlet, wine, navy nubias, green, brown and black.

Misses sizes, 14-20, ... $3.35
Womens' sizes, 38-44, ... $4.45

One Cent Sale – Oct. 14, 15, 16, 17 – A. A. Beirnes, Tofield

LOCAL AND PERSONAL

Mrs. John Lee of Edmonton visited Tofield this week.

Mrs. Hamilton and Mrs. Malcolm visited Edmonton one day last week.

Mr. and Mrs. Thompson and Pat Burnett motored to Edmonton on Wednesday.

Mrs. Harriman from western United States is visiting with Mrs. Jesse McMullen.

Mrs. Hamilton who has spent some time in Tofield left for her home in Calgary on Friday. Mr. Hamilton was the contractor of the new bank building.

The public school teachers are all attending the teachers' convention held this week end.

Born: To Mr. and Mrs. L. Herndon, on Thursday, October 8th, a daughter.

Mr. and Mrs. A. E. Thompson and family motored to Vegreville on Sunday.

Mrs. Bert Swift and son of Pollo visited with her mother, Mrs. Smith for a short time.

Miss E. Baynes of Ponoka is visiting with Mrs. B. Beale.

Mrs. Malcolm and Muriel and Wes Taylor motored to Edmonton on Sunday.

Beryl Edwards, who is working in Ryley, visited her home over the week end.

Miss Isabel Robinson who is attending normal in Edmonton is spending Thanksgiving week end at her home here.

Miss K. Moen is visiting relatives at Wetaskiwin.

Mr. and Mrs. McCalla of Hallberg, Sask., visited at the Jobb home this week.

Mr. J. Whyte, Mr. Jobb and Mr. and Mrs. McCalla motored to Wetaskiwin on Sunday. Mrs. R. Whyte returned with them.

The Vestry of Holy Trinity Church are holding a Harvest Thanksgiving Supper at the home of Rev. and Mrs. Wallis on Wednesday, October 14th, from 5:30 onwards. Supper 25c.

LAKESHORE

Winnie Stoddart, Lynn Phillips, Henry Tiedeman and Fred Beal left for Vancouver by car on Saturday.

Mr. and Mrs. L. H. Graham and Mr. and Mrs. George Franson made a business trip to Edmonton on Monday.

Mrs. Gladys Plante has been confined to bed with a severe cold for the past few days.

Miss Ethel Baines of Gadsby has been visiting in this district for the past few days.

At last the weather has straightened out and we are getting a spell of Indian summer. If the weather remains as it is at present everyone should finish threshing this week.

Bank of Montreal Changes Location

During the week some of the fixtures of the present Bank of Montreal banking rooms have been moved to the new building recently erected for banking purposes. Over the week end it is expected a complete removal will occur.

Evidence of its confidence in the future of Tofield has been shown by the Bank of Montreal in the erection of its new office building here.

The new building, which houses the local branch of Canada's oldest bank, is the successor to several other offices that have been utilized by the bank since its establishment here nearly thirty years ago. The first office was opened by the former Merchants Bank of Canada (now for many years part of the Bank of Montreal) in a rented frame building which stood on what is now the golf course. This was in 1907 when the site chosen was right in the business district. The next premises occupied by the bank were on the former site of the Edmonton City Dairy branch; these were followed by the building near the railway station which has served for many years, and the present new office that it is hoped will serve the bank's clientele for some time to come.

The new building is a single storey stuccoed frame structure on concrete foundations. In addition to the banking room in which a solid vault has been constructed, there are living quarters in the rear. Externally it is a substantial addition to the appearance of the town and a tangible expression of the bank's service to the community.

OBITUARY

There passed away at the Misericordia hospital, Edmonton, on Sunday, October 4th, Mrs. Chornohuysh, at the age of 47 years. The deceased lady had been seriously ill for some number of months and despite all efforts on the part of those caring for her the final call came on Sunday.

Mrs. Chornohuysh was born and raised in Poland and came to Canada and the Tofield district thirteen years ago. She leaves to mourn her loss a loving husband, one daughter, Mrs. J. Yakabuski, Tofield and three grand-children.

The funeral was held on Tuesday morning, service being held at St. Francis Roman Catholic church. Interment took place in the Tofield cemetery.

List of Floral and Spiritual Offerings:

Loving Husband; Mary, Jim and family; Stan and Nettie; Mr. and Mrs. Schmaltz; Mrs. Snell and family; Mr. and Mrs. Hansen and Mr. and Mrs. Ward and families; Mrs. Bruhg, Annie, Frankie and Mr. and Mrs. H. McGinitie; C.W.L., Tofield subdivision; Mr. and Mrs. C. Kallal and family; Mr. and Mrs. W. Kallal and family; Mr. and Mrs. E. Wuetherick; Mr. and Mrs. P. Nahrebeski; Mr. and Mrs. Pat Glada; Sisters of Service, Edmonton; Mr. and Mrs. V. Krul; Mr. and Mrs. Paul Sirdar; Mr. and Mrs. Geo. Carter; Mr. and Mrs. Tom Nahrebeski; Mr. and Mrs. M. Showchuk; Mr. and Mrs. A. P. Moen; Mr. and Mrs. T. Lavoir; Mr. and Mrs. Nacsikio; Mr. and Mrs. Evanion; Mr. and Mrs. Glasikio; Mr. and Mrs. W. Marcichiw; Mr. and Mrs. S. Evanovich; Mr. and Mrs. Rakober; Annie Audienko; Mr. and Mrs. Yatiw; Mr. and Mrs. J. Corbin.

CARD OF THANKS

We wish to express our thanks to those many friends who tendered to us expressions of sympathy and who rendered help in our recent and bereavement.

F. Chornohuysh and daughter Mary

TOFIELD WHEAT CLUB COME ELEVENTH IN PROVINCE

Out of some 53 Junior Wheat Clubs, listed in order of average score, Tofield is placed eleventh. The highest score in the Tofield Junior wheat club was obtained by John Warner.

The following is the standing of the members of the Ryley Junior Grain Club as shown by the judges' score of their standing fields.

Name	Points
1. Hilmer Moen, Tofield	86½
2. Marvin Moen, Tofield ...	85½
3. N Patterson, Tofield	85½
4. R. Patterson, Tofield	83
5. M. Nord, Ryley	80
6. C. Berild, Tofield	78
7. J Berild, Tofield	77
W Kropielnicki, Ryley ..	77
9. A Annabo, Ryley	75
Ralph Zook, Ryley	75

Others competing were Arnold Berg Tofield; Lloyd Berg, Tofield; Clifford Pepper, Ryley; P. Annabo, Ryley; G. Hillerud, Tofield; N. Nernason, Ryley; A. O. Haugen, Tofield; Berry Pepper, Ryley.

KETCHAMOOT

All the threshing was finished the middle of the week for which we are truly thankful, let's show our thankfulness by going to church at least, on Sunday next, October 11. Thanksgiving services at 11 a.m.

Doris, the seven-year-old daughter of Mr. and Mrs. Leslie McGinitie, met with a very painful accident on Sunday. When returning home from Sunday school she was thrown from a horse, breaking her leg. Dr. Law rushed her to the hospital, but we hear it will be a week before it is set, waiting for the swelling to go down. Doris seems to be very unfortunate, two years ago she had her collar bone broken.

Mrs. Whillans, Misses Nellie Lindsay and Hazel Sears and Stanley Sears spent the week-end visiting in the city.

Miss Nora Kennedy returned to her home near Poe one day last week, after spending three months at the C. A. Ingram home.

Mr. and Mrs. John Brown entertained a few friends and relatives to Sunday dinner. Those were, Mrs. Gratz, Mr. John McGinitie, Mr. and Mrs. Oscar Barnes, Mr. Huff, Mr. and Mrs. J. H. Ingram.

Mrs. Davison entertained a number of friends to afternoon tea on Tuesday in honor of Mrs. Harriman.

Testing Crops for Quality

The world's vast burdensome surplus of wheat that has been depressing price for the past few years is fast disappearing. Wheat prices in consequence have risen. To obtain the greatest benefit from higher prices farmers should produce a high quality crop. See the nearest Searle or Home Agent about having YOUR crop tested for quality.

SEARLE GRAIN COMPANY, LIMITED 32

No money required!

Under our Flour Exchange System you don't need money. Just bring your wheat to our elevator and take home a load of high grade flour. It costs less. Use "Gillespie Maid" Feed products. SEE OUR NEAREST ELEVATOR AGENT.

GILLESPIE GRAIN CO. LTD.

Exchange Wheat For Flour

We havev a carload of Apple Blossom Flour arriving next week which we can exchange for wheat on the basis of—

28 lbs. Flour for 1 Bushel of No 1 Northern
27 lbs. Flour for 1 Bushel of No. 2 Northern
26 lbs. Flour for 1 Bushel of No. 3 Northern

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

MAIMERS, CRIPPLERS AND KILLERS

T[illegible] without: I shall be [illegible] the streets.—Book of Pro[illegible]

[illegible] and later ages of life, in [illegible] half and the second half, in [illegible] backward and [illegible] among pro[illegible] or crude or [illegible] blazing tropics [illegible], what are the chief [illegible] and killers of the [illegible]

In the earliest days the primitive [illegible] some kind of health by [illegible] away from accumulated camp [illegible] by keeping away strangers [illegible] strange diseases. A [illegible] isolation [illegible] disease, a modern [illegible] travel and [illegible] many. Primitive [illegible] safety in their [illegible] from an[illegible] break that is[illegible] to meet at [illegible] settlement, with a [illegible] to deal with disease [illegible] by Science.

[illegible] the ages, when the pro[illegible] gave had been [illegible] the protection that [illegible] had not yet been gained, [illegible] way. It was [illegible] when there was not a [illegible] a pestilence somewhere [illegible] the Great Plague [illegible] struck London in 1665, [illegible] than half a million [illegible] the deaths rose to eight thousand or more a week, it is true that the Plague had been endemic, that is constantly more or less active, with considerable death rates in London for sixty years before that.

The middle ages were truly pestilence ridden, so are many places in the world today. In spite of Pasteur and Lister, Koch and Ronald Ross in many regions still the infections are the great toll-gatherers for Death. In the tropics, except where they are well health-officered, as in the Panama Canal zone, malaria is the greatest menace to life and health and to industry as well. It was malaria by the way, more than anything else that knocked the physical and mental and moral bottoms out of the glory that was Greece. As it spread, even the literature shows deterioration and growing pessimism. While malaria in Canada is negligible, yet Osler thought, the whole world over, it is today the greatest killer and maimer of the race. Tuberculosis, consumption, the Great White Plague was for centuries "Captain of the Men of Death" in many countries. Now in a couple of generations, the captain is reduced to corporal or less, though still Field Marshall or Commander-in-Chief in many ignorant, low-living, poverty-depressed communities, such as those of our half primitive but house-dwelling Indians. They live in houses but don't know how. In Manitoba the Indian death rate from tuberculosis is twenty-four times that of the uninvited white.

In some pitiful places of the earth, such as the Yellow River Valley of China, hunger still snipes by retail, as it has done among all primitive peoples whose living depended upon the happy chances of the hunter, and still slaughters by wholesale at times of flood and calamity. In Russia in the past five years estimates of deaths from famine range from three to fifteen millions.

Our own boasted civilizations, which in many ways have little enough to boast of, have their own killers, maimers and cripplers. Ordinary people like ourselves can lose health and vigor and even life by eating—or slimming—not wisely but too well. From streets and highways the demon speed vomits into hospitals the broken bodies of young and old. Too often booze-lighted morons are at the wheels. And a Great War, monumentally stupid, with giant scythe, lays many millions of lusty youth, a needless and world-devastating harvest, in the rotting swaths and windrows of horrid death.

Which, then, is the greatest killer or maimer or crippler of them all? After all, the world is wide and the ways men live and die are very various, so that this evil pre-eminence can scarcely be adjudicated.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

SINGLE RURAL RESIDENT UNEMPLOYED MAY BE HIRED BY FARMERS UNDER FARM HELP UNEMPLOYMENT RELIEF

A circular letter, from the Unemployment Relief Commission, sent to the secretaries of municipal districts states that an agreement has again been entered into between the Federal and provincial governments whereby farmers wishing to employ help to excess of their normal requirements may make application to the secretary-treasurer of a municipal district or to the R.C.M.P. in unorganized territory.

On investigation, if it is found that the applicant is not discharging help in order to obtain the benefit of this agreement and that he is applying for help that he would not ordinarily require, local authorities may recommend to the Bureau of Labor nearest to their station that help be furnished from the single, homeless, unemployed men that have been registered with the commission.

So far as the municipal district of Cornhill and other municipal districts are concerned applicants must be recommended by the secretary, reeve or local councillor and one responsible person to whom the farmer is known.

It is pointed out that the commission will consider applications submitted by farmers who wish to obtain help from single unemployed men in rural areas. A separate application which will require the approval of the commission before such men will be accepted under the plan must be completed. The foregoing is intended to apply only to single, homeless transients or to single unemployed residents of rural districts whose families are in need of such assistance.

The commission has agreed to pay each man accepting this class of employment the sum of $5.00 per month for clothing and necessities on presentation of a certificate signed by both the farmer and farm worker. An additional allowance of $2.50 per month will be paid to those commencing employment prior to February 1, 1937, provided they remain in continuous employment from the date placed under the plan until March 31, 1937. The commission will also pay to the farmer the sum of $5.00 per month for each person placed with him under the plan, but no payment will be made to the farmer if the period is less than 30 days.

Farm help unemployed relief plan forms for use in connection with single unemployed men in rural districts are available at municipal offices. The regulations state employment of immediate relatives will not be permitted under this scheme.

DON'T SPOIL YOUR SAVINGS ★

THE accumulated assets of the life insurance policy-holders of Canada are the largest—by far the largest—single class of investment holdings in the country. They include every type of non-speculative investment, but owing to the nature of the insurance contract the greater part of them consists of credit claims against property, with principal and interest payable in fixed dollar amounts, rather than ownership equities whose value and income depend upon earnings. The owners of these investments are only nominally the insurance companies themselves, some of which are wholly mutualized, and all of which administer total funds in which the shareholders' proportion is an almost infinitesimal part: the real owners are the policy-holders themselves. And in spite of the existence of a fair number of very large policies which may be regarded as a class of rich men's investments, the typical policy holding is a matter of a few hundreds or thousands of dollars, the chief asset and the metaphorical anchor to windward of some industrial, commercial or professional worker who has not accumulated and never will accumulate any other important asset.

No act of destruction or partial destruction of the value of any such credit claim, be it a government bond, a municipal bond, a public utility bond, a railway bond, an industrial bond or an ordinary property mortgage, can ever fail to impair the assets of the life insurance policy-holders of the country. Any widespread destruction of such values must necessarily render the assets of the policy-holders inadequate to perform the function for which those policy-holders rely upon them. The same is true of any tampering with the value of the unit of currency in which these credit claims are expressed. Policy-holders who have any real regard for the interests of their beneficiaries—the women and children for whose benefit the vast majority of life insurance policies are taken out—should set their faces immutably against all government tendencies leading to partial or complete repudiation of debt contracts, for such tendencies are destructive to the whole system of insurance.

The object of insurance is to make something sure. The effect of repudiation is to make everything unsure.

★ This editorial, taken from "Saturday Night", Toronto, is so timely and informative that it is reproduced here as one of a series of messages sponsored by Life Insurance Companies in Canada.

LIKE A PICTURE—

THERE WAS a time here, not so far distant, that no matter where one stood he or she was reminded that this was a western country, still in the pioneer stage. If one wished to go back a little farther still, it would be easy to conjure up memories of roads on the sides of hills because the level places were impassable; or corduroy roads through swamps, that, were they in general use to-day would test the springs of the best of automobiles. Bush, dense bush would be encountered everywhere and a "pot-hole" was all and more than the name implied. There is an old story of a teamster coming to a pot hole and observing a hat lying there, gingerly picked his way over to pick it up. To his great surprise, there was a man under it, to whom he said: "Gee whiz, but you are in deep." "In deep," the man under the hat replied, "You bet I am, and I am standing on a load of hay."

Times have changed. Last week we were out attending a tractor demonstration, drove over a road that was graded as high and smooth as any road need be and on into a field where the soil, while quite black was friable and soft. After observing the tractor for some time, we looked around and the countryside was pleasant to look upon. It was autumn of course, and the fields were clear of this year's grain, but in each direction, east as far as the lake, literally fat acres lay level with proof of fertility. Standing there we thought the whole scene looked like a picture—out of the Country Gentleman or some such kindred magazine.

CHANGING THE COWS NAME—

A year or so ago we had a heifer calf that we had no accommodation for. Rather than kill it, thus permanently cutting off a future supply of energizing milk, we "boarded" it out with a district farmer. According to custom we gave her a name, and as the prevailing expression at that time was "the Depression," we named her in conformity with the times, "Depression." The farmer's wife didn't like the name very well, so shortened it to "Dippy," and we are not quite so sure that the farm wife was referring to the calf when she first called it by name. However, it would now appear as if the calf—it is now a cow—has to be renamed, and if the prevailing mood is observed, we will call her "Prosperity."

For some time past, a matter of years, economists have insisted that before real recovery could take place international stabilization of currencies would have to be brought about. To the Alberta farmer international stabilization of currencies may sound like something afar off, yet in actual fact, currency affairs of other countries means much to him. Alberta is an exporting agricultural province which condition when viewed from an individual viewpoint means each farmer is indirectly an exporter. Direct importers and exporters place great importance upon the currency affairs of countries with whom they do business. Of course there is nothing any Alberta farmer or group of Alberta farmers can do, regarding foreign currency stabilization. At the best it is just a question of getting an understanding of it so that matters closer home—particularly these things concerning prices—can be better understood.

Of course it should be recognised that the immediate present improvement in the price of grain is largely due to the two North American drouths of 1934 and 1936. But it is also true that other things have and will again play their part as regards prices.

In prewar days with the gold standard working as it was designed to work, most of the currencies of the world kept pretty much in line. There were fluctuations of course, many people making a practice of buying this or that currency as they believed they would go up or down. Fluctuations were, however, fairly well confined within certain limits. With the coming of the war and its aftermath consisting of extra tariffs, embargoes, quotas and devices designed by governments presumably to protect their peoples, coupled with violent currency upheavals in Germany, France, Russia and elsewhere, the whole thing became a mathamaticians' nightmare, exporters and importers finding the going hard. While it is not true to say currency fluctuations caused the depression, it is true to say they played no small part in impeding recovery. Consequently ere the depression was two or three years old, steps were taken to bring about some form of stabilization.

After rather elaborate plans had been laid which involved visits to America by Europeans and visits to Europe by Americans an international economic conference was called to take place in London, England in mid-summer of 1933. Then a strange thing happened. After being one of the chief instigators of the conference, President Roosevelt refused to line up the American dollar with the British pound and French franc. In a surprise decision which left his own men as non plussed as the Europeans, he in effect requested his men to come home, and the conference just naturally "blew up." The wisdom of this action is still being debated in the United States, the concensus of opinion being that under the circumstances it was a wise move. From the time the conference was first suggested, to the time it was actually held the N.R.A. had come into being with its main purpose of raising prices, particularly of farm products. It was not possible for the United States President to follow the course of the Blue Eagle and tie the American dollar to foreign currencies at the same time, so he wisely, for the time being at least, "went it alone." Before the end of 1934 President Roosevelt let it be known that should the European countries desire stabilization, Washington would not stand in the way. This hint met with a cool reception in Great Britain and Europe and for the time being the subject was often spoken of but nothing done.

For quite a long time now, many economists have predicted that sooner or later the "Gold Bloc" consisting of France, Italy, Switzerland, Belgium, Poland and the Netherlands would have to revalue their currencies. Most other countries had already done so and it was becoming increasingly difficult for the Gold Bloc to maintain progress along the road of recovery which a number of other countries were enjoying. The news of the collapse of the gold bloc broke quite recently and already a certain alignment of currencies have taken place. But it would appear that the prediction of economists of a second international economic conference is likely to come true. Be that as it may, a great many of the currency difficulties will be ironed out in the immediate future, which in turn means a greater freedom in the movement of goods from country to country. This greater freedom of movement and international trade expansion is, many economists believe, the commencement of a new era of world prosperity.

Let us hope they are correct and that we have to change the name of that cow.

SOUTH-BOUND MONOPLANES

By Tony Lascelles in "Forest & Outdoors"

WHEN THE sons and daughters of the Great White Crane winged their way southward in the fall of the year, clothed in the golden plumage of youth, the Indians of the western plains believed they wintered in a land beside the sun. What else, they said, could explain the transformation from gold to the purest of white, embellished with darkened head and black-tipped wings, for so, attired like their parents, they returned in the spring to the land of their birth, bleached and charred by intense heat.

In our childhood days, as we heard faint twitterings or the swish and whistle of fast beating wings filtering through the darkness of the autumn night, we wondered whither the birds of summer wended their hurried way. And when the garden and shrubbery about our homes became miraculously populated with flocks of feathered songsters, who disappeared when darkness fell, we wondered, too, but without inventive thought, whence they came, and why.

The migration of birds has ever excited the imagination of northern dwelling people. Why do they leave us when autumn frosts the woods and marshland? Why do they return when the verdure of spring appears? And so, myth and legend of an untutored past bring to us the lore of bygone times, seeking to explain what, even to the mind of adult man, was complex and obscure.

To-day, however, we know full well that the reason for the orderly departure of migratory birds is a waning food supply. Nevertheless a few varieties remain, accepting the hazards of a boreal winter while precariously subsisting on seeds, berries, and hibernating forms of insect life.

The motive for their return brings forth many explanations from several schools of thought. Lack of nesting sites about the wintering areas, caused by density of population; special food requirements of nestlings which only the temperate north can supply; and the instinctive love of an ancient home inhabited throughout the year in the dim distant past before the last glacial sheet covered the upper reaches of the continent, are among the theories offered.

Strangely, the latter theory finds acceptance in the old beliefs of at least one tribe of northern Indians; for a time honored legend not only suggests why the birds of summer return at the advent of spring, but also the original cause of migration to warmer winter climes. Thousands of years ago, it is related, the ancient forbears of the race were driven south in the van of advancing ice. Birds and beasts shared the long journey, returning with their people ages hence on the heels or receding cold. The summer months of the homeland again became warm, while the winter, which was previously mild and generous, remained arctic in intensity. In consequence, many feathered inhabitants were compelled to seek more bountiful climes when chill winds blew from the north and hunger threatened with a menacing gesture. A longing for the old home, it is said, excites them to fly northward when the deep carpet of snow melts to the ground and the buds of the aspens are thick and sticky..

It is generally thought, however, that crowded conditions and the increased exertion to procure food in the south, at a time when the northern regions teem with eatable things, would stimulate a migration which, through the ages, has become instinctive, irrespective of actual need. Be that as it may. For whatever the cause, we welcome their arrival with the same fervour as we wish them bon voyage, not merely because of their beauty and song, but for their economic value as destroyers of harmful insects and the seeds of noxious weeds.

Where our migratory birds sojourn in winter is now a matter of record. The routes which many species travel as they wing a tireless way to and from the breeding areas of the north are even plotted and mapped. The Scarlet tanager, "the bird like a glowing coal, bright enough to set the woods on fire," who summers in the north eastern United States and south eastern Canada, has two known migratory paths which span the Gulf of Mexico, converging in Honduras. From there it proceeds by a single route to the equator. Another path, used entirely by water birds, begins in Nova Scotia, crossing the sea to the north east coast of South America over hundreds of miles of uncharted waves. Other routes criss-cross the continent like the invisible threads of a gigantic web.

This interesting knowledge, and what it teaches us in the interest of conservation and protection, has been greatly enhanced during recent years through the systematic medium of bird banding operations pursued under permit in accordance with the provisions of the Migratory Birds Convention Act. Different species of birds are captured in specially designed traps and tagged on the lower end of the leg above the foot with light aluminum bands, and then released unharmed. Each band bears a serial number of which record is kept at Ottawa and Washington, containing the bander's name, the species of bird banded, and the date the band was attached. Days, weeks, months, and sometimes years later, the identified bird may be killed or captured. The band is removed and forwarded to the authorities as directed thereon, giving us, as it were, a case history of its wandering. History is written on every band. In 1913, a common tern and one hundred unfledged young were banded on Muscungus Bay, Maine. Four years later a native wading in the sea on the west coast of Africa found a strange white bird lying dead on the shore with a metal band about one of its legs. Surprised at the find he took it to a missionary, and thus the band and record came back to the country of origin. The log of this long voyage with its difficulties and final disaster we will never know, but even the bare record is pregnant with romance. In Canada, natives who return bands removed from the legs of birds found dead or killed for food are rewarded by the government with an enamelled medallion for their interest, a gift responsible for much valuable information which otherwise might be lost to ornithological science.

At the moment bird banding operations are carried on by approximately 2000 scientists and amateur naturalists residing in every part of Canada and the United States, with the result that to date, about 110,000 migratory birds have been tagged, involving nearly 200 different species.

Through bird banding and closely observing their habits we have also learnt that generally the farther north they breed the farther south they spend the winter, skipping over the less mobile species. Thus, birds that summer in areas of the continent which are temperate throughout the year, for the most part move south only a limited distance in the fall. The Fox sparrows who breed about Vancouver only migrate to the states of Washington and Oregon. On the other hand, the Arctic tern breeds as far north as it can find land, and winters as far south as there is water to provide food. The distance travelled annually on this amazing journey from the Arctic to the Antarctic and return is 22,000 miles. Aided by instinct alone and seemingly ill-equipped for such an arduous feat, the accomplishment of this little feathered traveller dwarfs the adventurous undertakings of man.

Birds do not begin their migration en masse. From late summer until the last cold days of fall a stream of different species pass along the sky routes to the south. Certain varieties of waterfowl remain even after ice fringes the marge of the northern lakes and marshes, as if reluctant to leave. Others do not care to linger at a time when the countryside is generous with their needs. The young are full fledged and strong, and they heed the appealing call of the balmy south with the same instinctive impulse that compels their return. Many species fly to and from their winter stations, only when darkness covers the land, resting and feeding from dawn to dusk. Others travel by day, feeding as they flit from covert to covert, in more leisurely fashion. Certain species take off for the long journey in flocks like geese and crows, and some in pairs and family groups. And so, in like manner, they come back to us when the snows of winter have gone from the ground and insects and seeds and other favored food are exposed for the taking.

(Continued from front page)

Howard Lee of Edmonton was calling on friends and relatives in our district on Friday of last week.

Mr. James Ratigan, Miss Kathleen and James Ingram motored to Edmonton Monday, returning home in the evening.

Misses Edith Davison and Ethel Coombes and Harold Coombes were Sunday evening visitors of the Ingram young folk.

Mr. and Mrs. Henry McGlaitie were Edmonton visitors on Tuesday.

Mr. and Mrs. W. A. Mitchell visited at the home of Mr. and Mrs. C. A. Ingram Monday afternoon.

A family (we did not get their name) all their stock and belongings came up from near Calgary one day last week. They will reside for the winter in the Sam Nomeland house, formerly occupied by the Marsh Mitchell family.

AMISK CREEK

E. A. Moen, P. O. Flaaten and R. O. Berg shipped some hogs and calves to Edmonton last week.

Miss Astrid Moline has left for Walla-Walla, Washington, where she expects to stay for some time.

Miss Edna Moen has been on the sick list for the past week. We are glad to report that she is much improved now.

Mrs. P. O. Flaaten returned last week from a three week's trip to the Coast.

The young people of this district held a farewell party for Nora Sand, who is leaving shortly, on Friday evening at the P. O. Flaaten home. About thirty guests were present, all enjoying a pleasant evening of games and music. Nora was presented with a small purse of silver from her many friends. Lunch was served after which everyone returned to their homes, all voting a very pleasant evening.

Mrs. L. Rolfstad and children and Arthur Moen from Bardo were callers at the P. O. Flaaten home one evening last week.

Merl Hillerud who is attending Normal school in Edmonton spent the week end at her parents home here.

Arnold Berg has left for Edmonton where he will take a course in aviation.

Mr. S. Stenson, who is over here from Norway to visit friends and relatives was a visitor at the R. O. Berg and P. O. Flaaten homes last Friday.

Miss Doris Glasinger visited the city last Saturday and Sunday.

E. A. Moen visited the city one day last week.

The young people have arranged a program in the church next Sunday evening. Everbody welcome.

Hilmar Moen who is working at an elevator at Waskatenau visited his parental home last Sunday.

Nora Sand left Sunday morning for Hainsburg where she expects to spend most of the winter. S. Hanson and Gordon Sand accompanied her to Edmonton.

Mr. and Mrs. Jacobson, Truman and Mavis from north of Tofield, Mr. and Mrs. A. Haukedahl and children and Hannah Jensen from Bardo were guests at the E. A. Moen home last Sunday.

Mr. and Mrs. J. Holtie and son Milo from De-May were visitors at C. Eriksons last Sunday.

The Ladies' Aid met at the home of Mrs. Sam Olson on Tuesday of this week.

Pearl Patterson and Alfreda Berild who are attending high school in Ryley spent the week end at their parents homes here.

LINDBROOK

Well, it looks as if the Indian Summer is here, and let's hope it lasts awhile, to give us all a chance to do those things that we have been hindered from doing by the wet threshing season, also to fix up the "dens" for our winter hibernation.

The monthly meeting of the L.C.C. was held last Wednesday at the home of Mrs. A. C. Scott who was assisted in duties as hostess by Mrs. T. Evans. The meeting opened with "Hail, hail, etc., (no not that one but the usual one which is we believe "Auld Lang Syne" revised version. The roll call was answered by "Helpful Hints" and quite a few nifty ones were heard. Mrs. A. Scott gave a poem, rendering it in the original broad Scotch accent, and later was asked for a translation as to what it was all about. A dainty lunch was served and the afternoon went very pleasantly. The next meeting is to be held at the home of Mrs. J. Bailey on the last Wednesday of the month. Visitors present were Mesdames N. Ellis, Bracegirdle and Mrs. Joe Lepine.

Mrs. Whibley returned from her trip to the coast last week.

Lindbrook school children did very creditably in the school fair at Tofield this year as the published list in the Mercury shows.

Mr. A. Scott was a visitor to Ardrossan this week.

Quite a few sales are being held here. The exodus before the 40 degrees below stuff starts. Evidently the lure of the "dividend" is not proof against the Arctic's stuff.

Skunks seem to be quite lively again. No need to see them you know, and we hear one young lady had the misfortune to meet one with dire results.

WHEAT CLUB RESULTS

(Continued from front page)

2. Max Zook, Ryley 77 4/7
3. C. Berild, Tofield 76 2/7
4. Marvin Moen, Tofield ... 74 3/7

Others competing were Arnold Berg, Tofield; Lloyd Berg, Tofield; Clifford Pepper, Ryley; Donald Pepper, Ryley; Hilmer Moen, Tofield; A. Annebo, Ryley; P. Annebo, Ryley; Olaf Haugen, Tofield.

UNITED CHURCH NEWS

Thanksgiving services will be held at Ketchamoot, Lakeshore and Tofield on Sunday, October 11th.

Let us give thanks in a worshipful and also a practical way. Special music by the choir.

Anniversary services are to be held on Sunday October 18th. The Rev. Alex Stewart, B.A. is to be the guest speaker.

The services will be held at 11 a.m. and 7:30 p.m. Sunday school in the [illegible]

The anniversary banquet will take place on Monday the 19th from 5:30 to 7:30 p.m. A concert in the church at 8 p.m.

RUMOR-MONGERS FAILED

No other industry takes the elaborate precautions that the automobile industry does to bottle up secrets of its new products, says Detroit Auto Reports, and this Fall has been no exception. "The mystery has been extended this year to greater and lesser degrees," continued the statement in a summary of 1937 model plans, "dependent on the importance of the forthcoming program. Each year, however, there have been leaks. Detroit, with the livelihood of its million-and-a-half inhabitants closely linked to the automobile industry becomes a city of gossips. Companies, realizing that information of new developments can hinder the sale of current models, adopt a number of subterfuges to conceal their plans. Orders for a part never give any more details than is absolutely necessary, leaving each department in the dark on what the other is doing. Design rooms are closely guarded. Test cars travel at night under the disguise of old bodies. In keeping the complete nature of its 1937 program from employees as a safeguard against leaks, one company, in the quality group that is planning a radical departure this year, started three different motors down the line. Only one had the approval of executives, but few understood which of the three. The result is that while many rumors regarding the product have been circulated, a select group alone knows what is in the wind."

THE UNIVERSITY ON THE AIR

"When is the University Station coming on the again?" "We have missed the University Radio programs badly this summer. When does the station commence broadcasting again?" These [illegible] questions are being received by the Department of Extension every day, by telephone, mail and through personal visits. The answer to all is that the opening program inaugurating the ninth year of the University Station's activities will be broadcast on Friday, October 2nd, commencing at 7 o'clock. The regular schedule for the fall months will begin on the following Monday.

There is naturally the widest variety in listeners' tastes, and in building the program each year, considerable thought is given to making the talks series, music and drama of interest to varied groups. On the program for this fall there is something for almost everyone. The farmers have long appreciated the work of the scientific Agriculturists at the University, and the radio brings them into almost daily contact with these men who, on the Farmers' Forum, given at ten o'clock, give the very latest information and advice on agricultural matters. The interests of women and the general listener are not forgotten in the afternoon series. Are you interested in nature, and do you want to develop the "seeing Eye"? Then make a note of the talks to be given by Leslie Sara on "What Nature Can Show Us." This naturalist will take his listeners for rambles round the countryside, and they will find that under Mr. Sara's direction, the common sights of the fields and woods will open up new vistas of interest and delight. The Health Period still has its place on Monday afternoons at two o'clock. This series has a large following, as listeners know they can absolutely depend upon the advice and information given.

THERE ARE DIFFERENCES

Is there any difference between Pool elevators and line elevator companies? The latter seem anxious to prove that both are the same, but there are several essential differences.

1. Alberta Pool Elevators are the property of 43,000 Alberta grain producers. They are built for service and not for profit. This is not the case with line elevator companies.

2. The finances and operations of Pool elevators are an open book. Each year they are scrutinized by seventy delegates who are representatives of the producers. The detailed operations of the whole system and of each and every Pool elevator are thus obtainable from elected delegates. Is there one line elevator company who will provide customers with such information?

3. The Pools use the grain exchange. But this does not imply an idolatrous attitude towards that organization. The Pools believe that the demonstrated weakness of the speculative system during the depression had a serious reflection in the collapse of agriculture, and that a national wheat board would have offered greater protection. The line elevator companies are not in favour of a national wheat board and never were. John I. McFarland, who conducted stabilization of wheat prices for five years, testified: "Theoretically the open futures system is an ideal system for the handling of wheat, if it works; but when it fails to function, as it has failed, because of world-wide subsidies, over-supply and absence of speculators to carry the hedges, then my sympathy leans entirely toward the producer and his protection."

4. The Pools believe the Canadian wheat producers should be given assistance and protection to as great a degree at least as other interests in Canada. The Pools maintain that agriculture is Canada's most important industry and cannot be neglected. The grain trade, on the other hand, continually campaigned for marketing Canada's wheat at "world prices."

5. The grain trade say that the Pools' operations cost millions. That is a pure fabrication. Under the McFarland stabilization operations Canadian farmers produced, and marketed the surpluses of, wheat crops totalling more than one billion bushels, the Canadian prices were maintained at a substantially higher level than those of competing countries. For months the Canadian premiums ran as high as 25c. a bushel over prices of competitive wheat.

6. The Pools believe that agriculture needs an aggressive co-operative organization supporting its interests and reflecting the expressed wishes of producers and not subservient to vested interests.

7. The line elevator companies resent being designated as a "family compact", but the very advertisement denying this relationship was a joint affair and tends to substantiate the statement.

FAR-SEEING GRAIN PRODUCERS WILL SUPPORT
ALBERTA POOL ELEVATORS

Pools and the Marketing of Grain

The country elevators use the present marketing system because experience and numerous investigations have proved it to be the best and cheapest way of handling and marketing Canada's wheat.

The Western Pools, who are members of the Winnipeg Grain Exchange, state that they use its facilities because they have no other alternative. They have other alternatives. They could:

(a) Sell direct to Canadian exporters;
(b) Sell direct to overseas millers;
(c) Sell direct to overseas importers;
(d) Establish their own Pool Exchange.

They do none of these things, because they know that the open market, of all systems tried to date, affords the farmer the best price and the best protection. In other words, they use their memberships in the Winnipeg Grain Exchange in the same manner as the other country elevator companies use theirs, and for exactly the same reasons.

It may be that some better system can and will be evolved by conference, investigation or experiment. If any other system of marketing which will prove of greater benefit to the farmer can be evolved, it will receive its earliest and strongest support from the elevator companies whose pride it is to have been in the vanguard of service to the farmers of the West for more than thirty years.

The North-West Grain Dealers' Association

LAKESHORE

On Thursday last the ladies of the Tofield U.F.W.A. met at the home of Mrs. J. B. Warner. This meeting was the annual birthday party of the organization. The ladies celebrated the occasion by dressing as small children. From all reports some of the costumes were very good. Mrs. C. Baptist won the prize for having the best costume.

After spending the week end at home Miss Ethel Graham has returned to her school near Mannville.

Miss Marie Graham spent Thanksgiving Day at home.

Nearly everyone in this district is working in the fields in preparation for the next crop. This is the first fall in many years that much field work has been done.

UNITED CHURCH TO HOLD ANNIVERSARY SERVICES

Sunday next, October 18th will be observed at the United church, Tofield, as Anniversary Sunday. For the special occasion Rev. Alex. Stewart, of Edmonton, a former minister here will deliver the sermon at Tofield morning and evening and at Ketchamoot in the afternoon, assisted by Rev. D. K. Allan, resident pastor here.

There will be special music by the choir and Mr. Broughton will sing. All are welcome.

KINGMAN

Mr. and Mrs. Fenwick have moved to Sterko, Alberta for the winter months.

Mr. Milo Fugium is home again after being at the Royal Alexander Hospital at Edmonton, since May 1.

Mrs. Rognes is having her house remodeled her son Stanley and Mr. E. Rognes being in charge of the work.

A few friends called on Mrs. J. K. Dettwiler on October 6th to help celebrate her 75th birthday.

The Ladies' Aid was held at Mrs. Simon Simonson's and was well attended.

A special meeting of the Ladies' Aid will be held at the Kingman hall on October 22.

Miss Esther Wideman is staying with Mr. and Mrs. Norman for the winter.

Miss Connie Erickson, who is attending school in Edmonton spent the week end at home.

Mr. Dan Simonson and family have returned home after a short stay with relatives here.

Miss Alice Simonson attended the Teachers' Institute which was held at Camrose on the 8th and 9th, of October.

Miss Marie Lawson was home for the Thanksgiving holiday.

Threshing is nearly completed in this community.

Brother and Sister Meet in Holden After 52 Years

We are indebted to our Ketchamoot correspondent for the following interesting and unusual story. Fifty-two years ago a young man left Sweden to try his luck in the beckoning country of America. Among other loved ones he left behind him a sister, who also, a few years later answered the call of the outer world. A new country, new friends, changing conditions and letters that went astray broke the connection between brother and sister, until quite recently at Holden they met once again for the first time in fifty-two years.

Mrs. Henderson, of Holden, who is the mother of Mrs. Percy Owens, is the sister involved and an United States tourist into Canada is the brother. Mrs. Henderson's brother, accompanied by his wife, up on a tour of Western Canada from Tipton, Iowa, stopped over at Edmonton. Speaking with people there he learned that a lady who might be his sister was living at Holden. Making the journey to Holden down from Edmonton the brother located Mrs. Henderson and sure enough found that she was his sister. Parting as young brother and sister in Sweden—52 years later they meet at Holden, Alberta.

LOCAL AND PERSONAL

The Women's Missionary Society will hold their thankoffering meeting in the United church on Thursday, October 22 at 3 p.m. A special program has been arranged and lunch will be served. All ladies are cordially invited to attend.

Dr. Messenger of Edmonton spent the week end in this district. He was on a hunting trip.

Mr. and Mrs. Green spent the week end at Viking. Mrs. Green remaining for a short visit.

Miss J. Lukin visited Viking over the week end.

Mr. Ed Keibel is attending the livestock show at Edmonton this week.

Mr. and Mrs. Frank Wood visited at Tofield for two or three days this week.

Mr. A. Kendall and daughter visited Mr. and Mrs. H. Kendall for a few days.

Mrs. Jim Hannan of Camrose was a visitor to Tofield on Tuesday.

The final moving operations of the Bank of Montreal took place on Wednesday, and they are now located in their new building with everything spic and span.

Mrs. Malcolm and Muriel left on Tuesday morning for a short holiday at the Pacific coast. They travelled by bus.

Mr. A. Matchmoss visited his home at Strome on Sunday.

Mr. and Mrs. A. E. Allen motored to Red Deer over the holiday.

Mr. R. Whyte of Wetaskiwin visited Tofield over the week end, Mrs. Whyte returning home to Wetaskiwin with him.

Mrs. J. Jones is visiting her sister Mrs. Young here this week.

Miss Evangeline Trepanier of Castor is visiting Mr. A. Hummel here for a short time.

MOTHER LIES DEAD FOR SEVERAL DAYS WHILE BOYS BELIEVE SHE IS SLEEPING

ST. BONIFACE, Man. — Funeral of Mrs. Ivan Heath, 30 was held Tuesday of last week. In attendance were her widowed husband and the two young sons who for nearly a week played happily about the Heath home in the belief their mother was only sleeping.

One week ago Tuesday, Mrs. Heath went to bed after Mr. Heath had left for a northern Manitoba point. She did not awaken by bedtime and Donnie, six years old, and Lorne, four, got something to eat and went to bed.

They could not rouse their mother Wednesday. They again managed to obtain something to eat and played until nighttime. Mrs. Heath still slept Thursday and on Friday when Donnie and Lorne tried insistently to wake her.

Saturday afternoon the boys decided something must be wrong. They hadn't had much to eat for the previous two days, and they were hungry. They told a friend of their mother being asleep since Tuesday.

The coroner decided that death from natural causes, had occurred at least 36 hours before he was called in late Saturday.

WEATHER FORECAST MONTHS IN ADVANCE IS OBJECTIVE OF SCHEME BY EXPLORER

DETROIT — Establishment of weather stations in Arctic and Antarctic regions in an endeavor to solve the mystery of changing weather conditions and predict weather months in advance is the "central object" now in the life of Capt. Sir George Hubert Wilkins, Australian explorer.

Sir Hubert returned Monday to discuss the idea of international co-operation which has been behind all six of his polar expeditions, and will be one of the motives for his new expedition in a year or two.

He estimates the plan would be workable with 32 stations in the north and 12 in the south.

Of the points he thinks suitable in the Arctic, 20 already have stations, operated by Canada, United States, Russia, Sweden Denmark and Norway.

His next trip into the Arctic will be for the purpose of finding points in the polar seas, inaccessible except by submarine under the ice for the other two stations. The craft will cost $200,000.

MEN FORBIDDEN IF OLD SISTERS DESIRE LEGACY

LONDON—Two Baxter sisters of Harrogate, both in their 70's, will have an income of $800 a month if men keep away from their house.

Their brother, William Henry Baxter, died at the age of 86, leaving an estate of more than $1,250,000. He left them the monthly allowance on condition they do not allow any male person to reside in the [illegible]

The sisters are Georgina Todd Baxter, 75, and Lily Thorman Baxter, 76.

Said Miss Todd: "I am afraid he was very jealous of other men where we were concerned. He objected to us speaking even to the gardener. Though he was very close at home with money he would occupy the best suites in the best hotels in London."

KETCHAMOOT

Thanksgiving Services held on Sunday were well attended. Vegetables, plants and autumn leaves gave rather a thanksgiving spirit. Rev. Allan preached a most inspiring service.

There will be no Sunday School or Church services next Sunday as we have been invited to attend the services in town.

Miss Edith Davison entertained the Social Club at her home Thursday afternoon of last week, a most enjoyable afternoon being spent.

Mrs. Graves and sons of Calgary visited over the week end with Mrs. Graves' brothers, Jesse and Paul McMullen and families.

Misses Margaret Mitchell and Maude Wildman visited at the parental home over the Thanksgiving holidays.

Miss Nellie Lindsay spent the holidays at the home of her parents at Innisfree.

Mr. Harold Schultz visited over the week end with friends at Vermilion.

Mr. and Mrs. Coombes and family and mother Mrs. E. McMullen were Sunday guests of Mrs. Brown and family of near Bawlf.

Mr. and Mrs. C. A. Ingram were the guests of Mr. and Mrs. P. O. Moline of Shonts on Sunday.

Mr. Thomas Sutton and son Walter of Berrie, Ontario, came a week ago to visit at the different Sutton homes.

Mrs. Henry Sutton entertained on Sunday to a family dinner. Those present were: Mr. and Mrs. Jim Sutton, Mr. and Mrs. Albert Sutton and Mr. and Mrs. Joe Sutton and their families.

Mr. and Mrs. Donald Cressy and daughter, Frances and Miss Mary Ingram, all of Edmonton and Mrs. Owen were Monday dinner guests of the Sears family.

Miss Mabel Lawson and Mr. Lambert of Camrose were thanksgiving guests of Mrs. Lawson and Martin.

Master Raymond Sutton, son of Fred Sutton is suffering from blood poison in his hand caused from an injury received when shooting a bow and arrow. We hope he will soon be well.

Miss Hilda Nomeland of Tofield, spent the Thanksgiving holidays at the home of her parents also Mr. Arnold Steen of Bardo.

Miss Esther Winder who has been very ill is spending time recuperating at the home of Mrs. Henderson.

The Thanksgiving Tea and Sale of articles and home cooking held under the auspices of the Ladies' Aid on Wednesday afternoon was a decided success both socially and financially. They were favored with a beautiful day. Tea tables were set on the veranda, which was decorated with flowering plants. The tea was well patronized by ladies from town and Bardo as well as the Ketchamoot ladies. We wish to take this opportunity to thank all who kindly helped to make it a success especially Mr. and Mrs. Schultz for the use of their home. The November meeting of the Ladies' Aid will be held at the home of Mrs. J. Appleby.

LINDBROOK

This is "Sales" week here, quite a number being held, most of the sellers are migrating to B.C., and judging from the talk one hears a lot more would like to go and probably will eventually. Continued low prices and climatic conditions seem to be the chief cause of complaint.

A dance was held at the home of Mr and Mrs. Tucker here last Friday and everyone present enjoyed themselves immensely.

Mr W "Billy" Munro paid a visit to the city last week, and we hear it's the first in 30 years. Mr. Munro says it has changed a lot but he still recognized from Queen's Avenue eastward.

The ladies of the L. C. C. gave a whist drive at the school last Monday evening, the guests of honor being "their menfolk". Nine tables were in play and to Mrs. J. Pruden went the honor of first in the ladies, whilst Miss Lily Morden won the booby; Mr. Chas. Morden, her brother evidently made up for it by winning the gent's first, Mr. J. Bailey won the gent's booby and a funny thing it was too, causing much merriment. After the game a feast was held and then chatting until time to go home. The men folk hereby wish to thank the ladies for a very enjoyable evening and long live the L. C. C.

Harvest Festival was held at the school on Sunday. The service was conducted by the Rev Wallis of Tofield. The school was prettily decorated with the appropriate harvest things and was chiefly the work of Mr. Jas. Bracegirdle, Mr. Wm. Glenn, Mr. F. Kortsman and others.

The monthly Social Credit Study group met last Wednesday at the home of Mr. and Mrs. A. Scott and the last meeting was at Mr. C. Morden's. The sum of nine dollars was collected for the broadcast fund and sent in. The next Social Credit Group meeting is to be held on the evening of the 1st Wednesday in November at the home of Mrs. Smith.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

PRE-NATAL CARE

The importance of Pre-Natal Care has been recognized for ages but it was not till 1900 that it was organized on a wide and scientific basis by Dr. Ballantyne of Edinburgh, who received from a friend, a legacy of [illegible] for this great purpose.

The first pre-natal ward which he established in the Edinburgh Royal Infirmary had a garden and Dr. Ballantyne's plans were most kind, enlightened and successful. We have learned since then that every expectant mother should have prenatal care to keep her well, to prepare her for a safe and comfortable pregnancy and a successful delivery. The way to get this necessary care is for the expectant mother to go to see her [illegible] as soon as she knows that she [illegible] a mother and be guided by [illegible] advice.

[illegible] the family physician is [illegible] whom the mother goes and [illegible] her husband have not [illegible] physician then they [illegible] one without delay. Do [illegible] because the birth will not [illegible] for a few months, that [illegible] plenty of time. That is not [illegible] important to have the advice from the very first [illegible] do his best for the [illegible] make sure that every[illegible] all right. Nature's preparations for child-birth are complex and [illegible] and important beyond [illegible]. Nearly always, everything is [illegible] if the mother knows what [illegible] does it. But how does she [illegible] what to do, unless she has the [illegible] medical advice and care?— [illegible] the doctor is the only one who [illegible] give her that.

[illegible] concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

LACOMBE FIELD DAY SATURDAY, OCTOBER 17th

An exceedingly interesting and instructive programme has been arranged for the Swine Breeders' Field Day at the Dominion Experimental Station, Lacombe, on Saturday, October 17th.

A. W. Peterson of the Dominion Live Stock Branch, Ottawa, a well known authority on swine, will discuss the swine business from an angle [illegible] to the producer. In the course of his address Mr. Peterson will explain a number of points concerning [illegible] most breeders have [illegible] of ideas.

[illegible] few years a great [illegible] unrecognized facts [illegible] light in the realm of [illegible] feeding and management of [illegible]. The field day programme [illegible] a review of the work [illegible] at the Experimental Station [illegible] particular emphasis on [illegible].

Losses of young pigs were once [illegible] necessary evils, but it has [illegible] that they may be [illegible] by proper prevention [illegible].

These facts and many others of interest and also actual cash values [illegible] every swine breeder will be discussed and explained by officials of [illegible] Experimental Station and the Dominion Live Stock Branch.

The programme will start at 1:30 [illegible] are invited to come [illegible] spend a couple of hours before [illegible] in going over the other [illegible] the Experimental Station's [illegible]. Bring a picnic lunch, and make up a party of friends and [illegible]. Coffey, cream and sugar [illegible] for a basket lunch.

NO HITCH HIKERS THESE!

A [illegible] "bike-hike" around [illegible] western Ontario, with pup tent [illegible] tent, was the summer [illegible] of Sea Scout Ted Horton of [illegible] Sound and Scout Keith Solo[illegible] Meaford. They averaged 70 [illegible] a day, had no accidents, and returned "healthy as a pair of boys [illegible]."

ENGINEER FROM ARGENTINE TELLS OF HIS COUNTRY

Canada's national parks have been developed much further than those of his native Argentina, stated Carlos Souberan, Buenos Ayres engineer, who accompanied by his wife is making an extended holiday trip through North America, studying parks and agriculture on the way. They were guests recently at the Fort Gary Hotel at Winnipeg.

"Canadians I have met," Mr. Souberan said, "all seem to think that Argentina is mainly or exclusively a wheat country. It's not. We grow far more corn than wheat and also great quantities of barley, peanuts and sunflowers."

In Canada Mr. Souberan has seen fewer combines but far more tractors than in the Argentine. Not more than 15 per cent of the farmers there he believes, use tractors. Horses are plentiful and cheap. Apart from that he sees little difference in farming methods.

The majority of Argentine farmers are of northern Italian birth or origin. Mr. Souberan describes them as an honest, hardworking people. Spaniards come next, and there are many French and Germans. The government strongly favors small holdings, and many of the larger estates have been subdivided into small farms leased or bought on a crop-share basis.

COLLECTOR RELATES VALUE IN STAMPS

Answer to the man-on-the-street who is amazed that men should travel to remote corners of the globe in search of a cancelled stamp, was provided by O. Marsh of Errington and Martin Stamps, London, England who is visiting the city Friday on business and is registered at the Corona.

Most valuable stamp known to collectors is the one-cent British Guiana valued at $35,000 by its present owner, Mrs. Arthur J. Hind, widow of the American novelist who bought the expensive scrap of paper at a Paris auction. Many other stamps are worth as much as $10,000, he said.

Unlike almost any other commodity, value of old stamps is increased by presence of unusual flaws or deficiencies. A blur in engraving or absence of rippled edge on a stamp may place it in the hundred or even thousand dollar class, the visitor said.

Collecting stamps for half a century, Mr. Marsh has travelled to most foreign countries. His most [illegible] find was a central European stamp sold later for $150, he revealed.

CHAINS SMALL BOY TO KITCHEN STOVE

Findlay, O., Oct. 10.—A stepfather held for padlocking a 10½ foot logging chain around the frail body of 10-year old Robert Foucht insisted Saturday: "I have always tried to be good to the boy."

William Leeth, general odd-jobs man, was held in jail without charge while county authorities sought a new home for his stepson, who trudged to school Friday dragging the chain.

Leeth admitted to Probate Judge Capell he chained Robert to a kitchen stove because he ran away.

Robert, weighing only 60 pounds, and frightened, told the judge that Leeth locked the chain around his neck because he went into the kitchen to get a piece of pumpkin pie denied him at mealtime.

PUSH BUSINESS ON COFFEE CUP

London, Oct. 9.—The opinion of E. W. Tozer of Southsea, that a man who aspired to a managing directorship in any business concern must cut out the morning coffee habit was not agreed to by the others at the summer school of the Drapers' Chamber of Trade at Oxford.

G. E. Daniel, a young Londoner, declared: "Far more deals are made around the coffee table than in a firm's premises because things are discussed over a cup of coffee in a better mood."

TREES AVAILABLE for FARMERS

With reference to the all-important function of tree planting in Alberta, it was learned in an interview given to-day by the Honourable C. C. Ross, Minister of Lands and Mines, that certain types of trees were available to farmers for transplanting and could be secured for this purpose on application to the Forestry Division of the Department.

The principal object in view, Mr. Ross stated, was to provide transplants for replacement of less valuable species in shelter-belt and windbreaks, to introduce a more desirable product than the native variety found in the bluffs now in existence and to give protection to such products by planting them in stands of trees already established so as to provide the necessary shade for the new species to ensure a healthy and permanent growth.

Available for planting in the spring of 1937, the Minister continued, will be limited quantities of white spruce, jack pine, green ash and elm. There will also be a small number of bur oak and Siberian larch with which the Forest Service has been experimenting successfully and of which a few may be given out for trial. In addition to these a large number of lodgepole pine and Scotch pine, trees possessing healthy root systems, are available for distribution. These trees are recommended for planting in this province.

To avoid any possible confusion, application forms should be secured from the Director of Forestry, Department of Lands and Mines, Edmonton, the Minister concluded. Forms properly filled out as to quantity and species required should, he added, be sent in to the Department before the end of the present year for trees required for planting next spring.

At certain times of the year natives of Central Africa perform a frenzied dance around holes they have dug in the ground. Golf, in fact is spreading everywhere.—Punch.

BREED WOMAN, 78, TRUDGES 35 MILES

Hines Creek, Oct. 9.—Residents of this Peace River town are still talking about a recent endurance feat performed by a 78 year old half-breed woman living four miles from Hines Creek.

In one day the old woman trudged into town, registered for Social Credit dividends, walked another 20 miles to Fairview, then returned home carrying her groceries on her back. Entire journey was estimated at 35 miles.

ALBERTA WOMEN'S HEADS ARE LARGEST IN CANADA

Calgary, Oct. 9th.—Alberta women have larger heads than their sisters in other parts of Canada. This is the report of the general manager of an eastern millinery company. Local milliners confirmed his statement.

Young and old women wear large sized hats, according to the millinery authorities. The average headsize for Calgary's fair sex is 22½. There is a brisk demand for 23's too, and a number of orders for size 24—a size seldom sold in other centres of the Dominion.

No one seems to know why Alberta women have such large heads. Answers are: It may be the altitude; perhaps they are brainier, or perhaps they are proud of Alberta.

SCOUT TRACKING FOUND THE LOST CHILD

Boy Scout training in track reading brought a happy ending to an 18 hour search by police and some 300 people for a three year old boy who had wandered into the bush at Emma Lake, Sask. The sharp eyes of a Scout who had joined the search picked up the impression of a small foot. The trail quickly led to the child, lying under a bush and covered with mosquito bites.

SCHOOL HEAD TELLS ARCTIC PLEASURES

Nome, Alaska, Oct. 9.—Comforts of life on a frigid glacier were told Friday in a letter delivered by one of the last boats from ice-locked Wainwright, a lonely settlement on the Arctic shoreline.

Each day at lunch time, wrote Ernest P. Stowell, United States government school teacher at the trading post and reindeer village, the few whites there gather about the radios and hear the United States news broadcast—from London.

"There are three big coal mines. We have an abundance of hot water at all times, and a barrel full of hot water will keep a house warm when temperature go down to 40 degrees below zero.

"Our gasoline washing machines take the drudgery out of washing. We have six fine reindeer stored away for meat. There are 17,000 reindeer at this station.

"Our 'ice house' is carved right out of the glacier. This whole peninsula is on a great glacier, and you have only to dig down two feet and the ice commences," he wrote.

[illegible]

Holywood, Oct. 9.—Mrs. Edith Phelan, a brisk, matter-of-fact English nurse, told this story Friday of the death of "Cheiro," noted mystic, two nights ago:

"Three times, the clock tolled the hour of one . . .

"At the last moment, the whole house was filled with an overpowering fragrance of flowers. There were no flowers in the room, and none outside.

"I was sitting at the head of the stairs—except at the last moment—and they were empty. Yet they creaked as though an army of people were coming and going.

"Cheiro" was Count Louis Hamon, 70, an Irishman.

He said he had spent 50 years in the occult.

DISTRICT HAS FAMILY SCHOOL

McAdam, N.B., Oct. 9.—Prince William station on the main line of the Canadian Pacific Railway, 15 miles east of here in York County, boasts of a school built just for one family—the eight children of Mr. and Mrs. Ross Jamieson. There is a student for each class from grade one to eight.

Jamieson holds five jobs, farmer, postmaster, mail stage driver, tax collector and express agent. Because there is no accommodation for her at Prince William Station, the teacher, Lydia Pheeney, daily commutes from McAdam and back.

Fame is really worth while. It prompts the newspapers to print pictures of the fish you catch.—Detroit Free Press.

Times change, but if we change with them we don't notice it so much.—St. Louis Star-Times.

"Cheiro's" documents — magazine articles, notarized statements, and affidavits—set forth that he predicted the date of the death of the late King Edward VII., of Mata Hari, the famous spy, and of Lord Kitchener, who lost his life under mysterious circumstances during the Great War.

The most recent document was nearly a year old. It told the date and manner of the death of Irving Thalberg, husband of Norma Shearer, who died several weeks ago.

Policyholders Own the "Assets" of Life Insurance Companies

As a great co-operative enterprise, Life Insurance has built up Assets in Canada totalling, approximately, two billion dollars. Yet these Assets are relatively small when it is realized that they are jointly owned by about 3,500,000 policyholders—one-third of Canada's population.

On the average, each policyholder owns $571 as his share of the total Assets in Life Companies operating in Canada. Obviously, the great majority of policyholders are men and women of ordinary means—thrifty people who, year by year, have entrusted to Life Insurance part of their savings so that they may have financial security against the uncertain future.

These policyholders represent the best type of Canadian citizens. They have sought to preserve their financial independence, and, as thrifty citizens, neither they nor their dependants are ever likely to becomes charges upon government or municipal relief.

To protect the interests of these 3,500,000 Canadian policyholders, Life Insurance Companies have invested their Assets in government and municipal bonds—in first mortgages—in public utilities and industrial enterprises—and in other authorized securities.

The soundness of the Investment policy of the Companies has been tried and proven during periods of severe financial stress. Governing and corporate bodies in which policyholders' moneys are invested have, until recently, maintained the integrity of their obligations. This has made it possible in turn for the companies, in their capacity as trustees for the policyholders, to fulfill every obligation guaranteed by their policies.

Now, however, there is a growing tendency to repudiate, by legislation, public and private debts, regardless of the debtor's ability to pay. Legislation which tends to destroy the ownership of public and private property places an unjust burden upon life insurance policyholders.

CIVILIZATION, ITS CAUSE AND CURE

(By Raymond Crawford in Canadian National Railways Magazine)

WE ONCE saw the above as the title of a magazine article. We did not read the article, but presumably it was meant to be satirical. The phrase itself is pungent and provocative, and not withstanding its apparent contradiction suggests something that may be worthy of consideration. There is something called civilization which should be the goal of world achievement and there is something which goes by that name and which is anything but desirable.

First of all what do we mean by civilization, or rather what should we mean? What is there in the spurious kind to provoke a writer's satire? The dictionary definition is easy enough. It means advancement in knowledge, refinement, and progress in general. "It is an improved condition of man resulting from the establishment of social order in place of the individual independence and lawlessness of the savage or barbarous life". To this we add the numberless amenities and advantages of modern life, the comforts and conveniences of it (leaving out of account, of course, its uglier and more sordid elements) and the sum total we call civilization. It is a fine, comprehensive, yet altogether misleading connotation. As far as prgress in certain aspects of it is concerned there can be no question.

Alfred Russell Wallace called the last hundred years "the wonderful century". Assuredly it was, and it is certain that more wonderful things are to follow. Mechanical invention and skill have wrought marvels. This year there is being celebrated the sixtieth anniversary of the discovery of the telephone—a marvellous achievement. We listened during the past few days to voices from Berlin and could hear the applause of spectators of the Olympic games. We have our "6400" a remarkable mechanical feat. We can fly across the Atlantic almost in as many hours as it took our progenitors weeks to cross. It is without doubt the wonderful century, but are we becoming a happier race or a better one? A savage may travel eighty miles an hour and still remain first a wondering and gradually a complacent savage, but a savage nevertheless. He may fly across the Atlantic — a savage when he enters the plane, a savage when he emerges from it. There is nothing to prevent barbarians from travelling in railroad trains nor from listening to radio broadcasts, nor from running a motor car (many savages do), nor from participating in all the advantages of the modern inventor, but it would be absurb to confuse his advantages or even his achievements with the man himself. He is not civilized and accidental advantages do not make him so.

We have advanced, assuredly we have. We no longer kill one another with steel or bullet. We are far removed from the head hunters so that honor and national pride and the desire "to civilize" call into operation the use of poisonous gases that send non-combatants, old men, women and children to an agonizing death. Is the world civilized, that is to say removed from the lawlessness of a barbarous and savage state when civil war rages in one country over the question of what form of government people are to live under, a war that knows neither mercy nor chivalry, whilst other nations watch with fear lest the local may become a horrible universal, though there is no cause in sanity for such an outcome.

The plain fact is that the world has slithered back to ruthlessness and savagery whilst still hypocritically shouting about ideals and civilization. At the beginning and well on into the middle of the last century there was in Europe a genuine ideal of world peace and an eqally genuine attempt on the part of individuals to bring it about, to substitute good feeling and international arbitration for misunderstanding and conflict. The Congress of Vienna in 1814 envisaged such a condition. Mazzini in Italy and a strong appreciative following promoted the movement of universal fraternity. Tennyson's famous poem in which he wrote of the furling of battle flags in the parliament of man, the federation of the world, was hailed as a consummation devoutly to be desired. Most of the Central States in Europe showed a like desire and it was believed that the great International Exhibition which was held in London in 1851 was but the beginning of an era of world-wide peace.

Then suddenly something happened, a new and subtle psychology took possession of men's minds. Some think that this was the result of Darwin's philosophy in "The Origin of Species" with the emphasis on conflict as a natural state and its result the survival of the fittest. Some economic thinkers in England accepted and advocated this new doctrine of the normality of competition and self-interest. It was taken up and advocated in Germany. Altruism or consideration were deemed unnatural weaknesses and largely as a result of the glory of Force the great war came. All this means the autocracy of the unit whatever that unit might be, individual, class or nation. This, it will be seen is nothing more or less than reversion to the animal. It is characteristic of the ape and tiger not of the thinking, feeling human.

Without tolerance, mutual understanding, mutual goodwill and co-operation there can be no such thing as peace or happiness and these necessary virtues are far from prevalent in these irrational days. It's a mad world.

RARE DISCOVERY OF ALBINO FROG AMAZES SCIENCE

Detroit, Oct. 9.—A strange specimen of bleached animal life—an albino frog—is owned by Mrs. Howard A. Reabe, who found it on the shore of Glen Lake, near Empire, Mich. It Possesses the characteristics of true albinism, pinkish white skin and rose colored eyes.

Dr. Raymond L. Ditmars, New York Zoological Park reptile curator, and Dr. G. Kingsley Noble, curator of herpetology at the American Museum of Natural History, have joined in pronouncing it more distinctive in point of rarity, than the birth of human quintuplets.

In a lifetime of study and experience with snakes and frogs, Dr. Ditmars has encountered an albino frog only once before. It failed to live beyond the tadpole stage. Dr. Noble marvels that the frog, now one and one-half inches in length has been able to survive.

"That it has been able to avoid its enemies and escape destruction is the rarest thing of all," he says. "Conspicuous mutations are generally destroyed by their enemies. It must be one in millions."

According to scientists, albinism in frogs occurs with less frequency than in any other form of animal life.

CHILD DISCOVERED STARVING THREE DAYS

London, Ont. 9.—Without a morsel of food for three days, a small child discovered by J. B. M. Ferguson, school attendance officer, was responsible for the board of education's decision Thursday to appeal directly to the public for help in stopping "amazing conditions of privation" in this city.

The trustees are asking that the public aid them in providing food and clothing for children whose parents are not eligible for relief because of a residence rule.

SEES GREAT FUTURE McMURAY REGION

Destined to Become One of Greatest in Empire Says Ells.

VANCOUVER — McMurray in the centre of a vast bituminous sand area in northern Alberta, was destined to become of the most important points in the British Empire, S. C. Ells of the dominion mines department, Ottawa, predicted Thursday at the annual convention of the B. C. section of the Canadian Institute of Mining and Metallurgy.

Petroleum generally, he said, was more precious than gold, adding he believed it was only a question of time until the "tar" sands rich in gasoline and other petroleum products, would be developed commercially.

Dr. Fred Joliffe of the geological survey branch of the dominion mines department, told the convention of his investigations in the North West Territories, where in recent years the radium and silver ores of Great Bear lake were discovered.

Only the most accessible parts of the vast area had been penetrated by prospectors, he stated.

A discovery of gold on Great Slave lake, the speaker said, was significant and opened the possibility of finding gold in formation heretofore believed unfavorable.

ALBERTA PIONEER, AUGUST PASS, DIES

Resided on Sylvan Lake Farm for 36 Years

SYLVAN LAKE—One of the best known pioneer farmers in central Alberta, August Pass, 75, died on Saturday on the farm he settled on 36 years ago a few miles west of Sylvan Lake town.

He was born in Finland and lived in Butte, Montana, before coming to Alberta. His widow, three sons, three daughters, five grandchildren and two great-grandchildren survive.

BIG SOVIET MARKET FOR CATTLE IS SEEN

CALGARY—Russia is now offering a possible market for upwards of 100,000 head of Canadian cattle a year, G. G. Serkau, Montreal trader said in an interview here Saturday.

Mr. Serkau was in Calgary to meet with livestock dealers to plan exchange of Canadian cattle for Russian goods.

"It is fair to say," he said, "resumption of trade with Russia will benefit Canadian agriculture more than any other industry."

THE FLOWING TIDE

being the Popular Report (1935-36) of the British and Foreign Bible Society, by the Rev. John Patten, M.C., M.A., Literary Superintendent.

For many years the popular report of the British and Foreign Bible Society has established and maintained a tradition for literary excellence and spiritual power. This year's report in no way belies that reputation. The title—The Flowing Tide—is very suggestive, and every page breathes a calm confidence in the spread of the Word of God and the ultimate conquest of the world by its power. Literary allusions from Sir Walter Scott, Robert Louis Stevenson, Matthew Arnold Wordsworth and Tennyson, abound in the prologue, and Shakespeare's great conception of the "tide in the affairs of men" marks its opening. The theme is set forth in the words: "The tide with its ebb and flow is in harmony with the ways of God." The great movements in history are reviewed, and chapters follow on: "The Flowing Tide of the Scriptures"; "The Flowing Tide of the Translated Word"; "The Flowing Tide of Distribution"; "The Flowing Tide of Blessing" and "The Flowing Tide of Christian Giving." Present day world events are noted, and the efforts of men here and there to dam the flow of Scripture distribution. Naturally the name and work of William Tindale come in for special mention in this 400th Anniversary of his martyrdom at Vilvorde, October 6th, 1536. The text on the frontspiece is one specially well known to Canadians: "He shall have dominion from sea to sea, and from the river unto the ends of the earth." One of the illustrations is the Reversing Falls at Saint John, New Brunswick, and two and a half pages are devoted to the tide of Canadian Immigration and of the Scriptures in Canada, while the flowing tide in Canada receives very picturesque treatment.

ROPE-FULLS OF ORPHANS

One of the jobs of Toronto Scouts on duty this year at the Canadian National Exhibition was showing the sights to a large number of orphans who were enjoying the annual Shriners' treat. To prevent them getting lost, the children were taken round in batches of twenty or more, on a rope, with a Scout at either end.

GOLD AND WHEAT

France raised the price of gold to $35.40 an ounce last week which meant that the franc was devalued approximately 30 per cent. This action caused some trepidation throughout the financial business world, and of course, had an effect on the wheat market. But the strong support given France by Great Britain and the United States prevented a serious upset.

The British pound went down in Canadian currency at one time going [illegible] below the $5.05 figure of the week before. The lower the British pound goes in relation to Canadian currency the more expensive becomes the purchase of Canadian wheat.

Virtually the whole of the world has now revalued gold at the higher figure of $35.00 an ounce and the historic price of $20.67 an ounce has gone into the discard. This should increase the price of primary products. If gold was now $20.67 an ounce the price of wheat at the present time would be about 66c a bus. instead of $1.10. The manifest tendency of the larger nations to return to a stabilized internal monetary system, to quit interfering with their internal currencies and to greatly lower tariffs suggests that there may be a general revival in world trade.

Wheat Pool Bulletin

BIG GAME HUNTING POPULAR

Jasper, Alberta, October 12—Larger than usual numbers of big game hunters, now outfitting in Jasper and vicinity, indicate returning prosperity across the line, for the greater number of these come from the United States.

This years every guide and outfitter in Jasper Park is busy, and reports coming back from parties already in the hunting area show that full bags will be the rule, as game is plentiful.

This business of "big game hunting" is bringing thousands of dollars into the province and is rapidly making Alberta famous as a hunting area. Sportsmen return yearly to Alberta, thoroughly satisfied with the wonderful opportunities offered.

Not all the hunting is done with a gun. A number come to "shoot" with movie camera the game in its native haunts.

Increase in deer, moose, elk, bear, goat and sheep in the mountainous regions adjoining the park is made possible by the rigid protection afforded these animals. Some of the species were rapidly becoming very scarce until the dominion government stepped in and established protection in certain carefully selected regions.

It is the constant overflow from such regions as Jasper National Park that makes it possible for hunters to find specimens of all kinds of game animals roaming the country outside the protected areas. It has been said that every license issued brings $2,000 into the province.

ARGENTINE IMPROVE CATTLE

The cattle industry of Argentina, where breeding is carried on on a large scale (there are over 30 million head of cattle in Argentina) has an interesting history. The native cattle came from stocks imported from Spain in the early colonial period. These cattle ran wild and multiplied rapidly but had little or no economic value until compartitively recent years, since it has been practicable to ship frozen and still later, chilled meat to Great Britain and to Europe.

Back around 1843 the first purebred stock was imported from England but it was not until towards the close of the last century, when the demand for meat had vastly increased that Argentine breeders generally began to take an interest in improving their herds. Since then, cattle breeding has been developed into a specialty, today 70 per cent of all the cattle being from purebred stock on the male side and in varying degrees on the female side.

BARLEY CROPS PAY THOUSANDS FOR THIS AREA

Highest malting barley prices in 17 years are giving farmers of the Edmonton district thousands of dollars "in pocket", it was learned Tuesday.

Returns to some farmers have been as high as $4,000 while others have received $3,000. Many have had net returns of around $1,500 and $2,000.

A shortage of malting barley in Canada and the United States has caused prices to soar to near post-war levels.

Usually the malting companies have allowed a premium of three cents a bushel on malting barley. This was canceled recently, however, when it was found out that the company had their requirements.

Peak Price $1.04

The peak price for this season was hit September 4 when extra 3 C.W. six grade barley brought $1.04 cents per bushel at Fort William, with three cents additional for premium. Last Saturday the price was down however the 93½ cents.

A year ago, the price for top quality barley was 45¾ cents at Fort William. Low point in recent years was touched in February, 1933, when barley was quoted at [illegible] a bushel causing farmers to feel at that time it was not worth hauling to market.

"The best of it is that many farmers in this district were practically forced into seeding barley," said one prominent grain dealer last week. "As the Spring was late, they felt that wheat would not be a success and as an alternative turned to barley, with results that are much more profitable than wheat.

Yields are Large

Biggest barley crops are running 45 bushels per acre. Figuring on a net return of 90 cents per bushel, which many farmers who marketed earlier received, the barley returns greatly eclipse those from wheat.

For some years, barley has been a disappointing crop owing to low prices, but Edmonton district farmers are "cashing in" on the high prices this season, thus giving further stimulus to increased business.

One farmer in the Namao district received $4,000 for 5,000 bushels of barley which were sold when prices hit 80 cents. Another farmer in the Volmer district was paid $3,000 when he marketed his barley during the period of higher prices.

"DEAD" HUBBY BLOCKING WAY TO ANNULMENT

VANCOUVER, Oct. 15— Is Frederick John Trice, real estate broker, 1340 Haro Street, entitled to an annulment to his marriage or should his wife, Charlotte, have an order presuming the death of her former husband?

These were questions which faced Mr Justice D. A. McDonald in supreme court Thursday, when the petition of Trice for a divorce of nullity was called.

The marriage which Trice, a real estate broker, sought to have annulled was performed March 12, 1936. He understood his fiancee, Charlotte Bergin, 1062 Pendrell Street, was a widow and had reasons to believe until some months after the wedding that Walter Herbert Bergin, whom she married at Edmonton on January 12, 1922, may still be alive, Trice said.

A petition launched by Mrs. Bergin in supreme court early last year for an order presuming the death of Bergin was twice stood over by the late Mr Justice F. G. T. Lucas for further evidence.

In it, Mrs Bergin stated that she learned six months after her marriage that Bergin was suffering from creeping paresis and could not live long.

He left Edmonton in the summer of 1923 for the United States and the last heard from him was word received from San Jose, Calif., by a brother at Claremont, Alta, in 1926.

Mrs. Bergin stated in her petition that she wished to remarry and five days after the matter was last adjourned she married Trice.

Mr. Justice McDonald adjourned the nullity petition with a suggestion to F. N. Raines, counsel for Trice that further inquiries be made. In case Bergin is dead, Trice is not entitled to a decree of nullity, His Lordship observed.

PLAN TO REGISTER JOBLESS VETERANS

Registration bureaus for unemployed ex-service men have been established by the Edmonton Veterans' Assistance committee in preparation for the sittings here of the federal veterans' assistance board in November.

Single men on relief may register Wednesday at 9:00 a.m. in the new immigration hall; married men on city relief may register Friday at 3:30 p.m. at the city relief department. Registration of other single and married men who are unemployed but not on relief will commence Friday at 10:00 a.m. in the Memorial hall.

Registration covers pensioners receiving relief, those receiving war veterans' allowance assistance or provincial relief and all veterans unemployed and not receiving relief.

BEAR KILLS TWO MEN

ELLSWORTH, Me., Oct. 15.—A captive 350-pound bear horribly mangled and killed two men at the Whistle Inn, a small combination gasoline filling station and restaurant today.

Leo Burnett visited his home here en route for Wainwright where he will work for some time.

Miss Jeane McLeod left for Arrowhead where she will teach school for the coming term.

Mrs. Art Young and son, Johnnie, visited Edmonton over the week-end.

RICH VALUES ARE REVEALED AT GOLDFIELDS

Declaring that the Goldfields camp is destined to be the biggest mining camp in Canada, James W. Blaisdell, Boston mining engineer and developer of the Charlotte Lake Golds property, north of Goldfields has flown back to the city in company with Pete Davidson on a business trip. He expects to return to Goldfields before the weather breaks.

Sacks of samples from the newest of the 23 trenches cut across the 200 feet width of the Charlotte Lake Golds show some phenomenal assays, he says, adding that a dump sample across 50 feet of gray quartz assayed $333.15 in gold and one foot of the main ore body showed $304.05 in gold.

A third sampling across three feet of white quartz assayed $126.70 and another across five feet of porphyry went $75 60 in gold, $3.55 in silver and $1 75 in silver.

Reports of the strike of nickel ore has brought engineers of International Nickel into the field. Mr. Blaisdell has staked 14 claims at the north end of Charlotte Lake which show 2½ per cent nickel, with $1.40 in gold and ½ per cent copper. Staking has been active until the snow came few days ago.

"There are a thousand people in Goldfields now," says Mr. Blaisdell in telling of the rapid growth of the town. "There is a schoolhouse, a lecture theatre, a dancehall, a church and a government liquor store, and new houses and stores are going up each day. The government is building a wharf on Beaver Lodge bay. I look to see a railway and a smelter there before long, owing to the great ore development taking place in the field."

BANKER FINED FOR SEIZURE AGAINST ACT

HARDISTY, Oct. 15.—Albert Ball manager of the Canadian Bank of Commerce at Hardisty, was found guilty of seizing and disposing of 334 bushels of wheat, property of Elmer Jones, farmer of Irma, without a permit from the debt adjustment board, in contravention of the Debt Adjustment Act, by Magistrate Miller. He was fined $20 and costs, but gave notice that he would appeal.

The seizure was made between 10 p.m. on September 18 and 2 a.m. September 19. Counsel for the defendant was S. Bruce Smith, Edmonton, with W. J. Shortreed, Hardisty, for the plaintiff.

PREPARE OPEN CREDIT HOUSES IN 12 RIDINGS

Opening a block of credit houses in possibly 12 provincial ridings north of Red Deer and including Edmonton, is being considered by the government states Hon. E. C. Manning, provincial secretary and minister of trade and industry.

The proposal is to establish one credit house in each of these constituencies at the start. It is not likely that they would open before November 15th.

While the credit houses would be put in operation, this step would not mean that the payment of basic dividend would commence at that time, said the minister.

The credit houses, however would accept deposits either for cash purposes or for conversion into Alberta credit.

Mr. Manning said that it was proposed to have these credit house staffs deal with a lot of the preliminary work that would be required before the general plan was in operation. For example, there would be the making up of accounts, preparin of pass books and other details which could be undertaken at these initial credit houses.

The minister said that a survey was being made of sites or premises for credit houses. This work had been largely completed.

SENSITIVE TO COLD? DIP YOUR HAND IN 50-DEGREE WATER TWO MINUTES A DAY

CHICAGO— How many persons who are too sensitive to the ear-tingling blasts of winter can protect themselves was outlined recently in the Journal of the American Medical association.

The treatment, described in a report on 22 cases of hypersensitivity to cold, was simple.

The patient immerses a hand in water chilled to 50 degrees Fahrenheit for one or two minutes a day for from three to four weeks.

This, it was reported, gave systematic general "desensitization" to 16 of the patients.

Hypersensitivity to cold shows itself by temporary wheals or welts on the face, neck and hands and sometimes on the feet, thighs and trunk, after exposure to cold winds, water or environment. The general reaction is manifested by fainting and nausea.

The study indicated the reaction from immersion resulted from the release, due to cold, of chemical substances from tissue cells. The substances entered the blood stream.

The doctors found that in addition to the immersion treatment, patients also could be desensitized by injections of histamine over a period of two or three weeks.

The study was carried out by Dr. Bayard T. Horton, Dr. George E. Brown and Dr. Grace M. Roth at the Mayo clinic in Rochester, Minn.

Fine line of Christmas cards at the Mercury Office.

BARDO

The deepest sympathy of this community is extended to the F. Sutton family in their recent bereavement.

Messrs. Ivan and Modie Foshaug and Arnold Johnson were in Edmonton on Monday.

Miss Helen Gabrielson of Holden is assisting Mrs. C. M. Rude.

The Misses Nora and Irene Rude were Edmonton visitors over the week-end.

The Ladies' Aid meeting was held at the home of Mrs. H. Jensen on Thursday afternoon and was very well attended. It was decided to have the Lutefisk dinner and bazaar on Saturday, December 7th. Everybody welcome.

The Parkland Y.P.S. rendered a cantata at the Lutheran church on Sunday afternoon, which was much enjoyed by all present.

After the cantata a Silver Wedding celebration was held, Mr. and Mrs. O. Johanson's silver wedding anniversary being on Friday, October 16th. After a short program, lunch was served to the large crowd present. Mr. and Mrs. Johanson received some lovely and useful gifts. Best wishes are extended to them for many more happy years together.

Miss Agnes Johanson of Hay Lakes was home for her parents silver wedding celebration.

Mrs. Mary Nordus is staying with Mrs. Martha Hagen.

Mr. and Mrs. J. Ness spent a couple of days in Edmonton last week.

KETCHAMOOT

Mrs. F. A. Owen is spending two weeks visiting friends at Kingman and Bardo.

Mrs. McDowell of Edmonton came on Friday of last week, for a week visit with her cousin, Mrs. C. Williams.

Mrs. C. A. Ingram was a visitor to the city Monday and Tuesday.

Mrs C. Harriman returned to her home at Bellingham, Washington, on Friday of last week after several weeks visit with her daughter and family, Mrs. Jesse McMullen.

Mr. and Mrs. J. H. Ingram, Mr. and Mrs. Will Ingram, Miss Kathleen and James Ratigan were Sunday guests of Mr. and Mrs. T. D. Ferguson at Lakeshore

Among the passengers to Edmonton Friday were: Mrs. Williams, daughters Marguerite and Joyce, Mrs. Schultz, Messrs. Leo Ovaldson, Frank Hall jr., Lyle Coombes, Fred Sutton and son Raymond.

Mr. and Mrs. Paul McMullen and family were Sunday guests of Mrs. McMullen. On Monday they left by car for the coast. They will take some time to look around before deciding definitely where they will make their home. We regret the departure of the McMullen family, but wish them success and happiness in their new home.

OBITUARY

It was with much regret we have to report the death of Master Raymond Earl Sutton at the Royal Alexandra hospital in Edmonton Saturday morning, October 17th at the age of 11 years, 8 months, 2 weeks.

On Sunday, October 11 blood poison developed from injury to the hand and after receiving medical attention here, was taken to the hospital on Friday, where he passed away. Raymond was a bright pleasant boy and had lived all his young life on his father's farm in the Bardo district. Funeral services were on Monday, October 19th at 2:00 p.m. at the home of his grandmother, Mrs. Fannie Sutton. A large crowd was present to pay their last respects to the little fellow. Bardo school was dismissed and all the school mates were present. Rev. Milo Stutzman conducted the services. The school children, lead by the teacher, Mr. Broughton, sang, "There's a Home for Little Children." The body was laid to rest in the Tofield cemetery, many beautiful flowers covering the casket. He leaves to mourn his loss, his father, Mr. Fred Sutton, two brothers, Harold and Donald; his grandparents, Mr. and Mrs. Welsh of Rabbit Hill; grandmother, Mrs. Fannie Sutton, besides a number of uncles, aunts and cousins. Pall-bearers were his school mates: Eston Stirrit, Malcolm Finseth, Elvin Moen, Talbert Fauchaug. Our sincere sympathy is extended to the family. Mr. Stinson was funeral director.

SUICIDE BY HANGING

Late Sunday night or early Monday morning, Emil Keefoed committed suicide by hanging at the Tofield mine farm. George White, an employee of the farm discovered the body upon commencing work Monday morning. The proper authorities were notified and the coroner ordered an inquest. At the inquest the verdict given was "suicide while of unsound mind". The unfortunate man, who had formerly been employed at the mine was 35 years of age, was of Danish nationality and, we understand, had no relatives here.

Judging by the chilly winds and low temperatures, winter has arrived. There is the possibility of course that it is just a "flash in the pan", and we are still to have some fine weather. It has happened before.

LOCAL & PERSONAL

Dr. J. C. Ward and family of Leduc, and Mrs. J. Ward of Edmonton were visitors at the Emery home on Sunday last.

Born— To Mr. and Mrs. Emery Phillips on Oct. 18th, a daughter.

Born— To Mr. and Mrs. H. Arbon on October 19th, a daughter.

Mr. and Mrs. McLaughlin, Mrs. Somers and Mrs. B. Whyte of Wetaskiwin visited friends in Tofield on Thursday and Friday of last week.

Miss Jessie Munro spent the week end visiting in Edmonton.

Mr Critchly and Mr. Burrows jr. were business visitors at the Crown Lumber Co. here last week.

Mrs. Geo. Brace is visiting relatives in Winnipeg.

Mr. H. Green spent the week end in Viking. Mrs. Green who has been visiting there returned home with him.

Mr. and Mrs. Jacobs and Goldie motored to the city on Saturday.

Mr. Hamilton, contractor of the new bank building, returned to Calgary on Saturday.

Mr. Jim Hannan of Camrose was a business visitor in town last week.

Mr. and Mrs. Dodds and family visited Edmonton on Saturday.

Messrs. Lee and Stan Glover motored to Edmonton on Friday last.

Mr. and Mrs. J. T. Bullock and twins of Minburn visited friends in Tofield over the week end.

A number from town attended the barn dance held at Pete Lorenson's new barn on Monday evening last.

Mr. and Mrs. Agnew and Keith stopped in at Tofield enroute to Edmonton on Friday evening.

Max Rogers spent the week end at his home here.

Messrs. Bill and Sid Werton left by train Sunday evening for Montreal enroute to England where they will spend the winter months.

Miss L. Rule of Edmonton visited Mrs. F. Dunn for a few days this week.

Mr. Carson Wallen of Edmonton spent the past week visiting relatives here.

LAKESHORE

Mr. and Mrs. J. H. Johnston and Mr. and Mrs. Rodway were Sunday afternoon guests at the L. H. Graham home.

Mrs. C. Harriman of Bellingham, Washington, visited a number of friends in this district one day last week. Mrs. Harriman was one of the pioneers.

The weather for the past few days has been anything but pleasant. Perhaps because it is too suggestive of what is to come later on. Maybe we are too optimistic but we predict some more fine weather before winter sets in.

This is Round-Up week at the Reserve. All those who had cattle there this summer are taking them away as they are available.

When the Easiest Way Is the Best Way----

There are no two ways about it! Certainly the easiest way to get the most for every dollar you spend is to buy products that you know about through the advertisements in your local paper. You don't have to go out and look for buying opportunities. The advertisements bring them to you. And all you need do is consider the facts, compare values and decide on the soap or the sedan that best fits your judgement and your pocketbook.

Certainly the best way of making your money go farthest is to buy merchandise of proved value. Advertised merchandise. Merchandise that is bought and used by many people. Merchandise that must be superlatively good enough for its maker and your local retailer to keep calling it to the attention of people week after week and year after year.

This is the service—of convenience and profit—that the advertisements offer you. It will pay you to read them regularly and take advantage of everything they can do for you.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

TELL THE PEOPLE

Tell the people. We have told them that they must pasteurize their milk and we have told them why. The people have taken it well. No doubt it was a shock to them at first. No doubt there are still some unbelievers. No doubt there are a few towns and villages where milk is not pasteurized and where they may not be intelligent enough to submit a By-Law for the pasteurization of milk on January 1st, 1937. No doubt there may even be some places where such a By-Law may be defeated if submitted on January 1st, 1937. Those who vote Nay are partly responsible for the sickness, disablement and death caused by the use of unpasteurized milk. But the people have taken the news well and in the country many of our leading farmers have the milk used in their households boiled three minutes and they like the taste of it and they know why they have it boiled.

We have told people, ever since 1882 when Koch discovered the tubercle bacillus and proved that it the cause of tuberculosis, that tuberculosis was a transmissible disease, and therefore that it could be prevented. Don't let it be transmitted.

Every one who has tuberculosis got the infection from some other person who had tuberculosis. Therefore, if every person who has tuberculosis is scrupulously clean and careful and makes sure that anything that he coughs up, and sputum is burned or otherwise destroyed, that he uses paper handkerchiefs and they are burned and not kept in his pocket, thus he does not cough in people's faces or otherwise cause his breath to be breathed by them, that his dishes are washed by themselves in boiling water and not used by others and if he takes all other necessary precautions, then no infection is transmitted by him and nobody gets tuberculosis from him. People who work in Sanitariums for tuberculosis are safer from infection the anyone else, because the precautions taken in such a Sanitarium are perfect and no one gets the infection of tuberculosis there.

We have told the people all this and they have taken it well, although since 1882 there have been some people who only half-understood these facts. They got the idea that tuberculosis was transmissible and their minds stopped at that point and so they were afraid of the person who had tuberculosis and were sometimes cruel to him. The only one to be afraid of is the person who has tuberculosis and does not know it or won't admit it and so will not take any precautions. He should be examined by the best modern methods to ascertain whether he has tuberculosis or not and if he has, he should go to a Sanitarium so that he can learn how to cure and protect himself, and then protect other people when he is well enough to come home again.

Tell the people. It pays.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

MANY TO VISIT ENGLAND FOR CORONATION CELEBRATION

MONTREAL, Que., October 19.—Inquiries are reported with regard to travel facilities and arrangements for viewing the coronation procession of His Majesty King Edward VIII, according to C. W. Johnston, general passenger traffic manager of the Canadian National System. Advance bookings for rail and steamship accommodation are already being made at Canadian National offices.

Some interesting details regarding the coronation arrangements are contained in the October issue of the Canadian National traffic bulletin, which is distributed for the information of agents. In regard to the seating accomodation along the route of the procession it is likely that the high commissioner for Canada will receive an allotment of seats for the use of Canadian visitors and applications for these seats will have to be made to the High Commissioner's department. Applications may be made through London, England, office of the Canadian National. The form of application may be obtained from any agent of the railway.

"It should be noted, however," the bulletin continues, "that the furnishing of the form does not guarantee the reservation of space, as the accommodation held at the disposal of the High Commissioner's office may be limited and will be allotted according to the order in which applications are received."

The bulletin states that apart from the accommodations to be made available through the High Commissioner's office, seats will be on sale at prices varying from $10.50 to $52.50 in Canadian money. Arrangements have been made so that Canadian National agents can have the London office of the company purchase tickets for those who wish to secure them in advance.

EPIC STORIES OF NORTH APPEAR IN MACBRIEN REPORT

Ottawa, Oct. 19th.—Blinding Arctic blizzards, shortage of food, unsurmountable walls of ice or rock on land and tricky shifting of ice at sea are some of the trials encountered by members of the Royal Canadian Mounted Police who undertake the long patrols along Canada's northern coast and among the islands that dot the polar sea.

Stories of a few such patrols, carried out in the last year, are told in the annual report of Sir James MacBrien, commissioner of the force, which has just been issued.

One of the most difficult patrols of the period was that undertaken by Corporal Kearney, Constable Hamilton and "Mukie", an Eskimo, from Craig harbor to Dundas Harbor. The distance as the crow flies is only a bit over 100 miles, but the party was out 11 days and failed to reach its objective owing to natural barriers in their path.

Craig harbor is the most northerly police post, situated on the south shore of Ellesmere Island. To the south across Jones Sound lies Devon Island and Dundas harbor is on the south shore of Even, directly south of Craig harbor.

The patrol set off with two dog teams, sleds and an ice boat. Owing to open water in Jones Sound they had to make a wide detour to find ice on which to cross—and rough ice it was. They then had to travel on a narrow ice ledge along the shore for 15 miles as the shore line consisted of sheer cliffs to Belcher Point where a long sloping glacier was expected to provide a means of ascending to the Devon Island ice cap and thence crossing the island.

After travelling about five miles they found the ledge broken off completely and further progress barred. Retracing their steps they set out for Cape Sparbo, about 50 miles to the westward with the hope of finding another suitable glacier. They reached Cape Sparbo and examined five glaciers but none was accessible so it was decided to abandon the attempt to reach Dundas harbor.

The patrol sighted a herd of musk oxen on Devon Island and Corporal Kearney attempted to photograph them. When he approached the herd split into two sections, each forming a circle heads outermost with the cows and calves inside. The corporal thought these tactics would be an effective defence against attack by wolves, of which the district has few.

In contrast to this journey, Lance Corporal Gray and two Eskimos had a comparitively easy and succesful patrol along the eastern coast of Baffin Island. They travelled south from Pond Inlet to Home Bay, a distance of about 420 miles, and returned. They reported the natives along the coast were well supplied with carribou. Walrus and polar bear were scarce, but white and blue fox and sea fowl were plentiful.

From Port Burwell on the north easterly tip of the Labrador peninsular, Lance Corporal Bolstad and "Bobbie," a native, made the 540 mile round trip to Fort Chimo on the south shore of Ungava Bay, with stops at Georges River and Whale River.

NEWSMAN CIRCLES GLOBE IN 18½ DAYS

NEW YORK, Oct. 19.—H. R. Elkins, world circling reporter, officially ended his trip in the lobby of the New York World-Telegram at 11:14 a.m. Monday, completing his dash around the globe in slightly more than 18½ days.

Elkins, reporter for the World-Telegram and other Scripps-Howard papers, thus became winner of the unofficial race he staged with Dorothy Kilgallen, of the New York Journal and International News Service, and Leo Kieran of the New York Times.

Both of Elkin's rivals are in Manila, awaiting departure for California of the first passenger flight of the China Clipper..

CAMROSE MAN DIES OF HEART SEIZURE

Apparently stricken with a heart attack, the body of Lloyd Leslie, 56, was discovered on the floor of the Canadian Oil Company warehouse Monday by C. E. Morflitt, agent. Coroner Dr. P. F. Smith decided an inquest was not necessary. Mr. Leslie formerly was employed by the C.P.R. here. He is survived by his widow, one daughter, Mrs. J. Sawyers of Camrose, and an adopted daughter, Betty June, four.

FARMER SLAIN BY MYSTERY SHOT WHILE PLAYING CARDS

Shot through the head as he sat playing cards with three male companions in the kitchen of his farm home six miles south of here Sunday night, George Pogmore, father of six children, was instantly killed.

The bullet, from a high powered rifle was fired through an open window, police were told. The killer apparently stood on a gravel walk.

Although an immediate search was instituted by the victim's companions, no trace of the killer was found. There were no auto tracks discernible.

Byemoor is 120 miles southeast of Edmonton.

Word of the tragedy was telephoned to R.C.M.P. Const. W. L. Staley at Castor who, accompanied by Sgt. Ford of Camrose, a champion revolver shot, who was in the district, hurried to the scene. Dr. C. R. Cousineau, of Castor, accompanied the police officers and was to conduct an inquest Monday afternoon.

Pogmore, a trucker and farmer, is survived by his six children and widow.

Slaying of a Byemoor farmer through a window by night makes the third successive year in which such a fate has befallen Alberta farmers. September 25th, 1935, Nick Nykiforuk was killed at his farm 20 miles southwest of Edmonton, as he sat at a table. Dec. 30, 1934, Alex Smolink was shot through the window of his farm at Myrnam, 110 miles east of Edmonton. In this case the victim had been playing cards with his family beside a window. John Skrut, hired man, was hanged for the latter slaying. Tried for the Nykiforuk slaying, John Kur, a hired man, was committed to a mental institution.

Stettler, Oct. 20.—Manual Ernest, former hired man on the farm of George Pogmore, Byemoor farmer, and Pogmore's widow are lodged in the town jail here while Royal Canadian Mounted Police probe circumstances surrounding the slaying of Pogmore as he sat playing cards with three other men in the kitchen of his farm home Sunday night.

Ernest is reported to have made a statement concerning his relations with Pogmore.

Police reported Tuesday they had recovered the rifle allegedly used in the shooting of Pogmore. It was claimed that Ernest had told police where the weapon—a .22 calibre high power—was cached.

Ernest and Mrs. Pogmore were formally arraigned Monday night at Stettler and were remanded for eight days—Ernest on a formal charge of murder and Mrs. Pogmore, the mother of six children, as a material witness. It was indicated that another charge would be laid against Mrs. Pogmore shortly.

PROSPECTOR, LEG FRACTURED, WAS GUARDED BY BEAR FROM COYOTES IN B.C. FOREST

BURNS LAKE, B.C. Oct. 19.—Arthur Gammon lay on a hospital cot in this little settlement 100 miles west of Prince George Monday and told how a bear had protected him against coyotes after an accident had shattered his leg and left him helpless in the wilderness for two weeks.

As a surgeon prepared him for an operation, Gammon, a former English tie maker and now a prospector, told how on Oct. 2 he was felling a tall pine tree when it suddenly sprung back and broke his leg, rendering him unconscious.

The next day he managed to crawl to his mackinaw 100 yards away. Tearing the lining out, Gammon roughly splinted the broken leg and for four days dragged himself toward his cabin.

On the sixth day a heavy snowfall drove him to seek shelter under the bole of a huge spruce tree and there he found the cave of a yearling black bear. The animal made no move when he crawled into the cave and he stayed there.

After several days, Gammon, semi-conscious, crawled from the bear's cave and continued his slow crawling progress toward his cabin.

The bear followed him. He partly appeased his hunger and thirst by picking what berries he could and licking the moisture from low-lying leaves.

After a week Gammon had crawled to within half a mile of his cabin, with the little black bear a constant companion.

On the 10th night he lapsed into a stupor but was conscious of being surrounded by a ring of coyotes. The coyotes however would not approach with the bear standing guard.

From then until he was found Saturday in an exhausted condition by another prospector his mind was a complete blank. The only thing he remembered was occasionally seeing his guardian bear.

LICENSING THE PRESS—

Considerable mention is being made verbally and in print concerning the Premier's suggestion to license the press. Immediately the suggestion was made it was assumed that a sort of censorship would be clamped upon editorial writers, and the freedom of the press, such as we understand it, would in Alberta, be a thing of the past. However, since the first announcement was made [redacted] have come that editorial writers would be free to wield their pens in any manner they think fit and the sole desire of the government is that newspapers print the truth. Passing over the obvious fact that "truth" on any subject of public interest is capable of many interpretations without recourse to falsehood; we take it the government desires that deliberate falsehood for political advantage should be banned from the columns of the press. In this respect the desire of the government is good enough and the government will find the rank and file of newspaper men, city and country, willing to admit this, both by letter and deed.

It would be wise perhaps for the Alberta public to review the history of Canadian journalism for the past one hundred years, more or less. There has been an evolution, gradual, but nevertheless persistent and today's freedom of editorial expression was not always in evidence. Some fifty years ago, so we have read, in Eastern Canada, newspapers were but "political sheets." Even the smallest communities would have two papers, one lustily holding forth the views and opinions of one political camp and the other its opposite. Inasmuch as newspapers are chiefly sustained by their advertising columns, the way to hurt a newspaper most, was to repair from using it as an advertising medium. Consequently Liberal merchants refused to advertise in the Conservative paper and the Conservative merchants would not advertise in the Liberal paper. However during the past fifty years the inexorable pressure of economics combined with a wider knowledge of what constitutes good advertising, gradually brought about mergers and combinations in some cases and the death of "weak sisters" in others, the result being that in Canada to-day there are literally hundreds of newspapers headed by keen observing men who are free from any party group, church, or combination of interests whatsoever. These men serve but one earthly master, the same master you, I, or anyone else who has to make a living and desire to pay their way, have to serve—the master of economic necessity. These men know that a newspaper, like a church, lodge, town, province or country cannot be built up on falsehood and misrepresentation. They know that in the long run success comes to those who play the game fairly and who try to understand things as they are and not as they would like them to be. If, among the several hundred newspapermen in Canada there are a few who as yet do not understand these things and who are trying to build up a newspaper on falsehood and misrepresentation, for whatever cause, they are assuredly doomed to ultimate failure.

Here in our "two-by-four" newspaper office, we are not unduly concerned over the suggested licensing of the press. We believe it to be a backward and unecessary step, but the government was duly elected and if they are determined to do so, we will have to abide by it. Our chief concern is as to whether it will cost us anything; country newspaper publishing is not as lucrative a calling as some, and even if we do not live by "bread" alone, we live by "bread" first. We doubt whether any licensing would alter the trend of editorial opinion throughout the province, except perhaps to make it more virulent—a doubtful expedient. licensed or unlicensed, we propose to carry on as we have always done, writing as attractively as possible and using as the main ingredient, just plain common sense.

In the presidential campaign now underway in the United States, there have been many really great gatherings. At Chicago, in a hall rated to seat 25,000, President Roosevelt received a great ovation with a capacity house singing and the organ playing "Happy Days are Here Again." Governor Landon, too, has been greeted by great crowds, but in contrast he attended a children's gathering at the little chapel at Greenfield Village, the village Henry Ford restored. There he heard the children sing old fashioned hymns, topped off with a version of "Oh, Susannah." After being introduced by an elder boy, he simply said:

> "It's an inspiration to visit this lovely little chapel and to hear your beautiful singing of those old-fashioned hymns. Whatever changes may be ahead of us, good character will be just as ennobling, good literature just as elevating, and good music just as beautiful, and I'm happy to be here with you today."

WHY?

Why talk of debt, doubt, disease, drugs, disaster, discouragement, depression, decay, disorder, despair, defeat, difficulty, discord, danger, destruction, discomfort deception, disapointment, distrust, dejection, destitution, desolation, when you can just as well think and talk of peace, plenty, power, pluck, persistence, purpose, possession, pleasure, promotion, patriotism, proficiency, progress, prosperity, perseverance, purity, philantrophy, prayer, and paradise?—Unidentified.

NEW BARLEYS IN THE MAKING

The advent of the smooth-awn barleys which have been evolved by Canadian scientists for Canadian soils has been enthusiastically hailed by farmers as a signal advance in barley improvement, but there remains the malting quality problem. The barley crop in Canada is used mostly for feed, both farmers and feeders are pleased with the smooth-awn varieties but about ten per cent of Canadian barley is used for malting. The change to smooth-awn barley has been of revolutionary importance to malting concerns and the Canadian malsters are acustomed to using Manchurian type barley. Malsters in the United States have been able without great difficulty to become acustomed to handling the smooth-awn varieties but Canadian malsters look with disfavour on the new varieties.

While feeding interests are of paramount importance compared with the limited malting trade, it is nevertheless important that the malting trade be satisfied also. The solution to the problem, states Dr. J. B. Harrington, Professor of field husbandry at the University of Saskatchewan, lies in producing new varieties which possess all of the favourable characteristics of the present smooth-awn varieties and in addition have high malting qualities. The problem is a big one and serves to introduce the new barley breeding activity in Canada. Nature appears to be opposed to combining smooth-awns with tight hulls. (Tight hulls tend to insure uniform germination, a minimum amount of mould growth and a good appearance).

In the efforts to attain the desired combination, two very successful crops of hybrid barleys were produced during the 1935-36 winter at the University of Saskatchewan. A total of 125,000 second hybrid generation seed of six different crosses was produced. This is by far the largest collection of its kind ever raised under glass in Canada. One crop was matured in December; the other in April. In the spring of 1936, these seeds were sown and five thousand of the most promising plants are at present being tested for hull tightness in the cereal breeding laboratory at the University. Progeny of the best 2,000 of them will be grown in the northern nursery, and again the best plants will be selected. This selection process must be continued for several years. (Twelve years is the time required for a cross to become a commercial proposition in the hands of the farmer). During the winter of 1936-37 a careful study of the inheritance of hull tightness in relation to smoothness of awns will be made and the results will be used as a guide in the 1937 selection work.

It is expected, says Dr. Harrington, that high-yielding, smooth-awn varieties with high malting attributes will emerge during the next three or four years from this breeding project, and from the other barley improvement projects in Western Canada. Meanwhile, the farmers desiring profitable feeding and market barley have a number of very good smooth awn varieties to choose from and the Canadian malsters will probably offer sufficiently high premiums for OAC 21 barley to induce farmers in the most northern areas to continue growing that variety.

FARM CONDITIONS IN ALBERTA

The agricultural areas of Alberta have received very little rainfall during the present autumn and are going into the winter months in an excessively dry condition. There are exceptions to this, notably in the Peace River, but on the whole the main grain raising area is quite deficient in moisture. This means that unless unusually heavy rainfall is experienced next spring a bumper crop is out of the question and an average crop will be raised with difficulty. This condition extends into Saskatchewan and Manitoba.

It takes 14 inches of rainfall to produce a normal crop of wheat, according to investigations conducted by the Federal Department of Agriculture in Saskatchewan. Summer fallowing is practised to collect the rainfall during two seasons in order that the wheat plant may have sufficient moisture. If 6 inches of rainfall occurs on the summer-fallow land and an additional 8 inches is received during the growing season the year following, a bounteous crop may be expected. It is seldom in the main wheat growing regions of the prairie provinces that 14 inches of rainfall in one year is received.

Western Canada has experienced four dry years. The last three years have been particularly droughty with subnormal crops. A decided change in meteorological conditions will have to be experienced next year if a good crop is to be harvested in 1937. It may be safely said that the shortage of reserves of moisture this fall is worse than the bad conditions prevailing in the last three years.

ARTIFICIAL WOOL NEXT

In an effort to combat the inroads made by synthetic products, such as rayon, or artificial silk, wool-producing organizations in New Zealand, Australia, South Africa and Argentina are undertaking a research and educational campaign to develop and bring to the attention of consumers the natural advantages of wool.

World production of artificial silk last year reached one billion pounds and Italy is experimenting in the production of synthetic wool from casein, according to the Industrial department of the Canadian National Railways. At the present time the world's wool clips are being absorbed without any undue carryover.

BRITISH WHEAT STOCKS LOW

The United Kingdom port stocks of wheat and flour are around 6 million bushels according to Broomhall. This is only enough to supply the trade for ten days as Britain needs around 4 million bushels weekly.

British millers and grain men never practised building up large stocks in that country, always preferring to augment their supplies from stocks afloat. At all times many ships, carrying millions of bushels of wheat are plying the trade routes destined for Great Britain and Europe. The total of stocks in ships' holds runs from 30 million bushels and has been known to be as high as 90 million bushels. This large supply can easily be diverted to British shores when the need arises. It is true in war time there is danger because of the readiness with which shipping can be destroyed by hostile navies. On this account an agitation was started to store larger supplies of wheat in the British Isles. This matter has been thoroughly debated but no active move made towards that end.—Wheat Pool Bulletin

THE WORLD OF WHEAT

By H. G. L. Strange, Director "Crop Testing Plan."

The wealth, welfare and prosperity of farmers, and indeed of all of us, in Western Canada depend mainly upon the sale each year to foreign countries of large quantities of Canadian wheat at satisfactory prices.

Between 200 and 300 million bushels a year, it seems to me, will have to be exported if a reasonable standard of living for our producers and other people is to be assured.

Our large annual sales in the past have depended upon the buyers in not less than 72 different countries demanding or "wanting" Canadian wheat. Our problem, then, can be stated very simply. It is that somehow we must induce the buyers of 72 countries to "want" between 200 and 300 million bushels of Canadian wheat each year and to pay a reasonable price for it. Can this be done? Yes, I at least believe it can, provided for one thing that we maintain, and if possible increase, the present margin of quality or "strength" that Canadian wheat enjoys over the "strength" of all other wheats in the world. But we must remember that meanwhile other countries are steadily improving the quality of their own native wheats. Canada, therefore, will undoubtedly have to increase the efforts she is now making in order to maintain her present superiority in wheat quality.

The recent substantial increase in price of wheat has been brought about by the complete disappearance of the "burdensome" world surplus that has tended so to depress world price since 1930.

Rainfall that may occur in Australia and the Argentine in the next few weeks is the most important factor now governing world price. If abundant rains soon occur the world price of wheat will probably fall. If generous rains do not soon fall, however, the price will probably rise still further. The Buenos Aires "Futures" market for the moment is an excellent price barometer.

JAPANESE BUILDING UP TOURIST TRADE

MONCTON, N.B., October 19.—On his first visit to the Maritime Provinces, Mr. Atsushi Kosa, representative of the South Manchuria Railway Company in New York City stopped over in Moncton between trains to see the "Bore," noted tidal phenomenon which brings many visitors to the city. He left later on the Ocean Limited of the Canadian National Railways for Halifax.

"With the extension and improvement of railway services, there has been a considerable influx of tourists to Manchuria," Mr. Kosa said. "Manchuria," he continued, "has a climate somewhat similar to Canada. In the southern portion cotton is grown. There is a great wealth of minerals, including coal." Speaking of Japan, Mr. Kosa, who is a Japanese, stated that the tourist business has increased considerably, every effort being made to build up this trade as in other countries.

D. EMBERG DIES AS RESULT CRASH COOKING LAKE

Approximately 24 hours after his car and a two-ton truck collided head-on about eight miles south of Edmonton on the Cooking Lake trail, David Emberg, 27, C.N.R. brakeman died in University hospital Saturday night. Severe internal injuries and head wounds caused death.

Robert McKercher, 10420 80 ave. is alleged to have been driver of the truck.

No announcement has been made as to when an inquest will be held.

Saturday morning McKercher was fined $20 and costs when he pleaded guilty to operating a truck without owning a drivers' license.

With Emberg in the car when the collision occurred was his nephew Malcolm Bakken, 10636 124 st. who was badly shaken up in addition to sustaining painful face and head injuries. He was not seriously hurt.

Rushed to hospital in a passing car Emberg was attended by Dr. John K. Fife.

BIRCHING-MARKS BRING MONEY

LEEDS, England, Oct. 19.—Juvenile authorities were mystified to see the same faces come up before them time after time for "birching"—a sound whipping with a birch switch—until a sleuth discovered the reason.

The boys were showing their marks to other admiring youths at one and two pennies a look.

Authorities are puzzled as to what to do about it.

[illegible] CREEK

(continued from front page)

Miss Glmener who is teaching school here attended the convention held in Camrose last week.

Miss Gladys Olson visited with friends in Camrose over the Thanksgiving holiday.

Mr. Byrastad from Camrose, who is an organizer for Sons of Norway, visited several homes around here one day last week.

Mr. and Mrs. P. O. Melina and daughter Margaret were guests at Mr. and Mrs. Arthur Shaw's wedding reception held at Mr. and Mrs. F[illegible] recently.

Mrs. Sam Olson has been assisting with the house work at the B. Helgeland home lately. Mrs. B. Helgeland is quite ill at present, we hope for a speedy recovery.

Mrs. J. H. Olson sr., spent last week in Edmonton with her daughter Mrs. L. Watt.

Mr. and Mrs. R. O. Borg and Al[illegible] Mr. and Mrs. P. O. Flaaten, [illegible] Mrs. E. A. Moen and Ed[illegible] and Myrtle attended the program [illegible] Mr. and Mrs. Johnsons' twenty-fifth wedding anniversary held in the Bardo church last Sunday.

Mr. and Mrs. R. O. Borg motored to the city last Thursday. Mr. and Mrs. B. Helgeland accompanied them, Mrs. Helgeland remaining at the hospital for a couple of days for an examination. She returned home Saturday.

Mr. and Mrs. J. Bevild visited Miquelon Lake school, where their daughter is teaching, on Thanksgiving day. The had dinner with friends and met many new friends there.

Mr. and Mrs. I. C. Olson motored to Lavoy last Sunday and visited with Mr. and Mrs. J. Blackburn and family.

Mr. and Mrs. C. Erickson and baby son visited the city last Thursday.

Mr. Tony Leferud from Viking was a visitor at the R. O. Borg, C. Erickson and P. O. Flaaten homes on Thanksgiving day, returning to Viking on Tuesday evening.

Several of the young boys around here are busy preparing ground for a skating rink for the winter. The rink will be at the E. A. Moen place.

Mrs. P. O. Flaaten was a visitor at the A. Patterson home last Friday. Forty-two years ago on that date Mrs. A. Patterson, her mother Mrs. P. C. Moen, Mr. E. A. Moen and Mr. A. Erickson and late Mr. P. Moen arrived here from the States.

SAYS SUN CAUSES MIGRATION HABITS

Bombardment of ultra-violet rays on ductless glands rather than in[illegible] intelligence is responsible for [illegible] migration was the claim of W. J. Dick, Edmonton sportsman [illegible] man, who discussed "Migration of Birds and Animals" at [illegible] luncheon in the [illegible] Monday.

[illegible] to Dr. William Ro[illegible] head of University department [illegible] as "the man who has contributed more than any other to an understanding of migration," the speaker explained northern birds fly on their search of essential sun rays, absent for four months of winter here. With the coming of spring, the process is reversed he said.

[illegible] inland pools young fish are forced to swim downstream for refuge in ocean depths from over-strong sunlight but as they develop, with aid of vitamen D obtained from sea food, requirement of increasing oxygen supply drives them upstream to spawning pools again, Mr. Dick described.

LINDBROOK

(continued from front page)

It looks as if our old friend? winter isn't far off. Still living where we are we must expect it, and up to now the weather has been ideal.

Lots of acquaintances have been renewed of late at the recent sales. People, some of whom don't live so very far away either, not seeing each other, probably for months and sometimes years, meet at the sales. But why can't they meet more often at social gatherings, whist drives and dances, etc., there seems to be a dearth of these.

The Social Credit study group meets at the home of Mrs. A. Smith on the 1st Wednesday in November in the evening.

The L.C.C. meeting is at the home of Mrs. J. Bailey, on the afternoon of the 29th of October. What the answer to the roll call is this time, we dinna ken, so will tell you later.

A party was held at the home of Miss Gladys Johnson, Lindbrook W. last Friday evening. It was chiefly a young folks party so naturally dancing formed the chief amusement. Everyone enjoyed themselves immensely.

CURLING CLUB MEETING

A general meeting of the mens' curling club will be held in the rink waiting room on Wednesday, October 28th, at 8 p.m., for the purpose of electing officers and making arrangements for the coming season.

REORGANIZATION OF PROVINCIAL WORKS DEPARTMENT STARTS

Carrying out the reorganization of the mechanical branch of the provincial public works department and the inspection branch of the trade and industry department, which he announced on Monday would be pressed forward, Hon. W. A. Fallow, minister of public works, stated on Thursday that the mechanical superintendent's branch had been transferred from his department to the inspection branch.

Reorganization is to be carried out by November 1, but transfer of this branch may not be complete until the middle of November.

Asked if this would mean that Superintendent John H. W. Douglas of the mechanical branch would be dismissed, the minister said that so far as his department was concerned he superintendent and its chief were through. However, he said, it was likely that there would be some employment found for him elsewhere.

THREE-YEAR MAXIMUM FOR PUBLIC LOANS

Ottawa, October 20th—Defining further the terms of the housing rehabilitation plan announced by the dominion government a few days ago, officials explained, Tuesday, the maximum period for a loan will be three years. The federal treasury guarantees chartered banks against 15 per cent of the loss on an aggregate loan total of $50,000,000. Individual loans are limited to $2,000.

UNITED CHURCH NEWS

The Anniversary services of the United Church held on Sunday and Monday 18th and 19th were most successful.

The guest speaker, The Rev. Alex Stewart of Edmonton delivered two very thoughtful, interesting and powerful sermons.

The congregations were large both morning and evening.

The Junior Choirs led the praise at the morning service and also rendered a beautiful anthem.

In the evening the senior choir helped the service considerably and sang an appropriate anthem.

Mr. Broughton was soloist at both services.

On Monday the Annual Supper was well patronised. The men folks excelled as waiters.

The concert following the supper had a well balanced programme which was received.

Mr. Jos. Rogers acted as chairman. The following took part: Mrs. Firth, Betty and Shirley Stinson, Messrs. Thomas, Broughton Chaseer. Mr. McCauley was the accompanist.

Also talks were given by Messrs John Cookson, Bert Level and Revs. A. Stewart and D. K. Allen. The success of the gathering was largely due to the fine co-operation of all the groups.

The members of the Church Board wishes to thank all those who in any way helped to make our Anniversary celebrations successful and memorable.

WOMEN STOP TRAIN, 'BEAT UP' ENGINEER, SEND CREW SCURRYING TO NEARBY WOODS

Minden, La., Oct. 20.—Women strike sympathisers stopped a train here, beat the engineer, tore the clothing from an official, chased the crew into nearby woods and left the frightened passengers stranded.

The women, several hundred strong, surrounded a northbound train of the Louisiana and Arkansas railway when it stopped here for water Monday night, clambered aboard, and collared Mark Willis, senior engineer of the line, and a negro brakeman. Other crew members leaped from the train and fled to nearby woods.

W. P. Salisbury, chief engineer of the road, protested vigorously when Willis was hauled into the station and forced to telegraph his resignation to C. P. Couch, president of the railway.

The women turned on Salisbury, witnesses said, ripped his clothing from his body, slapped him roundly, and let him go.

A shop foreman went out to the stalled train later in the night, shut off the steam to keep the locomotive engine from exploding, and moved the engine into the roundhouse.

The strike has been in progress for more than a month. Since it started, a passenger train was derailed, causing a fatal injury to two persons, and a railway bridge was burned.

LOSES $300 SAVED FOR HOME IN CITY

His hopes of settling in North Edmonton with his wife and children blasted, Walter Yasinski went back sadly to his farm home at Lamont at the week-end, $300 poorer after losing that amount of hard-earned funds from his hip pocket Saturday night.

Known as a quiet plain-living young farmer, Yasinski had been pinching the pennies for many moths in an endeavor to save enough money to buy land in the city and a small house which he intended to move onto the property. He had already paid more than $200 on the deal.

Saturday night he told police the $300 was in his pocket at 3:30 p.m. when he left a real estate office where he had been "dickering." He went for a long stroll, including a visit to a livery stable on 99th street and a lumber yard in North Edmonton not far from the scene of his hoped-for future home.

Returning to his lodgings, he spent a short time there before again going uptown. When he arrived home once more at 10:00 p.m., he felt his hip pocket for the reassuring bulge which represented his claim for security, a city home, and a place to bring up his children.

There was no bulge there at all. The money was gone.

COCHRANE CHINESE SENTENCED TO DIE

COCHRANE, Ont., Oct. 15.— A verdict of guilty was returned by a supreme court jury last night in the case of John Wah, 54-year-old Chinese, charged with murdering Wong Hong at Timmins, Nov. 4, 1935.

After deliberating for four hours and a half the jury returned to declare Wah "guilty" of murder as charged, but we recommended mercy. Wah was sentenced to hang Jan. 8

STUFFED DEER FOOLS HUNTERS IN NEW BRUNSWICK

Fredericton, October 20th.—Hunters hopped from their automobiles with loaded guns to fire at a deer, standing on Roy Estey's farm. They were too late, though, for Estey already had killed the deer, stuffed it and placed it near the road as a "joke."

FIREBUG AT FRANK STARTS 7th FIRE

FRANK, Alta., Oct. 22.—A "firebug" whose blazes in the past three weeks have amounted to seven, has continued to baffle R.C.M.P. and a citizens' vigilante group in this Crow's Nest pass town, 125 miles south of Calgary.

The incendiarist set his latest blaze Tuesday night just as the citizens were leaving on their first patrol. A building a quarter mile west of here, used to store village-owned wooden pipes was destroyed with loss estimated at $600.

LOUISE HAS ARMY OF RATS

LAKE LOUISE, Alta., Oct. 21 — An army of packrats today continued their invasion of the village here, growing so bold they entered house doors fearlessly whenever given the chance. For days the rats have been entering basements and residents have been unable to stop them.

The village of Lake Louise is on the railway line, about three miles from the lake itself. The invasion was heralded by some as portending a hard, cold, long winter.

Only about 100 of the 60,000 children who left London schools in the last year have failed to find employment.

VETERAN TWO WARS DIES IN ARDROSSAN

Veteran of two wars, William Mearns, 60, of Ardrossan, died Wednesday at his home. He had been a farmer in the Ardrossan district for the past 11 years.

Surviving him are his widow; one son, Duncan of Ardrossan; two brothers, Duncan, Scotland, and Hector, Nyasaland, Africa; two sisters, Mrs. R. Marsden and Miss M. Mearns, Scotland.

Funeral service will be held at 2:00 p.m. Friday from St. Peter's Anglican church, Ardrossan. Rev. A. Wallis will officiate. Burial will take place in Fairview cemetery.

DON'T AID CRASH VICTIMS, DOCTORS URGE BYSTANDERS

PHILADELPHIA, Oct. 21.—The innocent bystander who attempts to aid a person injured in an automobile or other accident was warned today by members of the American College of Surgeons that the best thing he can do is nothing.

Unless an injured person is in imminent danger of further injury he or she is best left exactly in the position and on the spot where injured until a physician or surgeon arrives, since attempts to aid generally result in complicating the injury, the surgeons declared.

The advice emanated from a symposium on fractures held as part of the 26th annual clinical congress being held this week.

Dr. Robert H. Kennedy, of New York, pointed out that from 1,000,000 to 1,500,000 fractures occur annually in the United States and that in a large number of cases "helpful" attempts of untrained persons vastly increased the injury.

VANCOUVER JOBLESS CREATE PRISON ROW

VANCOUVER, Oct. 22.— Some 100 unemployed men, awaiting hearing on charges of obstructing police officers staged ochert-lived demonstration in their cells at the city jail late Wednesday when it became known that 15 of their comrades had been given jail terms in police court Wednesday.

The men rattled the bars of their cells, stamped their feet, shouted and sang for almost an hour.

Of a total of 26 men appearing in police court Wednesday, 15 were sentenced to two months on charges of obstructing police officers, three were dismissed on the same charges and six were remanded.

The men also were reported to have also gone on a hunger strike and thrown their food out into the corridors and out windows into an adjoining lane, although this was denied by police officials.

Social Credit Meeting Held at Logan

On Tuesday evening the people of Logan Polling Division No. 7 called for the district organizer, J. Ferguson, to attend a meeting at the McKenzie school house for the purpose of organization. They met with a fine response, there being a full house. The organizer called the meeting to order and asked for an appointment of a chairman. He then asked the people if they were prepared to elect their officers and complete the organization or if they wished the organizer to address the meeting on the necessity of studying money, and how it affected trade as medium of exchange, the answer was, "give us the information."

The organizer took for his subject, "Has money something to do with the present World Chaos. The Factors behind Booms and Depressions." He proceeded to prove that money was the chief obstacle, demonstration: Supply and demand could not function so long as a third party controlled the medium of exchange, this was proven by a speech made by the President of the Central Bank of Canada, in which he stated commodity prices and security prices were too high in 1929 so credit had to be contracted, [illegible] to the tune of about 50 per cent. Now he stated, "prices were too low so he would have to expand credit, but pleaded that he would have to do so gradually in order to avoid a boom. Speaker then proceeded to show how the people could use their own credit, and also equate goods and money as we know it.

The people were satisfied to go on with the organization, some 25 members signing up. Officers elected were Harold Weatherill, president; E. J. Googlein, vice president; Jack Johnson, secretary-treasurer; with a slate of 8 members to act as committees for the good and welfare of the organization and was declared a fully constituted group. Business was then taken up. The group will meet the 1st Tuesday of each month. The setting of dues will be arranged later. The meeting then discussed the holding of a zone meeting, and decided to hold same at Tofield on Thursday, Nov. 5th at 1 o'clock. It was urged that as many members as possible attend the zone meeting.

It might also be stated that a good number were out from Lakeshore, and arrangements were made for a canvas to be made for signers for that district. 9 have already signed and when the required number (15) is reached they will form an organization.

The success of the meeting was largely due to the work of Harold Weatherill and Mat Eagleskam, to whom a hearty vote of thanks was extended. Meeting adjourned at 12 p.m.

A number of the Tofield Young people motored to Viking on Friday evening to attend a young people's meeting there.

LOCAL & PERSONAL

The annual C.W.L. bazaar and chicken supper will be held in St. Francis' Hall, Saturday, November 7.

Mrs. Jack, nee Helen Schultz, visited the Thompson home here over the week end. She is now visiting her aunt, Mrs. McConnel.

Mrs. B. Seale and Miriam and Mr. and Mrs. A. N. Booth motored to Fallis for the week end to visit Mr. and Mrs. B. Swift. Mrs. Swift and Lawrence returned with them.

Mr. Harry Rogers of Winnipeg is visiting his brother Mr. Joseph Rogers here.

Mr. and Mrs. Jacobs and Ida motored to Wetaskiwin on Sunday to visit Mr. and Mrs. George Mc[illegible]

Jack Barnes left for Calgary en route for England on Saturday last. Jack is planning joining the air force.

Mr. and Mrs. D. E. Ball were visiting in Tofield over the week end.

Miss Joan Ellis was in Tofield on Sunday.

Ray Martin was in town last week after spending the summer in the Peace River country. He intends spending the winter in Wildwood.

Mr. and Mrs. Wm. Pollard of Namao were visitors at the A. Herndon home this week.

The Junior C.G.I.T. group held a very successful Hallowe'en party on Wednesday evening.

Mr. and Mrs. McLeod left on Monday for the Coast where they will reside.

Mr. and Mrs. Pat Gladu and family left for the Coast this week where they intend living.

The Jolly Twelve Bridge Club held its first meeting on Monday evening at the home of Winnie Warton. Honors were won by Mrs. Coutts and Mrs. Currie.

The W. A. will meet at the home of Mrs. W. McCarthy on Thursday, November 5th at 2:30 p.m.

TOWN COUNCIL MEETING

A regular meeting of the town council was held on Monday, October 26th. Present were Mayor G. B. Bruce, Councillors Coutts, Swift, Bellamy, Lovell, Hammond and Low.

A number of routine communications, covering relief matters, hospitalization of indigents, etc. were read and content noted. A number of accounts were approved and payment of same ordered. The matter of an adjustment of the debenture indebtness was reported to be still a subject of correspondence between the Utilities Board and the owners of the bonds. Council made a detailed review of all agreements of sale of lands disposed of by the town and in which the town still has an equity. The usual financial statement covering receipts and expenditures for the month of September was read and ordered placed in the minutes. The By-Laws committee was instructed to engage a number of special policemen for duty on Hallowe'en night, with instructions to have them sworn in as constables so that they would have full authority to arrest any persons committing a breach of the peace, or found damaging property in any manner. The Public Works committee was requested to have posts, with the tops painted white, placed in the shoulder of the grade at the curve in the road immediately east of the large school. This as a warning and protection to motorists on account of the high grade at this curve.

Report of Mr. Warton's visit to the immigration convention at Saskatoon in connection with the Hornby immigration scheme as published in the next issue of the Tofield Mercury of Oct. 1st, was placed before the council for consideration. It was ordered placed on file for future reference.

LAKESHORE

Mr. and Mrs. Harrison were Sunday guests at the T. R. Murray home.

Mrs. Bert Swift of Fallis is visiting at the home of her parents.

Mrs. Bertha Seale is busily employed moving her household effects into the house of Mrs. Myrtle Seale.

Mark Ferguson was bruised and shaken up when a team ran away. He was loading lumber and the horses became frightened. In attempting to reach the lines he was struck by the rear wheel and knocked to the ground.

KETCHAMOOT

The regular monthly meeting of the Ladies' Aid will be held next Wednesday afternoon, Nov. 4th, at the home of Mrs. J. Appleby. A cordial invitation is extended to all.

Mr. and Mrs. O. Barnes, Mr. and Mrs. Nomeland and Mr. Frank Hull visited at the home of Mr. and Mrs. Wm. Splisted.

Mrs. R. Berraclough and children of Bardo spent a few days visiting at the home of her parents, Mr. and Mrs. L. Carlisle.

Our little patient, Doris McGinitie, has been having quite a serious time. It will be remembered she broke her leg near the hip some three weeks ago. After Xrays and operation, still confined to the hospital and a further operation and cast put on will be necessary.

A pleasant afternoon was spent at the home of Mrs. E. McMullen on Thursday of last week when about 25 neighbors met to help celebrate Mrs. McMullen's 70th birthday anniversary and to wish her many happy returns of the day. During the afternoon Mrs. McMullen was made the recipient of a box of stationary and a cup and saucer and purse of money, also two pretty birthday cakes. Mrs. Brick made the presentation. Guests present were: Mrs. Grats, Mrs. John Brown, Mrs. Davison, Mrs. J. H. Ingram, Mrs. C. A. Ingram, Mrs. W. A. Mitchell, Mrs. Schultz, Mrs. O. Barnes, Mrs. Ralph Barnes, Mrs. L. Carlisle, Mrs. E. Carlisle, Mrs. Elsie Carlisle, Mrs. Brick, Mrs. H. McGinitie, Mrs. Owens, Mrs. Sears, Mrs. Berraclough, Misses Edith Davison, Nellie Lindsay, Mildred Ingram and Ethel Coombes.

Miss Gertude Ingram, whose marriage to Mr. Leslie Ovaldson takes place on Saturday, Oct. 31, was guest of honor at the Barnes home Wednesday afternoon of last week when Mrs. Oscar Barnes entertained about 30 guests to a miscellaneous shower. The bride-to-be was assisted by Miss Ethel Coombes and Ethel Brown in opening the many useful and beautiful gifts. Refreshments were served and a pleasant afternoon was spent. Among those present were: Mrs. J. H. Ingram, Mrs. T. D. Ferguson, Mrs. Susan Brick, Mrs. McMullen, Mrs. Coombes, Mrs. McCowen, Mrs. B. Cookson, Mrs. Campbell, Mrs. Lawson, Mrs. C. A. Ingram, Mrs. John Lee, Mrs. L. Carlisle, Mrs. H. Lawson, Mrs. Earl and Elsie Carlisle, Mrs. Jim Sutton, Mrs. Albert Sutton, Mrs. Nomeland, Mrs. Oliver Thompson (Kingman), Mrs. John Brown, Mrs. Soma, Mrs. Tollefson, Mrs. H. McGinitie, Mrs. W. A. Mitchell, Mrs. R. Barnes, Mrs. Schultz, Mrs. Sears, Mrs. A. Lehman, Mrs. Davison, Misses Mildred and Kathleen Ingram, Hazel Sears, Mildred Soma, Janet and Ethel Brown, Ethel Coombes, Selma Nomeland, Esther Winder, Margaret and Angus Tollefson, Marie Wodchuk, [illegible]

Among the Edmonton visitors on Tuesday were Mr. and Mrs. H. McGinitie, Mr. and Mrs. L. McGinitie, Mr. and Mrs. Nomeland and Selma, Mr. and Mrs. Oliver Thompson, Julius Lerbekmo, Mrs. C. A. Ingram, Mrs. Sears, Hazel, Albert and Stanley Sears.

Charley Sears is spending a few weeks with his cousin Don Creasey at Athabasca.

LINDBROOK

The dance at Mr. P. Lauritzen's new barn having been reported in last week's issue, we need not repeat.

We hear Mr. W. Munro is building a new house. What are you going to do Billy? A dance? whist drive, bridge or a stag party? Have to do something you know, it's an old Canadian custom.

Mr. Archie Domberger was taken to hospital this week seriously ill with pneumonia. To date no reports have been received, but no news is good news in a case like this.

Mrs. Tucker is doing well after her operation and will be home shortly.

Mr. Norman Ellis purchased a pure bred Suffolk ram at the sheep show and sale in Edmonton last week.

A Pie Social and dance will be held in the School House on Friday evening, Nov. 6th, in aid of the childrens' Xmas tree. All of you are expected to attend and bid high for the pies.

A farewell party was held last Saturday at the home of Mr. and Mrs. F. Kortzman in honor of Mr. and Mrs. Pat Gladu and family who are going to reside at the Coast.

Curling Club Elect New Officers

A meeting of the Tofield Curling Club was held in the rink on Wednesday evening Oct. 28. Whilst the number present was rather small, the feeling was one of enthusiasm for curling prospects for the coming season.

Officers and committees elected were as follows: President, Johnstone Ferguson; Secretary, J. W. Chapman; Vice-president, O. P. Thomas. An executive committee composed of the president, vice-president, secretary, together with J. G. Jobb, A. B. Clutterham, J. E. Stinson and Dr. F. P. Law was appointed. Membership committee Dr. F. Law and Rev. D. K. Allan. Ice Committee, M. C. Hammond. It was decided to re-engage Mr. Art Hosler as caretaker and ice maker for the season, the work of preparing the rink for the making of ice to commence immediately. It was estimated that there should be at least ten rinks of curlers.

CORNHILL COUNCIL MEETING

The last regular meeting of Municipal District of Cornhill was held at the Municipal hall on Friday, Sept. 25th. Councillors Bonese, Holmberg, McSporran, Glenn, and Walker were present. The meeting was called to order by Reeve Glenn at 10:20 a.m.

Minutes of the previous meeting together with list of accounts were read by the secretary and upon motion adopted.

It was moved by Councillor McSporan that the secretary be authorised to interview Messrs. Griesbach O'Connor and O'Connor, Edmonton regarding Mrs. R. E. Dow's application or action for damages and also for a larger culvert to be placed under road diversion at a point opposite C.N.R. cement culvert along south side of Section 33-51-20, W4. The secretary was requested to point out to the solicitors that present drainage ditch requires to be rebuilt or cleaned as it is not capable of draining area in question. Secretary also to be authorized to appoint A. T. McLean, Edmonton, to represent district if found necessary. Carried.

The secretary was instructed to write Messrs. Parrish and Heimbecker, Ltd., Edmonton, advising them to place their recommendations re roads before council in writing not later than May 1st of each year.

Moved by Reeve Glenn that Secretary write Mr. H. G. Pitterson stating that council fully appreciate and recognize the state of drainage conditions that existed during spring of 1936 in that area covered by Hay Lakes Drainage District No. 11. However the council have not any authority to deal with this as it is a matter appertaining to the said Hay Lakes Drainage District No. 11.

Moved by councillor Merden that District appoint Mr. A. T. McLean, Barrister, Edmonton, to represent this district in having the question of who is responsible for the care of Mr. Herbert Anobie. Mr. McLean to take steps as outlined in his letter to district. Carried.

Upon motion it was resolved that Medical Health Officer be requested to report to district office all patients sent to hospital by him. Carried.

Moved by Councillor Merden that Reeve endeavor to engage Mr. Johnston Ferguson as relief inspector for winter of 1936-37. Remuneration when on duty $5.00 per day and 10c per mile for use of his car. Carried.

Moved by Reeve Glenn that Secretary be authorized to have suitable signs printed outlining that Council desire advance notice of one month from any person who considers he or she will require assistance during the winter of 1936-37. Carried.

Moved by Councillor Holmberg that secretary write the Board of Public Utility Commissioners, Edmonton requesting that all taxes levied on Lots 7, 8 and 9 of plan 3490 CS., a plan of subdivision of part of S. E. ¼ of Sec. 6-49-21 W4 up to and including the year 1936, be paid to this district before said property is included in the Village of Hay Lake. Carried.

Moved by Councillor McSporran that lots 1, 2 and 3, block 5, plan 7534 AA be sold to Mrs. P. M. Simonson for the sum of $21.00. Carried.

Mr. A. C. Jenson interviewed council re road diversion effecting the N.E. 7-51-19 W4, asking the sum of $150.00 for damages. Moved by Councillor McSporran, committee be appointed to investigate Mr. A. C. Jenson's claim for damages. Carried.

Moved by Councillor onese that Mr. W. Grahn be sold two lots in

When the Easiest Way Is the Best Way----

There are no two ways about it! Certainly the easiest way to get the most for every dollar you spend is to buy products that you know about through the advertisements in your local paper. You don't have to go out and look for buying opportunities. The advertisements bring them to you. And all you need do is consider the facts, compare values and decide on the soap or the sedan that best fits your judgement and your pocketbook.

Certainly the best way of making your money go farthest is to buy merchandise of proved value. Advertised merchandise. Merchandise that is bought and used by many people. Merchandise that must be superlatively good enough for its maker and your local retailer to keep calling it to the attention of people week after week and year after year.

This is the service—of convenience and profit—that the advertisements offer you. It will pay you to read them regularly and take advantage of everything they can do for you.

READ THE ADVERTISEMENTS IN THE

THE MERCURY

AN UNUSUAL PRICE SITUATION

An abnormal condition has existed in wheat markets this season. The price of the May option has been consistently below the price for cash wheat and this has been the case for weeks. Under normal conditions the price of the May future should be considerably higher than that of cash wheat. It costs a cent a bushel a month for storage charges on wheat so that to carry that commodity from now until May would entail an expense of at least six cents a bushel. The extraordinary situation on the market this autumn actually discounts the May futures price on top of not allowing anything for storage charges.

The only reasonable conclusion that can be reached as to the cause of this rather unprecedented market condition is the possibility that European importers, and notably those of the United Kingdom are of the opinion that wheat prices will be lower later on in the year. Added to that is the dearth of immediate supplies, for, outside of some 50 or 60 million bushels wheat surplus in the Balkans, Canada is the only country with large supplies of surplus wheat.

There have been price flurries due to reports of bad conditions in the southern hemisphere. Importers are very seriously short in its supplies, but it is now fairly well established that Argentina will at least have an average crop, and past experience suggests that that country will offer freely once harvesting is concluded. It may thus be judged that the British, at least, look for lower wheat prices when Argentina begins to market her crop. They are thus apparently buying current needed supplies from Canada but are not interested in the future price of wheat in this country to the extent of bidding up the May to a level to which it properly belongs under the normal mechanism of exchange marketing. There is another fact to be considered, and that is, that the United States winter wheat acreage is the largest for a number of years and prospects are better than for several years past.

No one can predict what the wheat market will do because human beings are not given the power to foretell what the weather will be nor can they foretell what other important factors will enter into the situation. But it is well to have an accurate grasp of the whole picture and not to be influenced entirely by enthusiasm. This year is certainly an abnormal one and Canada is occupying a rather unusual position. It cannot be expected that crop disasters will continue on the same scale in the future as they have in the past couple of years.

WHICH ARE YOU?

By Edna Wheeler Wilcox

There are two kinds of people on earth today:
Just two kinds of people, no more, I say.

Not the sinner and saint, for it's well understood,
The good are half bad, and the bad are half good.

Not the rich and the poor, for to rate a man's wealth,
You must first know the state of his conscience and health.

Not the humble and proud, for in life's little span,
Who puts on vain airs, is not counted a man.

Not the happy and sad, for the swift flying years
Bring each man his laughter and each man his tears.

No; the two kinds of people on earth I mean,
Are the people who lift, and the people who lean.

Wherever you go you will find the earth's masses
Are always divided in just these two classes.

And, oddly enough, you will find too, I ween
There's always one lifter to twenty who lean.

In which class are you? Are you easing the load
Of overtaxed lifters, who toil down the road?

Or are you a leaner, who lets others share
Your portion of labor, and worry and care?

In the shoe business there is a width called AAAA. It looks decidedly unconstitutional.—American Lumberman.

CHEMIST: FARMER OF FUTURE

LOS ANGELES, Oct 28—A world of tomorrow in which families will raise their own vegetables from chemical tanks instead of gardens, getting a year's supply at the present monthly cost was visualized today by Arthur C. Pillsbury.

Mr. Pillsbury, naturalist, inventor, explorer, author, and lecturer, said soilless tank experiments had indicated a tenfold increase in vegetable production.

"Although the idea is not new, recent experiments have led scientists to believe that vegetables can be grown commercially in shallow tanks, partly filled with water, in which all the necessary soil elements have been mixed," Mr. Pillsbury said.

"In one instance tank-grown potatoes produced between 2000 and 3000 bushels to the acre as compared with a United States average of 104 bushels.

"The size of flowers grown under this process was doubled and furthermore they were produced at any time of the year, as were the vegetables.

"In an effort to raise winter tomatoes, we planted them in the tanks in December and harvested them in March.

"Nasturtiums grew in the tanks so fast they fell down, unable to bear their own weight, while almost all other flowers and vegetables had to be artificially supported. Tomato plants grew 25 feet high and 40 feet wide," he said.

Mr. Pillsbury is noted for his pictures of growing plants taken with a "lapsed time" camera, which operates like a motion-picture camera but takes pictures at set intervals. Pictures that require more than three months to take can be shown in about three seconds on the screen, he said.

[illegible]

WILLIAM LAKE, B.C. Oct. 27.—Hunter's shot that killed a Canada goose here, also killed a passenger—a humming bird travelling south in a soft warm berth of feathers of the larger bird.

Ornithologists say it is a common practice for humming birds to stow away in this fashion and frequently when the geese are brought down the small creatures dart away from their crashing air-liner.

CANADIANS AND THEIR INDUSTRIES....AND THEIR BANK

FIRST IN CANADA'S INTERNATIONAL TRADE
· THE TOURIST INDUSTRY ·

A national asset worthy of the most intelligent cultivation is the tourist business, which brought $302,000,000 into Canada last year and is estimated to bring at least $350,000,000 this year. In our international trade its monetary value to Canada now ranks ahead of that of any of our exports, not excepting those important exportable commodities, wheat and newsprint.

But the tourist industry has potential values beyond its annual money income:

- it fosters exchange of ideas between neighbours, international understanding and co-operation, tolerance and goodwill;
- it accelerates betterment of railway, waterway and airway service, of motor roads and hotel accommodation;
- it awakens interest in Canadian products and opportunities for capital investment.

Through its offices abroad and more than 500 branches distributed throughout Canada, the Bank of Montreal is one of the leading factors in providing service for the tourist trade. Its offices abroad and in Canada are centres to which countless tourists turn for information and guidance. These offices not only extend financial hospitality which facilitates the exchange and transfer of money, but contribute in many other ways to make the visits of tourists comfortable, happy and profitable.

Thousands of customers of the Bank of Montreal do business with visitors from other countries—hotels, transportation lines, service stations, stores, or creameries—and they too find the kind of banking service they need in the Bank of Montreal.

From the General Manager's address at the annual meeting of the stockholders of the Bank, 193

"Canada has unexcelled railway and hotel facilities to attract tourists the whole year round, and yea as our automobile roads are improved more and more American cars will be seen

"Railway and steamship lines, tourist agencies papers have done a great deal towards cult important trade in the general intere

"Country hotels, boarding houses and coming to realize the necessity of s dations and service.

"If tourists are given a warm w accommodated and treated courte number will increase annually

MODERN, EXPERIENCED BANKING SERVICE....THE OUTCOME OF 11

AN OPPORTUNITY AND A CHALLENGE—

HALLOWE'EN EVE, during the darkest hours of which restless supernatural spirits are supposed to be roaming around, is almost upon us once again. Witches and Hob-Goblins may or may not be abroad in the land, but one can bet their Sunday dinner a whole lot of youngsters of tender age will. With capacious pockets, augmented by the occasional bag, youngsters, disguised and undisguised, will be out requesting treats. Apples, peanuts and candy are the general fare and the thrill of getting them by this method on Hallowe'en is out of all proportion to their actual worth. And so is the thrill of giving, so if a roving band of Gypsies, Indians, or just plain Canadian youngsters call for apples, peanuts and candy Saturday night, it is both the part of wisdom and generosity for those people who are able to, to have some on hand for the special purpose of giving them away.

But really, the Hallowe'en fun does not end there. Spontaneous and generous giving should be responded to by spontaneous and generous appreciation. Therefore school boys and school girls out for apples, peanuts, and candy, and a good time, should respond to the generosity of citizens by refraining from the petty annoyances to which citizens in the past have often been subjected. For after all—one good turn deserves another.

To those who are past school age but still on the youthful side of life, Hallowe'en is both the signal and opportunity for fun and frolic. No reasonable person begrudges youth its proper share of fun, but youth should take care that fun—even Hallowe'en fun—should not conflict with the rights of others. Some pranks are harmless, others cause those upon whom they are perpetrated much inconvenience—occasionally sorrow and grief. Therefore before becoming involved in them, it is wise to remember that laughter, created at the expense of a victim, is at the best rather hollow, and moreover has the strange quality of echoing in the distance, and coming back as barbs, to the point from where it started. Hallowe'en throws down a challenge as well as offering an opportunity to youth. It gives youth the opportunity for exuberant fun and challenges it to find a way of providing this without damage or hurt to anyone. Can youth take up the challenge?

LOOKING BACK TWO YEARS—
(Winnipeg Free Press)

IT IS interesting to recall now that two years ago western farmers were being told, by Canadians of exalted position and influence, that the way to prosperity for them was to cut down wheat production. Indeed, just two years ago, in August, 1934, the name of Canada was affixed to a "world agreement" which committed this country to reducing wheat exports (and therefore acreage, as many understood the document) by 15 per cent.

At the time this agreement was hailed with enthusiasm by some people as a brilliant stroke of statesmanship. Canada, the advocates of artificial scarcity said, had been growing more wheat than the world would buy. Canada would have to reconcile itself to the fact that European countries were going to raise their own food. Canada had better get rid of the notion that it could any longer play a dominant role in the world wheat trade. Those days were gone forever. That was the argument put up by the defenders of the wheat agreement in 1934.

The agreement, as it happened, was not made effective except in a limited sense. For one season, and one only, the Government of the day restricted exports by the agreed percentage by the method of holding the huge stock of wheat it had acquired. But the farmers were not forced, or bribed as in the United States, to reduce their acreage. Many did so voluntarily after listening to the preachers of scarcity, but there was no compulsion and no offer of handouts for leaving land uncultivated.

How fortunate it now appears two years later, that the policy of the wheat agreement was quickly dropped, in fact never wholly adopted by this country. The Free Press takes some satisfaction in recalling its part in showing up the stupidity of the pledge Canada had given; but the wheat agreement was defeated by events, not argument. When it appeared in the fall of 1935 that Canada could look forward to a season of heavy export business, the exponents of scarcity said: "Ah, but this is an exceptional year and does not disprove the general theory." Now that another good export season is in prospect, not a word is heard from these citizens. The United States, largely because its own farmers were bonused by the AAA to cut wheat acreage, is importing Canadian wheat in volume. Italy is buying because of weather damage to its own crop. Canadian wheat is selling, and at a good price. There is nobody in Canada today who would deny that the adoption of the scarcity policy in this country in the last two years—the enforced cutting of wheat acreage—would have been an unmitigated disaster.

No one, it may be said, can predict excessive rainfall in Italy or a political event like the AAA in the United States. Quite true; but it remains a curious fact that politics or weather, or some other cause, always produces a demand for wheat somewhere in the world—a demand which can be filled by any country that has the grain and is ready to part with it at a reasonable price.

THE FARM AND HALLOWE'EN—ORIGIN AND LEGENDS

No farm; no Hallowe'en festivities. That is the position, although little thought may be given that the festivities of Hallowe'en and the farm, as the producer of the fruits of the earth, are inseparable. Certainly, the apple and the pumpkin, two farm products, are popularly associated with Hallowe'en, but the farm is also the supply base of all the necessary essentials of the feast. Even the humble cabbage, apart from its culinary purposes, has a peculiar significance at Hallowe'en, for do not some maidens sally forth in the darkness of the night to the cabbage patch to pick a stem, in order to divine the characteristics of their future husbands. If the stem be tall, or short or crooked, so shall their future husbands be?

The pumpkin as a Jack-o-lantern in the hands of a frolicsome lad is the improved Canadian edition of the humble swede turnip in Europe, and to many a youth in Canada the pumpkin is the symbol of Hallowe'en par excellence, either for food or frolic; but after all the apple is more closely associated with the feast than any other fruit or vegetable. There is a special reason for this. In pagan times, at the festival of Pomona, the goddess of fruit trees, nuts and fruits, particularly apples (poma) played an important part and originated the custom of roasting nuts, apple ducking, and the distribution of apples as gifts at this festive time. The Canadian boys who go from house to house asking for Hallowe'en apples are doing exactly what little boys in other countries did three thousand years ago.

When Adam was appointed to dress the garden of Eden and to keep it (Genesis 11,15), the apple was fated to be of overwhelming significance to the whole human race. In this connection, the legend of the Apples of Paradise figured in the lore of ancient Egypt some 3,000 years ago. These apples were said to show in their lop-sided shape the outline where Eve had taken a generous bite. In this Egyptian lore, there was mention of other apples, the apples of Istkahar, all sweetness on one side and bitterness on the other. In modern times, in the production of various kinds of apples, Canadian scientists have been and are in the forefront of world research.

In the Christian church, Hallowe'en or All Hallows Eve is the name given to the evening of the 31 of October as the vigil of Hallowmass, or All Saints Day. Before the Christian era, however, the eve of the 31st of October was the occasion of harvest and other ceremonies in various countries. The festivities which gradually gathered round the Christian Hallowe'en originated for the most part in countries under the sway of the Druid religion, notably Britain, plus a few indoor celebrations borrowed from the pagan Roman festival to the goddess of fruit.

The two chief characteristics of ancient Hallowe'en were the lighting of bonfires and the belief that Hallowe'en was the only night of the year in which ghosts, warlocks, witches, imps of the earth and air, and evil spirits were permitted to wander on earth. On the 1st of November the Druids held their great fall festival and lighted fires to the sun-god in thanksgiving for harvest. It was a firm belief in the religion of the Druids that on the eve of this festival, Saman, lord of death, called together the wicked souls that had been condemned within the past 12 months to inhabit the bodies of animals. With regard to this belief it is interesting to note that in parts of Ireland, the 31st of October was, and even still is, known as Oidhche Shamhna, the vigil of Saman. In Scotland, bonfires, otherwise known as beal-fires, still are part of Hallowe'en celebrations, a relic of the worship of Baal. Some cynics declare that the evil spirits of old Druidical times still exist in the shape of thoughtless youths who overstep the mark of pure fun at Hallowe'en and cause injury to persons and damage to property.

While the apple still holds its premier position in Hallowe'en festivities, particularly in Canada, pumpkin pie is also held in high esteem. At the same time there are other pumpkin delicacies, for example, pumpkin chips and candied pumpkin, in the making of which at Hallowe'en time the following recipe may be found useful.

Honey Pumpkin Pie

1 cup cooked pumpkin.
½ Cup honey.
One-third teaspoon ginger.
One-third teaspoon cinnamon.
One-third teaspoon salt.
1 egg
1½ cups milk.

Press the pumpkin through a fine sieve, add salt, spices, and honey. Beat well. Add well-beaten egg; then the milk. Pour into a deep pie plate lined with pastry and bake at 450 degrees F. for ten minutes, then reduce heat to 325 degrees. Bake until custard is firm. Pumpkin custard is excellent for children and may be served when pie is served to adults. For the custard, use the above recipe, omitting the spices. Bake in custard cups.

TO PROSECUTE SHORT WEIGHT GRAIN BUYERS

Complaints about short weights and non-payment for wheat being purchased by unlicensed dealers through Alberta have been received at the offices of the board of grain commissioners here and prosecutions will follow, W. H. Blatchford stated today upon his return from a trip through the northern section of the province.

At Didsbury, Mr. Blatchford said an unlicensed buyer had been operating and several farmers had complained of non-payment following delivery. At Leduc some buyers purchasing grain from the farm and trucking it into the town, are reported to be "chiseling" on weights.

One farmer complained a load of 125 bushels had returned him only the price of 115 bushels; another in the same district stated he had been "short-changed" as high as 20 bushels on a truckload and other complaints were along similar lines.

The major difficulty, Mr. Blatchford states, is on the part of the farmers themselves in selling to men not licensed by the board and consequently not bonded.

The Grain Act specifies that all buyers must be licensed and bonded, the assistant commissioner said, and farmers selling grain to other than recognized sources should be careful in that regard.

In any event precaution should be taken in event of sale to unknown truckers, to be sure and have some reliable person in town verify delivery weights.

BURIED 10 YEARS, HIDDEN
SAVINGS OF $3,000 FOUND

HARRISBURG, Pa., Oct. 27.—Ten-year search in the York county hills finally uncovered the "tin can" bank in which William Felty buried between $5,000 and $6,000 on his farm and then forgot the hiding place.

Time had reduced the money to bits of mouldy paper and dust which were sent to Washington to determine their redeemable value.

Felty buried the cash in 1926. Unable to remember the spot he dug up practically every section of the farm in the intervening years. He finally located the cache outside a stone fence bordering the property.

RUSSIANS TO TRY CANADIAN WHEAT

WINNIPEG, Man.—Russia will not be a competitor of Canada in the export wheat markets, at least not in the near future, said A. Essipoff, chief of the State Plant Breeding Fund of the Soviet People's Commissariat of Agriculture, Moscow, who is visiting western Canada to study Western Canada's methods of wheat breeding.

Russia's chief object at present is to produce enough to feed its population of 170,000,000. With economic conditions improving for its people, they are asking for more wheat in place of the rye to which they have been accustomed. This will make it unlikely that Russia will be a competitor for export markets for this year at least.

Canadian methods of combating rust in wheat are very interesting to Russia, Mr. Essipoff said. Some of Canada's best wheats will be planted in Russia with a view of adapting them for that climate.

BANANAS IN MAINE?
PATENT APPLIED FOR

WASHINGTON, Oct. 23—Schemes to produce oranges and bananas outdoors in Maine and to grow forest trees as an annual crop, like potatoes or wheat, are among the applications pending for federal plant patents.

"All these fancies seem impossible at present," the Patent Office commented, "but not necessarily any more so than the airplane or the radio would have seemed to the patent examiners of 1836."

It added in a statement that the granting of patents on plants, constituting its newest activity, might bring a horticultural advance during the next century of "great social and economic implication."

Reporting more than 200 plants had been patented since 1930 the Patent Office said the significance of such patents would be stressed at the centennial celebration of the American patent system Nov. 23 in Washington.

QUEBEC WOMEN MAY
AT LAST GET VOTE

QUEBEC, Oct 27.—The age-long fight for women's suffrage in Quebec, repeatedly brought up and just as often turned down by the Quebec legislature, apparently is to be re-opened before the present session of the legislature.

Leader of the women attempting to gain a vote in Quebec political matters, Mrs Pierre F. Casgrain is in Quebec. She will confer with Premier Duplessis it is believed on women's right to vote, asking for changes in the electoral law which would give them power to do so.

YANKEE INGENUITY AWARD
SENDS YOUTH TO COLLEGE

WORCESTER, Mass., Oct. 27.—Approximately $1.00 worth of junk, put together in the right pattern, has won for a North Brookfield youth the "Yankee Ingenuity Scholarship" at Worcester Polytechnic Institute it was announced today.

Franklin D. Hayes, son of Mr and Mrs. David F. Hayes of North Brookfield, a tech freshman, has won the $500 prize awarded annually to the freshman native of New England and possessed of sufficient "Yankee ingenuity" to construct something which will merit the award.

Hayes' winner is a temperature regulating device which saved him many trips day and night to the heater of his father's greenhouse.

Constructed from two strips of zinc, a strip of sheet iron, a bicycle wheel spoke, two clock wheels, some copper rivets from old harness, several decoration bulbs, a toy train transformer, the base of a vacuum cleaner and a door bell, the device registers a change of three degrees in the temperature of the greenhouse and starts a blower in the furnace when the temperature gets too low. At the same time it rings a warning bell.

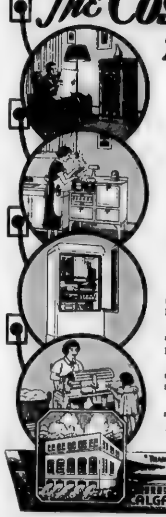
FOOD BOAT FAILS TO
REACH GOLDFIELDS

GOLDFIELDS, Sask., Oct. 27.—Engine trouble that developed in the Canadusa, lake freighter pushing a barge loaded with 100 tons of winter food supplies for this Lake Athabasca town, dashed hopes Monday for residents who hoped for relief from a food shortage.

The vessel was forced to abandon its attempt to reach here. Failure of the vessel to get through with food supplies for the winter, town officials said, would place this mining community on short rations until air service is resumed in about three weeks.

And "The Green Pastures" proved to be an unique film, if only for its interesting presentation of Hollywood's conception of a New York playwright's conception of some colored folk's conception of heaven.—Life.

The Cost so Small
The BENEFITS So Great!



HARDLY a half century ago Electric Service was almost unknown. Today it is universally the most used and useful of utility services. There is not a room in a modern home that is not made more livable, comfortable and convenient through the use of this all-doing service.

For every housewife there are many electrical appliances available and every worker can have a dozen electrical helpers at a cost which is insignificant compared to their accomplishments.

For glareless, flickerless electric lighting there is no substitute.

At the cost of a few cents radio gives the finest of world-wide entertainment for hours.

Electric refrigeration promotes health and cleanliness and will pay for itself in food preservation.

And every minute of every hour, day and night, Electricity is on the job to make your task easier.

Is there anything that brings you more at less cost?

LOCAL MANAGER
T E TANNER, CAMROSE, ALTA.

"TRANSFORMING MOUNTAIN WATERS to ELECTRICITY FOR A PRAIRIE PEOPLE'S NEEDS."

CALGARY POWER COMPANY Limited

BARDO

The date of the Ladies' Aid Sale and Lutefisk Dinner is Saturday, November 7th instead of December 7th.

Quite a number from here attended the surprise party on Mrs. Andrew Johnson of Kingman on Sunday. She was presented with a cabinet Sparton Radio and a purse of money.

Miss Helen Gabrielson and Mr. Arthur Moen spent the week end in Holden.

Mr. Lars Rolfstad of Ryley spent last week with his wife who is staying with her brother Mr. A. Moen. He left for the Coast on Saturday.

Miss Lavonne Broughton spent the week end at her home in Donalda.

Mrs. E. Rogers and Mrs. Innes of Tofield visited with Mrs. C. M. Finseth on Monday afternoon.

Mrs. Arnold Johnson entertained the L. D R. on Thursday afternoon.

While unloading his shot gun in the house one morning, Mr. John Ness' gun accidently went off. Fortunately no one was hurt.

Mrs. C. J. Rude is visiting with the Emil Rude and Pete Bjornson homes of Ryley.

Miss Evelyn Rudd visited at the Mattison home of Trondjhem Sunday evening.

Mr. and Mrs. M. B. Ness of Edmonton visited with Mr. and Mrs. Ingvold Ness last week.

Mr. and Mrs. John Westby have moved to Mr. O. Anderson's farm.

Mr. and Mrs. B. M. Anderson and family visited with Mr. and Mrs. C. Metz of Cooking Lake on Sunday.

LIBRARY NOTES

About one hundred new books have been purchased for the Womens' Institute Library. Among them are books by such authors as Jeffery Farno, Rex Beach, Gene Stratton Porter, Alexander Dumas, George Eliot and P. C. Wren. Mrs. A. B. Clutterham is again taking charge of the library and an announcement will be made later as to the days and hours when books may be secured.

HEART ATTACK PROVES FATAL TO R. WALLACE

Death of Ronald Wallace, 22, only son of former President R. C. Wallace following a heart attack at McGill university Sunday evening, was made known in Edmonton Monday. He was a brilliant student and a popular figure on the university campus.

Graduate of Alberta university with B.Sc. in Arts 1934, Ronald left Edmonton early this fall to register at McGill for post-graduate work in electrical engineering. It was while pursuing his studies there that he suddenly succumbed to the heart trouble that had been threatening him for some time.

After convalescing for a year in bed following previous heart trouble, he had returned to the city from a visit to Vancouver early in the summer with his health considerably improved. He went east with the family recently.

Playing a prominent part in student activities while at university here, Ronald was a member of the history club and belonged to Phi Kappa Pi fraternity. In his graduation year he had the distinction of being chosen to write "the history of class '34," reviewing achievements of his year, for the annual year book.

Born in Winnipeg, July, 1913, Ronald went to Edmonton with his family in September 1928 when his father received appointment as university president. He attended Garneau high school, Edmonton before going to University.

Surviving are his parents, Dr. and Mrs. R. C. Wallace and three sisters. Funeral was held on Tuesday in Montreal.

NEW PACT CREATES MARTS FOR WHEAT

OTTAWA, Oct. 26.—The payments agreement between Canada and Germany, announced yesterday, is expected to bring about a more or less even balance of trade between the two countries. For the past few years, due to German exchange restrictions, trade between the two countries has shown a heavy balance in favor of Germany. In the 12 months ended Sept. 1936, imports from Germany totalled $10710031 and exports to Germany only $6,748,021.

As the treaty provides all foreign exchange accruing from the sale of German goods in Canada will be made available for the purchase of Canadian goods, it means the more German goods Canada imports the more Canadian goods can be sold in Germany. In other words German importers may buy Canadian goods to the extent German exporters sell goods in Canada. They are not compelled to do so, however. The agreement provides for the allocation of 63.1 per cent of the exchange accruing from sales in Canada among certain specified commodities and the balance of 36.9 per cent will be available for all other commodities.

Thus 35 per cent of the total is allocated to wheat indicating on the basis of recent trade returns a possibility of increased exports.

In the 12 months ended September, Canada sold $845,790 worth of wheat to Germany but the allocation of foreign exchange to wheat in that period, had the treaty been in effect would have been approximately $3,500,000.

In some cases a maximum figure is set for the exchange available for the purchase of particular commodities.

KINGMAN

While working on a Buzz Saw rig, throwing away blocks, Mr. Herbert Asp had the misfortune of cutting off his first finger on his right hand.

Miss Vinnola Christenson and Miss Gladys Shlien have gone to Olds, to attend school.

Mr. Allan Anderson spent the week end in Edmonton.

Miss Alvina Simonson visited Marie Lawson last week.

IL DUCE SETTLED ON AFRICAN WAR IN '33, BOOK SAYS

ROME, Oct. 26.—Premier Mussolini decided upon the Italo-Ethiopian war in 1933 and began preparations then, Marshal Emilio de Bono, who commanded the Italian troops at the start of the war, reveals in his book on "The preparation and the First Operations."

In 1933, he writes, "the head of the government fixed his thoughts on the possibility of military operations in East Africa."

The first point to decide was whether the operations should be initiated with a defensive or offensive operation. De Bono made an extensive survey and submitted his findings to Il Duce.

At the beginning of 1934, he relates, the commander of the troops then in Eritea and the Italian military attache at Addis Ababa came to Italy for talks with Mussolini and himself.

De Bono then describes the colony. More native troops were enlisted. Road work was begun. Building of barracks and warehouses started. At the same time a political office was started with the task of undermining the allegiance of the Ethiopians to Emperor Haile Selassie.

"The result of our political disuniting action," he says, "was seen in symptoms from the very beginning of the operations. It subtracted from our enemy not fewer than 200,000 men who either did not take up arms or who, although mobilized and armed, showed themselves inactive."

De Bono left for Africa Jan. 7, 1935, ostensibly to settle the Ualual incident, which was the pretext for starting the war. Soon after reaching Eritrea De Bono reported to Mussolini that the Negus did not intend to attack. Mussolini then wrote him:

"In case the Negus does not intend to attack us, it must be we ourselves who will take the initiative."

In May, when difficulties with Britain began, Mussolini wrote him that, "You must have foodstuffs and munitions for at least three years."

At the end of June De Bono received a letter from Il Duce with regard to Foreign Secretary Eden's trip to Rome.

"In a very secret note," De Bono says, "He (Mussolini) told me that if we got into trouble with the English we would naturally be obliged to renounce our offensive action and content ourselves in the begining with keeping to a defensive which would have insured the integrity of the colony.

RIMBEY BABIES IN THE MONEY

RIMBEY, Oct. 26.—Even the babies at Rimbey are better looking, as is evidenced by the winning of two of the 13 prizes at the "Beautiful Baby Contest," staged in Red Deer last week. Joy, three-year-old daughter of Mr. and Mrs. Allan Lewis of Rimbey and John, young son of Mr. and Mrs. Bernard Hedemark of Blackfalds, drew equal honors in the third prize class.

Mr. and Mrs. A. Lewis were both raised in Tofield, Mr. Lewis managed the Tofield Creamery prior to being transferred to Rimbey.

CARD OF THANKS

I desire through this medium to sincerely thank all those who so kindly tendered sympathy and rendered help during our recent bereavement. To those who sent floral offerings I am especially grateful.

FLAMES ENVELOP DISTRICT FARMHAND

Seriously burned about the head, arms and body by a fire which he heroically smothered and prevented from destroying his bunk house although his own form was wrapped in flames, John Deino, Polish-born worker employed on a farm at Bremner, 12 miles east of Edmonton, was in the General hospital Monday in critical condition, but given a good chance of recovery.

Sleeping alone in the bunk house on the farm of John Schroter, Deino arose about 4:00 a.m. to light a fire. His reasons for doing so he later told the members of the Schroter household, was two-fold; it was chilly in the bunk house and he wanted to dry out his clothes which he had washed before going to bed Saturday night.

Deino is said to have "coaxed" the blaze with a dose of "distillate" oil and a moment later a violent explosion shook the little building.

Sheeted in flames, Deino swatted out the blaze which had broken out around the stove, cutting it off before it could spread to the walls and ceiling.

Then he wrenched the sheets from his bed and tried to put out the fire which was tormenting his own body. The effort was in vain, and a few seconds later the agonized man was running about the farm property, screaming for help.

He was given emergency treatment and rushed to hospital in a neighbor's automobile. At the General hospital he was attended by Dr. T.E. Corbett.

Early Monday Dr. Corbett told the Journal his patient was seriously burned in 20 to 30 per cent of his body surface. His condition was reasonably good and his hopes for recovery were excellent.

Denie's wife and their four youngest children are said to be living in Edmonton, though they could not be contacted early Monday. Another daughter, married, lives in Bremner district.

CORNELL COUNCIL MEETING

(continued from front page)

Kingman, Mr. Graha handing to district quit claim deed [illegible] covering the N.W. 10-50-20 W4. Carried.

Moved by Councillor McGowan Council sell to Mr. H. Grandberg, the N.W. 10-50-20 W4 for the sum of $600.00 on the following terms: $300.00 cash, balance arranged. Being subject to a quit claim deed being received from Mr. Graha and also approval of Dept. of Municipal Affairs.

The settlement of road diversion through section 19-51-21 W4 was ordered tabled.

Some accounts as read by the secretary were passed and ordered paid. Council adjourned at 5:10 p.m.

TOFIELD SEED FAIR

The annual Seed Fair of the Tofield Junior Grain Clubs was held in the Curling Rink, Friday, October 30. Mr. Hallman, Representative, Dept. of Agriculture, was greatly pleased with the interest shown, this being our most successful fair.

Prizes were taken by:

WHEAT CLUB

Member	Bus.	Gr.	Field
J. J. Kallal	1	1	
Chas. F. Kallal	2	2	
Clifford Appleby	3		
James McAllister	4		
Harris McClymont	5	3	
John Warner jr.	6		1
OAT CLUB			
Harold Schultz	1		
W. R. Davison	2	1	1
Chas. F. Kallal	3	3	
Orville Nicherson	4		
George Fosheng	5		
J. J. Kallal	6	2	

Mr. Hallman strongly advised the members to exhibit at the Toronto fair.

W. Davison and J. J. Kallal were leaders in Preliminary elimination in Mr. Scott's, district agriculturist, district, and went to Edmonton for the final elimination Thursday, Oct. 29th. The Tofield team met with some stiff opposition in Edmonton, but acquitted themselves very creditably. The team from Stettler won the free trip to Toronto.

Cupid Has a Busy Week

A quiet wedding of local interest took place at Edmonton on Tuesday, November 3rd, when Miss Hilda Nomeland and Dr. Simpson were united in marriage. The principals of the event, at time of writing, being out of town, details of the ceremony are lacking, and will have to be carried over until next issue. Just the same the very many friends of both "Hilda and Doc" will be eager to extend hearty congratulations and the very best wishes for future happiness.

On Saturday morning, 31st of October, Gertude A. Ingram, daughter of Mr. and Mrs. James Ingram was united in marriage to Mr. Leslie Ovaldson. The wedding ceremony took place in the United Church manse, the Rev. D. K. Allan officiating.

The bride was attended by her sister, Kathleen, and James Ingram, jr. assisted the bridegroom. A short honeymoon was spent in the city. Mr. and Mrs. Ovaldson will reside in the Ketchamoot district.

A very pretty wedding took place in the United Church, Holden, on Wednesday, 4th of November at 11 a.m. when Miss Eva Southron, daughter of Mr. and Mrs. George Southron of Ryley was united in the bonds of Holy matrimony to Mr. Richard L. English of Ryley. The Rev. D. K. Allan of Tofield officiated.

The bride was attended by her sister, Joan and the bridegroom by Morris Southron.

To the strains of the wedding march the bride, leaning on her father's arm took her place beside the waiting bridegroom. There was a goodly number of friends and well-wishers present at the ceremony.

Mr. and Mrs. English left amid a hail of confetti.

A splendid wedding breakfast was provided at the home of Mr. and Mrs. Mavriage, Ryley.

Mr. and Mrs. English will be at home in a few days on their farm south of Ryley.

A TON OF HONEY

Ab Sinclair, whose spare time hobbies run all the way from growing dahlias to keeping bees, has this year raised a mountain (more or less) of honey. Approximately a ton of honey created right in the centre of town is quite an achievement and while the bees did all the work (or did they?) Ab gets all the credit. Anyway if Tofield should harbor the occasional person with a sour nature, such close proximity to so much sweetness should have the desired effect.

FAREWELL PARTY

On Wednesday evening friends of George Chasser gathered together to bid him farewell, before his leaving for Acme. Dancing was the order of the evening, everyone having an enjoyable time. On behalf of the group Annie Johnson, with a few words, presented George with a small token of remembrance. George thanked the crowd very much for the gift, but said that he would not need anything to remember "the gang" at Tofield. A vote of thanks was then passed to Mr. and Mrs. Schultz and Walter for their kindness in allowing the young people to use the old bank for the party. After lunch dancing was resumed after which the party broke up.

LAKESHORE

On Friday last the children of the Lakeshore school held a Hallowe'en party. Despite the weather quite a number were present. Contests and fortune-telling were the order of the evening. At the conclusion lunch was served by the children. The proceeds are to go to the Junior Red Cross.

Jack Jones suffered a painful accident while using an axe. The axe was deflected and struck his foot, nearly severing one toe. Jack is under the doctor's care and from all reports he will be laid up for some time.

Mr. Graham had the misfortune to break three ribs while helping load some cattle into a truck. William Tennie is helping Mr. Graham until he recovers.

LOCAL & PERSONAL

A whist and Bridge drive is to be held in the Curling rink on Thursday, November 12th. This drive is being sponsored to aid the Tofield Hockey team, so everyone come and give the hockey boys a start. Good prizes for the winners. Drive starts at 8:30 p.m. Admission 25c.

The annual C.W.L. bazaar and chicken supper will be held in St. Francis' Hall, Saturday, November 7.

Mr. and Mrs. Clark and Archie Hall were visitors in Tofield last week.

Tom McBratney, who has been away for the summer months returned to his home last week. His cousin accompanied him and is visiting here for some time.

Lee Burnett who has been working in Wainwright was in town on Saturday.

Mrs. W. Hay and Miss Florence Kendall visited at the Kendall home here one day last week.

Mr. and Mrs. H. Kendall left on Monday evening for Vancouver where intend residing.

Mr. and Mrs. Chevraux and small daughter spent Sunday at the home of Mr. and Mrs. Foreman.

Mr. R. Blair of Edmonton was a visitor in Tofield on Wednesday.

Mr. and Mrs. McLaughlin of Wetaskiwin were Tofield visitors this week.

Mr. and Mrs. W. E. Seale were visitors in Edmonton this week.

Mr. Paul Thomas was on the sick list for a few days this week.

The Jolly Twelve Bridge club met at the home of Mrs. Coutts on Tuesday evening. Honors were won by Marjory Stuart and Mrs. Currie.

Mrs. Bruce who has been visiting relatives in Manitoba returned home Wednesday evening.

The local Rebeccas and Oddfellows attended a banquet held in Ryley on Tuesday evening.

Mrs. J. W. Robinson attended the Quarterly Board Meeting of the Women's Auxiliary of All Saints Church and Parish Hall on Friday, Oct. 30, and visited with her daughter Isabel on Saturday.

KINGMAN

Mr. Harold Vague and family have moved to the home of his parents for the winter.

Born—To Mr. and Mrs. Fred Evanson, a daughter, at the Camrose hospital.

The Social Credit group will have a program and basket social Friday evening, Nov. 6th. Mr. McPherson will be the speaker.

Rev. Emil Ericksen will hold services at the Lutheran church, Nov. 8th at 3 p.m.

The Amateur hour which was sponsored by the Kingman C.C.F. club was well attended. Albin Anderson acted as Major Bowes. There were twelve numbers on the program and the audience voted for the winners. Miss Muriel Asp was awarded the first prize of $3.00, the Kingman band second, receiving $2.00, and Misses Marie Lawson and Doris Regnes third prize, receiving $1.00.

Miss Evelyn Lawson visited her sister Miss Marie Lawson of Kingman last week.

Mr. Mons Foglin, a resident of Kingman recently died at the ripe age of 87 years.

KETCHAMOOT AND LAKESHORE WIN DIPLOMAS

At the Tofield School Fair diplomas were awarded those schools having the largest number of points in Educational exhibits and agricultural exhibits. Lakeshore was awarded the agricultural diploma with 423 points and Ketchamoot the educational diploma with 213 points.

UNITED CHURCH NEWS

Sunday, November 8th is "Remembrance Sunday." It will be observed in the United Church.

All Service men and others are cordially invited to attend.

Mr. Wm. Lowden
Stylist and special representative of
TIP TOP TAILORS LIMITED
will be here **Tuesday, Nov. 10**

The most outstanding collection of British Woolens in Tip Top history! Newer, authentic styles! These are what the Tip Top representative is bringing with him. Be sure to come in and meet him personally. If you wish, let him help you build your Fall wardrobe. His world of experience in the clothing business is at your disposal.

Make note of the date. You'll want to meet our representative.

When the Easiest Way Is the Best Way----

There are no two ways about it! Certainly the easiest way to get the most for every dollar you spend is to buy products that you know about through the advertisements in your local paper. You don't have to go out and look for buying opportunities. The advertisements bring them to you. And all you need do is consider the facts, compare values and decide on the soap or the sedan that best fits your judgement and your pocketbook.

Certainly the best way of making your money go farthest is to buy merchandise of proved value. Advertised merchandise. Merchandise that is bought and used by many people. Merchandise that must be superlatively good enough for its maker and your local retailer to keep calling it to the attention of people week after week and year after year.

This is the service—of convenience and profit—that the advertisements offer you. It will pay you to read them regularly and take advantage of everything they can do for you.

6,000 HEAD OF CATTLE BOUGHT

Since the inception of the Dominion-provincial agreement for the relief of farmers in the drought stricken areas of the province and the taking from the farms of [illegible] livestock, a total of 6,000 head of cattle have been purchased by the provincial government and processed, according to W. N. Chant, minister of agriculture.

The minister stated that the agreement would remain effective until December 31 next.

Of the 6,000 cattle purchased, about 3,000 have been shipped to the stockyards in this city and the rest to the Calgary stockyards.

Some of the cattle so shipped have been processed into boneless beef and the rest into tankage. The boneless beef has been marketed in the Orient.

On the processing of the livestock into boneless beef there has been a profit, but on the processing into tankage there has been a loss. Farmers are being paid one cent a pound for their cattle so shipped, while tankage is being sold at half a cent a pound. This is being used for feeding hogs and as meat scraps for poultry.

Asked as regarding the feed situation, the minister declared that the province had on hand 10,000 tons of feed for distribution in areas where it was necessary.

So far there has been no shortage of feed troughout the province, as a whole, the central and northern sections being well supplied.

CANADIAN TELEGRAPHS NINETY YEARS OLD

TORONTO, Ont. October 30.—Ninety years ago on October 22 the first telegraph company in Canada was formed, at Toronto, and within a few days active construction upon the pioneer wire line between Toronto and Hamilton was commenced. In January the line was completed to Queenstown, where there was a wire head from Buffalo and, within three months Toronto was in active telegraphic communication with New York and other points. The same year the Montreal Telegraph Co. established communication between Montreal and Toronto and in 1852 purchased the initial Toronto company. By the end of 1847 the Montreal Telegraph Co. had 540 miles of wire in use, nine offices opened and 33,000 messages sent. Great as was this one year's growth, it pales into insignificance with the ultimate expansion nine decades later. Today, the Canadian National Telegraphs operate 146,700 miles of wire and when the carrier current wires are taken into consideration, giving as many as 24 channels to one wire, or the equivalent of 24 wires in one, another 192,217 miles may be added. In 1846 there were 40 miles of wire. Ninety years later it spanned 22,-882 miles. The original nine offices have increased to 1700 and the 33,-000 messages filed in the first year of telegraphic operation have been extended to more than 7,5000,000. Press copy, which during the initial year of operation was an unknown quantity, now alone totals almost 40 million words annually. Truly a tremendous growth in less than a century but one which is symbolic of the national growth of the Dominion.

MEXICO GOING IN FOR BIG IRRIGATION SCHEME

Winnipeg, November 1.—Mexico has lined up with countries that are seeking national self-sufficiency. A six-year plan has been adopted, the chief aim of which is the redistribution of land and the improvement of the standard of living of the rural population as well as that of the lower classes in urban centres. Two thirds of the population of Mexico is engaged in agriculture, mainly general farming, although cattle raising is important, according to the agricultural Department of the Canadian National Railways. Last year work was commenced on developing large potentially fertile areas in the north and northwest of the republic by increasing the existing 750,000 acres of irrigated and by the addition of another 500,000. It is hoped that a total of 2,000,000 acres will be under irrigation by 1940.

Yes, We Know

"Oh mamma look!" cried the little girl on her visit to the country. "There's a duck! And it walks like it had just got out of a rumble-seat." —Christian Advocate.

THE WORLD OF WHEAT

By H. G. L. Strange, Director, Research Department, Searle Grain Company Ltd

Wheat prices have bounded up. Why?

Simply because the excess, or burdensome world's surplus, has disappeared,— it has been eaten up!

So a heavy burden that has been difficult and expensive to carry has at last been lifted from the backs of our Canadian farmers.

Before 1928 the world, with an average production and consumption of some 5,400 million bushels, usually carried over each year about 600 million bushels, but in 1928 many countries experienced an extraordinary yield to the acre, and so the year-end surplus suddenly and greatly increased.

More than this, during the years of the depression, people ate less bread, all of which resulted in the usual 600 million bushels surplus growing by 1934 to the vast amount of 1,150 million.

Since 1934, however, several important wheat producing countries have suffered from very poor crops and the world has actually produced less than it has consumed, and so the world's large burdensome surplus each year has been drawn upon until it has completely disappeared. Not only is this the case, but as well there will be, I calculate, on August 1st next only 400 million bushels in the world's cupboard for a carry-over instead of the usual 600 million.

Just as the increasing surplus depressed price from 1928 to 1934, so it seems have prices risen as the surplus in turn became less.

The following factors have appeared that we have had the effect of pushing wheat prices up:—Lack of rain persists in Australia—France is resuming wheat importation — The European rye crop is 6 per cent less than last year.

Factors depressing prices have been as follows:—Large wheat shipments from Australia, Argentina, Danubian area, India and other countries—Seasonable weather for fall work in Europe—European demand for wheat declining—Favorable conditions in the United States winter wheat belt—Increased estimates Japanese rice and Chinese wheat crops.

YOU Share In Canada's Greatest Co-Operative Business

LIFE INSURANCE is the greatest co-operative business in Canada. As a policyholder, YOU are associated with more than 3,500,000 other Canadians in this great enterprise.

Every business day last year Life Insurance Companies in Canada distributed, to Canadian policyholders and beneficiaries, over Half a Million Dollars.

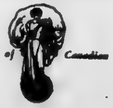
Life Insurance enables YOU to provide financial security for yourself and family. It also benefits the country as a whole through the investment of Life Insurance funds in important public enterprises.

Life Insurance dollars give employment to workers throughout the Dominion. Transportation facilities are extended, highways built, streets paved, schools erected, water, sewage and other necessary works constructed. Life Insurance dollars help to finance the farmer, and bring business to the general store and country merchant.

In the past five years of business depression, Canadian policyholders and beneficiaries received over Eight Hundred Million Dollars in payments from their Life Insurance funds. Life Insurance Companies have fulfilled every obligation one hundred cents on the dollar.

As a policyholder, YOU can take justifiable pride in sharing in this, the greatest co-operative business in Canada.

Life Insurance



Guardian of Canadian Homes

POPPY DAY—

POIGNANT REMINDER of those spacious days of glory and grieving, "Poppy Day" once more recurs to prompt the citizens of this country in the duties they have inherited from the past generation. To the Canadian youth in this year of grace, the deep-red petals of the Poppy may not carry the same significance they bore to the youth of eighteen years ago. The symbolism of sacrifice with which the Poppy has become charged is something to which the present generation succeeds only through the wistful memories of the aging men, who fought their country's battles, triumphed amid surroundings carpeted with Poppies.

To wear this humble emblem on Poppy day is to proclaim that amid all the jangling confusion through which this country is striving valiantly to penetrate, the heart and mind are nevertheless attuned to a sense of homage due those men whose patriotism inspired 600,000 Canadians to offer themselves for service between 1914 and 1918; of that number more than 60,000 found graves in France and Belgium. And it is over those graves that the Poppy blows in perrennial bloom.

The numbered dead were not strangers. They were young Canadians, filled even as the youth of to-day is filled, with the joy of living. So also, were the 170,000 men who in 1935 bear upon their bodies the marks and scars of war—the disabled ex-serxice men who suffered disablement on behalf of Canada.

To manifest that proud recognition of their place in this Country, to mark that tribute which is their due, Poppy Day has been set aside in order that all may join in recalling the Great Sorrow.

The blood-red emblems distributed throughout Canada py the Canadian Legion's vast volunteer organization are the product of disabled veterans, men striving to maintain themselves in the Vetcraft Shops administered by the Dominion Government. To purchase a poppy is a small thing. For every citizen to do so is a big thing.

LET US ALL WEAR A POPPY ON POPPY DAY.

AFTERMATH

"If Ye Break Faith ...... We Shall Not Sleep!"

By G. E. R. Shaw, Leduc, Alberta.

Over the crimsoned field where poppies blow
A grey mist hovers like a changing wraith;
And voices bring a cry from out the mist;
"We sleep not, Comrades, do ye keep the faith?"

They gave their lives to make a better world,
Safe for the old, the helpless, and the young—
Safe for that wider brotherhood of man;
What of that victory so dearly wrung?

What is this foe with whom we keep the quarrel?
What is this conflict that we must suppress?
What but the idol in the market-place—
The symbol of a nation's selfishness!

If this remembering, that day by day
They who were with "them" falter to our doors
Begging their humble stint of daily bread—
The heroes—nay, the victims of our wars.

That day by day they toil the weary roads,
While little children starve, and women sigh;
Our granaries o'erflow with golden grain;
"What say you, Comrades? Is the Torch held high?"

Far on Olympus, how the Gods must laugh;
"The larks still sing; the morning come anon;"
We hoard the golden grain—and fling the chaff!
"The poppies flourish—but our rest is gone!"

THE U.S.A. PRESEDENTIAL ELECTION—

FOR A POPULATION having no direct political connection with the recent United States election, Alberta residents evinced keen interest both in the progress of the election and its final result. Generally speaking "support" here was on the side of the re-elected president. Partly because the name Roosevelt has a familiar sound to it, and partly because the United States Democratic party's ideals more closely resemble the liberal type of thought prevalent in Western Canada, than any other. To all observers President Roosevelt's smashing victory was a surprise. While many believed he would be re-elected, there was a feeling that Governor Landon would run a close second. This belief was justified by the events of the campaign, but a closer analysis caused observers to believe President Roosevelt would be elected.

Too brief a time had elapsed between the depths of the depression and the election to allow of a vast political change of mind. Economic conditions being on the upgrade, even though not fully satisfactory, caused popular support to swing to the president who was in power when the up-turn occurred. Even though the New Deal in many respects was only a shadow of its former status, with some phases of it declared unconstitutional, the voter remembered that President Roosevelt was the man who led them, even if he did not pull them out of the depression, and cast their votes accordingly. The London Economist has said that "Mr. Roosevelt may have given the wrong answers to many of his problems, but he is at least the first president of modern America who has asked the right questions." And as any school student knows, understanding a problem is half the battle in solving it.

A FALLACY PERSISTS

In 1852, Dr. Charles MacKay, an eminent English philosopher, drew the attention to the extraordinary popular delusions which take possession of the minds of numbers of people at certain periods in the world's history. He also showed how often these delusions persist for a long time in spite of definite evidence which showed clearly that the opinions held were certainly fallacious. An instance of this kind has occurred in the international wheat situation. In the Searle letter of Aug. 6th attention was drawn to a most incorrect statement. It was published on the front page of an important New York daily newspaper, and was to the effect that the world was actually short of no less than 500 million bushels of wheat for its consumptive needs for the current year, and that consequently people could not have their normal rations of bread. The Searle letter quoted authentic statistics to show that this New York statement was nonsense, pure and simple, and that the true facts were that far from the world being short 500 million bushels of wheat on Aug. 1st next, in spite of the poor crops, the world would probably still have then some 400 million bushels of wheat as a "carryover."

This misleading New York story has been repeated over and over again during the past month, and now a prominent Western Canadian farm journal just recently off the press repeats the New York statement and wonders why if the world is short 500 million bushels of wheat for its consumptive needs, price should not be $1.50 a bushel.

The price of wheat, of course, would easily be $1.50 a bushel if the story were true. The facts are, however, that the statement is quite untrue and is actually not less than 900 million bushels in error.

It seems a great pity that fallacious figures such as published in the New York paper should be published repeatedly, for it means that many worthy people—farmers and others—are grossly deceived and so, naturally, become discontented when price fails to rise to the level that certainly would be warranted were the fallacious figures only correct.

Erroneous statements, when published by prominent journals, are, of course, written in the first place and repeated by other papers in all good faith. Such, we feel sure, was the case with the Western Canadian farm paper that we mention. Unfortunately, however, individuals who often know better, deliberately repeat false statements in order to mislead the minds of the people and often to serve some personal end and aim.

THE WORLD OF WHEAT

By H. G. L. Strange
Director, "Crop Testing Plan"

Canadian wheat is seldom used abroad as the main ingredient in making a loaf of bread.

The European loaf generally is made from native wheats. Such bread is nutritious, of good flavor, but is not very palatable; the loaf is small and heavy, not very attractive or appetizing.

When, however, as little as fifteen per cent of "Manitobas" is mixed with native wheats an almost magical change takes place; the loaf now becomes large, attractive, rather moist, of even silky texture with a crumb that is elastic and of a very light cream color; it has a nutty flavor, is palatable and also has a thin good golden brown crust.

European people like this improved bread when they can obtain it and when they can afford it.

It is the inherent quality found in good Canadian varieties, and in a few other wheats, called "strength"—meaning quantity and quality of gluten—that is capable of bringing about this decided improvement in the European loaf.

Canadian wheat today is the "strongest" wheat in commerce. This is the only reason why foreign millers require it. It seems, therefore, that we must continually strive to maintain this superior "strength" or quality in our wheat if the world is to continue to "want" it.

Wheat prices have recently been pushed up by the following influences:— Poor conditions persist in Australia. Fear of war in Europe continues. Chinese cotton crop largest on record, giving increased purchasing power. Construction increasing in world, demanding more linseed oil so more flax, hence probable decreased wheat acreage. Many countries lowering tariffs permitting additional wheat imports.

Prices have been pushed down by: -Latest statistics world wheat shortage less than previously estimated. Crop conditions in Argentina improving. Exports of wheat occurring from unexpected countries. Japanese dry bean crop shows decided increase. European hog population five per cent increase over last year.

THE HAPPY FAMILY

Montreal, Que., November 1.—The moving of a family and its impedimenta by rail from one city to another is not an unusual occurence but the particular way in which they are cared for en route and the method of showing appreciation for "service rendered" does give color to the occasion. This is shown by the following letter received by A. A. Gardiner, assistant general passenger traffic manager of the Canadian National Railways, from a patron whose family was recently transferred from Toronto to Winnipeg.

"I enclose herewith cheque in payment of the passenger accommodation for my family. They all arrived safely and comprised:

6 children.
1 bull-dog in crate.
1 lady cat (in crate.)
1 gentleman bantam (in crate).
2 lady bantams (in crate.)
1 wife (not in crate.)

The wife said all were most comfortable and appreciated the unfailing kindness and courtesy of your people throughout—they were really so comfortable that the youngsters' appetites increased with every meal in the diner."

CANADIAN NATIONAL

IS SENTENCED TO NIGHTS IN JAIL

HAMILTON, Ont Nov. 3—John Kennedy, Hamilton, must do three things for the next two months. One of them will be to spend his nights in the Barton st. jail from 8:00 p.m. to 5:30 a.m

Kennedy appeared in court Saturday on an assault charge and his counsel, Orville M Walsh, K C. suggested to Magistrate McKay if he decided on a jail term for Kennedy he would appreciate having his client sentenced to serve time at night. His wife and family therefore, would not become public charges and he would be able to retain his position.

The other two things Kennedy must do are to refrain from liquor and support his family.

DUMMY TALKED FAR TOO MUCH OWNER IN JAIL

POZMAN, Poland, Nov. 3—Ventriloquist's dummy which couldn't resist the temptation to make Communist speeches got its master into trouble here.

Police discovered the wooden-jawed little gentleman sitting on another gentleman's lap was using only the usual line of comic talk to attract a crowd at county fairs.

But—

Once the audience was on hand, with no policeman about, the dummy would drop its joking and launch into a political harangue

The ventriloquist was sentenced to eight months' imprisonment.

OATS YIELD 104 BUS. TO ACRE IN EDMONTON

Believed to have been the record yield in coarse grain for the Edmonton district, oat crop of A. Provoo, of Clover Bar, averaged 104 bushels per acre from 50 acres, it is learned.

Second generation registered Banner, the crop has been cleaned and and stored for marketing next spring as seed.

A Belgian, Mr. Provoo believes in getting the most possible from every acre by use of tried cultivation methods and best and cleanest of seed. Further proof of his good farming methods is seen in his harvesting of 350 bushels of Red Bobs University 222 wheat from 10 acres of land on which he raised potatoes a year ago

REFUSED AT JAIL, IS WELCOMED LATER

BURK'S FALLS, Ont., Nov. 3—Police gave Thomas Stinton, 20, of Moose Jaw, board and lodging in the town jail Monday after refusing his request a short time before.

A merchant telephoned headquarters to say Stinton had thrown a stone through the jail window and would wait with the merchant till police came for him

They called for him and took him to jail

CONSERVATIVES OUST LABOR IN BRITISH POLLS

LONDON, Nov 3 — Sweeping Conservative gains at the expense of Labor became apparent today as returns from yesterday's municipal elections throughout England and Wales were compiled

In 130 principal cities and towns the gains and losses in polling for municipal councils were as follows

Labor, 47 gains; 124 losses
CONSERVATIVES, 76 gains; 35 losses
LIBERALS, 10 gains; 16 losses
INDEPENDENTS, 67 gains; 25 losses

Labor candidates in many cases were defending gains made three years ago. Polling took place in 300 cities, towns and boroughs to fill vacancies created by the triennial retirement of one-third of the councillors. In many smaller towns the voting was not on party lines, while in numerous larger centres Liberals and Conservatives coalesced or co-operated against Labor

The Labor party had 1,070 candidates defending 446 seats and contesting others. Conservatives had 630 candidates in the field for 314 seats while Liberals put up 150 candidates in 100 seats.

# LOANS
for
HOME IMPROVEMENT

Under the new provisions in respect to the Dominion Housing Act

The Bank of Montreal is co-operating in the plan announced by the Dominion Government for assisting home owners who wish to renovate, modernize or otherwise improve their homes, and it is now prepared to make loans to property owners under the new provisions of the Dominion Housing Act. Briefly, the provisions regarding home improvement loans are:

- Maximum loan on one property — $2,000.
- Discount—Charge equal to $3.25 per $100 of the face value of the note, for one year, payable in advance. Repayment by monthly instalments.
- Loans to be used solely for improving and repairing existing property, and not for building on vacant land. Improvements include all such work as new plumbing, remodelling of rooms, installation of furnace, painting, roofing, etc. Fixtures which are not removable attachments or appliances are considered improvements.
- No endorsers are required
- Loans made to owners only. Properties on which loans may be made include private homes, duplexes, small apartment houses, farmhouses and combination store and dwelling houses.
- Standing of taxes, mortgage payments, etc., to be acceptable to the lending institution

If you wish to obtain funds to repair, improve or modernize your property, we would be very glad to have you call and discuss your requirements with us.

BANK OF MONTREAL

Tofield Branch: A. E. ALLAN, Manager

"a bank where small accounts are welcome"

AMISK CREEK

Remember the chicken and Lutefisk dinner and sale of fancy work which will be held in Amisk Creek church, November 11th, Armistice Day. Serving will commence at 12 o'clock and sale after the dinner. Everybody welcome.

The Ladies' Aid held an extra meeting at the home of Mrs. E. A. Moen on October 29th. About all of the members and many visitors were present. The members expressed hearty thanks to the visitors for so willingly helping to stitch the quilt.

Edna Moen and Evelyn Hillerud visited Hilmar Moen who is second man at an elevator at Waskatenau, one day last week. They also visited Mr. and Mrs. C. Patterson of Tofield for a couple of days.

Mrs. Burnet, nee Hazel Anderson, from Edmonton visited with her sister Mrs. E. A. Moen and family for a couple of days last week.

Mr. and Mrs. Anton Wilson from north of Ryley visited at the P. O. Flaaten home Wednesday of last week.

Rev. Hoversteen conducted a service in the church last Sunday. Mr. and Mrs. Erickson had their baby son christened Donald Waine. Godmother was the baby's aunt, Mrs. C. Kjering from Ryley. Godfather was the baby's grandfather, Mr. A. Erickson. Sponsors were Dorten and Alfred Sorenson, Auntie and uncle to the baby. Rev. Hoverstoen, Mrs. Kjering and Mr. and Mrs. Sorenson, Dorten and Alfred were guests at the Erickson home after the service.

E. A. Moen shipped hogs one day last week. Lillo's truck took them to Edmonton.

Mr. A. Erickson spent a couple of days in the city last week.

Arnold Berg spent Saturday and Sunday visiting his parents here. He returned to Edmonton where he is practising flying.

Mr. and Mrs. C. Johnsrud were visitors at the E. A. Moen home last Sunday and attended the service in the church.

Mr. and Mrs. J. Jacobson and family from north of Tofield also attended the service and visited with Mr. and Mrs. J. Berild and family in the evening.

Emil Vaagard who has been working for A. Patterson this summer and fall, left last week for a trip to southern Alberta. When he returns he will assist at the E. A. Moen home for the winter.

Some from this neighborhood attended the sale held at Mrs. Donough, near Ryley on Monday November 2nd.

OTTAWA TAXATION OFFICIALS TO BE TOLD OF REVELATIONS

MONTREAL, Nov. 3.—Mr. Justice Turgeon, royal commissioner inquiring into the Canadian Textile industry, ruled at Monday's session of the probe that evidence showing companies possessed assets undisclosed on their financial statements should be forwarded to tax authorities at Ottawa.

The commissioners order followed a charge by Commission Counsel J. C. McRuer that Canadian Cottons Limited had a "hidden reserve" of some $2,227,000 on which no taxation had been paid.

On Mr. Justice Turgeon's order, commission evidence that Dominion Textile company has some $2,000,000 not appearing on the company's balance sheet, also will be sent to Ottawa.

"Tax authorities may take whatever action they think advisable," said the commissioner in delivering his order all evidence and proceedings of Monday's hearing be forwarded "to the proper department for its information."

Commission counsel's charges the government had not collected all it was entitled to in that no taxes were paid on the "concealed reserves" was denied by Charles R. B. Brown, accountant, who said the reserve was known to tax officials and had been discussed with them.

PROSPERITY ERA SEEN FOR WORLD

Europe will remain free of war for years to come if the present threats of conflict can be stilled for the next couple of years; by that time, the new era of world-wide economic prosperity will have removed the primary reason for war, it was declared in Edmonton Tuesday by Floyd S. Chalmers, of Toronto, editor of The Financial Post and recognized throughout Canada as one of the leading observers of economic affairs.

"I believe that already we have established a firm basis for a new prosperity," he said. "I believe that Sir Robert Kindersley was on solid ground the other day when he said the the world will see in the next four years a prosperity such as it has never seen before.

"And since economic troubles are the fundamental cause of war, I am convinced that when prosperity comes back and nations begin to trade freely again—and there has been action that way already, as for instance France's 25 per cent horizontal reduction of tariffs when she revalued gold—the cause and need of war will have been removed.

"There is probably no proof to show, but it's being pretty widely recognized that the cause of the economic collapse seven years ago was a world shortage of gold. The returning prosperity now is due to three things chiefly: increased production of gold, increased valuation, and revaluation of it in relation to currency of all the nations."

Canada obviously will have a big share in the new era of wealth, Mr. Chalmers noted, but added: The west, of course, needs real crops; she must have good crops, combined with good prices. Two-dollar wheat would not be much good to drouth areas for instance, this year.

"It ought to be remembered," he said, "that we can't very well compare our unemployment figures of today with those of 10 years ago or 30 years ago, because until the past few years there were never any real figures on the unemployed. There was no machinery for it, and there was no relief problem. People who weren't self-supporting then lived on their relatives or were helped by private charity.

"All of that class of people are included in our unemployment figures today; the lists are padded with the names of people who are actually unemployable and always will be unable to work even if there is work to do," he said.

Mr. Chalmers came from Toronto to attend the official opening of the Canada Packers' plant Wednesday, and also to look at the Alberta situation.

RIMBEY HAS QUINTUPLET PHONE FIRM

RIMBEY, Nov. 2—The Quintuplet Telephone Company was recently organized here when five farmers purchased a government line. The new "Quints" all prominent residents are: F. Jersey, reeve of Blindman municipality; W. A. Saunders, municipal and village secretary; Gordon Wright, Rimbey dairyman and Ira D. Taylor, prominent in U.F.A. and community circles.

Hugh McLean, Rimbey lineman, will officiate in Dr. Dafoe manner for ailments of operation for the new and legally christened company.

$900 ROBBERY AT VERMILION

Safe-crackers that have been terrorizing the northern part of the province for the last several weeks struck again late Saturday night. They broke into the Red and White store at Vermilion, used nitro-glycerine to crack the safe and escaped with some $900 in cash.

HUGILL OF ALBERTA WINS AT KINGSTON

MONTREAL, Nov. 3—Two first places were carried back to Kingston Royal Military college by John T. Hugill, son of Alberta's Attorney-General Hugill, after the intercollegiate track meet here last Friday.

Defeating McGill runners in both the 100-yard dash and the 220-yard dash, young Hugill won the shorter distance in 10.3 seconds and the longer distance in 23.6 seconds.

PUNCH ON NOSE ENDS GAY TIME BY MASQUERADER

PETERBOROUGH, Ont., Nov. 3—Dressed as a man, a Peterborough young woman had a whale of a time on city streets Saturday night.

She was disillusioned about midnight however by a punch on the nose. Meeting a married couple whom she knew the masquerader proceeded to throw her arms about the woman's neck.

The husband swung broke the "masher's" nose and sent her through a plate-glass window.

PREMIER DECLARES CONFLICT WOULD EMBROIL EUROPE

MILAN, Italy, Nov. 2—With his fiery "armed peace" speech ringing around the world, Premier Mussolini looked today for reaction from Great before offering a complete Anglo-Italian pact, including recognition of mutual rights in the Mediterranean.

Warning that "the Italian people would spring to their feet like one man" to fight for "that sea which was the sea of Rome," Il Duce told 800,000 wildly cheering Fascists, "If the Mediterranean is for others a high road for us Italians it is life.

"We have said a thousand times, and I repeat, we do not intend to menace this road. We do not intend to interrupt it. But we say on the other hand, our rights and vital interests must be respected.

"There are no alternatives—reasoning brains of the British Empire must realize the thing is done and is irrevocable. The sooner the better.

"Bilateral conflicts are not to be thought of, and even less a conflict which from bilateral would become immediately European.

"There is, therefore," he said bluntly, "only one solution—direct, rapid and complete understanding with Britain on the basis of recognition of reciprocal interests."

(In London informed sources said no matter what Mussolini's speech portended, Britain would not change her Mediterranean policy—based on the unflinching credo that that sea is Britain's "life-line" to her Dominions and colonies.)

TO SAVE SEAT FOR ALD. CRANG

Due to the fact that Ald. Margaret Crang has not attended city council meetings over a three-month period during the past year, Mayor Joseph A. Clark, K.C., announced Monday that a special meeting of council would be called for 5 p.m. next Thursday to give the lady alderman an opportunity to meet charter requirements. The charter provides that a councillor missing meetings over this period of time automatically loses his or her seat.

Thursday's meeting, however, will give Miss Crang her required number of meetings, and save her seat on the council. She was elected in 1935 for a two-year term.

WELL BLOWS IN AT WAINWRIGHT

A report at Edmonton that the old Emerald well, some six miles north of Wainwright, blew in Saturday with a gas flow estimated at 20,000,000 cubic feet.

As a result of this report C. W. Dingman of the provincial department of lands and mines, has left for Wainwright to investigate the news.

This well had been closed down for five or six years and the casing left in it. A few weeks ago the casing was bought by another company and while they were pulling it out, the well blew in.

All the equipment was cleared away for fear of a fire starting. Just across the road is the Edmonton-Wainwright well, and great care is being taken as a fire might also catch this property.

SEEKS MORE TRADE NOW WITH CANADA

OTTAWA, Nov. 3—Revision of trade agreements between Canada and New Zealand to permit the latter country a larger share of the trade is being asked by Hon. Walter Nash, minister of finance, customs, and marketing in New Zealands' first Labor government.

Heading a trade delegation to the United Kingdom, Mr. Nash arrived in Ottawa Tuesday and conferred with Hon. W. D. Euler, minister of trade and commerce, and Hon. C. D. Howe, minister of transport. At the present time, Mr. Nash said, Canada exports far more to New Zealand than this country does to the dominion.

LOW RAILWAY FARES FOR REMEMBRANCE DAY

Winnipeg, Man., November 1—Announcement is made by Jos. B. Parker, secretary of the Canadian Passenger Association, of reduced fares between all stations in Canada on the Canadian National and Canadian Pacific railways, for Remembrance Day, November 11th. On the going journey, tickets will be good from November 10th until November 11th, and good to return not later than midnight November 12th.

The fare will be one way fare and one third for round trip and will be good for all classes of travel—coaches, tourist cars, standard sleepers and parlor cars, upon payment of the regular charge for accommodation occupied.

This will be the last holiday series of special fares before the Christmas vacation, according to Mr. Parker.

WEDDING

Word has been received of the marriage at Gadsby, Alta, on Tuesday, November 10th, of Miss Ethel Baynes and Mr. M. Wood. Both contracting parties are well known in this district, Miss Baynes being a former teacher at Lakeshore school and Mr. Wood living here since early boyhood. Miss M. Wood accompanied her brother to Gadsby and was present at the ceremony.

SOCIAL CREDIT ZONE MEETING

A social credit zone meeting was held at the Tofield curling rink on Thursday last. A zone meeting is a gathering of members of social credit groups within a specified zone. Quite a number were in attendance and we understand a successful meeting was held.

SCHOOL BOARD MEETING

A regular meeting of the school board was held on Tuesday, Nov. 3. Present were the Chairman Mr. A. J. Harrison, and trustees McCauley, Robinson and Chapman. Business was light in volume and nearly all of a purely routine nature. [illegible] School Inspector's report on the principal's room was read and considered satisfactory. The teacher was graded V.G.

LINDBROOK

On Friday afternoon, the 30th of October, a Hallowe'en party was given at the school here, by the teacher, Miss Phipps and her pupils, to which the parents of the children were invited. The children first formally introduced their respective mothers to their teacher and after all were acquainted the concert started. The school was decorated in the approved Hallowe'en style by teacher and pupils and looked very nice. The concert went off well, in fact the general opinion was that it was the best we've had for a few years so we look forward to a few more of its like.

The monthly meeting of the L.C.C. was held last Wednesday at the home of Mrs. J. Bailey. The roll was answered by funny stories and quite a few good ones were told, we hope not too "risque". Then some played bridge and others chatted, after awhile a dainty lunch was served and everyone went home after an enjoyable afternoon. The next meeting will be held in November at the home of Mrs. Arthur Gill and the roll call will be answered by "bright sayings of children."

Mr. Bert Rogers shipped a carload of cattle to Edmonton last week via the railroad. Quite a change to

To Bee or not to Bee

Mr. Editor,
Dear sir,

Hey there, the Bee Lady does not intend sitting back and letting the Bee Man in Tofield get away with all the honey. The Bee Lady got four hundred and between thirty and forty pounds from two 2 pound packages of bees, and all because the Bee Lady did not allow swarming. And yes, the Bee Lady had bees fifteen years before any Bee Man dared to try to stand bee stings. And now Mr. Editor, take a taste. It's grand.

Whoever thought that our little mention of "A Ton of Honey," in last week's issue would bring forth such a welcome letter as the above. Certainly we will hand out a little "honey" to the Bee Lady also—didn't they both do the same to us? In fact that is what a local paper is for—to give support to all endeavor toward the creation of beneficial things.

KETCHAMOOT

Starting last Sunday and continuing through the winter months, church services will be held in the afternoon at 2:30 p.m. every alternate Sunday.

Mr. Jack Fair left last week for Toronto where he has relatives. Jack came over from England a few years ago and has worked for different families in our district and made many friends. While we are sorry to see him go, we wish him every success.

Mrs. Henderson, who has been in ill health all fall was taken to the home of her daughter Mrs. W. A. Mitchell on Monday.

Miss Kathleen Ingram has been visiting in Edmonton for the last two weeks.

Little Doris McGinitie is spending a few weeks at home before further treatments.

Mrs. Elsie Carlisle and daughter Noreen and Lorne Lee motored to Edmonton Monday.

Many old time friends of the Lars Johnson family were very sorry to hear of the death of Mr. Johnson at his home in the Grand Prairie district. No doubt full particulars will be given by our Bardo correspondent.

In spite of cold and stormy weather, a pleasant afternoon was spent at the Appleby home on Wednesday afternoon of last week, when Mrs. Appleby entertained the Ladies' Aid, there being twenty ladies present. Next month the annual meeting will be held at the home of Mrs. Sears, if you have any donations for sunshine please bring it along.

Messrs. Oscar Barnes and Chester Coombes left on Monday on a hunting trip.

Miss Ada and Mr. Dick Turner are leaving on the 19th of this month on a trip to their old home in England.

The newly weds, Mr. and Mrs. Leslie Oveldson returned home on Monday of last week after a few days honeymoon spent in Edmonton. In the evening some seventy relatives and friends gathered at the J. N. Ingram home to offer congratulations and best wishes. After a social time, treats were passed around by the bride and groom. Lunch was then served after which a purse of money was presented by Harold Schultz on behalf of the gathering. All singing "For they are jolly good Fellows" brought a pleasant evening to a close. Mr. and Mrs. Oveldson have rented and are now making their home on a farm of Chris Hammond's in the Miquelon district.

On Monday of this week, when it became known that our other bride and groom, Dr. and Mrs. Simpson were at the home of Mrs. Simpson's father and mother, Mr. and Mrs. Sam Nomeland, the phone soon was busy and another gathering took place. While not as large a crowd a jolly time was had by showering them with congratulations and best wishes, also a purse of money was presented by Joe Sutton. Refreshments were served by the Nomeland family.

LOCAL & PERSONAL

The Eastern Star Lodge will hold a bridge drive at the Masonic Hall on Monday, November 16th, at 8:30 p.m. Admission 35c. Good Lunch and good prizes.

Thos. G. Dark, Eyesight Specialist of the Edmonton Optical Co. Ltd., will be at the Tofield Hotel, Wednesday evening from 6 to 7:30, Nov. 25th. All work guaranteed.

Born: To Mr. and Mrs. John Thomson, Tofield, on Saturday, Nov. 7th, a son.

Mr. and Mrs. R. Whyte of Wetaskiwin visited at the Jobb and Whyte homes here over the week end.

Mr. and Mrs. Pauls, Edythe Barden and Miss Kelley from Edmonton spent Sunday at the Barden home here.

Mrs. B. Calvert of Edmonton spent the Armistice holiday with her sister Mrs. B. Seale.

Mrs. B. Seale and Miriam, Mrs. S. Yakaboski and Kenneth Munroe are spending a few days in the city.

Mrs. Cairnes of Edmonton is visiting her daughter Mrs. Currie, here for a few days.

Mrs. F. McHeffey received the sad news of the death of her sister at Dartmouth, N.S. on November 3.

Mr. and Mrs. Jobb motored to Daysland on Wednesday.

The pool equipment is now being moved from the Variety Theatre to the premises formerly occupied as the bank of Montreal. Mr. Schultz has purchased this building, redecorated the interior and has a smart up-to date place as well as a convenient location.

KINGMAN

Mr. and Mrs. Pete Haugen from Grand Prairie visited at the Thor Hortes' home last week.

Quite a number from town attended the Ladies' Aid sale and Lutefisk supper on November 7th, at Bardo.

Rev. Hoverstien of Minnesota held service in the Lutheran church on Sunday evening.

There will be a movie in the Kingman Hall, sponsored by the First Aid and Athletic club on November 14th, at 8:00 o'clock.

CARD OF THANKS

The C.W.L. wish to thank all those who helped by their attendance and in other ways to make the recent bazaar an outstanding success.

$2300.00 CASH will buy 160 acres having buildings and sixty acres broken; ½ mile from gravel road and close to station.
Fire, Life, Accident and Sickness Insurance written. Agent for C.P.R. and Hudson's Bay Lands. Notary Public—Issuer of Marriage Licenses. Express money orders issued
A. J. H. McCAULEY Telephone 44 TOFIELD

ROSS CREEK

WEDDING

A quiet wedding was solemnized at the United Church Manse, Lamont, on Wednesday, November 4th, when Lily, second daughter of Mr. and Mrs. Charlie Sampson became the bride of Mr. Elmer Sagmoen.

The marriage was performed by the Rev. N. McLeod of Lamont.

The bride was attended by her sister Mabel and Mr. Leonard Wiltzen acted as best man.

After the wedding, supper was served to a few friends and relatives at the home of the bride.

The happy couple have taken up their residence on the groom's farm at Ross Creek.

Miss J. Stechyn and Miss Grace Law entertained at a bridal shower in honor of Miss Lily Sampson, a bride elect.

Table decorations were in pink and white. Numerous gifts were presented in a decorated tub. The evening was spent in games, contests and a mock wedding.

Those present were: Misses Lily, Mabel and Edith Sampson; Mrs. A. Snider; Mrs. I. Schacher; Mrs. A. Thor; Mrs. L. Strand; Mrs. F. McLachlan; Mrs. A. Wiltzen, Mrs. Shertel, Mrs. Yarusiwick; Mrs. Sheremata; Mrs. R. Hisey; Mrs. F. Hisey; Mrs. A. Ferrel; Mrs. A. Hisey; Mrs. P. Lappenbush; Mrs. A. Lappendbush; Mrs. Mackwood; Mrs. M. Lauder, Mrs. Iverson; Mrs. Humaniuk; Mrs. Kulyck; Mrs. Kurrant; Mrs. R. Vanbuskirk, Mrs. Belan; Mrs. Rustand, Mrs. M. Bailey; Mrs. A. Ford; Mrs. McColman; Mrs. S. Kochka; Mrs. Elniski; Mrs. Klatchuk, Misses Florence and Lora Lappenbush; Annie Humen; Mamie Shertel. Clara Mackwood; Agnes Lauder. Nancy Belan; Bernice Wiltzen; Olive and Mildred Wiltzen; Lena Kurrant, Josephine Yarusiwick; Violet and Lilly Schacher; Josephine Elniski, Phelma, Edythe and Verna Ford, Dorothy Vanbuskirk; Clara Moscki. Nancy Atchemichuk; Julia Iverson, Audrey Rustand; Eileen Thor; Nettie Bailey; Doreen Snider; Sophie and Katrina Thomas; Ethel, Joyce and Phylis Hisey; Grace Law; J. Stechyn and Dorothy Iverson.

WANTED TO RENT—A typewriter for a few months.—Apply The Mercury Office.

C. W. L. HOLD SUCCESSFUL BAZAAR AND SUPPER

On Saturday last at St. Francis' Hall the Local C.W.L. held their annual bazaar and supper. Quite a large number attended the supper and thoroughly enjoyed the splendid repast [illegible] by the ladies for them. After supper a social time was held. [illegible] came in for attention and caused much interest and fun. The drawing for prizes was held with the following results: 1st, Ladies Manicure Roll, Julia Kallal, Jerseyville, U.S.A.; 2nd, Coleman lamp, T. M. Nahreboski, Tofield; 3rd, Hand painted cushion, Jas. Kallal, Jerseyville, U.S.A.; 4th, Picture, Stan Yakaboski, Tofield; 5th, Glass dish, Mrs. M. Simmons, Tofield.

They Are Coming Back

During the past few months we have been highly gratified at the number of people who have come in and paid up their subscription, in some cases far in arrears.

The recent depression cut deep in many places, but there are few places where the cutting was any deeper than on the farm and in the country newspaper office.

But while, perhaps, we are not all in this district on the high road to fortune, conditions are better than they were. One dollar wheat is better than fifty cent wheat and seven cent hogs are better than four cent hogs. Quite a number have come in with rather a wry grin—remembering the economic perils they had passed through—and paid up, and to these our thanks are due. There are others, however, who we would cordially welcome. Even if the depression did compel you to run behind, come in anyway, you will find us easy to deal with, and while we prefer cash we will accept anything that is useable on subscription accounts—we do this to enable you to get the subscription account off your mind and to make our list as far as possible a 100 per cent live one.

THE MERCURY

THE WORLD OF WHEAT

By N. G. L. Strange, Director, Research Department, Searle Grain Co. Limited.

The 260 million bushels of wheat which Canada hopes to export annually has to compete on the markets of the world with a vast quantity of other foodstuffs.

It is calculated that the 2,000 million people in the world consume each year in round numbers foodstuffs as follows: Potatoes 8,000 million bushels; wheat 5,000 million, rice 3,200 million, rye, millet and spelt together 1,920 million.

In addition 10,500 million bushels of corn, barley, oats and mixed grain are fed to livestock and produce the equivalent of about 2,000 million bushels of livestock products such as meat, eggs, butter, cheese, milk and cream.

Then there are consumed either directly or through livestock large amounts of beans, peas, lentils, rapeseed, ground nuts, linseed, sesame, cotton seed, hemp seed, copra, palm kernels, fish, game, vegetables, fruit and pasture grasses.

Or, it means that on the average each person in the world consumes annually the following: potatoes 4 bushels, wheat 2.5 bushels, rice 2.6 bushels, rye, millet and spelt 1 bushel, livestock products 1.1 bushels, fish, game and vegetables, fruits and other cereals 3 bushels, making a total of 14.5 bushels of foodstuffs each person consumes per annum, of which it will be noted that wheat forms one fifth.

Factors that have tended to raise prices have been: Poor prospects in Australia—Italy purchasing Argentine wheat heavily—Serious lack of sub-soil moisture in U.S.A. northwest and western Canada—Price of gold advancing — Japanese wheat crop estimates lower—Increase in Argentina flax acreage—Sale of diamonds from South Africa increasing considerably.

Prices have been pushed down by: Beneficial rains in Argentina—Large wheat exports from Balkans, Southern Hemisphere, India, Persia and Sweden—U.S. winter crop very promising—Argentina further devalues currency — Seasonable crop weather in Europe—Exports of corn and pork from Rhodesia increasing.

The British scheme to popularize the use of milk in England through the institution of "milk Bars," based on the same plan as public-houses or beer saloons has reached such proportions as to justify the establishment of a Milk Bar Advisory Department of the British Milk Marketing Board. There are over 450 milk saloons or bars throughout the country, 100 of them being in London. The number is being added to daily.

CHEESE HAS SPECIAL INTEREST TO CANADA

Apart from the attention being drawn by the institution of National Cheese Week (November 9-14) to the advantages of cheese as a food product, Canadians have a particular interest in the cheese industry. There are over 316,000 farmers in Canada producing milk for market, and cheese utilizes seven per cent of this production. Seventeen per cent of the total population of Canada is directly dependent on the dairy industry for a living, and the value of Canada's dairy produce is approximately $280,000,000 per annum.

North America is not distinguished for its cheese-eating propensity. Canada and the United States eat the least cheese of any of the great nations, the United States being slightly ahead of Canada by about a pound per capita. The approximate figures of cheese consumption among the various nations are: Switzerland, 22 pounds per head of population per annum. Holland, 14¼ pounds; France 13½ pounds; Denmark 12½ pounds; Italy 12 pounds; Germany 11½ pounds; Great Britain 9½ lbs. Scandinavia 7 pounds; New Zealand 4½ pounds; United States 4½ lbs. and Canada 3½ pounds.

There is no doubt as to the value of cheese as an article of diet, and cheese is capable of many variations in its use as an ingredient of meals. It contains a great store of energy-producing units and is an economical source of protein. Its low cost places a highly nutritive food well within reach of every housewife, no matter how slender the purse may be. Cheese should be used often in combination with other foods as the main dish of a meal. When used in this way, other protein foods should be reduced to a minimum. Because cheese is so rich in protein it should be combined with starchy foods, and these with the addition of leafy and root vegetables and almost all fruits make an excellent combination for the maintenance of a reasonable and well balanced diet.

EAGLE, DOG, MAN ENGAGE IN FIGHT

CALGARY, Oct. 31—A battle between an eagle, dog and man ended in victory for William Davison. He caught the eagle, which had a wing spread of 6 feet 10 inches, by hand, but not his bare hands. He wore gloves. The bird died shortly after its capture.

S. J. HUNGERFORD NAMED CHAIRMAN AND PRESIDENT CANADIAN NATIONAL RLYS.

OTTAWA, Ont. November 9—The board of directors of the Canadian National Railways today informed Hon. C. D. Howe, Minister of Transport, that it has appointed S. J. Hungerford to be president of the system.

Mr. Hungerford will combine the duties of president with those of chairman of the board. The appointment is subject to approval by order-in-council, and steps are being taken immediately to procure this approval.

The statute passed at last session of Parliament authorizing a new set-up for the management of the Canadian National system, left to the discretion of the board of directors whether these offices should be combined or two men named. After careful consideration the board decided that Mr Hungerford should fill both posts.

As chairman and president of the Canadian National, Mr. Hungerford will have charge of the operation of a property employing 85,000 men on 24,000 miles of railway in Canada and the United States, having also telegraph, express, hotel and steamship enterprises. His first job on a Canadian railway was as an apprentice, and he has held positions of steadily increasing importance in the operating, construction and executive departments. He was appointed chairman of the new board of directors of the National Railways in September last, associated with him on this board being J. Y. Murdoch, K.C. Wilfred J. T. Gagnon, H. J. Symington, K.C., B. L. Daly, R. J. Moffatt and D. H. McDougal.

HUSBAND FAINTS AS 4 BABES BORN

SENATH, Mo., Nov. 3—Two of the quadruplets born Monday night to Mr. and Mrs James Bridges died Tuesday in their isolated two-room river valley cabin. One was a boy, the other a girl.

The quadruplets were born in a two-room log cabin near here Monday night. The share-cropper husband fainted when Dr. F. W. Speidel told him the news.

The children were one boy and three girls.

Dr. Seidel, 70-year-old physician, estimated weights of the babies at between two and three and a half pounds each.

"We had no scales and even if we had, I didn't have time to weigh the babies," the doctor said.

New 1937 Ford V-8s Announced

Two of the most popular body types in the entire Ford V-8 line are the de luxe Fordor touring sedan (above) and the Tudor sedan (below). The new 1937 editions are shown. The smart new front end, new headlamps, V-type windshield and use of the "tear drop" form wherever practicable, combine to give what those who previewed it declare to be the most beautiful Ford yet produced. The Fordor touring sedan is a family car especially suitable for touring. It boasts a roomy built-in trunk. The Tudor sedan has a new full-width front seat, with divided tilting seat back. Two engine sizes are available, the famous 85 horsepower V-8 engine and a new 60 horsepower V-8 engine. Mechanical improvements include new all-steel body, with steel top; "easy-action safety" brakes and new "finger-tip" steering.

SHADES OF THE PAST—

HAVING BUSINESS to do at the Town Hall a few days ago, and having to await my turn while a proud father registered the birth of a child, my eye casually caught sight of a small bottle of sand upon the counter. I idly picked it up, examined it, and when the opportunity presented itself, asked why it was there. Mr. Chapman told me it had been there ever since he had been in the office, eighteen years, and was a relic of the old Board of Trade days of about twenty years ago. The sample was one that had been tested as regards glass making qualities and, so we are informed from another source, found to be quite suitable. Now it so happens that while I have been to the town hall many times during the past eighteen years, this was the first time I had seen the bottle of sand. It also so happened that only two days previous I had read quite an interesting article "Houses of Glass." The two incidents coming together is responsible for the appearance of this article.

Many important things have happened since the sand was put into that small bottle, among them being a great improvement in the making of glass and the uses to which it is put after it has been made. A year or so ago in the news dispatches from the British Isles, mention was frequently made of glass houses, houses constructed of glass bricks instead of the well known brick of burnt clay. At first they were thought to be more novel than practical, but the last year or so have proven without a doubt that while they may still remain novel they are certainly practical. We have no way of knowing whether buildings of glass were first constructed in Europe or America, it really does not matter, but without doubt, architects, structural engineers, contractors, and men who simply want a building erected are giving the glass brick structure consideration.

Glass as a substance was accidentally discovered by the Phoenicians thousands of years ago. Drawing their boats to the shores of the Mediterranean, they made fire with sodium that they had mined. Unwittingly they had combined the chief elements of glass, sodium and sand fused by heat. From this humble beginning glass making has developed marvelously. Most people, certainly most old country people, remember the flowers, ferns and birds made of glass, so common as ornaments years ago, but they will be surprised to learn that there is now being manufactured "glass wool," so fine that out of one pound of glass, a thread 8000 miles in length is created. Glass wool or glass silk as it is variously called is used as an insulator against heat and cold.

But it is the glass "block" or glass "brick" that at present is receiving much attention. In laboratory tests glass bricks have been subjected to compression tests of 8000 pounds; tension test 48.9 pounds per square inch; pressure test 100 lbs. per square foot, corresponding to a wind velocity of 188 miles an hour. Deflection at middle of wall one quarter inch.

In the realm of practical use glass bricks have been used to construct schools, factories, dairies, stores, homes and even a power plant building. Glass brick buildings have been erected as far north as Minnesota and North Dakota and as far south as Florida. As an indication of its increasing popularity it can be cited that the Owens-Illinois Glass Company manufactured 680,000 glass bricks in 1935. Up to the present this year they have produced more than a million bricks a month. Glass as a fundamental building material has arrived. Glass bricks are vermin proof, fire proof, non conductors of heat and cold and permit the entry of an abundance of subdued light. One factory is being erected without windows, the first of its kind.

But to hark back to that little bottle on the town clerk's counter. There are many formulas for glass making but the principal ingredients of all glass are sand and sodium fused by heat. The process is not particularly complicated, but of course a certain knowledge and technique is necessary. Glass is made in a circular conical brick building called a glass house and so designed that the melting process goes on in a number of fire clay pots. The heat is either coal or gas. Here at Tofield we have plenty of sand, plenty of coal, and plenty of gas. Glass is best made where clean sand, plus the necessary chemicals, plus cheap heat are found in close proximity to each other. With glass building blocks finding favor, hundreds of pounds of glass will now be manufactured where previously only single pounds were produced. All industry is a combination of natural advantages plus technical knowledge plus enthusiasm, plus a demand for the goods. Many men in this town are as competent to determine whether the necessary factors for glass brick making exist at Tofield as we are. We believe they do, but at the same time fully realize that much careful thought and attention would have to be given to it before any definite plans were laid. Perhaps that small bottle of sand has not lain on the clerk's counter for eighteen years in vain.

PROFIT FROM PASTURES

With Proper Fertilizing and Grazing Management Pastures Produce More Food than any other Crop.

In Canadian agricultural journals, during the past five years, much space has been devoted to the subject of pasture improvement, and farmers are becoming convinced that their grassland areas merit more consideration than they have received in the past. A pasture properly established and well-managed becomes the most profitable crop on the farm, producing more protein and total digestible nutrients per acre than are contained in any other crop grown.

Pasture Committees

There is now a Federal-Provincial Pasture Committee in Canada, the membership of which includes officials of the Dominion Experimental Farms, Ottawa, the Ontario Agricultural College, Guelph, and Macdonald College, Que. The annual report of this committee has just been issued (Oct 1936). A Pasture Committee, similarly constituted, for the Maritime Provinces was formed recently and will hold its first conference at the Maritime Winter Fair, Amherst, in November. The creation of these committees indicates the importance attached to pasture improvement.

History of Pasture Improvement

The improvement of pastures by means of fertilizing is not new. In 1897 Professor William Somerville commenced the famous trials at Cockle Park, Northumberland, England, the work being carried on subsequently by Professor Gilchrist and, later by Professor D. B. Johnstone-Wallace whose remarkable success in pasture management led to his being called to the chair of agronomy at Cornell University, Ithaca, N.Y., in 1931. In New York State Professor Johnstone-Wallace has repeated his earlier successes and seems to have justified his claim that wild white clover is "the key to pasture improvement," under conditions such as exist in New York State, which resemble closely those in upper Canada.

During the war what is known generally as the Hohenheim system was developed in Germany. According to this method of pasture management, a large area is divided into four or more smaller fields or paddocks, fertilized liberally and grazed rotationally. Grasses when short and young are far richer in digestible protein than when allowed to grow tall and fibrous. The success of the system depends largely on proper control of the grazing. The herbage should be permitted to attain a height of four inches before being grazed and then be grazed fairly closely. Tufts of grass around droppings and any unduly tall growth should be cut down with a mower. While the animals avoid this tall stuff when it is growing, they eat it readily when cut.

New Grasses for Grazing

With the introduction of close grazing, plant breeders turned their attention to the creation of new bushy, dwarf-growing strains of timothy, orchard grass, ryegrass, etc., and it is expected that seed of these new types will soon be on the market. Of wild white clover there are several strains, among the best being Kentish and New Zealand, and seeds of both are now obtainable at certain Canadian seed houses.

Many assume that wild white clover and Dutch clover are the same. They are not. Wild white clover is smaller leaved and flowers later than Dutch. The former is persistent, whereas Dutch clover seldom lasts more than two years. There is in Canada much native wild white clover which, when stimulated into active growth by the aid of suitable fertilizers, will soon make its presence known. It is remarkable how a phosphate-potash fertilizer seems to bring white clover in where the plant was never noticed before. It was there all the same—just playing possum but ready to spread over the bare soil spaces as soon as its plant food needs were supplied.

Wild White Clover

The virtues possessed by wild white clover in pastures are its palatable and nutritional values, its persistence and ability to form a close turf, thus protecting the soil from excessive heat, and, finally, its favourable influence on the grasses growing in association with it. This is due to the nitrogen-gathering powers of the wild white clover, and grasses are grateful for nitrogen thus supplied.

At Cornell Professor Johnstone-Wallace has proved that any grass with wild white clover is infinitely more productive than any grass alone. For instance, two adjoining areas were sown with 24 pounds of Kentucky blue grass seed per acre, but one area received two pounds of wild white clover seed in addition. The latter yielded nearly three and a half times the dry matter and more than five times the amount of protein contained in the crop of Kentucky blue grass alone. Results similar to these have been obtained by Dr. L. E. Kirk, Dominion Agrostologist, at the Central Experimental Farm, Ottawa, whose plots with individual grasses and others to which seed of wild white clover has been added afford a most striking comparison.

Fertilizing Pastures

Authorities on pasture improvement emphasize the primary need for phosphate fertilizers. Both Dr. Kirk and Professor Johnstone-Wallace advocate liberal applications of superphosphate in fall for pastures on the heavier soils. For these Professor Johnstone-Wallace recommends from 600 to 800 pounds of 0-16-6 fertilizer per acre, applied in fall, and repeated at intervals of from three to five years. This is in accord with the recommendations of the Federal-Provincial Pasture Committee.

Fertilizing in Fall

Some 800 farmers in the Maritime Provinces, Quebec and Ontario used 0-16-6 fertilizer on pasture and hay land last fall, the rate of application varying between 250 and 500 pounds per acre. It was noticeable that those who used the heavier rate obtained generally the most pronounced results. This was to be expected, since half measures are seldom successful, and one must satisfy fully the plant food needs of the grasses and clover in order to ensure that conditions favourable to the quick establishment of a vigorous, thrifty herbage be provided at the outset.

Remember that good pastures provide more and cheaper feed than any other crop on the farm and that it would cost annually over $30.00 per cow to furnish her with dry feed equivalent in value to the pasture which she consumes.

OF 300 ONLY A SCOUT COULD HELP THE INJURED OLD LADY

A letter to the Editor of the Nottingham Journal:

Sir,—The value of a knowledge of first aid is not appreciated until the time arrives when it is most needed. On August Bank Holiday, Tuesday, I, with my family had a day trip to Sandown, Isle of Wight. While waiting at the pier steps to catch a return boat to Southampton, we observed an aged lady who had the misfortune to stumble, her leg slipping between two iron steps. She received a very severe cut behind her knee.

There were at least 70 people waiting to catch the boat, and not one had any knowledge of first aid. The poor lady had to await the arrival of the boat fifteen minutes later before efficient help was forthcoming. All this time her leg was bleeding profusely, bathing towels which had been wrapped round her leg being saturated with blood.

When the steamer arrived there were calls for a doctor, or anyone with first aid knowledge. Of at least 300 people on board only one stepped forward, and he was a Boy Scout. He did the job well and the lady was taken to hospital. I envied that Boy Scout's knowledge and efficiency.

W. B. Nottingham

WHAT YOU SHOULD KNOW ABOUT A WELL-BALANCED DIET

Beware of fads and fancies. Eat the essential foods. Chew your food. Eat slowly; don't bolt your victuals. Leave the table without being completely satisfied. Don't try to brace yourself against the daily task by means of stimulants.

A well-balanced diet comprises a reasonable amount of the essential foods. These are meat, eggs, milk, fish, vegetables and fruit. If in health you follow this direction, you may ignore all the talk about vitamins, calories, carbohydrates, proteins and the like.

In infancy, the best food is mother's milk. Next to this is cow's milk modified by the addition of boiled water and granulated white sugar according to age. The milk invariably should be pasteurized. If the milkman does not pasteurize his supply, drop him and buy from someone who can be trusted to do this properly or, in the small town or country where pasteurized milk is unobtainable, pasteurize it in a double boiler by heating it to 145 degrees F., keeping it at this temperature for half an hour and then cooling to 40 degrees, at which temperature it must be kept until used. Cod liver oil is essential to the well-being of infants during fall, spring and winter. Orange or other fruit juices should be given to the babies from the third month until one year. At six to nine months a small portion of well-cooked cereal may be advantageously allowed and from the tenth to the twelfth month some clear soup. In both these periods soft or hard-boiled yolk of egg may be given.

What is the rationale of this feeding? Meat and fish are body builders. Milk and eggs are also body builders and the latter contains the fat that fills up the wrinkles and aids in maintaining the heat of the body. Vegetables along with fruits supply the mineral elements and the latter contain sugar a source of energy.

The character and quantities of food vary in the presence of disease. Thus for example, the diabetic must cut his sugars and starches, the person with anaemia, especially of the pernicious type, must take liver, kidney, the lining of stomach or liver extract. Your doctor will be able to designate the diet suited to your needs.

The pregnant woman is best on a normal diet suited to her condition in life. In addition, she should have cod liver oil and seafish, the latter twice a week. If she is anaemic as many pregnant women are, she will require appropriate medicine from her doctor.

The tuberculous need a very nutritious diet. The overweight person should gradually cut his diet especially in sugars, starches and fats, take more exercise and avoid alcohol.

A very good line of food for the ordinary man is as follows:

A glass of water on rising, at 11:00 a.m. and 5:00 p.m.

Breakfast—Cereal or eggs. Cocoa, weak tea, coffee or chocolate. Toast or bread and butter. Fruit.

Luncheon— Meat (steak, chops, chicken, fish). Green vegetable or potato. Bread and butter. Light dessert (fruit or plain cake).

Dinner—Meat or fish, potato, Vegetable. Salad. Bread and butter. Light dessert as above. Macaroni or spaghetti may be substituted for potato.

Alcoholic liquors do not properly enter into the diet of the average man. Usually there is no objection to the use of weak tea or coffee at meals.

Your doctor can guide you in matters of diet and you should let him do so especially if you are not getting the best results from the food you eat.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

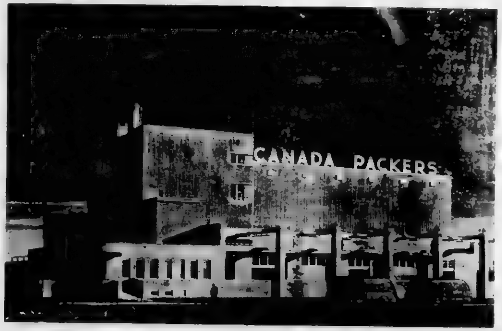
TIN CUPS FOR AUCTION SALE ALL VANISHED

RIMBEY, Nov 2—C. F. Damron, auctioneer of this district, is scratching his head and trying to figure out what has become of the 1000 tin cups he has purchased during his career as a crier of public sales.

He now has exactly 30 cups left and the sad part of it is, according to Mr. Damron that he must now pay $2.60 per dozen for the same grade of cups that he bought 20 years ago at $3.00 per hundred.

But in the rural districts where the farmer holding the sale furnishes lunch and hot coffee at noon, it has been customary for the auctioneer to bring to the sale a couple of hundred tin cups for the customers' use.

The ratty flour sack had been a familiar object at the Damron sales for many a year.



On November 4, 1936, the city of Edmonton passed another milestone in its industrial history. On that date the new, fully modern, million dollar plant of Canada Packers, Limited, was officially opened in North Edmonton before a crowd of 800 persons.

J. S. McLean of Toronto, president of Canada Packers; Senator the Hon. Arthur Meighen, former prime minister of Canada, Premier William Aberhart of Alberta; His Worship Mayor Joseph A. Clark, K.C., of Edmonton and R. A. Drinkwater, Sask., president of the Western Canada Livestock Union, took part in the opening ceremonies at 3 o'clock at the plant.

Mayor Clarke, officially started the plant in operation by pushing a button that sounded the plant whistle, indicating the inauguration of another unit in the city's overgrowing industrial life.

Above is an exterior view of the new Canada Packers building.

LINDBROOK

(continued from front page)

see cattle going up by rail and its a long time since it happened here.

A pie social and dance was held at the school here last Friday in aid of the childrens' Xmas tree etc. It was very well attended, and there were plenty of pies which were auctioned off by Mr. Chas. Morden, who did the job very well and got some very good prices for the pies. Mr F Kertzman acted as treasurer and J Hooper as clerk. The music was supplied voluntarily by Messrs. Bracegirdle, V. Glenn, H. Tucker, S. Smith, R. Kertzman, C. Lindgren and Mr Hanson, too all of whom many thanks for your services and the good music supplied, in fact one violinist was so good that he was likened to the famous Rubinoff. Lunches were served to those who had no pies and coffee at midnight. After supper decks were cleared for action again and the dance went on. A nice sum was realized for the tree and everyone had a good time.

A branch of the Junior Red Cross has been formed amongst the school children here with Miss Star Bracegirdle as president.

The Social Credit Study group met at the home of Mrs. A. Smith last Wednesday and was well attended despite the cold.

Quite a few of the older folks attended the Social Credit Zone meeting at Ministik Hall last Friday, the younger ones being of course at the dance here.

Old friends at Lindbrook of Doe Simpson and his bride, Miss Hilda Nomeland wish them both the very best of luck, health and happiness, on the occasion their recent wedding this month.

Divine Service was held at the school here on Sunday afternoon and the service was enjoyed by all present. Rev. A. Wallis of Tofield conducted the Service.

Here and There

Outstanding success has attended the publication of J. Murray Gibbon's book, "Steel of Empire," in which is told the history of transportation in this country. The first edition of this comprehensive and finely illustrated work on Canada's history was sold early and another is now out in preparation for sale as Christmas gifts for which it is anticipated there will be a heavy demand.

Effective January 1, 1937, contributory pensions for Canadian Pacific employees will replace the 33-year-old non-contributory system. Since the latter system's inception in [illegible], the railway has paid out $15,201,640 in pensions. Under the new plan, officers and employees will contribute three per cent of their wages or salaries. Pension rates will be unchanged and pensioning age will be the same as heretofore.

[illegible] three arrivals from [illegible] continental ports and [illegible] by Canadian Pacific liners will constitute the passenger service from Saint John and Halifax during the coming winter season, it is announced from company headquarters. Season will commence November 7 and close in mid-April.

Alan M. Irwin, of Montreal, has been awarded one of the Pamphile Lemay prizes for his book, "and ships—and sealing-wax," it was announced recently by Quebec Provincial Secretary Paquette. The book, written during a cruise around the world in the Canadian Pacific liner Empress of Britain, received the only English award in the Lemay prize list.

"and ships—and sealing wax," which is published in Canada and Great Britain by Macmillan's, deals with the lighter side of cruising, and is a valuable, if [illegible] aid to would-be travellers.

Two Canadian Pacific scholarships at L'Ecole Polytechnique and L'Ecole des Hautes Etudes Commerciales respectively have been awarded to Gilbert Proulx, 19, son of Arthur Proulx, warehouseman, C. P. Express Company, Montreal, and Roger Bussière, 19, son of Pallas Bussière, trucker and checker, Place Viger freight office, Montreal. Each is tenable for five years.

J. C. Patteson, who succeeds Sir George McLaren Brown, European general manager, Canadian Pacific Railway, London, England, with the title of European manager, was born at London, Ont., and educated at the Model School, Toronto; Ridley College, St. Catharines, and the Royal Military College, Kingston, and served overseas with the Canadian Field Artillery from June, 1916, to September, 1919. During 1925 Mr. Patteson was general agent in Toronto for the steamship department and has also held the positions of assistant general agent, New York; general agent, passenger department, Philadelphia; and general agent, steamship department, Chicago.

The annual competition sponsored by the Canadian Travel Bureau, Canadian Pacific and Canadian National Railways, for the most beautiful and for the largest maple leaves is now open to the public. The leaves must be gathered in Canada and sent from a Canadian point. Prizes totalling $215 will be distributed as follows:— Most beautiful leaf, $100, $40, $20, $10 and [illegible]. Largest leaf, $30 and [illegible]. Contest closes November 1 and entries should be forwarded express paid to Canada's Maple Leaf Contest, P.O. Box 2500, Montreal.

BRITONS RESCUE YANKEE CREW

LONDON, Nov. 9—Ten members of the crew of the United States freighter Bessemer City, in distress on the Cornish coast were rescued early today by the St. Ives lifeboat.

The lifeboat returned to the vessel for 22 others understood to be on board.

The ship which had grounded was understood to be in no immediate danger.

SINGAPORE, Nov. 2—Sixty passengers and the crew were removed from the British steamship Mahidel Saturday when it grounded at the mouth of the Kemaman river in eastern Malasia.

Dated at Tofield, Alberta, this 21st day of October, 1936.

J. W. CHAPMAN,
Secretary-Treasurer.

The Kipper Goes High Brow

There was a time when a kipper was just a kipper—that is, a herring split down the centre, hung on a spit and cured. Now it is all different. Like silk stockings, shiny automobiles, neon signs, the kipper has gone modern, and come all dolled up in a bright Cellophane wrapper, being topped off with a gold ink label. Last week Walter Bellamy had some choice kippers which came all the way from the West coast of England. No, we don't mean that they swam across, but were caught over there, cured and for kippers, were elegantly packed and shipped here. They opened up good too, were of fine quality and nicely cured.

Obituary

MRS. F. IMLER PASSES TO HER REWARD

The districts of Tofield and Viking are grieved to learn of the passing of Mrs. Fred Imler, on Monday evening, November 16. Her death took place after a prolonged illness.

Amy Aileen Newby was born in Greenwood, B.C. on February 2nd, 1900. When four years of age she moved to the Viking districts with her parents. Most of her childhood, except for some years spent in Ontario was spent in this district on the farm of her father, where she and her family became well-known and highly regarded. Part of her education was obtained in Ontario. She attended High School in Vegreville and Vermilion from which she graduated for Normal School. She attended the Camrose Normal School at the early age of 16 years. Following this Miss Newby taught in the Vegreville, Lavoy and Viking districts. Her five years of teaching were broken by an attendance at the University of Alberta.

Miss Newby was married to Fred G. Imler on April 15, 1922. Following this they came to Tofield where they have resided for the past seven years. Since that time they have been very active in the affairs of the community. Mrs. Imler was a member of the Ionic Chapter of the Order of the Eastern Star. While not a nominal member of the different organizations found in this district, Mrs. Imler was always ready to lend a helping hand to any worthy cause, within or without the community when it was needed.

For the past two years Mrs. Imler has not been in good health but neither she nor any of her friends realized the seriousness of her illness. In the summer she was taken ill with what was thought to be a comparatively light trouble. It was at this time that she began to fail. For the last two months she grew gradually worse until the end.

Throughout all her illness and afflictions of the past and times she never flinched. Her courage was marvelous. To those who were privileged to know her she always spread a ray of sunshine. Her good nature and friendship were contagious.

She leaves to mourn her loss her mother Mrs. M. Newby of Victoria, B.C.; her loving husband, Fred Imler, five children, James, Fern, Kenneth, Norman and Patricia; two aunts, Mrs. E. MacLeod of Vancouver and Mrs. MacCallum of Ottawa. She was pre-deceased by her two-year old daughter, Aileen, last July.

BRIDGE DRIVES HELD

The season has arrived when the usual number of whist and bridge drives come to the front. During the past week Tofield has witnessed two very enjoyable drives. On Thursday last a bridge and whist drive was put on in the Tofield Curling rink to aid the hockey boys. A fair crowd turned out and an enjoyable evening was spent. On Monday evening of this week the Eastern Star ladies sponsored their annual bridge drive. Thirteen tables of bridge was played.

LOCAL & PERSONAL

The Misses Aileen Allen, Gwen Firth and Edna Lindsay spent the week end in Tofield.

Mr. Mark Ferguson is holidaying at Athabasca.

Miss Loret Ross spent the week end in Edmonton visiting friends.

Mrs. MacLeod from Vancouver is spending a short time in town. Mrs. MacLeod is the late Mrs. Imler's aunt.

Mrs. Allan is spending some time visiting friends in Barrhead.

Mrs. McKernan is visiting with her daughter Mrs. Abbott.

Mr. and Mrs. Letourneau and Mr. Glenn are attending a Municipal convention at Calgary.

Mr. and Mrs. Mel Wood have taken up residence on their farm north of town.

Mr. and Mrs. Eldred and family of Edmonton visited Tofield on Wednesday.

Muriel Malcolm visited the city on Thursday.

The United Church Ladies' Aid will hold their annual bazaar, tea and sale of home cooking in the Institute rooms on Saturday, Nov. 28th.

The Anglican W.A. will meet at the home of Mrs. Barden on Thursday November 26th.

Mrs. Frank Dunn spent the week end in Edmonton with Mr. Carson Wallen and Mr. and Mrs. Dr. H. V. Golding.

$5.00 REWARD

This reward will be paid to the person supplying information as to the person who broke the window of the Club Cafe about midnight, Nov. 16th.

LAKESHORE

Mrs. Seale and Miriam spent a few days in Edmonton last week.

A Social Credit study group has been formed in this district. Elmo Ferguson is president and Mrs. Geo. Francis is secretary.

John Warner is on a hunting trip to Lac La Biche.

R. C. Phillips and Mrs. Plants visited at the J. H. Johnson home on Tuesday evening.

A dance was held at the Maciborski home Monday evening in honor of Bill Maciborski who was married last week.

Miss Gloria Plants spent the week end visiting her friend, Alice Nolan.

Mr. Graham and Mr. Francis made a business trip to Edmonton last Friday.

AMISK CREEK

Several of the boys from this district obtained prizes for their grains at the fair held in Ryley recently.

Miss Doris Glasinger spent the week end in the city.

E. A. Moen was elected to act as a delegate for the Wheat Pool at the convention which is to be held in Calgary in the near future.

Our deepest sympathy is extended to Mrs. Johnson and family at La Glace in their recent sad bereavement. Also to the Lille brothers in their sad bereavement.

There was a good turn out to the Ladies' Aid dinner and sale held on Armistice day. The fancy work brought a fair price. Violet Moen was the winner of the quilt with no. 162 and Alfreda Berild won the cushion with ticket 151. The Ladies of Amisk Creek extend their hearty thanks to each and every one who helped to make the event such a success.

Several from here attended the Lutefisk dinner held in Bardo recently.

Mr. Eric Lekness who has been working around here for some time left last week for the coast.

Mr. and Mrs. J. Anneke, Mr. and Mrs. R. O. Berg visited with Mrs. B. Helgeland on Sunday.

J. Berild and H. Hillerud returned from a hunting trip last Saturday being fortunate enough to bring back a moose and a deer.

Nearly everybody from this district attended the funeral of Albert O. Lille, held in Ryley last Sunday.

Mrs. R. O. Berg, Alice, Lloyd and Arnold motored to the city last Monday, returning home in the evening.

C. Berg took the bus to the city on Monday, returning the same evening.

KINGMAN

Mr. George Vague has returned to his home after a trip to the coast.

A good number of people from Kingman took advantage of the excursion to Edmonton on Friday last.

Rev. Emil Erickson will hold services in the Lutheran church on Sunday afternoon at 3 o'clock.

Mr. O. Bartness has gone to the United States to visit his parents who are ill.

There will be a pie social and Social credit dance at the Kingman hall on Friday evening, November 20th.

Miss Alice Grahn has gone to her home at Hay Lakes

They Are Coming Back

* * *

During the past few months we have been highly gratified at the number of people who have come in and paid up their subscription, in some cases far in arrears.

The recent depression cut deep in many places, but there are few places where the cutting was any deeper than on the farm and in the country newspaper office.

But while, perhaps, we are not all in this district on the high road to fortune, conditions are better than they were. One dollar wheat is better than fifty cent wheat and seven cent hogs are better than four cent hogs. Quite a number have come in with rather a wry grin—remembering the economic perils they had passed through—and paid up, and to these our thanks are due. There are others, however, who we would cordially welcome. Even if the depression did compel you to run behind, come in anyway, you will find us easy to deal with, and while we prefer cash we will accept anything that is useable on subscription accounts—we do this to enable you to get the subscription account off your mind and to make our list as far as possible a 100 per cent live one.

* * *

THE MERCURY

"THIS LITTLE PIG" — WAS ON RELIEF

Even pigs look for the government relief camp when out of a home, George Sorgard writes The Examiner and he goes ahead to prove it.

He recently bought 26 feeder hogs from the Southern Alberta Co-op at Lethbridge, marked with a 12 on their backs. When he was 3½ miles north of Coaldale they stopped to have a look at the pigs and could only find 25. They looked back and did not see any sign of the pig, so continued on their way to Iron Spring and passed the Nolan Hill relief camp at 4:30.

"Next morning one of the men at the camp sent word to me that a stray pig had come there for supper, lodging and breakfast and that if I would come and claim the pig I could have him.

"I went down and it was one of the pigs I bought, for it had the 12 on its back.

"He passed seven farm buildings and travelled at least eight miles to get to the relief camp for supper and a night's lodging."

ALL EYES ON THE SOUTHERN HEMISPHERE

The critical period has now been reached in the world wheat situation. The most important immediate factor is the condition of the wheat crops in Argentina and Australia. If big yields are produced it will be difficult to maintain prices unless new factors such as a war are encountered. It now looks as though the wheat outturn from the southern hemisphere will be at least 100 million bushels larger than last year. Nat Murray, United States crop forecaster, is now in Argentina and estimates the yield at 240 million bushels. Private reports from Australia suggest the crop there will reach 140 million bushels. If these yields are realized a total of 380 million bushels will be 100 million bushels more than last year.

Undoubtedly British buyers are looking for cheaper wheat. They know from long experience that Argentina is a free seller in ordinary years and Australia will keep pace with this rival. Buying has been from hand to mouth as a consequence. However, if serious rust hits Argentina's crop and Australia's is badly damaged a dynamic situation may readily develop. Certainly the surplus supplies of wheat in the world this year are not large and should any crop calamity develop some countries will be very near starvation.

The International Institute of Agriculture at Rome looks for a carryover among surplus wheat producing nations on August 1st, 1937 of only 125 million bushels. Broomhall figures the carryover in exporting nations at 86 million bushels, so that it is obvious that there is not much to come and go on as far as immediate supplies are concerned. But the future outlook does not look quite so promising. The United States total winter wheat acreage is now estimated at 52 million acres, which is exceptionally large, and the crop is off to a promising start. After four years of drouth the United States is due for a change in wheat production.

N. B. WALTON APPOINTED AS CHIEF OF TRANSPORTATION FOR C.N.R.

MONTREAL, Que., Nov. 14—Official announcement was made today by S. J. Hungerford, chairman and president, Canadian National Railways, of the appointment of N. B. Walton as Chief of Transportation with headquarters at Montreal. Mr. Walton has been General Superintendent of Transportation, Western Region, with headquarters at Winnipeg, since March 1930, and is well known as a railway operating officer of wide experience, especially on the western region.

Mr. Walton, who was born in Palmerston, Ont., has been active in railroading since 1900 when he started as clerk and stenographer with the Grand Trunk at Toronto. From then until 1907 he served the Grand Trunk Railway in the positions of clerk and stenographer; secretary to superintendent, telegraph operator and secretary to vice-president and assistant trainmaster. In 1907 Mr. Walton transferred to the Great Northern at St. Paul as secretary to the vice-president, and later inspector of transportation.

Returning to the Grand Trunk at Toronto in April 1908 he became Claims Agent. In October of the same year Mr. Walton became secretary to the general superintendent of the Grand Trunk Pacific Railway at Winnipeg and served subsequently as trainmaster at Wainwright, Alta., assistant to general superintendent at Edmonton. In September 1920 Mr. Walton became assistant general superintendent, Canadian National Railways at Prince Rupert, B.C. and transferred to Winnipeg in 1924 as general superintendent, being appointed general superintendent of transportation, western region, in March 1930.

Mr. Hungerford also announced that in future the general manager of the Canadian National Steamships will report to R. C. Vaughan, vice-president.

FEED MIXTURES FOR POULTRY

The poultry feed mixtures listed below have been used to advantage by the Poultry Division, Central Experimental Farm, Ottawa.

Laying Mash

Bran	18lb.
Alfalfa Meal	13 lb.
Middlings	15 lbs.
Ground Barley	20 lb.
Ground oats groats	20 lb.
Meat meal	6 lb.
Fish meal	4 lb.
Buttermilk powder	3 lb.
Bone Meal	3 lb.
Salt	1 lb.
Cod liver oil	2 lb.

Scratch Grain

2 parts Wheat
1 part Cracked corn
1 part Barley
1 part heavy Oats

Fattening Ration

Equal parts of ground whole wheat, ground whole oats, ground whole barley.

Fed with skim-milk or buttermilk as a moist mash of sloppy consistency.

With regard to poultry feeding, a farmers' bulletin has just been issued by the Dominion Department of Agriculture under the title of "Poultry Foods and Feeding." The foods and feeding of poultry are explained as simply as possible in 40 pages containing appropriate illustrations. The bulletin may be obtained free on request from the Publicity and Extension Branch, Dominion Department of Agriculture, Ottawa.

WINNING TEAMS IN PROVINCIAL CONTESTS IN BOYS AND GIRLS FARM CLUBS PROJECTS WILL ATTEND ROYAL WINTER FAIR

Youth in Agriculture will be splendidly represented this year at the 1936 Royal Agricultural Winter Fair, Toronto, when 31 teams with two members each of the Boys' and Girls' Farm Clubs of Canada from each of the nine provinces will be there to compete in the national contests in projects dealing with live stock, poultry and field crops. The members of these teams are the winners in the provincial contests.

The teams are made up of 56 boys and six girls. The girls are: Jean Brown, 20, of Heffley Creek, Kamloops, B.C. (beef cattle); Ethel Ferguson and Lillias Ferguson, 18, twins, of Conjuring Creek, Alberta, (swine); Marguerite Smith, 18, Arborg, Manitoba and Alice Johnson, 18, Winnipeg Beach, Manitoba, (poultry); Mary Coburn, 17, Mouth of Keswick, near Fredericton, N.B. (poultry)

Public Speaking Contest

In addition to the contests in the live stock, poultry and field crops' projects, the winner in each province in the public speaking contest will be there to contest for the Dominion award on Friday night the 20th at 8:30 p.m. in the Coliseum of the Royal Winter Fair. The contestants are: Wilbert Brydon, 19, Armstrong, B.C.; Oliver Weyman, 20, Woolford, Alberta; Bertram Husband, 19, Kelso, Saskatchewan; John D. Shaw 18, Swan River, Manitoba; W. Beverly Shouldice, 20, Shallow Lake, Ontario; Roger Ellyson, Saint Celestin, Quebec; Joseph Henry 18, Harvey Station N.B.; Colin Chisholm 18, Antigonish, N.S. and Ivan Roberts 18, Highfield, P.E.I.

The contest promises to attract a large audience. There is evidence of Dominion-wide interest in it.

Attractive Programme for Teams

These teams of the boys' and girls' farm clubs go to the Royal with all expenses paid by the Canadian Council on Boys' and Girls' Farm Club Work, the membership of which includes the Dominion and Provincial Departments of Agriculture, the two principal railways and several nationally known business organizations. The trip is a reward to the members of teams for their success in the provincial contests. The teams from the Maritime Provinces arrive in Toronto on Sunday night, November 15th. By 7:30 the next morning all the other teams will be on hand. Monday, the 16th will be spent in sightseeing and entertainment. On Tuesday morning, November 17th, soon after 8 o'clock, all the teams will be at the Royal Winter Fair to take part in the contests, the results of which will be known by early evening. On Wednesday, the 18th, packing plants in Toronto and other points of interest will be visited and in the evening the members of the teams will be guests at the Royal Winter Fair Horse Show. On Thursday, the 19th, they will go to Hamilton as guests of the International Harvester Company and from there will proceed to Niagara Falls returning to Toronto in the evening. Friday and Saturday they will spend seeing the sights of the Royal. The teams are being held over an extra day this year so that they can attend the public speaking contest on Friday night, November 20th.

Boys' and Girls' Farm Clubs have in recent years grown into one of the largest and most constructive of the national organizations. In 1931 there were 1,215 clubs with a total membership of 21142. There are now 2008 clubs and 24457 members.

The Canadian Council of Boys' and Girls' Club Work has its headquarters in Ottawa with A. E. MacLaurin the General Secretary. J. G. Rayner Director of Extension, University of Saskatchewan, Saskatoon, is the president.

THE WORLD OF WHEAT

By H. G. L. Strange, Director "Crop Testing Plan."

"Canadian wheat is not generally suited to the British market!"

Such was the opinion of a leading British Corn Merchant concerning wheat from Eastern Canada in 1862.

"Manitoba No. 1 Hard is the highest quality wheat in the world!"

But this was the opinion of the British Grain Trade in 1876 when the first shipment of wheat left Western Canada.

What put this extra quality or "strength" into Western wheat in 1876 and what has maintained it there ever since?

It is the result of probably tens of thousands of years of stored-up fertility in our prairie soil, coupled with much sunshine, and a small annual rainfall which, while sufficient to produce a fair yield to the acre, is not heavy enough to wash the precious nitrates out of the soil.

As well it is the result of the activities if countless millions of workers, the micro-organisms that live in the soil, which transform the fertile humus and other elements into quality-making "soup" but only a few particular varieties, it seems, are able to transform it into quality or "strength."

The following forces have tended recently to push wheat prices up: Italy continues to import wheat freely—Denmark cancels taxes on import grain—Seeding backward in Balkans and reduction in acreage expected—United States buys Argentina corn heavily—Finland needs large imports of rye—Expected Spain will require large quantities wheat.

Prices have tended to decline because of—Record winter wheat acreage in U.S.A. and crop in excellent condition—Wheat cutting in Australia now proceeding favourably—Indian rice acreage large (estimated at 78 million acres)—Demand for Canadian wheat somewhat declining—Danubian countries concentrating on permanently holding export markets for lard.

FAMILY GROUP ATTENDS CHURCH, PLACE CROWDED

MELBOURNE, Nov. 11.—When the McConochie family goes to church in a body, it not only attends the service but conducts it as well.

The family—172 members of it—recently attended South Richmond Methodist church in a body. The service was conducted by Rev. Mr. McConchie, assisted by another McConchie. The choir of 30 and the orchestra of three were all McConchies and McConchies took up an unusually large collection from more than 100 other McConchies.

Mr. and Mrs. David McConchie came to Australia 64 years ago from Langham, Scotland, and founded the family of which their oldest surviving son, aged 77, is now "head man." The family has its own successful cricket team.

A WALKING CAMP DAIRY

The Kensington, P.E.I. Scout Troop took no chances on their daily milk delivery at camp last summer. Through the kindness of a friend they borrowed a cow, drove it twelve miles to the camp site, pastured it, and had fresh milk "on tap" daily. Following camp they returned the cow, and assured everyone that by practising the 6th Scout Law of "kindness to animals" they had increased the "dairy's" daily output.

CHRISTMAS MAIL DEADLINES LISTED

Renewing their annual pre-Yuletide request to all people to "mail early to avoid disappointment," postal officials have released Christmas closing dates for parcels and letters for all parts of Europe and North America.

Delivery will not be guaranteed before Dec. 25 at the following destinations for mail posted after specified dates: Central Europe, Nov. 28; United Kingdom, Dec. 5; maritime provinces and eastern United States, Dec. 15; Quebec, Ontario and the Western United States, Dec. 17; Manitoba, Dec. 18; Saskatchewan and British Columbia, Dec. 19; Alberta Dec. 20; Edmonton, Dec. 21.

LEST WE FORGET—

(By Raymond Crawford in Canadian National Railways Magazine)

THIS IS written on Thanksgiving Day—one day out of the 365 when we are definitely reminded of the advantages which are ours as Canadian citizens. It is good for us to appraise what we have; it may serve to make us sober and reasonable. One measure of a man is his capacity to receive a gift, and what the present generation has of advantage and privilege is mainly gift, not our achievement. We are legatees, too often legatees unsatisfied or dissatisfied with our legacy, but legatees nevertheless.

There is with respect to our lot abundance of criticism but scant appreciation. Criticism there must be, it is a necessary element in advancement, but it must be positive, sane, tolerant and constructive. There are all too many who see and seize upon the less attractive features of our physical environment, and of our social, economic and national life, forgetting that though it is a little cold in winter and a little hot in summer, and though all social laws and government are imperfect there are ten good things for one bad. We are reminded of a remark of the late Colonel Ingersoll, to the effect, that if he were the controller of the world, he would make health catching and not disease. This is merely cynical and shallow ignorance, because there is more health than disease, more sunshine than gloomy days, more enjoyment than misery, more things that help than things that hurt.

It is good for us to exercise a little imagination and to see the path by which we have arrived, to make comparisons with other days and other peoples that we may have due appreciation of the unique position of Canada as a land of present benefit and future hope. It is of vital importance that we take cognizance of the past. It is said that he who lives in the past becomes a murmurer, he who lives in the future visionary, yet the most unsatisfactory of all conditions and attitudes is to live in the present only, without regard to the riches received from bygone days or to the responsibilities which the future places upon us. A survey of the past will be a corrective of that superficial temper that takes present advantages for granted and feels no gratitude for these advantages. Gratitude is one of the most valuable of the virtues, as it is one of the rarest. Gratitude links past with present, it joins debt to duty, advantage to loyalty, without it there can be no appreciation of the present and no reasonable determination to make the future worth while. Yet it is remarkable how the average man can cut himself off from the past, recognizing neither debt to it nor obligation to the present or future. He is here and time seems to have begun with him, and for him. Let us look at the contribution of the past; we have advantages and amenities which were unknown even in comparitively recent times. Take this as a simple example; even the poorest of us can have a carpet on his floor, but if we had lived in the days of Elizabeth we would have had, instead of Kermanshaws, Keshans, Sarouks or Wiltons, a layer of rushes. Most of us have bathrooms, but such a necessity was rare in England a hundred years ago.

It is good for us also to consider the present. Our millions upon millions of fertile acres, our mineral wealth, our forests and our fisheries, our climate, our lakes and rivers, our actual and potential water power are commonplaces to all. Notwithstanding the present financial stringency—much of it due to extravagance and lack of thrift—we have it from authoritative sources that with a population of less than 11,000,000 we are the fifth trading nation of the world, and it is well to remind ourselves that, "except in the building industry, unemployment in Canada is today less than it was some years before the post-war boom", less than, in what has been called, the normal year of 1926.

But we have assets greater than physical ones and without which these would be of little value. It is the heritage of governmental principles and moral ideals that is ours (and has been ours since the day when Jacques Cartier placed his cross at Gaspe), and to which we must cling with grim tenacity. There may be other peoples in other lands who prefer different kinds of political principles to ours. If that is their desire let them adopt these principles and govern themselves accordingly; but as for us, we are content with democratic government, and we must serve notice on those who would overturn it that they are free, and requested to go elsewhere if they wish something different; especially those who come from other lands with revolutionary ideas, for CANADA IS BRITISH.

The Opposite Situation

Said the chairman of a certain society at its annual meeting.

"In most kindred associations, half the Committee does all the work while the other half does nothing. I am pleased to place on record that, in the society over which I have the honor to preside, it is just the reverse."—That's a Good One.

WESTERN FEEDER CATTLE AVAILABLE FOR FARMERS IN EASTERN CANADA

Commenting on the movement of feeder cattle from dried-out areas in the Prairie Provinces, Hon. James G. Gardiner, Dominion Minister of Agriculture, stated today that, since September 1 1936 at least 20000 cattle have been shipped to farms in Eastern Canada with assistance offered by the Dominion Department of Agriculture. As far as this movement applies to the Province of Quebec the Provincial Department of Agriculture pays 50 per cent of the freight rates.

Upwards of 300 farmers in Eastern Canada have during the past two months taken advantage of the Feeder Purchase Policy to go to Western Canada personally to select the cattle required for their own feeding operations or by neighbours who have placed orders with them. Under the terms of this policy the Dominion Department of Agriculture pays the one-way railway fare and living expenses en route from the home of the applicant to the point where the cattle are purchased.

In order to secure refund of 50 per cent of the freight charges allowed by the Dominion Department of Agriculture on carload shipments of young feeder cattle purchased at and shipped from country points in the prescribed drought area, the majority of Eastern buyers have purchased direct from farmers and ranchers, a fact which has materially assisted producers in that part of Western Canada in disposing of cattle which they have been under the necessity of selling this year. In addition, many Eastern Canadian farmers who were unable to make the trip to Western Canada have utilized connections made by them in previous years to have cattle purchased for them at country points in the drought area, thereby saving 50 per cent of the freight charges.

It is pointed out by Hon. Mr. Gardiner that the freight concession applies only on cattle shipped prior to December 1, 1936, and that farmers who may still desire to secure advantage of it should lose no time in completing their arrangements to go to Western Canada or in placing their orders.

While the Dominion Department of Agriculture does not undertake to handle orders, service has been given through regular and specially appointed members of the staff of the Dominion Live Stock Branch in connecting buyers with farmers and stock growers who have feeder cattle for sale. There are still heavy listings of such cattle in the hands of two of the representatives of the Department—Raymond Youngman, at the Moose Jaw Stock Yards, and Kenneth Coppock stationed in the office of the Western Stock Growers' Association, Calgary. Both of these men are prepared to do everything possible to place buyers in touch with producers in the drought area who are anxious to dispose of young feeder cattle before winter sets in.

Reports received by the Dominion Department of Agriculture this week indicate that the better class of feeder cattle have recently been selling at prices at least 50c per cwt. below those at which the majority were sold during the month of October, 1936.

BRITAIN'S JOBLESS PLAN PARADE AT CORONATION

LONDON, Nov. 16.—An army of "forgotten men from all over Britain will congregate in London at the time of King Edward's coronation ceremonies next May, Harry Pollitt, British Communist leader announced in addressing party members and "hunger marchers" in Trafalgar Square yesterday.

Pollitt declared: "We will debunk the coronation ceremony by bringing to London the greatest army of unemployed forgotten men and women this country has ever seen."

Aneurin Bevan, Labor M.P. told the crowd; "I understand preparations are being made for the King to visit South Wales. I want to say that the best message the government can send to South Wales is not a hypocritical visit from anyone at all, but a declaration that the government proposes to withdraw the means test (for gauging dole allocations) and its unemployment regulations."

STATELY PRIVY COUNCIL INTRODUCED TO 'PAINLESS'

LONDON, Nov. 17.—A sidelight on a dentist today provided a relief from abstruse arguments being presented to the judicial committee of the privy council in connection with a series of Canadian appeals.

The appeals concern legislation dealing with labor and unemployment passed by the Bennett government.

One of the counsel mentioned a Canadian dentist named Painless Parker.

"Is Painless his real name?" asked Lord Atkin, member of the privy council.

"Yes, My Lord," counsel replied. "It is a name he properly and legally acquired when he moved into a province where Canadian law was contrary to doctors and dentist advertising. He has been very successful in his business."

"Painless extraction!" exclaimed Lord MacMillan, another privy counciller. "Well, I call that good."

UTOPIA SOUGHT BY WEARY TRIO

NASSU, Bahamas, Nov. 17. — World-weary Lady Tyrell-Beck was expected here today in her search for a lonely island Utopia on which she, her husband and an American relative can escape from civilization —and the threat of another European war.

The trio's plans to establish a retreat on one of the hundreds of Bahaman coral cays became known Saturday in New York when Austin Beck, of Swampscott, Mass., sailed for Nassau aboard the S.S. Munargo.

CANADIAN SCIENCE TOP — TWEEDSMUIR

OTTAWA, Nov. 17. — Scientific and technical departments of the Canadian government have no superiors in any country Lord Tweedsmuir governor general said here Monday speaking at a function commemorating the work of officers of the department of mines and the National Research Council in developing the radium deposits at Great Bear lake.

The development arose out of geological observations made by officers of the mines department and was made possible by research on metallurgical problems in government laboratories. The result had been achieved by a combination of the prospector, the mining engineer the metallurgist and the chemist.

In their wake came the medical men who used radium as a major weapon in the war against cancer. The whole development through the co-operation of industry and science was a fine example of efficient and public-spirited team-work, he said.

On the 14th of July in the year 1789 the Bastile fell in Paris and with its fall began the French revolution," said Lord Tweedsmuir. "On that same day Alexander Mackenzie the explorer set up a post on Whale island off the Arctic coast.

"That day in the old world inaugurated several decades of war and a carnival of windy theories of which we still feel the blast. Here in Canada, on the other hand, was inaugurated the slow and patient conquest of the north.

"In recent years in the old world we have seen a similar epoch of confusion and unsettlement, the strife of rival dogmas and the eternal rumor of war. In Canada these same years have witnessed a very different kind of movement, the steady pacific conquest of the wilds, the practical business of unlocking the treasure-house of nature."

SOCIAL SCHEME BLANKS GO TO FIVE MILLIONS

WASHINGTON, Nov. 17.—Postmen today delivered 5,000,000 social security application blanks to employers throughout the United States, first step in the gigantic task of setting up social security accounts for 26,000,000 American workers.

The blanks were distributed from 45,000 post offices to all employers in industrial and business pursuits. Each employer is expected to fill in the number of his employees and the nature of his business. These blanks must be returned to local postoffices by Nov. 21.

When the applications have been received by the postoffices, the specified number of employee application blanks will be set aside for each employer and delivered to him Nov. 24. Employer application will then be forwarded to th Baltimore account ing office of the Social Security Board for tabulation.

The next step in the process of setting up individual social security account numbers and wage records will follow. Employers will give employee application blanks to their workers who are required to return them not later than December 5.

The office personnel of the board was working at top speed as it cooperated with the postoffice in assuring smooth delivery of the initial forms.

One official described the collection of wage information for the nation's 26,000,000 workers as "the largest task of its kind ever undertaken by any country.

A SCOUT TRANSFUSION SERVICE

An item of the annual report of the First Calgary (Pro-Cathedral) Scout Group records the fact that every member of the Group's Rover Crew gave free blood transfusions in emergency hospital cases during the year.

LINDBROOK

A Bingo party and dance was given last Friday at Hastings Lake School by the people of the district in aid of the R. C. church at that point. The Bingo game went off well, the calling was in charge of the Rev Father McGuigan and the treasurers were Messrs A. Campion and J. Gladu and we [illegible] financially it was [illegible] all [illegible] respects it certainly was [illegible] a lot of fun. A little while before midnight there was the usual feast of cakes [illegible] and after that the dance commenced. Mr. [illegible] Campion acted as M.C. and Mr. James Gladu assisted [illegible] was the orchestra. Quite a large crowd were present despite the roads and all thoroughly enjoyed themselves and are looking forward to the next performance.

Mrs. Art Tanner is out of hospital we are glad to report and is now convalescing in the [illegible] of Tofield before coming home to Lindbrook.

Corn a la Southern

1 can corn, chopped
2 eggs
1 teaspoon salt
1½ tablespoons butter
2 cups [illegible] whole milk
[illegible] these ingredients and pour into buttered baking dish. Bake in a slow oven until firm.

'TENDRA' PREPARED FOR DISTRIBUTION

The natives of certain tropical countries have long practiced tenderizing their meat before cooking by wrapping it in the leaves of the papaya plant and letting it stand for a few hours. The papaya plant contains fluids or enzymes which soften the tough connective tissues in meat turning even tough stew meat into tender steak.

From Cincinnati news of an American manufacturer importing the juice of the papaya from the South Seas for use of hotel and restaurant trade. Experiments have been successfully carried on for several months with the result that soon a commercial product "Tendra" will appear on the market, guaranteed to make the toughest steak tender enough to cut with a fork.

Arthur D. Little Inc. industrial chemists in Cambridge Mass. have been investigating such fluids and in their latest bulletin they declare that "food softeners" are highly popular in Japan. The comment that whatever success products or methods now available may have, there is every prospect that in due time even cheap meat will be tender.

"Tendra" the extract of edible papaya fruits produces tender steaks from cheap cuts at a cost of only one or two cents each. The liquid is painted on the meat five or ten minutes before cooking and allowed to stand.

Will the Act Function?

The people of Alberta are entitled to judge for themselves the unfairness and injustice of The Reduction and Settlement of Debts Act. This is the first of a series of short statements concerning the Act and its effect on you.

Will the Act function? Be it just or unjust, will it work? There are cases pending in the Courts in which the question of the validity of the Act is raised. Until the decision of the Courts is rendered, it is natural that lending companies cannot be expected in the meantime to prejudice their rights. Companies have been and are still prepared, regardless of what the decision of the Courts may be, to enter upon negotiations and explore all avenues in an effort to arrive at arrangements fair to debtor and creditor, a course which was recently followed by companies doing business in the Province of Saskatchewan.

Debtors should think over their position, and the doubtful security the Act might provide, before brushing aside the undertakings they entered into when they obtained their loans. Those who are not debtors should think what their position will be in a community where promises are lightly cast aside. If you cannot trust your neighbor—if your neighbor cannot trust you—what becomes of security and the basis upon which business and all other human relationships rest?

This statement is one of a series written by The Mortgage Loans Association of the Province of Alberta. The Association is composed of 14 member companies. It represents hundreds of thousands of small investments by typical Canadians. Its loans to citizens of Alberta amount to some forty-five million dollars.

(The second statement in this series will be published in two weeks)

THE BRITISH AND FOREIGN BIBLE SOCIETY

The local Annual Canvas in the interests of the British and Foreign Bible Society was made last week. The officers and collectors wish to take this opportunity of thanking the numerous citizens for their willing and cheerful response to such a worthy fund.

Knowing that the Bible is a means of evangelization and the source of instruction and inspiration for the Christian Life, the Bible Society seeks to make it available to all men everywhere in their own tongue. Since its foundation in 1804 it has been used of God for the translation and circulation of the Scriptures in 692 languages. The Bible Society publishes the Scriptures in raised types for the blind, not only in English, but in 39 other languages.

The Bible Society never had such world-wide opportunities before it or such imperious claims upon it for the spreading of the Gospel throughout the world as it has today.

President J. W. Robinson,
Sec-Treas. A. J. H. McCauley.

CANADA CITED FOR RECOVERY BY U. S. EXPERT

CLEVELAND, Nov. 16.—American businessmen were advised today by Colonel L. P. Ayres, business statistician and vice-president of the Cleveland Trust Company, to compare United States recovery with that of Canada.

In the four years since 1932, he said in the bank's business bulletin "Canada has regained 97 per cent of the depression losses, while this country has regained 70 per cent of them."

The United States, he said, is in a recovery movement "which promises to continue for many months to come. The chief significance the recent elections have for business is that they show that the American people firmly desire to have their government actively participate in their economic problems."

After discussing this factor at some length Col Ayres concluded:

"We should be asking ourselves how it is that Canadian business has been able to accomplish an almost complete recovery and to do it in the main by old fashioned, undramatic methods of self-reliance and local initiative."

LOST THREE DAYS, EDSON MAN FOUND

EDSON, Nov. 16.—Missing since Thursday when he became lost while on a hunting trip, Dick Switzer Sunday met a search party of 125 men which had set out in an attempt to find him. Switzer walked into a cabin 12 miles southwest of Edson where the searchers had called a halt for lunch.

He reported he had heard two gun shots Saturday afternoon at five, which had given him an idea of his whereabouts. He built a fire, camped overnight and proceeded north in the morning until reaching the cabin.

Switzer was in good physical condition, and had both food and ammunition when he met the searchers.

Communication

Pawnee, Oklahoma.

Mr. W. Worton,
Tofield.

Dear sir:

As I promised you, I am sending you a short account of my trip. I was a week on the road rambling through the rockies. I left Calgary October 20th, and after making various stops arrived at Pawnee safely. Enroute I stopped at Wenachee and visited my old friends Frank Steinbaugh and sons. Here I went deer hunting in the rockies. I also stopped at Fernie, B.C.; Kingsgate (where we were inspected and crossed the line), Spokane; Butte; Denver; Salina; Witchita and Pawnee, my destination.

I found all quite well but the farmers were hard hit by the drouth, the worst that Pawnee has ever had since the country was opened up in 1893.

It commenced to rain the last of August and they went to plowing and putting in the wheat. It came up fine and they are pasturing their stock on it as feed is high. Oats are 65c a bushel and hay $14.00 a ton.

Well, Mr. Editor, if you publish this in the paper all my friends will know I got through all O.K.

Respectively yours,
Louis Glenn.

LIBRARY NOTES

The Womens' Institute Library will be reopened on Saturday afternoon, November 28th, at the usual hour. New books are available and the yearly membership fee is $1.00. Those wishing to avail themselves of membership for only half a year may do so for a fee of 50 cents. Mrs. A. B. Clutterham and helpers will be in charge again.

TRAPPED IN BATHROOM

JUNEAU, Nov. 24.—V. A. Babcock was taking a bath in Mrs. Fred Matson's boarding house when he heard the big slide coming down.

"I wrapped three towels around me and ran to the front porch," he related. "The slide hit the porch and it started moving. I turned around and ran like —— and jumped out a back window and ran down the street."

The slide carried the house away and Mrs. Matson was believed buried in the basement.

WANTED—Dance Musicians. Those residing near Tofield given preference. Full particulars first letter. X.Y.Z. Mercury Office.

Come To The
Tofield Hockey Dance
At The
— VARIETY THEATRE, TOFIELD —

LOCAL & PERSONAL

Mr. and Mrs. Brenneman, Norma and Paul are leaving Thursday night by C.N.R enroute for Chicago. Their final destination is Elkhart, Indiana, where they will spend the winter. They expect to be back in the spring and contemplate driving back in a new car.

Born:—To Mr. and Mrs. Dr. Brenneman, at Dhamtari, C.P., India, on Saturday, November 14th, a daughter. (By cable.)

Miss L. Rose visited the city on Thursday of this week.

A meeting sponsored by the C.C.F. is billed to be held at Tofield on December 9th. Mr. Irwin will be the principal speaker.

Mr. Frank Carter is visiting at the home of his sister, Mrs. Thomas.

The W.A. are holding their bazaar and sale of home cooking in the Institute rooms on Saturday, December 5th.

Messrs. Glen Wood, Harry Bowick, Arthur Francis and S. Stauffer are leaving to-night (Thursday) for Chicago. Harry and Glen Wood, will we understand, bring back cars for the Tofield Service Station.

Miss Mary Burnett visited the city on Saturday.

Mr. and Mrs. Thompson and Leon motored to the city on Sunday.

The Tofield Hockey Club dance has been postponed until Friday, Dec. 4.

A number of young people staged a skating party on Wednesday evening on one of the sloughs north of town. An enjoyable time was had, the ice being in fine shape, smooth as glass.

LAKESHORE

Herbert Warner is in Edmonton this week having an operation on his eyes.

Mrs. T. R. Murray and Margery wwere visitors to Edmonton last week.

Mrs. Gladys Plants spent the week end in Edmonton visiting friends there.

R. C. Phillips is leaving for Vancouver on Saturday for a month's holiday.

A dance was held in the Community Hall on Friday night. From all reports there was a good crowd and everyone had a good time.

Joe Griffith is spending a few days in Edmonton this week.

KINGMAN

Miss Helva Grahn has gone to Camrose to work.

There was a large crowd gathered at the Kingman hall last Sunday to surprise Mr. and Mrs. Mike Fughm. They presented them with a purse of money. Mr. Fughm has been ill since last February, but is able now to be around on crutches.

The Ladies' Aid held their regular meeting at the Kingman Hall last Thursday. Mrs. Bjrum and Mrs Lindberg were the hostesses.

The Ladies' Aid Sale will be held December 5th in the Kingman Hall at 8 o'clock.

MAD AT FATHER, REMAINED IN BED FOR FIFTY YEARS

West Milton, N.H., Nov. 24.—Only five blackened chimneys remained Tuesday of the 150-year-old Ephraim Plummer farmhouse where Joseph Plummer stayed in bed for 50 years because his father objected to his love affair.

Tradition has it that Joseph, then a young man of 22, talked one night with his father about a girl on a neighboring farm with whom he was in love. The father told him to stop talking and go to bed, and Joseph Saluteenailed - walked immediately to his bedroom.

From that night until he died at the age of 72, Joseph never left his bed. He died Aug. 15, 1912, with a white beard reaching to his waist.

KETCHAMOOT

Born: To Mr. and Mrs. Stanley Brown on November 17th, a son. Congratulations.

The annual meeting of the Ladies' Aid will be held next Wednesday afternoon, December 2nd, at the home of Mrs G. W. Sears. Will be re-electing of officers. All members are requested to be present. Visitors are welcome.

Mrs. Henderson returned to her home one day last week after a week stay at the home of her daughter, Mrs W. A. Mitchell. We are glad to hear that Mrs. Henderson has improved in health.

Miss Ada and Mr. Dick Turner left Saturday evening on a trip to visit relatives in England. We wish them a pleasant voyage and safe return.

Mr. Harold Schultz visited over the week end in Vermilion.

Mrs. Maurice McGinitie is returning home on Wednesday of this week after undergoing an operation in an Edmonton hospital.

The many friends of Mrs. A. J. Williams were very sorry to hear of her illness but hope it is only temporary.

Mr. and Mrs. J. H. Ingram, Mr. and Mrs. T. D. Ferguson and son Lloyd visited Mr. and Mrs. Les Oveldson on Sunday.

Mrs. Mabel Brown and son Archie, Mr. and Mrs. Terment and twin babies of near Bawlf visited at the home of Mrs. E. McMullen Sunday of last week.

Mrs. Abbot and her mother Mrs. McKernon, Mrs. Taylor and Mrs. Morton visited Mrs. Henderson at her home one day last week.

A new addition has been added on to the barn at the school house.

Mr. and Mrs. Berreclough and family of Bardo visited at the home of Mr. and Mrs. Carlisle Sunday.

Mrs. Sears, Hazel, Stanley and Charley, Harold Coombes and Gordon Whillans were Sunday evening guests of the Davison family.

Mr. Cardton of Vermilion is visiting his daughter Mrs. Joe Sutton and family.

BRITISHER FAVORS RETURN NAZI LANDS

Northampton, Nov. 24th.—Sir Oswald Mosley, British Facist leader, today advocated Britain return the colonies stripped from Germany after the Great War.

Such action, he said, would be "a contribution to peace and justice."

"For 15 years," said Mosley, "Hitler has preached friendship with England. The new Germany has been built upon an ideal exactly opposite to that of the old Germany."

He said that, as Chancellor Hitler had repeatedly asserted, Germany needs raw materials and that anyway the colonies in question "aren't British."

The former German colonies, he said, were held under a League of Nations mandate and "we are prohibited from using them for the benefit of our own people."

"They have been an expense to us and to Germany they would offer opportunity," he asserted.

Great Britain he said, "because of its virtual alliance with France and Russia is in the wrong camp. Anyone who goes to war against Germany, Italy and Japan is a candidate for the suicide club."

DEER IN DUEL TO DEATH

Canon City, Colo., Nov. 24.—Two big buck deer dueled in mortal combat Monday on a narrow granite ledge high above Colorado's Royal gorge. A hundred highway workmen watched from a distance.

For an hour the bucks manoeuvred silently. Charging finally, their antlers locked. Their footing gave way and they plunged together over a 400 foot precipice into the Arkansas river.

One deer was instantly killed. The other broke a leg and had to be shot.

Tuesday, December 8th
Woodland Dairy, Limited.

TOWN COUNCIL MEET

At a regular meeting of the town council held on Monday evening, Nov. 23rd, there were present Mayor Bruce, and Councillors Hammond, Swift, Bellamy and Law.

A number of communications covering such matters as relief, hospitalization of indigents, etc were read. Some accounts were passed and ordered paid. Fire, water and light committee reported purchase of a fire extinguisher with double-acting force pump for use with water, at an approximate cost of eight dollars. This had not yet been received. This committee also reported the filling up of the vacancies in the fire brigade caused by the absence of L. Burnett and W. B. Worton, Glenn Wood and Gerald Hosler filling the vacancies. Reserve bids were set on the various properties to be offered for sale in the month of December. The usual monthly financial statement was read and ordered incorporated in the minutes of the meeting. Mr Geo. Weatherill interviewed council regarding taxes on Block X Plan 3782 A.N., owned by him. Mr D. G. McCarthy also interviewed council relative to the agreement of sale existing between him and the Town. The Voters List for the year was adopted as prepared and presented to council.

SNEEZING DISEASE ENTERS 15th DAY

Geraldine Soper woke up early Tuesday, yawned, stretched then sneezed. A moment later, she was still sneezing.

Thus dawned the 15th day in the strange seizure, informally known as "sneezing sickness" which struck the 14-year-old Edmonton girl without warning November 10 as she sat at her desk in Westmount high school. Doctors are still puzzling over her case, though it is expected a fairly definite diagnosis will be completed before the week ends.

"Yes, she is still sneezing, but we are pretty sure there has been an improvement in her condition," a hospital official told the Journal Tuesday.

Obituary

We regret to have to report the death of the infant daughter, Eleanor Pauline, of Mr and Mrs Ed Weatherick on Thursday evening last. The little one had been in poor health for some time and on Thursday developed pneumonia, which caused her death. Tofield and district extend their sincere sympathy to Mr and Mrs E. Weatherick.

They Are Coming Back

During the past few months we have been highly gratified at the number of people who have come in and paid up their subscription, in some cases far in arrears.

The recent depression cut deep in many places, but there are few places where the cutting was any deeper than on the farm and in the country newspaper office.

But while, perhaps, we are not all in this district on the high road to fortune, conditions are better than they were. One dollar wheat is better than fifty cent wheat and seven cent hogs are better than four cent hogs. Quite a number have come in with rather a wry grin—remembering the economic perils they had passed through—and paid up, and to these our thanks are due. There are others, however, who we would cordially welcome Even if the depression did compel you to run behind, come in anyway, you will find us easy to deal with, and while we prefer cash we will accept anything that is useable on subscription accounts—we do this to enable you to get the subscription account off your mind and to make our list as far as possible a 100 per cent live one.

THE MERCURY

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

INFECTIOUS DISEASES

The bane of motherhood. The invariable accompaniement of school-days. What can be done to control them?

With the opening of the schools in autumn, two-thirds at least of school children acquire infections of various kinds, colds, measles, scarlet fever, whooping-cough etc. They carry these infections home to other children in the family, and, unless prompt measures are taken, the entire community becomes involved.

The infectious diseases spread from person to person by personal contact. If there is a general outbreak in a school section, some persons clamour for closing of the school. Such a proceeding is of no value. It is better to keep the school open since in school there is general supervision. Left at home the children mingle together on the streets without supervision and the outbreak spreads.

There are two precautions of real value in the prevention and control of the infectious diseases. The first is as old as Moses. It is to "separate the sick from the well." That is how the great law-giver protected the Israelitish tribes against the spread of disease. The principle remains one of the best resources of the health officer. He isolates or removes the sick one from the other members of the family, and thus prevents in so far as he can, the dissemination of the infection. The other precaution goes back to the days before the child is born. It is the proper feeding of the baby's mother before her child is born. In addition to the use of essential foods, meat, eggs, milk fish vegetables and fruit the mother should have cod-liver oil and sea-fish throughout her pregnancy. Many mothers are anaemic. If so, they should have suitable treatment for this condition from their respective doctors.

The value of cod-liver oil and sea-fish in the mother's diet consists in the prevention of rickets in her baby. Moreover such a diet ensures good bones and teeth in the child, increases the resistance to infection and a sturdy, vigorous body.

There are other valuable preventatives of infection. In the first year of life every child should take cod-liver oil from October to May. The clothing should be suited to the weather, and not too heavy in the hours of play. It is a mistake to continue to go with bare legs when the frost comes. There is no value for this practice after September, however valuable it may be in the summer sunlight.

The old-fashioned practice of letting the child take measles and other infectious diseases "so they will be done with them" is played out. In every possible way the child should be prevented from having the infectious diseases. The childhood infections are provocative of heart disease, arthritis and other diseases of after-life.

In the schools of cities and the larger towns, the practice of having school doctors and nurses to scrutinize the children daily has done a good deal to limit the spread of infection by its early discovery and the application of precautionary measures. It costs money but the future saving is seen in smaller doctor's bills, less severe illness and fewer funeral bills.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be personally answered by letter.

HOW TO IMPROVE THE IDLE HOUR

The busy season for the beekeeper is over. With the honey crop harvested and the bees snugly packed away for the winter there will be considerable spare time during the next five or six months which the bee keeper could profitably use by getting in touch with his fellow workers, either by personal contact or through the medium of literature. Winter time is convention time, when producers of all kinds gather together for the purpose of discussing with each other the various problems connected with their particular industries. Several such conventions are held for the beekeeper and many an idle hours can be pleasantly and profitly spent in attending them. Many a time the writer has heard beekeepers remark that certain information picked up at conventions has more than repaid the cost of attending.

In addition to the conventions and association meetings, there are also a number of short courses for beekeepers given by some of the Agricultural Colleges. Although these courses are especially prepared for beginners, the experienced beekeeper may also find them profitable, and those who can afford to do so are well advised to attend them. Convention and short courses are not the only sources of information, for numerous books and journals which should be present in every beekeepers library are available at low cost. These can be obtained through any dealer in bee supplies in Canada. In addition, bulletins and pamphlets dealing with different phases of beekeeping may be obtained free of charge from the Publicity and Extension Branch, Department of Agriculture, Ottawa, and also from some of the Provincial Departments as well. A few hours in contact with other beekeepers and a few more hours spent in reading is time well spent, both pleasantly and profitably.

INHERITS $300,000, "LITTLE EXCITED"

HERNDON, Pa., Nov. 24.—Mrs. Mary Hoover, 84-year-old guest of the Burd Memorial Home for the Aged, said she was "only a little excited" Monday at the prospect of inheriting a fortune of $300,000 which home officials said she has already signed away.

Rev. G. E. Heisey, superintendent of the home, said lawyers discovered the claim of Mrs. Hoover against the estate of Mrs. Florande Clark of Council Bluffs, Iowa, in litigation for more than a year.

Mr. Heisey said the home would claim the fortune, if it comes to Mrs. Hoover, under the terms of an agreement he asserted she signed upon entering the home 10 years ago, giving to the institution all personal possessions.

INSURANCE—

TO-DAY, FROM various sources one hears frequent mention of insurance. From companies, fearful that government legislation will adversely effect their intricate financial structure; from individuals who are fearful of lessened value of their policies; and from governments who have asserted in principle they desire to do no harm to the insurance policy holder. The above applies specifically to what is known as "life insurance."

Insurance is in escence, a contract between two parties in which one, in exchange for a stipulated amount, agrees to indemnify the other against loss of any kind. Insurance dates back so far into history that its actual beginning is not known.

The first form of known insurance was marine, due perhaps because hundreds of years ago, damage to life and property on sea was greater than that on land. Marine insurance was believed to have originated in Flanders, being introduced into England in the 16th century. Most every person has heard of Lloyd's. Llody's is really a society of underwriters, the name Lloyd's being taken from a certain coffee house in Abchurch Lane, London, where the original members of the society met. Many independent companies are subscribers to Lloyd's and it is common for any one piece of marine insurance business, even though written by one company, to be divided between a number of underwriters, thus spreading a loss, if any, among more people.

Fire insurance to no small extent is of a similar nature; that is one party agrees to pay the other compensation for loss received in exchange for a stipulated sum. Like marine insurance, many independent companies are subscribing members to a society of underwriters, who work out a table of premiums based upon certain classes of risks. Therefore, generally speaking, it matters little what company an individual places his business with, the rates are the same, and in the case of policies of extra large amounts, it is likely the loss, if any, would be paid by the same people, the underwriters. In addition to marine and fire insurance there are numerous other forms, catering to specific trades and industries in all of which the basic principle of promising to pay a loss, if any, in return for a stipulated amount is involved.

Life insurance is in a different class, inasmuch as in return for the premiums paid, the insurance company definitely promise to pay a stated amount. It will be noted that in marine, fire and most other forms of insurance, benefits are only paid upon the event of loss, and there may be and most frequently is no loss. On the other hand life insurance precludes eventual loss for all must die. We are reminded of a remark by Mr. Pincott made some 15 or 16 years ago, on the peculiarities of human nature. He said that it was relatively easy to sell fire insurance as against life insurance, yet people knew that they might never have a fire, but were quite certain they would eventually die. Life insurance dates back to 1583, but the object of the insurance then was quite different to now. It is believed that in its earliest stages, life insurance was for short periods and was mainly placed as a protection to creditors. Oh, these material possessions! However through the centuries, life insurance developed into a fine art and today is one of the accepted amenities of modern life. There are elaborate tables relating to the amount of premiums to be paid for certain classes of risks, life insurance companies being chiefly concerned with age, health, family history and occupation of the applicant. Generally speaking life insurance companies are under a certain amount of government supervision. They often have handsome offices, well paid executives, and for years, to be connected with life insurance business, especially in an executive capacity, meant that individuals were "well fixed." And why shouldn't they be? Life insurance business is conducted on an actuarial basis. An actuary is an individual who carefully computes all the known risks and then sets a rate to cover them. A sort of sure to win, can't lose proposition. A rather nice business if you're lucky enough to be inside. But they have their responsibilities too. Financial soundness is their religion and prompt payment of claims, their creed. Anything that is likely to effect their financial position or to jeopardize their ability to pay proper claims immediately they are due, causes them extreme worry.

So far we have mentioned life insurance as applied to benefits received upon the death of the person insured, usually by a close relative. But there has grown up during comparitively recent years, another type of insurance, that of paying to the person insured after a stipulated number of years, the amount of the policy. To distinguish this form of business from that calling for payment only upon the death of the insured, it is called life assurance, but though there is a difference in actual practice, the terms insurance and assurance are synonomous.

So great has life assurance business become that for many classes of people, wage earners in the higher paid class, professional men, office men,

(Contiaued on back page)

THE WORLD OF WHEAT

Wheat is probably the oldest of world's crops.

A larger quantity of it is consumed than of any other foodstuff with the single exception of potatoes. In prehistoric times wheat was cultivated throughout Europe and was one of the most valuable cereals of ancient Persia, Greece and Egypt.

It has always been prized for the high quality bread which it produces—whenever it is possible people turn from foods made from rye, barley and oats to bread made from wheat.

It is grown in almost every country in the world, the only parts from which it is absent being the hot, low-lying regions of the tropics; Siam, however, being the one notable large country where no wheat is produced.

Its cultivation is simple and it is adapted to more varying soils and climatic conditions than any other food plant known.

It has ripened as far north as Skibotten in Norway and is cultivated around Archangel on the White Sea and in Verhoyansk in Siberia within the Arctic circle. It is as well cultivated on the equator and Columbia.

Wheat is also grown at different altitudes varying from sea level to a height of 15,000 feet in Tibet.

Prices have tended to be raised recently by the following:—Demand for Canadian wheat increasing. Subsoil moisture very deficient in Western Canada and spring wheat area U.S.A. and in parts winter wheat belt. U.S. purchases large quantities Argentinan corn. Rains delay planting in parts of Europe. Production of dried beans in Danube Basin less than normal.

These factors have tended to push prices down: Wheat surplus in Danubian countries estimated one hundred million (all time record) Large quantity wheat afloat to world's market. Esthonian production potatoes increasing. Argentina shipping surprisingly large quantities of rye

10 ARE SOUGHT IN DEBRIS OF JUNEAU SLIDE

Juneau, Alaska, Nov. 24.—Flames spread through wrecked buildings beneath a great land slide here to-day and hope faded for at least ten missing persons who, rescue crews believed, were trapped under mud, rock and shattered timbers.

Only one body had been recovered. Nine injured are in hospital.

Weary, mud-smeared men dug and chopped while a power shovel cut into the 100 foot wide mass which ranged from 10 to 40 feet in depth.

Rescue efforts centred on the demolished three-storey frame Nickinovich apartments which received the full force of the slide as it rumbled down a mountain slide and cut a swath through an apartment house district.

Four of those listed as missing were believed to be in the Nickinovich building.

Earlier estimates by Fire Chief Mulvihill placed the missing at from five to 25 persons and said four were killed when twin slides rochetted off a mountain and swept through the neighborhood.

Relief workers found the body of Mrs. Gus Erickson crushed behind a stove in her frame house. Her husband was injured

The first of the two slides did little damage but the second cut a 100 foot path through the neighborhood, burying stores and residences in a to foot mass of mud

When the slide struck, citizens, soldiers and firemen rushed to the scene to clear the oozing mud, rock and smashed timbers which engulfed two apartment houses, a lodging house, a store and several small dwellings.

Guided by voices of people trapped within buildings, rescue crews worked through the night Power lines were wiped out and fire truck headlights guided the rescuers in their work

ROYAL GRAIN INQUIRY COMMISSION

Mr. Justice W. F. A. Turgeon, Royal Commissioner appointed to inquire into the Canadian Grain Industry, announced at Ottawa recently that hearings were scheduled to begin in Winnipeg, on Tuesday, December 1 Subsequent hearings will be held at Regina, Saskatoon, Calgary, Edmonton and Vancouver and possibly at some other points

By Order-in-Council the Commission is authorized to inquire into and to report upon the subject of the production, buying, selling, holding, storing transporting and exporting of Canadian grains and grain products, and other questions incident to such matters, and in particular, but without restricting the generality of the foregoing terms, to inquire into and to report upon

1.—The method now or heretofore employed in marketing Canadian Grains abroad, including Goverment Grain Boards co-operative or pool marketing, price stabililization measures and the open market or competitive method; and the effect of these various methods upon markets

2.—All transactions since the year 1930 pertaining to the handling of grain for relief and seeding purposes in the provinces of Manitoba, Saskatchewan and Alberta under the Dominion Government guarantee, or otherwise.

3.—The extent, if any, to which the Canadian wheat Board protected speculative short interests in the Winnipeg wheat market in December 1935, immediately following the higher price fixed by the Argentine Government for Argentine wheat, and the effect, whether beneficial or harmful, of any such action taken by the Board.

4.—The effect of the practice of mixing and of the selection of grain for protein content by millers and exporters.

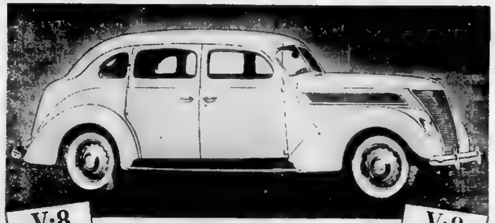
5.—The causes of the decrease in Canadian Grain exports in recent years

6.—The measures which should be taken to retain and to extend the markets throughout the world of Canadian wheat and other grains and their products

With Commissioner Turgeon will be associated Hon. J. L. Ralston of Montreal as Counsel. Mr J. E. Coyne of Winnipeg as assistant counsel and Dr. T. W. Grindley of Ottawa as Secretary

The Commission is anxious to hear anyone having information to offer on the above subjects, and those desirous of making submissions are asked to communicate with the Secretary or with Counsel for the Commission at Winnipeg, stating the nature of their evidence and the place at which they would prefer being heard.

Announcing
THE FORD V·8 FOR 1937
The Quality Car in the Low-price Field



V·8 85 HORSEPOWER • Maximum Performance with Good Economy

V·8 60 HORSEPOWER • Good Performance with Maximum Economy

Two Engine Sizes - One Wheelbase
AND A NEW LOW PRICE

THE New Ford V-8 for 1937 is the most beautiful Ford car ever offered. It is built in only one size—with one standard of roomy comfort and modern appearance. But you may have either the improved 85-horsepower V-8 engine for maximum performance—or the new 60-horsepower V-8 engine for maximum economy. The smaller engine makes possible a lighter car—a lower priced car, with lower operating costs—and permits still more people to enjoy the smoothness, quietness and reliability of the V-type 8-cylinder engine.

Improved 85-horsepower V-8 engine — Drive it and watch the speedometer!

More than three million owners are now enjoying the superior performance of the Ford V-8 engine on the road. When you drive the 1937 Ford with the 85-horsepower V-8 engine, you are master of a power plant that gives everything you can possibly demand in speed and acceleration. Today it is a better engine than ever—with a better cooling system and new smoothness. Yet improved carburetion enables it to deliver its thrilling performance with unusually low gasoline consumption.

New 60-horsepower V-8 engine — Drive it and watch the fuel gauge!

The new 60-horsepower V-type 8-cylinder engine is almost an exact replica of the 85—except for size, weight and power. It delivers V-8 smoothness and quietness—even at speeds up to 70 miles an hour—with gasoline mileage so high that it creates an entirely new standard of economy in modern motor car operation.

We invite you to see this new Ford car at your Ford dealer's showroom, and arrange to drive one equipped with the engine that fits your own needs.

FEATURES

APPEARANCE—A newly designed car. Head-lamps recessed in fender aprons. Modern lid-type hood hinged at the back. Larger luggage space. Spare tire enclosed within body. Completely new interiors. Slanting V-type windshield opens in all closed cars.

BRAKES—New Easy-Action Safety Brakes, of the cable and conduit control type. "The safety of steel from pedal to wheel." Self-energizing—car momentum is used to help apply the brakes. Tests show that about one-third less pedal pressure is required to stop the car.

BODY—Not an ounce of wood used for structural strength. Frame structure all steel, sheathed with steel panels top, sides and floor. All are welded into a single steel unit of great strength.

COMFORT AND QUIET—A big, roomy car. Extra space is in the body, not taken up by the engine under the hood. Comfort of the Centre-Poise Ride further increased by smoother action of the long-tapering springs, with new pressure-lubrication. New methods of mounting body and engine make this a quieter car.

DISTRICT SOCIAL CREDIT CONVENTION AT HOLDEN

35 Delegates and 10 Zone Presidents, with relatives and friends assembled in the Community Hall, Holden, on Friday afternoon, to transact business pertaining to the affairs of the Vegreville Social Credit Constituency Association under the chairmanship of Mrs. Clara H. McPherson.

F. A. F. Koethe, of the Holden group, extended a hearty welcome to the visiting delegates.

Wm Hayhurst, M.P. for Vegreville, addressed the gathering at some length on the financial affairs of the [illegible] the control of money, and the method behind the control. He also touched on the philosophy of Social Credit.

Many resolutions were presented and approved as follows:

(Owing to lack of space these are somewhat condensed.)

That out of the first dividend each recipient return to the government the sum of $2.00 to assist in paying off old debts. This would be voluntary.

That groups, municipal councils, etc., purchase from the government Prosperity Certificates and place them in circulation.

That the government take over main market roads and maintain them by issuing Alberta Credit. To prohibit trucks on same when they become soft.

That livestock, etc., be disposed of at stockyards instead of being sold direct to packing plants.

That only resolutions passed at Zone Assemblies be considered at constituency convention.

That all municipal minutes for the years 1935-36 and each year thereafter, be published in local papers, so that ratepayers be fully informed of all business transacted by councils.

Five delegates were elected to attend the divisional conference: R. Irwin, W. Bruce, A. English, W. E. McDonald and J. Ferguson. Mr. McDonald will also represent the constituency at the Provincial convention.

Officers were unanimously re-elected: President, Mrs. Clara McPherson, Ryley; Vice-president, J. Ferguson, Tofield; Secretary W. Crockett, Vegreville; Treasurer, M. C. Anselstine, Vegreville.

Mundare was chosen for the next convention.

—Vegreville Observer.

The Best Seed at Cost

To obtain the most income, the farmer must grow the best crop.

To grow the best, each must sow the best.

Registered or Certified seed sealed in the sack is the best, and is available at our Elevators to farmers at cost.

See the nearest Searle or Home Agent.

SEARLE GRAIN COMPANY, LIMITED

Several Tofielders are on the sick list this week. Among them are: Mrs. N. Scott, Mrs. Schmaltz; and Mrs. Lovell.

Miss A Swift visited friends in the city over the week end.

FUNERAL

The funeral of the late Mrs. Imler was held on Wednesday last, service being held at the Tofield United Church. Rev. D. K. Allan gave words of comfort. Interment took place in the Tofield cemetery. The floral offerings were numerous and beautiful.

The Jolly Twelve Bridge Club met at the home of Mrs. Cowell on Thursday of last week. Honors were won by Annie Swift and Winnie Worton.

Mr. Harvey Brenneman has fall plowed 20 acres of land recently. The Solberg Bros. plowed about 200 acres this fall and Mr. Selmer Helgeland was plowing yet on 19th November. Flowers have commenced to "re-bloom" and some folks are planting early vegetables in anticipation of spring mistaking this balmy weather for the real thing.

CONTINUED FROM PAGE THREE—

and all those who do not need their surplus earnings find this a convenient and systematic method of saving. Consequently thousands of people in this country are paying in certain sums annually so that in a certain number of years they may draw any amount from one thousand dollars up. Naturally this places considerable responsibility upon the assurance company. Their business and duty is to solicit and accept this money, invest it in such a way as to bring about an increase and to pay out the total sum whenever it becomes due. And this of course, despite the fact that rates are set so as to preclude loss, calls for good judgement and business ability.

One of the favorite forms of investment for life insurance and life assurance funds have been securities of Canadian public bodies, province, city, town, village, municipality and school district. The reason perhaps is that back of all these is the power to tax. Any particular business, however popular at one time, is subject to the public's whim, danger of becoming obsolete and new competition. But organized groups of population with power to tax are as permanent as anything nicely can be. Therefore it can be seen that except in very drastic cases, only legalized repudiation can impair the value of the public body securities held by the insurance companies. Now, legalized cancellation of public debt no doubt sounds very nice to those relieved of the necessity of payment, but undoubtedly included among the citizens of any public body are many who have invested their savings in life assurance policies. The non payment of municipal securities on any large scale is likely to result in non payment of insurance and assurance policies, and should this happen, even those people who do not possess policies will feel the effect. Due to it's power to tax, a governing body is the foundation of the district it governs and structurally if a foundation cracks and crumbles, the building standing upon it tumbles too.

This does not mean that the door is closed to all negotiation and mutual adjustment.

As a Life Insurance Policyholder

You Share in the Ownership of These Valuable Assets

Government Bonds First Mortgages Municipal Bonds
Industrial Securities Public Utility Bonds

YOUR savings in Life Insurance—which help to form the Assets of the company in which you are insured—not only protect you and your family but also make you a part owner of high-grade securities.

For example—as a Life Insurance policyholder, you share in the ownership of Government and Municipal bonds. These bonds provide for the construction of highways, railways, canals, schools, water and sewage systems, and other important public enterprises.

You likewise have a definite financial interest in Canadian industries, and in Canadian homes and farms.

The Life Insurance companies, which your enterprise and thrift have built up, acting on behalf of yourself and 3,500,000 other policyholders, invest the Assets you have entrusted to them. In making these investments, they exercise the utmost care to secure safety with a satisfactory yield.

Of the combined Assets in the Life Insurance Companies operating in Canada, the major part is invested in Government and Municipal bonds and debentures. Large amounts are also invested in first mortgages on carefully selected city, town and farm properties, and in loans to policyholders.

You can take satisfaction in the fact that Life Insurance companies in Canada have faithfully discharged their obligations. Even in periods of greatest financial stress, every obligation guaranteed by their policies has been [illegible].

Vol. XVII, No. 44 Thursday, December 3rd, 1936 $2.00 Per Year. To U.S.A. $2.50

KINGMAN

Mr. Elmer Schmidt has gone to the United States for a three month's trip visiting relatives there.

Miss Malinda Dettwiler is attending Bible school over at the Mennonite Church.

Rev. Windblade and several others will hold an all day meeting on Sunday, Dec. 6th, at the Baptist Church.

The Kingman C.C.F. club held their regular meeting on Nov 25th. It opened with the election of officers. The same officers were elected for the next year: Mr Albin Anderson, president; Mr. Perry Simonson, vice-president; Mr. Henry Simonson, secretary-treasurer An enjoyable time was then spent, all partaking in the games, songs, and fortune telling. A lovely lunch was served.

Messrs H Thompson, A Matchmess, C. Edwards and A. Hummel motored to Streme on Thursday evening last, to attend a dance.

Miss Marie Scott left on Thursday for Camrose where she has obtained a position.

Hockey Meeting

On Monday evening the Tofield senior hockey club held their organization meeting in the Town Hall. The following officers were elected: Manager, Mr. Burke; Coach, Bud Hannan, Sec-Treas. Harland Thompson. On Tuesday night a number of the hockey boys motored to Holden to to attend a league meeting held there. The league will be run similar to last year with one exception. One game will be played with Wainwright for four points instead of two games for two points each, as in previous years

LINDBROOK

A birthday party for young folks was held at the home of Mrs. John Pruden here last Monday, Nov. 23 It seems that some of our youngsters have lately attained the age of 21 years, hence the celebration. Music, singing and dancing were indulged in, and from all accounts it was a very enjoyable affair

Mr. Fred Evans who lately had a very critical heart attack which pretty nearly put him in the R.I.P. class, is now getting on O.K. we are pleased to say. Cheer up Fred old man, "Old soldiers never die" you know, so you'll be around for a long time yet.

Mrs. Best and daughter Eileen, of Athabasca, visited their relatives here, Mrs. F. Evans and Mr. J. Bracegirdle and family. Mrs. Best returned home last week but Miss Eileen will probably stay here till just before Xmas.

The monthly meeting of the L.C.C. was held last Wednesday at the home of Mrs. A. Gill. Guests present were Mesdames W. C. Lancaster, Appleby, Forman and Nickerson. Roll call was answered by "childish sayings" (this is not inferring that those present are childish in their talk, but it should read "bright sayings of children.) Part of the amusement during the afternoon was the giving of free aeroplane rides (in the kitchen.) What these were only those that went up can tell possibly it is part of the solemn and mystic rites of initiation of this society, evidently it is not too painful an experience however hard you crash, anyway it caused lots of fun. The usual dainty afternoon tea was served, who poured it we dinna ken, but thats no matter as long as all enjoyed it. The next meeting is at Mrs. J. Pruden and roll call will be answered by New Year's Resolutions, ha! ha! made today and broken tomorrow. Time marches on!

Miss Chrissie Robinson, daughter of Mr. and Mrs. Robinson of Lindbrook N. entertained a number of friends at a birthday party at her home last week. All present report it absolutely A1 and many happy returns of the day, Chrissie, from the "reporter."

Mr. Ray Coatta left this week for a motor trip to U.S.A.

KETCHAMOOT

The Social Hour club will hold a silver tea at their monthly meeting next Thursday afternoon, Dec. 10, at the home of Mrs. Wm. Ingram, also a quilt will be raffled off A cordial invitation is extended to all.

Mrs. Geo. Shaw and daughter, Mrs. Ross, and two lady friends, all of Calgary arrived Saturday evening and are the guests of Mrs. Shaw's sister-in-law, Mrs Fannie Sutton.

Mr. and Mrs. W. A. Mitchell and son Billie were Sunday guests of Mr. and Mrs John Morton.

Mrs. Foshaug and two daughters, Mrs Rude and Mrs. John and children of Bardo visited Mrs. C. A. Ingram, Tuesday afternoon of last week.

Mrs. John Brown, her mother, Mrs. Gratz and Mr. John McGinitie motored to the city on Monday.

Mr and Mrs. McCowen, son Jimmie and the Campbell children were Edmonton visitors Saturday.

Mrs. L. Carlisle received a telegram Saturday stating that her mother was critically ill at her home in Iowa Mrs. Carlisle left on the evening train.

Mrs. Sheppard of Edmonton is visiting at the home of her daughter, Mrs. Williams.

Miss A. Lindsay motored from Innisfree on Friday. Miss Nellie accompanied her home.

Mrs. E. McMullen, Mrs. C. A. Ingram and Mrs. G. W. Sears were Sunday afternoon visitors of Mrs. Williams. We are glad to report Mrs. William's health is improving.

The Stirritt telephone board held a business meeting at the Sears home Friday afternoon.

Mrs. Coombes and children visited Mrs. Barnes at her home Sunday afternoon.

Misses Hazel Sears and Mildren Ingram were guests of Miss Ethel Coombes Sunday afternoon.

Mr. and Mrs. Kleinsroth sr. were guests of Mr. and Mrs. C. A. Ingram Thursday afternoon.

LOCAL & PERSONAL

The Eastern Star lodge will hold a tea, sale of Home Cooking, Novelties, and a fish pond in the Institute Rooms on Saturday, December 12th.

I am opening my Beauty Parlor, above Mr Geo Brace's store, Saturday, December 5th. I would appreciate your patronage and in return will render my best services to all Esther Pyle.

We are glad to report that Mr Geo Cookson, who has been quite ill in an Edmonton hospital is home again

Miss Nina Bell of Edmonton visited with her sister, Mrs. Norman Scott last week.

Mr and Mrs E. Brady of Edberg visited with Mrs. Brady's parents, Mr and Mrs Abbott over the week end

Miss Jean Kellner of Beaver Lodge visited Tofield en route for Toronto Many Tofielders will remember Miss Kellner when she lived in Tofield She visited at the Baptist home here.

Don McLaughlin from Edmonton flew over Tofield on Sunday last.

Miss A Lindsay of Innisfree visited friends in town on Sunday.

A number from here took in the Old Timer's Banquet in Edmonton last week

Miss Fern Imler spent the week end with friends in Edmonton.

Miss Myrtle Bethel of Sedgewick spent the week end at her home here.

Mr Mark Ferguson, who has been visiting at Athabasca returned home.

Mr. Van Dyke is here as night operator at the C.N.R. station.

On Thursday night last, the Jolly Twelve Bridge Club met at the home of Mrs. Coatta to do honor to a former member, Mrs. Doc Simpson (nee Hilda Nomeland) After the usual session of bridge and during the lunch period, Winnie Worton on behalf of the club presented Mrs. Simpson with a lovely bed-throw. The company then tendered a toast to the bride, following which the guest of honor replied suitably thanking all those present for their kindness and generosity.

Mr. Nickerson will be able to qualify as a second Sherlock Holmes. Recently a man stole a team of horses from his barn and took them to Edmonton. Within 48 hours Mr. Nickerson had them back home and the man under arrest in Edmonton.

Shower Held

Mrs. S. Yakabuski, Mrs. W. E. Seale and Miss L. Ross held a miscellaneous shower in honor of Mrs. Doc. Simpson (nee Hilda Nomeland) at the home of Mrs Bethel on Tuesday afternoon There were about forty guests present During the afternoon they were entertained by a "Wishing Well" which was decorated in yellow and white, the color scheme of the room Mrs Morton read a presentation to the guest of honor The gifts were then brought in and opened, being both numerous and beautiful Hilda thanked all her friends, after which a dainty lunch was served by the hostesses

AMISK CREEK

The Ladies' Aid held their annual meeting at the home of Mrs I. C. Olson on November 24th Rev Hovenstein took charge of the devotion The secretary-treasurer gave the financial report for the year, which was approved of. Election of officers then took place, the following being elected to office Mrs C. Ward, president, Mrs I. C. Olson, vice president,

(Continued on back page)

LAKESHORE

A shower was held in honor of Mrs Simpson at the Bethel home on Tuesday At the time of writing none of the details are known

Mrs Bertha Seale and Miriam spent the week-end at the home of Mrs Seale's aunt, Mrs Appleby

A dance was held at the Community Hall on Friday night in honor of Mr and Mrs M Wood Everyone reported an enjoyable time

Mr and Mrs L. H Graham, Mildred and Lawrence were visitors to Edmonton on Saturday

Miss Grace Mackinnon spent the week end in Edmonton

The school children of this district are busily practising for the Christmas concert.

The Jolly Twelve Bridge Club met at the home of Mrs Currie on Monday night Honors were won by Mrs Wuethherich and Mrs Coatta

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

GOOD BONES AND GOOD TEETH

Best Teeth and best bones in children of Scotland found in "Black Houses" of the Island of Lewis. Mothers live on equivalent of cod-liver oil and seafish. Breast nursing universal.

The island of Lewis is the largest of the outer Hebrides. It is a relatively barren land whose inhabitants live in "Black Houses" and subsist chiefly by fishing.

A black house is a low, rectangular building constructed of flat unmortared drystone thatched with turf or straw. The walls, about 7 feet high are double, and the space of [illegible] inches between the two tiers of wall is filled with earth. The thatched roof covers the inner but not the outer wall, and has but a slight incline from the middle. A high-pitched roof would not withstand the winter gales and a projecting eave would be only an invitation to the wind to snatch the roof off. In the winter gales of 1921, which swept the sea over the outer isles, the roofs of many more modern houses were blown off but none of the black houses was damaged. A few of the latter have a chimney, in the majority the peat smoke gets out as it can through the thatch. The only entrance, and that usually through the attached byre, and the closed windows, if there are any, are on the lee side.

The interior is covered with a layer of carbon from the peat fire, hence the name "Black House."

The interesting thing about these houses is that the children born under their roofs have the best bones and the most enduring teeth to be found north of the Tweed. These children, until they are at least 9 months old, never cross the threshold. Outside Stornaway, there are no perambulators and yet in 1921, according to the registrar-general's report, the infantile mortality in Lewis was only 28 per 1000 births—one of the lowest in Europe. For the same year the corresponding rate in Glasgow was 90, in Edinburgh 82 and in Aberdeen 104. Rickets was unknown and Dr. Sutherland, the writer, says that he has never seen healthier or more beautiful children.

The secret of the good bones, teeth and healthy character of the children of Lewis is that their mothers before the children are born live largely on a diet of sea-fish including the livers which in the case of all sea-fish, great and small, are filled with the equivalent of cod-liver oil. The men eat the same fare. When a couple of men go out to the line-fishing they take with them two large scones. As soon as a fish is caught the liver is cut out, sliced and placed between the two bannocks. These are placed on a seat of the boat and one of the men sits on them. At the end of an hour considerable of the oil from the liver has been expressed into the scones. This is eaten by the men; they are eating bannocks saturated with the purest and freshest cod-liver oil. At home the women fare similarly.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

WORLD OF WHEAT

China is the largest wheat producer in the world!

Of the 5,000 million bushels of wheat produced and consumed on the average each year in the world, the Chinese production and consumption is about 950 million.

The U.S.S.R. (Russia) follows a close second with almost the same amount, but it is expected that in a few years the wheat grown in the U.S.S.R. will exceed Chinese production. The population of the U.S.S.R. is increasing at such a rate that it seems almost certain that the people there will require for their consumption every bushel on the average that the U.S.S.R. can raise. (Russia tells us that she does not produce wheat for export in competition with Canada, and will only sell wheat abroad when she has a much larger crop than usual.)

Third comes the United States with a production in normal years of about 800 million bushels. Fourth comes Canada with an average of 365 million. Next India with 340 million, then France with 300 million, Argentina with 235 million, Italy with 225 million, Spain 145 million, then a number of countries each of which produces quantities varying from 140 million down to 5 million.

Following worldwide factors have recently tended to raise prices: Lack of moisture in U.S.A. Southwest continues—France and Italy buying generously—Seeding in Europe delayed by rains—Searle report confirms lack subsoil moisture Canadian West—South African wheat crop less than last year—Reports of drought in North China—China harvests large cotton crop.

Following factors have tended to lower prices: Improvement in crop conditions in Argentina and Australia—Japan harvests 600 million bushels rice which is 50 million larger than last year—European buyers decrease purchases when price advances—Large shipments of corn and rye flowing to markets—Turkey sells large quantities barley.

CANNED BREAD IN BRITAIN

The British press recently has given publicity to the possibility of commercializing "canned" bread. It is stated that after two years of experiment it has become possible to can the ordinary English loaf in cylindrical tins about nine inches long at a cost of little more than that of the ordinary loaf. Its chief use is likely to be an emergency ration. Then, it will always be possible to have a fresh loaf of bread in the house, for it keeps in the can indefinitely. It appears that the problem which had to be overcome in canning bread was was to prevent molding and to enable the bread to retain its original properties. It is claimed that this [illegible] been achieved. Best results are obtained by waiting for half an hour before using the bread after it is taken from the can, so that it may absorb moisture from the atmosphere. It will then be fresher than when the can was opened.

MOTHER OF QUADS SPURNS $50,000 FOR SALE OF GIRL

St. Neots, Huntingdonshire, Nov. 30.—"I was worried when I read of the separation of the Dionne quints from their mother," said Mrs. Walter Miles, mother of England's quads in an interview to-day.

"I had visions of officials sweeping down on St. Neots and whisking my babies to some institution as wards of the state," she added.

The Miles quadruplets celebrated their first birthday yesterday and a cable of congratulations from the quintuplets at Callender, Ont., was much appreciated.

Hundreds of other messages arrived as well as 150 presents, most of which will be sent to a London children's hospital as the quads will be unable to use them all.

Mrs. Miles said one woman had offered her £10,000 ($50,000) for Ann, the only girl amongst the quadruplets.

"I would not part with any of them for all the gold in the Bank of England," the mother said. She added 20,000 people had visited the nursery, the greater proportion of them men.

FEEDING PULLETS FOR EGG PRODUCTION

(Experimental Farms Note)

Different methods of feeding pullets have given satisfactory results and each individual must decide for himself just what plan will be followed. Most poultrymen prefer to simplify the feeding methods as much as possible and if the necessary feeds are supplied, there seem to be no necessity of following practices involving extra labor, such as feeding a moist mash. In fact [illegible] may be obtained by the dry feed system unless one has had considerable experience in feeding pullets.

Pullets should be in good condition when they are put in the laying house and they should be fed so as to slightly increase their body weight during the first few months after beginning egg production. If the body weight decreases, due to presence of colds, faulty feeding or any other cause, a partial moult is likely to occur and production will be affected for a considerable time.

At the Dominion Experimental Station, Fredericton, N.B., a dry mash is fed in hoppers where the hens can have free access to it. It is advisable to put a small amount of fresh mash in the hoppers each day rather than to fill the hoppers sufficiently to last several days, as the birds will be more eager for the fresh mash.

A mixture of whole grains, made up of two parts wheat and one part each of cracked corn, barley and oats is fed in the litter night and morning. The birds are fed so that they will be eager for the grain and about one-third of the day's supply is fed in the morning. The grain for the evening feed may be supplied in troughs, if desired. Pure water, oyster shell and grit are available at all times and green feed is supplied daily.

The mash mixture at this station consists of 100 pounds of ground oats, middlings, bran and corn meal, 25 pounds each of fish meal and meat scrap, 10 pounds bone meal, 5 pounds each of charcoal and fine salt and, during the fall and winter months, 10 pounds of cod liver oil. If sour skim milk or buttermilk is available, it makes an excellent supplement to this ration and unless very heavy egg production is desired, the amount of fish meal and scrap may be reduced when milk is fed.

One hundred laying pullets will eat on the average about 24 pounds of feed, grain and mash combined, per day. The proper proportion of grain and mash to feed must be determined by the attendant, but it is usually necessary o feed considerably more grain than mash during the fall and early winter. When production is at its peak, more mash than grain will likely be consumed.

For fuller information write to the Publicity and Extension Branch, Dominion Department of Agriculture for Bulletin No. 166, Poultry Feeds and Feeding.

THREE FACTORS IN REARING WINTER PIGS

The winter feeding of swine presents many problems that are not encountered in summer time, since pigs are forced to live under unnatural conditions in winter and without the variety of feeds available in the earlier part of the year. At the same time it has to be remembered that any attempt at forcing winter pigs when exercise is limited is courting disaster. Good feed should be fed at the rate that the pigs can overtake and the pigs kept in dry, comfortable quarters with room for exercise in the early stages of growth. By combining good feeding and management, many of the common ailments of swine will be avoided and the result will be healthy and thrifty market pigs.

Successful winter pig production depends largely upon three factors, states E. B. Fraser of the Animal Husbandry Division, Experimental Farms, Dominion Department of Agriculture. These factors are:—warm, dry sleeping quarters, free from draughts; suitable feeds and care in feeding them, and exercise in the early stages of growth. Exercise for the growing animal is practically a necessity. This is particularly true of the pig in the early [illegible] and especially so if the pig is being forced by heavy feeding. Heavy feeding without exercise is conducive to crippling. It a wise, therefore, to allow the young pigs to run outdoors during the fine fall weather, and when they must be kept inside, due to bad weather, they should be allowed sufficient pen space to exercise freely.

With regard to providing warm and dry sleeping quarters, if there are buildings available it would be unwise and not economical to build new pig quarters. Even old buildings should be remodelled only sufficiently to ensure comfortable feeding and sleeping accommodation. Sufficent trough should be profided so that each pig will have an opportunity to secure a fair share of the [illegible]. If the building is draughty or likely to be cold, the construction of a covered sleeping berth will be well worth consideration. It can be constructed of any available lumber in a dry corner of the feeding pen. The sleeping berth should not be more than three feet high and covered with boards and straw, and just large enough in area to house the pigs comfortably in a bed of dry, clean straw.

The most important key to successful rearing of pigs in winter is the matter of feeds and how to use them. So much can be said on this essential subject, that, at the presen moment, it is permissible only to call attention to the publications issued by the Department of Agriculture—Pamphlet 62, Fall Litters, Breeding, Feeding, and Management for Winter Pork Production; Pamphlet 74, Hog Breeding and Feeding for Market; Pamphlet 40, Handbook of the Bacon Hog and Hog Grading; Circular 81, Feeding of Swine; and Circular 78, All Year Hog Cabin.

JAILS HIDEOUTS For CRIMINALS

WARSAW, Nov. 30.— Convicted Polish criminals used jails as hideouts after nightly holdups, the police have discovered.

Robberies and repeated holdups were a constant danger to residents of the outskirts of Poznan until police trapped a gang of criminals who escaped every night from jail with the help of duplicate keys, and then returned every morning.

CHINESE "CANUCKS" RETURN TO CHINA

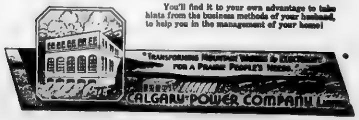
WINNIPEG, Man., Nov. 30. — Mah Jo and his wife and his Canadian-born children left Winnipeg recently over Canadian National lines, on their long journey back to China. Mr. and Mrs. Joe Mar—as they have Anglicized their name—have lived 33 years in Winnipeg. For that length of time Joe has been cook at the General Hospital. He left as the head chef, with the good wishes of the doctors and the gifts of the staff. Three fitted travelling cases were put on the train proudly.

Mah Jo left China as a lad. In Victoria, B.C., he married, and his eldest son, Dr. Roy Mar, now in China, was born; seven other children were born in Winnipeg.

BARBADOS, GEM OF THE CARIBBEAN SEA

MONTREAL, Que., November 30. —An attractive booklet on the ever-popular island of Barbados, known as "Little England," in the British West Indies, has been received by the Canadian National Steamships for distribution. It has been issued under the auspices of the Colonial Government with a view of bringing to the attention of tourists the many attractions and scenic advantages offered by the island.

The aim of this brochure is to present a truthful, pictorial record of the various phases of life in Barbados, with the dual object of assisting visitors to find readily the attractions most enjoyed and of inducing others, who have not yet visited the island, to spend a pleasant vacation



"TRANSFORMING MOUNTAIN WATER IS ELECTRICITY FOR A PRAIRIE PEOPLE'S NEEDS."
CALGARY POWER COMPANY LTD.

IF Husbands had to do The Housework—

DOES Friend Husband use the quill pen of the nineties, make his journeys with a horse and buggy, work with out-of-date tools or use his brain for an adding machine? He does not! He uses up-to-the-minute labor-saving, time-saving and money-saving devices.

Put Friend Husband doing housework and what would happen? The bugbears of household drudgery would vanish in quick time. There would be more Electric Ranges, Refrigerators, Vacuum Cleaners, Washing Machines, Ironers, Floor Polishers, and smaller appliances installed in a few months than in all time past.

Friend Husband wouldn't worry about the increase in his electricity bill either! He would know that the savings in labor and time would more than pay for the cost of electricity used.

You'll find it to your own advantage to take hints from the business methods of your husband, to help you in the management of your home!

TOWN AND PROVINCE ....

THE TROUBLE IN SPAIN—

ONE OF THE bitterest, most agonizing and blood thirsty civil wars of history is now being fought in Spain. Each day news despatches tell of attacks in which combattants are killed and wounded, bombings by aeroplanes in which women and children are included in the slain, while news of executions have been coming through for so long that the senses almost become dulled as regards their horrible nature. But to many, the writer included, there is a definite vagueness of understanding as to the exact cause of the conflict—what specific issue is at stake. Civil wars are the most horrible of all wars, but generally there is a specific issue involved, such as for instance, the question of slavery as in the American civil war. In the present conflict in Spain, as far as one can see, there is no specific issue except a general one as between radicals and conservatives, regardless of what name they may be given. We read of Royalists, Loyalists, Insurgents, Marxists, Leftists, Rightists, Rebels, and the outsider wonders what it is all about, but boiled down it appears that fundamentally the basic issue is between advanced radical thinking as against a more conservative school of thought. Out of the struggle there has emerged an issue that probably was not there when the trouble started and perhaps will be forgotten when the trouble ends, viz: Fascism vs. Communism. It is reported that countries that have gone to extremes in the matter of government are much interested in the outcome of the Spanish quarrel; Russia watching the fortunes of the radicals and Germany and Italy watching the fortunes of the forces headed by General Franco. There is a general signed agreement among the nations that they will not interfere in the Spanish situation, but this agreement does not prevent volunteers from any country joining either force. Most countries also have agreed to refrain from shipping arms into Spain for either side. But while the non-intervention agreement is in force, there are repeated statements that both men and war material from other countries have gone into Spain.

Perhaps a clearer insight into the Spanish embroglio can be obtained if the most important events of Spanish history since the fleeing of King Alfonso in 1931 are reviewed.

April, 1931—Alfonso XIII, flees, ending reign of the Bourbons. Niceto Alcala-Zamora is President of a Provisional Government.

July 14, 1931—Constitutional Cortes assembles. The new Constitution is liberal and progressive.

1932—Legislation of republican reforms passed under leadership of Premier Manuel Azana. Foundation laid for social and economic transformation. Revolts, notably one in Andalusia, suppressed.

November-December, 1933—Right and Right Center parties win sweeping victory in elections. Power of Roman Catholic leader, Gil Robles, at peak.

October, 1934—Working classes revolt in protest against failure of Rightist Government, under Premier Leroux, to make social reforms.

1935—Rightists retain and strengthen power.

Feb. 16th, 1936—Leftist Popular Front wins elections. Manuel Azana, Premier.

May 10—Azana second President of Republic.

May 13—Casares Cabinet formed after Leftist victory at polls.

June—Terrorism due to conflict between Right and Left. Churches burned, rioting.

July 13—Jose Sotelo, Monarchist Deputy slain. Plotters of revolt hasten their plans.

July 18—Fascists revolt in Morocco.

July 19—Fighting spreads to Spanish mainland. Cabinet of Premier Casares resigns. Diego Martinez Barrios forms Cabinet, more to left.

July 25—Loyal troops defeat rebels at Madrid. France refuses arm shipments.

July 28—Americans evacuated from San Sebastian. Other foreigners leave.

Aug. 1—France Proposes non-intervention agreement among powers.

Aug. 19—London bans shipments of war supplies to both sides.

Aug. 22—Southern rebel army starts drive on Madrid.

Sept. 13—General Mola takes San Sebastian for rebels.

Sept. 18—The Alcazar blown up by Goverment forces.

Sept. 22—Rebels take Maqueda, 45 miles southwest of Madrid.

Nov. 7—Madrid Government moves to Valencia.

That the recent vast economic depression has brought into the world great changes in thought, political as well as economic, there is no denying. Mercury readers will remember that the last three speeches of Mr. Bennett in the Dominion election campaign struck quite a socialistic note. Recently, Hon. W. D. Herridge, former Canadian Minister to the United States, delivered a speech to the Canadian Club in Toronto in which he stressed the necessity for a national policy for Canada "based upon the new economic truths" as an alternative to "frenzied radical or ruthless reactionery."

Hon. W. D. Herridge is a Conservative, but we find him saying:

> "The instrument intended for this purpose must function. The present instrument is democracy. Democracy must get results. It must

TRAPPER IN NORTH ADVISES SKUNK TEA FOR LONG LIFE

Grande Prairie, Nov. 30—A new recipe for longevity, but one which few will be willing to try even if it would endure the life of a centenarian, is recommended by Louis Callieu of Grande Prairie.

This veteran trapper of the northland, and first settler in the Grande Prairie district, attributes his excellent health and vigor at ninety years to skunk tea and skunk fat, which, he says, keeps him young.

The tall, straight, white-headed figure of this old trapper who boasts he is half Cree Indian, can be seen walking the three miles to the post office at Bezanson twice each week as regularly as a postman.

Louis explains his recipe as follows:

When the skunk is trapped for his skin, the odor sac is carefully removed and dried. In appearance it resembles a tobacco pouch about two inches square with a twisted tube projecting from it. When the skunk emits his famous scent, the tube untwists.

When dried, the contents of the sac look like cream colored powder and actually have a sweet smell! This sac and contents, Mr. Callieu boils for a whole day in a large open kettle full of water. The resultant brew he stores away and religiously drinks at every meal.

Besides this he renders down all the oil and fat from the skunk and uses this lard to butter his bread as well as for frying. Skunk oil is also his medicinal standby instead of the [illegible]

SAFE BLOWINGS BELIEVED SOLVED BY THREE ARRESTS

Arrest by Royal Canadian Mounted Police, in the McNair Brothers store, Mirror, early Saturday morning, of Paddy Sullivan, Charles McRudden and Paddy Doyle, who were caught practically "red-handed" as they prepared to blow the safe, is believed to have solved a large number of Alberta safe-blowings.

The bandit trio was taken into custody, with explosives and burglar tools in their possession, within 24 hours of the time they were released by Edmonton city police when evidence was insufficient to warrant prosecuton following their arrest as suspects in the Northern Club holdup in this city.

The three men, who have long criminal records for burglary and similar offences, were arraigned before Magistrate Robertson at Bashaw on Saturday. They reserved pleas and were remanded in custody for eight days. They are detained in the Edmonton R.C.M.P. guard room.

Police have been kept on the run by recent safe-blowings in Opal, Pickardville, Bellis, Elk Point and a number of southern Alberta points, for which these men are believed responsible.

Arrest of the three suspects followed the quick witted action of a number of young lads who were playing hockey east of Mirror on Friday afternoon. During the afternoon the boys saw a car pull up and three men walk hurriedly into the bush. One of the lads informed his father of the suspicious actions of the men, and the police were notified. As a result all stores in Mirror were placed under police surveillance that night, and the men were caught red-handed in their efforts to blow open the store safe.

TREATMENT FOR CRAZED SAILOR GOES BY RADIO

BOSTON, Nov. 30.—The Marine Hospital here wirelessed instructions last night for treatment of a "violently insane" man aboard the Transatlantic freighter Independence Hall, 95 miles east of Nantucket.

Serving as a relay station for messages between the New York bound ship and doctors at the hospital, coastguard headquarters said "McKenzie, Master" of the Independence Hall reported a 27-year-old man went insane Saturday night "so violently that we had to tie him up." Identity of the man and his position aboard the ship were not mentioned in the dispatches.

The doctors listed several kinds of medicine and sedatives, asked if they were included in the ship's medicine chest, suggested the man be put in a hot bath and kept there under observation for 12 hours.

The ship was expected to put in at New York late today.

GALES ARE BUCKED FOR 27 DAYS

SAINT JOHN, N.B., Nov. 30.—Her starboard lifeboat stove in and her superstructure damaged by mountainous seas, the little Norwegian collier Fanefjld crept into harbor Saturday night after bucking the north Atlantic for 27 days from Swansea, Wales. Eight days out she was driven back to within 100 miles of the Irish coast.

BASEBALL SEASON FINALLY ENDS

DRAYTON VALLEY, Nov. 30.—Almost seven weeks after the close of the world series, Drayton Valley defeated Rocky Rapid Stars here last week by 6-4. A large crowd turned out to see the final ball game of the season in weather California would boast about.

RED REFLECTOR TO WARN DOGS AGAINST SHEEP

BRISBANE, Queensland, Nov. 30. — Queensland's plain-roving sheep may soon be provided with "tail lights" as protection against the dingo or wild Australian dog, if herders adopt the invention of Francis Carley, a railway worker.

The new light is a metal disc, with a bicycle reflector in the centre. The edges are painted with Phosphorous which gives the effect of a ring of fire.

WESTERN CANADIAN YOUNGSTERS DO WELL

WINNIPEG, Man., November 30. —On their way home after having spent a week at the Royal Winter Fair in Toronto, members of the boys' and girls' clubs from Western Canada passed through Winnipeg over Canadian National lines with a fair share of the spoils. At Toronto the western representatives were in open competition with members of clubs from all ovr Canada and made a very good showing.

The Manitoba girls team from Teulon won first prize for poultry judging. They also won second prize for grain judging and beef cattle and fourth prize for swine judging.

The Saskatchewan representatives won third prize for swine judging, third for beef cattle and fourth prize for grain judging.

Alberta was victorious in the swine judging competition, with the twin Ferguson sisters from Conjuring Creek capturing the honors.

In Southern Rhodesia gold mining is carried on by a great many small operators. There are innumerable mines and mining companies in contradistinction to South Africa where a few large groups control the industry. The premium on gold has resulted in an increased output from the mines of Southern Rhodesia, 724,000 fine ounces valued at approximately $16,340,020 being produced last year, according to the Industrial department of the Canadian National Railways.

BANK OF MONTREAL

Established 1817

A presentation, in easily understandable form, of the Bank's

ANNUAL STATEMENT

31st October, 1936

LIABILITIES

LIABILITIES TO THE PUBLIC	
Deposits *Payable on demand and after notice*	$691,312,054.08
Notes of the Bank in Circulation *Payable on demand.*	27,749,972.00
Bills Payable *Time drafts issued and outstanding.*	137,838.65
Acceptances and Letters of Credit Outstanding *Financial responsibilities undertaken on behalf of customers (see off-setting amount [x] in "Resources").*	7,168,979.49
Other Liabilities to the Public *Items which do not come under the foregoing headings.*	1,947,005.98
Total Liabilities to the Public	$728,315,850.20
LIABILITIES TO THE SHAREHOLDERS	
Capital, Surplus and Undivided Profits and Reserves for Dividends *This amount represents the shareholders' interest in the Bank, over which liabilities to the public take precedence*	76,766,147.82
Total Liabilities	$805,081,998.02

RESOURCES

To meet the foregoing Liabilities the Bank has	
Cash in its Vaults and Money on Deposit with Bank of Canada	$ 79,242,079.59
Notes of and Cheques on Other Banks *Payable in cash on presentation.*	29,222,231.15
Money on Deposit with Other Banks *Available on demand or at short notice.*	20,264,801.82
Government and Other Bonds and Debentures *Not exceeding market value. The greater portion consists of gilt-edge securities which mature at early dates.*	442,781,097.95
Stocks *Railway and Industrial and other stocks. Not exceeding market value.*	1,030,297.00
Call Loans outside of Canada *Secured by bonds, stocks and other negotiable securities of greater value than the loans and representing moneys quickly available with no disturbing effect on conditions in Canada.*	25,400,166.98
Call Loans in Canada *Payable on demand and secured by bonds and stocks of greater value than the loans.*	8,169,988.82
Bankers' Acceptances *Prime drafts accepted by other banks.*	361,924.23
TOTAL OF QUICKLY AVAILABLE RESOURCES (*equal to 83.27% of all Liabilities to the Public*)	$606,472,587.44
Other Loans *To manufacturers, farmers, merchants and others, on conditions consistent with sound banking.*	174,141,011.90
Bank Premises *Two properties only are carried in the names of holding companies, the stock and bonds of these companies are entirely owned by the Bank and appear on the books at $1.00 in each case. All other of the Bank's premises, the value of which largely exceeds $14,000,000, appear under this heading.*	14,000,000.00
Real Estate, and Mortgages on Real Estate Sold by the Bank *Acquired in the course of the Bank's business and in process of being realized upon.*	1,507,373.67
x Customers' Liability under Acceptances and Letters of Credit *Represents liabilities of customers on account of Letters of Credit issued and Drafts accepted by the Bank for their account.*	7,168,979.49
Other Assets not included in the Foregoing	1,792,045.52
Making Total Assets of	$805,081,998.02
to meet payment of Liabilities to the Public of	728,315,850.20
leaving an excess of Assets over Liabilities to the Public of	$ 76,766,147.82

PROFIT and LOSS ACCOUNT

Profits for the year ended 31st October, 1936, after making appropriations to Contingent Reserve Fund, out of which Fund full provision for Bad and Doubtful Debts has been made, and after deducting Dominion and Provincial Government Taxes amounting to $991,641.26		$3,101,101.37
Dividends paid or payable to Shareholders	$2,800,000.00	
Written off Bank Premises	200,000.00

		$2,012,114.71
Transferred to Rest Account		1,000,000.00
Balance of Profit and Loss carried forward		$1,012,114.71

CHARLES B. GORDON,
President

W. A. BOG,
JACKSON DODDS,
Joint General Managers

● ● ●

The strength of a bank is determined by its history, its policy, its management and the extent of its resources. For 119 years the Bank of Montreal has been in the forefront of Canadian finance.

Bank of Montreal Shows Strength and Expansion

Total Assets exceed the $800,000,000 mark—Liquid Assets at $604,472,587 are equivalent to 83.27 per cent of all Liabilities to the Public—Addition of $1,000,000 brings Rest Account up to $39,000,000 with Capital at $36,000,000—Deposits continue to gain and now total $691,312,034

The Bank of Montreal is forwarding to its shareholders a particularly pleasing statement. The year has been marked by more active conditions in most branches of trade and commerce and this has been reflected by expansion in many of the principal departments of the Bank.

Total assets have increased to over the $800,000,000 mark. This has been due largely to the healthy gains in deposits. With the improvement in business, profits are above those of the previous year.

well known policy of always adding to its strength, have always set aside from accumulated profits a further $1,000,000 to Rest Account, bringing the Rest up to $39,000,000 as against the Capital of $36,000,000.

Following the practice of the Bank, the Statement is presented in an easily understandable form in order that the general public may more fully appreciate its various features.

Strong Liquid Position

The annual statement, which appears in the principal centres of the country, shows total assets at $805,061,908, up from $792,772,872 a year ago. Of this amount, total liquid assets are $608,472,587, equal to 83.27 per cent of all liabilities to the public. The unusually high percentage of liquid assets is likely due to the lessened demand for current accomodation and the necessity of placing a greater amount in high grade government bonds. As a result the total holdings of government and other bonds and debentures have increased to $442,781,097 from $361,769,848. The greater portion of these holdings consists of gilt-edge securities, which mature at early dates.

At the same time, increases are reported in call loans both at home and abroad. Call loans outside of Canada stand at $21,410,106 as compared with $18,825,230 while call loans in Canada total $8,109,908, a gain from $4,438,736.

A [illegible] indication of the strength of liquid assets is afforded by cash holdings and deposits in the Bank of Canada of $79,242,097; notes of and cheques on other banks $29,222,231 and deposits with other banks $30,344,861, bringing the available cash holdings well above $135,000,000.

While general business throughout the country, particularly in the latter months of the year, has reported substantial increases, it is evident that many of the larger companies are availing themselves of their liquid resources to take care of any new business secured. As a result, current loans have declined and are reported at $174,141,011, down from $234,461,311. This situation probably also indicates the readiness with which former loans have been liquidated.

Gain in Deposits

Another healthy sign is afforded by the manner in which the Bank's deposits continue to reach new high levels. Deposits payable on demand and after notice now amount to $691,312,064 up from $676,944,866.

Of special interest to depositors is the position reported, with total assets of $805,061,908 to meet payment of liabilities to the public of $728,315,850 leaving a margin of assets over liabilities of $76,766,147.

Profit and Loss Account

Reflecting the improvement in conditions, profits showed a tendency to gain, as compared with the previous year. The total profits for the year, after making appropriations to contingent reserve fund, out of which fund provision for bad and doubtful debts had been made, were $3,181,501, as compared with $3,005,212. The profits were equal to 4.18 per cent on the capital, surplus and undivided profits. From the total profit there was appropriated for dividends $2,880,000 and $200,000 was written off bank premises, leaving the amount to be carried forward for the year, of $101,501. When this amount was added to the balance brought forward at the end of the previous year, it brought the total balance at credit of profit and loss up to $2,036,534.

From this amount there was transferred to Rest Account $1,000,000, bringing the Rest up to $39,000,000 and leaving the balance of profit and loss to be carried forward at $1,036,534.

Whc ʼavings Will be Next?

The money the people of this Province borrowed was used to provide them the houses, barns, and lands which now give them shelter and in which they do business. They have used them and they continue to do so. Should they not recognize those who made it possible for them to have those things? Is it just that those who have saved, and who have been thrifty, to provide you with the facilities you possess should now be deprived of their savings?

Let those who look upon the lending companies as "big business" enquire whose money they have enjoyed. They will learn as we shall tell them in one of the statements to follow.

If the citizens of Alberta pass by lightly the injustice of this Act, what is to prevent their own savings, their homes, their business, their farms and other possessions being taken away from them? Can they feel safe in the enjoyment of their savings? Keep in mind that the confiscation of the property of others is only the first step leading to the confiscation of yours.

You have been told that our Government does not intend to confiscate. The Reduction and Settlement of Debts Act would confiscate the savings of hundreds of thousands of people. Whose savings will be taken next?

This statement is one of a series written by The Mortgage Loans Association of the Province of Alberta. The Association is composed of 14 member companies. It represents hundreds of thousands of small investments by typical Canadians. Its loans to citizens of Alberta amount to some forty-five million dollars.

(The third statement in this series will be published in two weeks)

attune itself to progress. If not, it will be cast aside and some other instrument will take its place. Whatever the real merit of the later one, it will be new and so invested with a hope. Would you not clutch at it knowing the hopelessness of the old?

If in recent years democracy had performed in terms of its ideal, would we now be in these unhappy circumstances? Democracy has been laggard. A faulty economic system puts it on the spot. It must make good. It must prove that the economic system will operate advantageously within the democratic principle. The time allotted for that demonstration is distinctly limited. When it is gone, democracy goes also. The machine runs on and finally prevails. But then it is our master. We become its robots.

Our task then, is the preservation of freedom through the regeneration of the economic system. For there is no place for freedom amidst unhappiness and want. I cannot usefully qualify that statement."

The speech, which is quite lengthy is full of trenchant sayings. Contrary to much socialistic doctrine, it does not advocate changing the "system," but rather humanizing the "system," which is something this column advocated four years ago. Democracy is a form of government, so is Fascism, so is Communism, but all three—or any other forms—are dependent upon the economic and political behavior of mankind. Human carelessness, perversity or incapacity can spoil any form of government yet devised.

KETCHAMOOT

Our sincere sympathy is extended to the Kleinschroth family in the loss of their wife and mother which occurred at their home Friday, Dec. 4. We also wish to send our sympathy to Mr. Glover and family.

Messrs. Henry McGinitie, Mr. Haugen and son returned home on Sunday from a hunting trip around Drayton Valley. They were unsuccessful in bagging any game.

Mr. and Mrs. Schultz and son Harold were Sunday dinner guests of the Sears family.

Mrs. Berreclough and children are keeping house at the home of her parents in the absence of her mother, Mrs. Carlisle.

Mrs. Crandal of Duluth, Min. arrived to attend the funeral of her sister, Mrs. Kleinschroth. A daughter came from B.C. and a son from Drumheller. A daughter and family from Grand Prairie have been home for some time.

A pleasant evening was spent at the Schultz home Thursday of last week, when they entertained a number of friends and neighbors to a whist drive, four tables playing. Honors went to Mrs. Thompson and William Stairs. Consolation prizes to Mr. Sears and H. Lawson. A few boys enjoyed the evening playing pool on Harold's new pool table.

Mrs. Bruha and Mrs. H. McGinitie received the sad news that their father and grandfather had passed away at his home in Nebraska, U.S.A. Miss Annie Bruha has been visiting at the home of her grandfather for some time. We extend our sympathy to the family.

Harold Schultz and Stanley Sears motored to Holden Monday, returning home in the evening.

Miss Nellie Lindsay and pupils and Miss Hazel Sears as organist are busy preparing for the annual Christmas concert.

Mr. Charley Whillans who has been in very poor health for some time, went to Edmonton Tuesday for further treatment.

The Ladies' Aid meeting was held at the Sears home Wednesday afternoon of last week. Owing to cold and stormy weather only six members were present so re-electing of officers was postponed. Visitors present were: Mrs. Davison, Mrs. Schultz, Mrs. Coombes, Mrs. Earl and Elsie Carlisle, Misses Ethel Coombes, Edith Davison and Kathleen Ingram.

WOODLAWN

The Woodlawn ladies met at the home of Mrs. O. I. Cookson, November 21, and organized a "Good Will Club." Mrs. Jack Wilson was appointed President and Miss Ethel Conklin secretary. At their second meeting, Dec. 5, at Mrs. Charles Campbell's home, they made stage curtains for the Woodlawn School and also arranged for a whist drive to be held Friday evening, December 11. The fee will be 15c, lunch will be served and prizes given.

We desire to express our heartfelt sympathy to the Kleinsroth family in their late hours of bereavement.—The Woodlawn friends.

Mrs. Charlie Campbell is spending a week in Edmonton with her mother, who is ill.

Miss Ella Hanson spent the week end with the Cookson family.

Miss Ines Broen was a visitor at the Wilson home last Monday evening.

Mr. Wilfred Schroeder and his mother, Mrs. O. I. Cookson and Mr. Peebles set out to attend a Social Credit meeting in Camrose, Thursday evening, December 3rd. They arrived to find the meeting had been held in the afternoon.

TOFIELD - - ALBERTA

LOCAL & PERSONAL

Messrs. Art Francis, Sam Stauffer, Harry Bowick and Glenn Wood returned from their trip to Chicago.

Mr. and Mrs. George Glover came to the Glover home here on Sunday.

The winners in the Disabled Veteran's Campaign Committee were: prize name, Mona, won by Stanley Swift, a rolls razor. Lucky numbers, 25, 50 and 75 won by A. Hummel, a set of military brushes; P. Burnett, a triple mirror; J.J. Hannan, a carving set. There is still a chance on both trips due Dec. 15, 1936.

Mr. Matchmee held the lucky ticket on the pair of blankets raffled by the Tofield Hockey club. The draw was made on Friday last, at the Hockey dance.

Mr. C. McDonnough was in Tofield on Tuesday and Wednesday, trouble shooting for the Alberta Government telephone.

Mr. Davies, manager of the Bank of Montreal in Edgerton, was in town on Tuesday. Tofielders will remember Mr. Davies who was a member of the bank staff here some years ago.

The W. A. wish to thank all those who in any way helped to make their bazaar and tea such a success.

Permanents at their best can be obtained at "The Vanity Salon," above Bruces store. Prices: $4.00, $5.00, $6.00. Students $3.00, End permanents $2.50 to $3.50. Esther Pyle, Tofield.

MR. IRVING ADDRESSES WELL ATTENDED C.C.F. MEETING

On the evening of December 9th the people of Tofield and surrounding district were privileged to have as their speaker in the Variety Theatre, Mr. Wm. Irvine. Mr. Douglas, M.P. for Weyburn, Sask. who had intended addressing the meeting with Mr. Irvine was unable to be in Alberta because of constituency business which kept him in Saskatchewan.

The meeting was opened by Mr. A. H. Harrison who acted as chairman. The Bardo male quartet under Alban Anderson rendered in their usual excellent manner "Larboard Watch" followed by "Grandfather Clock."

Mr. Irvine spoke on the topic of Economic Security for All. He point-

Mrs. Glover Tofield Resident 21 Years Passes Away

The numerous friends of the Glover family were deeply grieved to hear of the death of Mrs. Glover, which occurred Monday night, December 7th, at the age of 65 years. Mrs. Glover has been ill with heart trouble for quite a long time, but bore her illness with fortitude, being of a cheerful, pleasant nature.

She leaves to mourn her loss, a loving husband and four sons; also her sister who has been staying at the Glover home for the past few years. The sons include: George, Stanley, Leslie and Norman. A son, Charlie, pre-deceased her in 1927.

Mrs. Glover was born at Liverpool, England, where she grew up and met Mr. Glover, a young man from Ireland. They were married and later came to Canada, having been in this country 30 years, 21 of which have been spent at Tofield. Members of the Anglican Church, in earlier years Mrs. Glover was active in both Women's Auxiliary and Women's Institute work.

The funeral was held on Thursday, service being held in Holy Trinity Church, Rev. Wallis officiating. Pallbearers were: Messrs. Billman, W. Chapman, Lancaster, Bellamy, Burchard and McCarthy. There was a large attendance to pay their last respects to a long time resident of the town. The floral offerings were numerous, testifying to the esteem and respect in which the departed lady was held. A complete list of the floral offerings will be published next week.

Change of Location

Owing to the sale of the equipment in the meat market operated by me during the past six months, I beg to announce that I find myself obliged to secure new equipment and premises. It is my intention to continue in business, and commencing with TUESDAY, December 15th, I shall operate an up-to-date meat market in the premises recently occupied by Mr. H. A. Kendall, opposite Crown Lum. Co., Limited. As soon as the weather permits it is my intention of erecting suitable premises on Main Street.

In requesting the continuance of the patronage of my many friends and customers, I take this opportunity of expressing my appreciation for past favors.

WALTER BELLAMY

DOG BLAMED FOR TRAGEDY BLAST, FATAL TO EIGHT

CHICOUTIMI, Que. Dec. 7.—Isolated from the outside world by lack of communications and impassable mountain roads, the remote settlement of [illegible] Ambroise held a secret today [illegible] the details of fire and explosion that [illegible] the lives of eight persons.

[illegible] was shown here, 20 miles [illegible] the scene of the tragedy on the [illegible] River was that Mrs. [illegible] Brassard, [illegible]-year-old farm wife, had perished with seven of her nine children when flames from a [illegible] explosion destroyed the little farm home last Friday night.

[illegible] convalescing from [illegible] had in an apparent attempt to awaken her children, asleep [illegible]

[illegible] still clutching [illegible]-day-old child when the [illegible] Brassard staggered [illegible] and came to search [illegible]. He tossed [illegible] window into [illegible] his clothing a- [illegible] safety.

[illegible] infant and an 18-year-old daughter were the only survivors of the family living on the [illegible] of the settlement.

The children who perished, six [illegible] were Laurent, 13; [illegible] Jean Baptist, 8; Solange, [illegible] Jean Paul, 6; Laurier 2.

[illegible] brought to this [illegible] for the tragedy, [illegible] from the hills [illegible] said the dog had knocked over a can of gasoline in a back shed used for cooking.

The children were sleeping upstairs and apparently the daughter who survived with her father struck a match and went into the annex to investigate the racket.

Explosion followed, and within minutes the wooden home was enveloped in flames. Brassard found his wife at the top of the stairs. She apparently had collapsed while attempting to carry her new baby to safety. Brassard attempted to lift his wife and head down the stairs. But he was too weak from near-suffocation and staggered down alone.

SPLINTER HITS EYE, SIGHT THREATENED

Doctors were striving Monday to have the sight of Albert Stumf 21-year-old farm worker of Clive, east of Lacombe, struck in the left eye Sunday by a flying fragment of wood. It is believed the young man was chopping logs.

Admitted to University hospital Monday, he was pronounced "resting easily" by officials.

BRAVEST OF BRAVE. THESE TWO!

CAMROSE, Dec. 7—Jack Branten and Ole Hansen, two courageous hunters, captured and killed 11 skunks at Edberg 14 miles south of here. The kill was made in a single day, the striped ones being caught under a culvert. Questioned as to the thrills of hunting skunks, Branten and Hansen wrinkled their noses and jointly replied "Quiet, please!"

BRITAIN'S FOOD PROBLEM IN CASE OF WAR

During the past summer a certain prominent element in Britain became alarmed over the small supplies of wheat kept in store in that country to feed the people, and the statement was frequently made that in case of war that country would be in an unenviable position. When actual war did threaten with Italy over Ethiopia and Britain found herself unprepared the government took immediate and vigorous steps to re-arm the nation and build up the army, navy and air force to a peak of efficiency. The question of food supplies, however, was not publicly dealt with, although indications suggest that the matter is receiving very careful consideration.

Dr. Cloudesley Brereton, M.A. has recently been writing to the British press in which he claims that the domestic food supply is Britain's first and last line of defence. He said that the agricultural returns for 1935-36 were alarming as compared with 1914. Barley and oats show enormous decreases in acreage, and these are important as they largely are used in feeding animals. Britain's naval strength available to protect imported food from overseas is dangerously low. Whereas in 1914 Britain had seventy cruisers available for convoying, to-day she has only about twenty. The danger from U-boats and their vastly extended range of action is greater. The decrease in the tonnage of Britain's mercantile marine is put at nearly two million tons as compared with 1914, and the conversion of the navy fuel from coal to oil will necessitate further tonnage to bring oil to that country.

The Miller (London, England) in discussing this problem comments that Andrew Cairns, Secretary of the International Wheat Committee, was asked about the attitude of that committee to adequate wheat reserves. Of the necessity of such reserves Mr. Cairns was in agreement, but he said, "I would like to point out that the only reward overseas wheat producers have so far received for maintaining adequate wheat reserves in the past five years has been the catastrophic lowering of their standard of living. To the Argentine, Australian and Canadian wheat growers adequate reserves have meant in practise starvation prices. If importing countries desire adequate wheat reserves as an insurance policy against shortage of supplies and high prices, surely they ought to pay at least the storage and interest outlay necessary to carry such reserves instead of using them as a club to beat the price of wheat down to 50c. a bushel."

In 1932 many Canadian farmers received less than 25c for the number one wheat they delivered to the country elevators. In the same year the price of oats and barley was so low that it scarcely paid to haul it from farm to market. Mr. Cairns sums up the ethics of the situation tersely in these words, "It is impossible to justify such a state of misery and it is a waste of time attempting to deny that the existing economic organization which permits such colossal waste is not sadly in need of reformation." The Miller goes on to say, "The public interest must be served and we must admit that Dr. Brereton is on the side of the public. The more speedily private interests align themselves with this necessitous national policy, namely the provision of adequate grain supplies and storage in times of international alarm, the better for all concerned, and the safer."

HERE'S HOW TO MAKE THE REAL PEA SOUP

EDMONTON, Alta., December 7.—Anadre Franchi, travelling chef in charge of the culinary department of all Canadian National Railway hotels, divulged one of his favorite recipes when he reached the c[illegible] on a recent visit.

The following recipe makes pea soup a gustatory delight rather than the usual greenish quagmire:

"Take one pound of whole, dried peas, of good quality, and soak them overnight in cold water, adding one-half teaspoonful of soda to the peas. In the morning rinse well and drain them. Place in a pot which contains three quarts of cold water, add one-half cup of diced turnips, one cup of diced carrots, one onion chopped fine, a small piece of salt pork and a small hambone. Bring to a boil and skim well. Then let it simmer for four hours. Add a small quantity of salt, and fine herbs if desired. This will serve four persons."

And for those who serve salads, Mr. Franchi has an uncooked dressing prepared without oil. Ingredients are: Two eggs beaten until light, one teaspoonful of salt, one teaspoonful of mustard, one can of thick condensed milk, one cup of vinegar. Beat the first four ingredients vigorously for a few minutes, then add the vinegar, stir well and set aside for a few hours to thicken.

WORLD'S OUTSTANDING GRAIN COMPETITOR

When the Centennial Exposition was held in Philadelphia some fifty years ago, a sample of wheat grown by an Anglican missionary at Peace River, Rev. A. L. Brick won first prize. This is the first recorded instance of Canada winning with a wheat exhibit in international competition. A couple of decades ago, Seager Wheeler, Rosthern Saskatchewan, was in the height of his glory as a producer of prize winning wheat. Since then various individuals have come to the front in this respect, but from 1926 on, Herman Trelle of Wembley, Peace River, has dominated the field. Last week he repeated at Chicago winning first prize with his Reward wheat exhibits and first prize with oats. He has won five world championships in wheat and four reserve championships, three world championships in oats and two reserves, three championships in peas and one reserve and championships in flax, timothy and rye.

Herman Trelle is today the outstandingly successful producer of prize wheat in the world. Trelle was born in Idaho in 1895 of German-American parents and moved with his family to Alberta in 1900. On graduating from the University of Alberta he took up a 160 acre homestead at Wembley on the Peace River, which he gradually extended until now it comprises 700 acres.

TEN CHILDREN GET REAL CHRISTMAS BOX

WINNIPEG, Man. December 7.—The ten children of Mr. and Mrs. W. E. Slade of Simonhouse, Man., will receive the most unique Christmas present of their lives this year. They are all on their way to the Old Country and left Winnipeg recently over Canadian National lines. The children, who range in ages from 21 to the little girl of three years, have not only never seen a large ship, but this is the first time they have ever been as far away from home as Winnipeg.

Needless to say the children are at the height of excitement already and keep asking their parents at each stop, "Is this where the big boat is?"

Mr. and Mrs. Slade have not been back to the Old Country for twenty-six years and are looking forward with as much excitement as the children to their arrival "back home in dear old Kent, where I was born," as Mr. Slade puts it.

THE WORLD OF WHEAT

The "White-Collar Farmer" is the producer's best money-maker.

"Scientific Agriculturist" is his technical and correct name.

Little known, seldom understood, rarely valued or rewarded at his true worth, nevertheless the "White-Collar Farmer's" quiet persistent efforts enable tens of thousands of practical farmers to continue their operations—to stay on their farms.

Consider the new areas and countless farms that were opened up in the West by Marquis wheat, which have added hundreds of millions of dollars to the pockets of Canadian farmers.

Dr. Wm. Saunders, and his son, Sir Charles Saunders of the Dominion Experimental Farm at Ottawa, are responsible for Marquis.

Consider Reward and Garnet which in turn, opened up vast areas in Northern Alberta and Saskatchewan. The Saunders family made the first crosses for these varieties and Dr. S. H. Newman, present Dominion Cerealist, made the selections and then the distribution to farmers.

Many other varieties of wheats, oats and barleys, breeds of livestock, varieties of flowers, fruits and shrubs, are the products of the plant breeders, the animal breeder, the floriculturist and horticulturist—all scientific agriculturists, all for the most part "White-Collar Farmers."

What a debt farmers and all of us owe to these quiet, modest, untiring workers who so well serve agriculture.

Following factors have tended to raise prices: Large purchases of wheat by United Kingdom and Continent—Rumor Great Britain and other countries intend stocking up with wheat—Broomhall increases his estimates world imports by 16 million—Drought in parts of U.S.A. winter wheat belt continues—World's rye crop estimates less than last year—South African maize crop considerably less than last year.

These factors have tended to lower prices: Large wheat crop seeded under favorable conditions in India—Argentina harvesting starts with clear weather on increased acreage; good threshing yields reported—Argentina suspends guaranteed minimum price to farmers on wheat and linseed—Greatly increased exports of vegetables from Cuba to U.S.A.

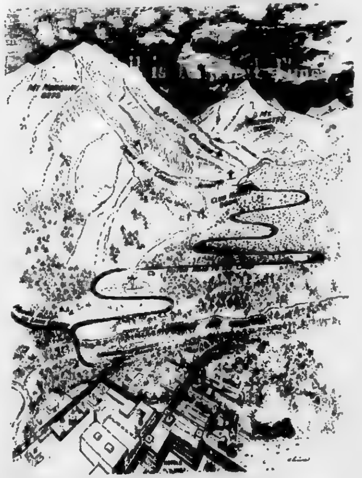
Banff Prepares for Ski Championships



The spectacular skiing depicted in the above drawing of Mount Norquay near Banff in the Canadian Rockies will become an accomplished fact at the Dominion Championships of the Canadian Amateur Ski Association to be held there from March 5 to 8. Only four miles by good motor road from Banff, which is situated 4,500 feet above sea level on the main line of the Canadian Pacific Railway, Mount Norquay is but one of the many fine skiing districts which is earning a world-wide reputation for the Canadian Rockies.

Competitors and visitors to Banff for the men's Dominion championships and the women's Western Canadian championships have some pleasant surprises in store for them. The best Canadian and American skiers will compete on trails and jumps difficult enough to try the nerve of the best of them. Pleasure skiing is particularly attractive throughout the beautiful mountain district. All the local and many imported amusements will fill in the spare hours.

With the assistance of the Dominion Government, the slopes of 8,275 Mount Norquay have had jumps, downhill runs, and slalom courses built on them equalling the best in the world. The downhill run, starting 7,500 feet up the mountain, drops 2,000 feet in a mile and a half. Jumps of 250 feet or more are expected from the new jump built on the style of the ones at Garmisch, Germany, and Lake Placid. The slalom course is at angle of 30 to 40 degrees. Entertainment for visitors, after the day's skiing programme has been completed, will include skating, hockey matches, curling, moonlight sleighing and tobogganing, snowshoeing, dancing, and — of all things for a winter resort — outdoor swimming in a naturally warm sulphur pool.

Plans are also being made to detain some of the competitors as guests of Banff to show them other less accessible but possibly better skiing grounds, notably Skoki, which is 14 miles from Lake Louise by ski trail; Sunshine, which is eight miles by motor and eight miles by ski from Banff; and Assiniboine, which is 25 miles by ski trail from Banff.

AMERICA—

STRETCHING AWAY up into the frozen wastes of the north, and down through tropic [redacted] to again encounter the cold of the extreme south, lies the continent of America. At some places thousands of miles from eastern shore to western shore and at other places so narrow that when looking at the map one wonders why the waters of the Atlantic and Pacific failed to break through. But they didn't and from the far north to the far south an elongated irregularly shaped continent lies unbroken by tide water. To the east and to the west lay thousands of miles of turbulent ocean, America's insulation. The continent of America, a world within a world, running the whole scale of climatic changes the world provides. Inland seas and mountains of grandeur, vast plains and forests that spread on and on until earth and sky meet, teeming cities and country towns, factory and farm, all combine to make America a land of promise, politically as well as economically, despite the many things that seem to prove otherwise.

Early in the eighteenth century, Simon Bolivar, "Liberator" of Latin America, conceived the ideal of a Pan America. Seeing the political upheavals of the old world, he dreamed of an America whose different republics were bound together in ties of friendship, and which, though having no part or parcel in quarrels of European origin, would combine to prevent encroachment on their American rights by European powers. He never saw his dream realized but he did set in motion what might be termed American Continent conclaves, commencing in 1826 and with variations being held right down through the century to 1936.

On December 1st of this year, there assembled at Buenes Aires, Argentine Republic, the Inter-American Conference for the Maintenance of Peace. President Roosevelt of the United States opened the peace conference and there were present representatives from all or nearly all American republics. Canada was not officially invited.

Situated as we are at the northern end of the American continent, and occupying as we do an area stretching over two thousand miles from ocean to ocean and reaching from the United States boundary to the Arctic ocean, we, as Canadians, should be more than casually interested in the Pan American idea. While the original idea was perhaps purely political, and designed as a safeguard against political infection from the old world, through more than a century of time, trade relations have entered into the Pan American idea and the "good neighbor" policy includes an exchange of goods as well as a hand shake. Many of us living in Canada rarely give thought to the continent of America as a whole. If we do think about it at all, it is because some small Southern American state is waging a futile war upon another. We rarely view it as a vast continent stretching up and down from the equator. Our thoughts of "America" rarely descend farther south than the United States, and when our thoughts do wander southward, it is with a cousinly feeling that all is well down there and consequently all is well with us. Our political and trade connections within the Empire is our first line of trade and moral support and our close geographical and racial proximity to the United States is our second. Perhaps we are well enough off being thus smugly content, but as a vast country sparsely populated and specializing in a few basic commodities, it would seem to be good business to take note of what is going on around us, particularly on the isolated continent of which we are a part.

South of the equator, but in the continent of America, lies Buenos Aires. Ask the average Canadian what city ranks third in the new world and he will likely think of Montreal, Vancouver, Winnipeg, Philadelphia or Detroit, but it is Buenos Aires. Ask him where the world's largest refrigerating plant is located and remembering the windy city and its meat industry he will likely answer Chicago, but Buenos Aires is the right answer. A city more Spanish than Spain; larger than Madrid; rich, beautiful and commercial, Buenos Aires is an American city of prime importance, through the gates of which flow wheat, beef, pork, mutton and butter. Phrases like "Pan American Trade Bloc" are already in use and trade treaties are being signed. A complete crystalization of the Bolivar Pan American idea may yet take some time, but certainly there are definite moves in that direction. Canada as a geographical member of the American continent, but politically linked to the old world, will watch with increasing interest the banding together for protection and profit of other states of the continent of which she is a part.

BEGIN TODAY

Dream not too much of what you'll do tomorrow,
How well you'll work perhaps another year;
Tomorrow's chance you do not need to borrow—
Today is here.
Boast not too much of mountains you will master,
The while you linger in the vale below;
To dream is well, but plodding brings us faster
To where we go.
Talk not too much about some new endeavour
You mean to make a little later on;
Who idles now will idle on forever
Till life is gone.
Swear not some day to break some habit's fetter,
When this old year is dead and passed away;
If you have need of living, wiser, better,
Begin today! —Anonymous

GRAIN INQUIRY BOARD REVIEWS WHEAT FIGURES

Statistics Dealing with Wheat and Trade Presented by Economists

By Sam Ross

Winnipeg, Dec. 7.—(Special Correspondence)— The Turgeon Royal Commission was launched last week into its extensive investigation of the Canadian grain trade and an effort to find means of extending markets for Canadian grain.

Mr. Justice W. F.A. Turgeon of Regina, appointed by the federal government to conduct the inquiry, heard witnesses submit statistics showing declines in Canadian wheat exports. Other witnesses offered reasons for the loss of markets and reviewed the international currency situation.

After Hon. J. L. Ralston, commission counsel, declared the finding of means to extend markets would be a major constructive objective of the inquiry, L. W. Brockington, K.C. counsel for the North-West Grain Dealers' Association, urged the commission to recommend a national survey to determine the causes of the economic plight of the farmers and suggest remedies.

"It may be stated that the farmer suffers from the double handicap of buying his goods at costs which are enhanced by a closed market and selling his products on a market in which tariffs and embargoes have been raised against him," said Mr. Brockington in pleading that basic causes be investigated.

James McAnsh, statistician of the Canadian Wheat Board, declared Canada had not only failed to win part of the world wheat market thrown open by disappearance of the United States as an exporter but had failed to hold her own share of the foreign trade from 1930 to 1935. Canada's export position showed an annual average decline of 91,300,000 bushels over the five-year period ended 1935-36 compared with the preceding five-year period, he said.

Citing reasons for the decline in Canada's export trade, C. B. Davidson, secretary of the Canadian Wheat Board, said tariff enactments and imposition of dumping duties by Canada in 1930 curtailed imports from European markets and brought about fewer foreign purchases of Canadian wheat. By imposing severe import restrictions on textiles, Canada struck at the very heart of her trade with continental Europe and destroyed the basis of her wheat business in that area, he said.

Where protection of secondary industries was carried to a point where fair competition was eliminated, the disruption of the export markets for the products of its primary industries resulted. While no one could quarrel with the principle of empire preference, the switching of long-established trade with foreign countries to Empire channels could only bring unfortunate consequences, said Mr. [redacted]

Dr. D. A. MacGibbon of the Board of Grain Commissioners reviewed the wheat situation and governmental aid to growers in the United States, Argentina and Australia. The Argentine was a low-cost producer and measures to improve her handling and marketing were likely to reduce further her costs of selling export wheat.

The United States, he said, was shifting its attack upon growers' problems from the marketing field to that of restriction of production combined with recognition of the principle that a high protective tariff involved a compensatory payment for the undue burden on agriculture. In Australia, the national government gave £8,428,223 to State governments between 1931-32 and 1933-34 when it recognized condition of farmers was acute.

Foreign markets were vital to Canada and bilateral trade agreements were of no value because Canada had to sell in foreign countries to build up credits to meet debits, said Prof. Robert McQueen of the University of Manitoba. Futility of simultaneous currency depreciation as a method of recovery was being recognized and world currency stabilization was indicated in the tripartite agreement between Great Britain, United States and France.

Prof. J. S. Allely of the University of Manitoba said steps toward international currency stabilization had cleared the way for setting up a system by which currencies would not again be allowed to get out of alignment. "It is our belief," he said, "that a partly stable, partly flexible currency system which recent devaluations portend should tie in with impending capital movement controls and commercial agreements to diminish the fear that national monetary and industrial instability must result from international trading."

An anti-splash device has been invented for motorcar wheels. No doubt a smaller model will soon be available for clipping on to the breakfast grapefruit.—Humorist.

INFLUENCES ON SIZES OF LITTERS

The profit in hog raising comes from finishing large litters of thrifty pigs; but before large litters can be raised, they must first be farrowed.

There are a number of facts which influence litter size; these include age, condition, type and breeding of the sow and the condition and virility of the boar.

Records at the Dominion Experimental Station, Lacombe, show that older sows average larger litters than gilts, and also, that the pigs from older sows are heavier at birth and produce quicker gains. Another fact worth remembering is that if gilts are continuously used, and sows over a year old are turned off to market each year, the size of litters and the size and strength of the progeny will gradually decrease with each successive generation of young mothers from young mothers.

Since the number of pigs farrowed is limited by the number of ova, or eggs, produced by the sow before conception, which in turn is to some extent influenced by the condition of the sow, it pays to feed the sow liberally for a few weeks before breeding, to get her in good condition. This is particularly true in the case of sows that are run down, just after weaning a litter.

It is unwise to give sows their meals in bed. As over-fat sows will not produce large litters of husky pigs, all the sows at Lacombe are forced to take exercise by feeding at some distance from the cabins. As a further measure to enforce exercise the sows are fed by scattering the grain over a fairly large area of ground.

Because of the fact that the number of pigs in a litter is limited by the number of ova secreted by the sow, it is impossible for the boar to increase the number of pigs in the litter; but if he is not in good breeding condition, or if his sperms are weak and few in number, the litters farrowed may be smaller and the pigs weaker than had a normal boar been used.

For this reason it is good business to keep the boar fit. To accomplish this end, not only is it necessary to allow him a fair quantity of good quality feed, but the number of services must also be limited, and spread out as regularly as possible over the breeding season. It is good policy to keep the boar apart from the sows, or with a bred sow as a companion in a cabin with adjacent yard for exercise. With the boar, too, exercise is essential.

In order to secure consistently large litters, it is necessary to select breeding stock that come from large, uniform litters—and to the greatest extent possible from second or subsequent litters—house breeding animals comfortably, feed them properly, and force them to exercise.

THE FIRST FARMERS

One of the very great geneticists of modern times is Professor N. I. Vavilov who discusses early cultivation of the soil in a recent issue of Priroda (Nature). He contends that only in recent centuries and even decades that lands easily farmed were exploited. In primitive times farming reached its highest development in mountainous regions and in the deserts of Egypt and Peru. Raids and wars drove beaten tribes to the highlands, argued Vavilov. There agriculture could be developed in peace, hence its mountain origin. In southern Asia farms are to be found at 12,000 feet altitude in the Himalayas and 10,000 feet in Afghanistan. In Tibet on the shores of Lake Dangra-Yum the soil is tilled at 15,000 feet, a record unsurpassed in agricultural history. In Central China the record height is about 12,500 feet. A type of wheat is found in French Northern Africa at 7000 feet—wheat which can be threshed more easily than other varieties and which is grown nowhere else. In Ethiopia farming has been practised at 11,000 feet for centuries.

What Life Insurance Means to the Women and Children of Canada

To thousands of Canadian families, Life Insurance means financial security against the uncertainties of the future.

To each family deprived of its breadwinner, Life Insurance means food, clothing, shelter and other necessities of life.

It means ready cash to meet pressing obligations during the difficult re-adjustment period.

It means money to pay the rent or meet mortgage payments.

It means funds for the education of children until they are old enough to support themselves.

It means rearing your family in self-respect, free from the humiliation of private charity or public relief.

It means contented retirement for the business woman when she is no longer able to work.

Every working day, Life Insurance disburses $500,000 to Canadian homes. Every day, it helps to keep homes together and families united.

No wonder that Canadian women appreciate the value of Life Insurance, and are grateful to their loved ones whose far-sighted thrift has made possible such vital financial security for themselves and their children.

OBITUARY

There passed away at her residence near Tofield on Friday, December 4, Mrs. Katherine Kleinschroth, aged 76 years. The departed lady was born in Ontario, and in 1884 was united in marriage to Henry Kleinschroth. In 1911, together with their family they came west settling near Consort. They came to Tofield in 1934. Mrs. Kleinschroth leaves to mourn her loss, her husband, two sons and two daughters, also one adopted son and one adopted daughter. The sons are Alec of Tofield and Harry of Tofield; daughters, Maud (Mrs. [illegible]) and Lada of Grande Prairie, the adopted son William of Tofield and daughter Ella at home. The funeral was held on Monday, service being held at the home, Rev. D. K. Allan officiating. Quite a number of mourners from different points, In the Peace River, Drumheller and Edmonton were present. The floral tributes being both numerous and beautiful. J. E. Stinson, funeral director.

LINDBROOK

Someone remarked here awhile back that we "might" not have any winter, but what about last week, it was a good imitation if nothing else.

Say, isn't it about time our old frend A B C of the Mercury's columns appeared in print again; doesn't seem winter without his witty remarks.

The Social Credit Study Group monthly meeting was held in the School last week and was well attended despite the weather. The monetary question was discussed and Mr. J. Ferguson of Tofield gave a lengthy and interesting address.

A dance was given by Mrs. J. Bracegirdle and Miss Phipps, the teacher last Friday evening and was also well attended. The orchestra was all voluntary owing to the fact that the proceeds were to be devoted to augment the children's Xmas party. Everyone enjoyed themselves and hope the kiddies enjoy their party as much as they did the dance.

Someone got hard up for a drink the other night and emptied Mr. J. Bracegirdle's car radiator of its "Anti-Freeze." We hope they enjoyed their liquor, kind of powerful stuff with a whale of a kick, at least so we would imagine.

LAKESHORE

A shower was held for Mrs. M. Wood at the T. A. Jones home on Thursday, December 3rd. Although the weather was cold there were a large numbre present. Mrs. Wood received many useful gifts, as well as the best wishes of her many friends.

A surprise party was held at the R. H. Phillips home on Tuesday evening, the occasion being Mr. Phillip's birthday. Dancing was the order of the evening.

Miss Mildred Graham spent a few days in Edmonton last week.

Mr. Graham had the misfortune to lose a number of hens. They contracted infectious bronchitis, which was brought on by the recent cold wave.

A birthday party was held at the home of Mr. and Mrs. Gilbert Brustson last Sunday week and was enjoyed by all present. We don't know whether it was Mr. or Mrs's birthday but to whoever it was, Many Happy returns of the day.

KINGMAN

Mr. Pat Fuglan has gone to his home at Cold Lake. He has been with his brother for about a month, as he is not well.

Mr. Brunon has gone to Seattle, Washington to spend the winter.

The Ladies' Aid Sale was well attended last Saturday and their proceeds were over fifty dollars.

Rev. Emil Erickson will hold services at the Lutheran Church on Sunday afternoon, December 13, at 2 o'clock.

Miss Judith Oesmis and Mr. Ray Kalevick were married last Friday, December 4th.

There will be a movie sponsored by the gymnasium club on Saturday, December 12th at 8 o'clock.

There will be a program on Dec. 10th by the Social Credit people. Admission 25c and 15c.

MORE ABOUT MR. IRVINE

ed out that he was going to deal with economic, social and political problems of Canada and a proposed solution for them.

Economic Security for All is the great desire of every working man and women. This is the most serious problem that faces men and women of Canada. First he outlined the economic problem, the greatest group is the agricultural group which represents 50 to 60 per cent of the people of Canada. On the whole they have been producing an abundance of foodstuffs and selling them at a below cost. They have been screasing their indebtedness and reducing their standard of living. This condition of affairs cannot go on much longer.

The wage earning class is the nxt largest in size. Their wages have been reduced, the number of working hours have been decreased so they cannot make a living for themselves or their families. They are the majority of those obtaining relief. This constitutes the second problem.

Perhaps never before in the history of the world have we been so well equipped to supply the needs of the world. Production has never been so great and yet, want and starvation are the greatest in the world that they have ever been. "I do not believe there is an animal in the jungle so stupid as we are."

The debt situation is the next problem. The debt continues to grow. It is there because of the debt creating system. This debt goes on. At the present time Canada's debt is approximately twenty billion dollars, at an average of 5 per cent interest. Much of the present talk is to stop borrowing. If that were done and nothing were paid on the debt as it is today, in fourteen years the debt would be forty billion dollars. In twenty-eight years it would be eighty billion dollars. "We have a wildcat by the tail —we can't let go."

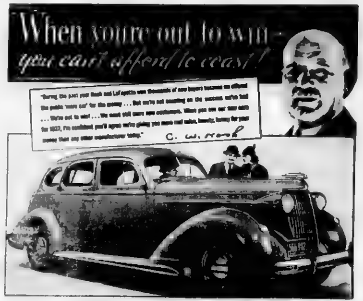
The present generation finds itself in a most deplorable situation. The opportunities of the past generations, while not as great as those of today, were certainly better in some respects. Today there are good schools, the young are better educated and on the whole better fitted for going out into the world. Yet there are no jobs for them., "They have for the past few years been riding box cars across Canada."

These points were brought out purposely by the speaker because of their obvious application.

Internationally on one side of the sphere is Japan, a small virile state led on by able, [illegible] militaristic leaders. They realize that their lateness into the history of the world as a colonizing country has made it impossible to get territory. They

(Concluded next week)

Twenty friends of Arnold Ragness helped him celebrate his 7th birthday on Monday, December 7th. He received many nice presents.



When youre out to win—
you can't afford to coast!
"During the past year Nash and Lafayette won thousands of new buyers because we offered the public 'more car' for the money . . . But we're not coasting on the success we've had . . . We're out to win! . . . We want still more new customers. When you see our new cars for 1937, I'm confident you'll agree we're giving you more real value, beauty, luxury for your money than any other manufacturer today."

High School Students Hold Concert

On Friday evening last the Student's Union of the Tofield High School held their annual concert before a capacity house. The programme was of a high order, including plays, sketches, recitations as well as musical numbers.

J. W. Chapman occupied the chair and after a few remarks announced the singing of "O Canada."

Two choruses were then given by the entire high school, conducted by Mr. Thomas, "March of Men of Harlech" and "The Garden by the Sea."

The complete programme is as follows:

Recitation, Marvin Seale, "The Little Brother's Complaint."

Play, "Poor Madeline," by the dramatic class of grade nine. Those taking part were Arnold Swift, Mary Nahrebeski, Clifford Appleby. This play was very well chosen and presented. It dealt with life in the land of Fantasy as in contrast to the tragedies of real life.

Recitation by Minnie McAllister, "The Parson at the Hockey Match."

Solo by Marjory Murray, "The Cuckoo."

Practical demonstration of first aid work directed by Charlie Worton. Worton. Those taking part being John Warner, Ken Baptist, Ross Scott, Marvin Seale and Clifford Appleby.

Quartette, "We Meet Again Tonight," by Donald Edwards, Donald Betrass, Allan Harrison and O. P. Thomas.

Demonstration of Indian club swinging by Olwyn Hoover and Hazel Moore.

Skit, "No, No, a Thousand times No." This was the comedy hit of the evening and was well prepared and well acted. Those taking part were: Donald Edwards, Pat Firth, Jim McAllister, Allan Swinton, John Warner and Alice Moon.

Duet, "Oh that we two were Maying," by Cleo Wilson and Audrey Swinton.

Play "The Weather Breeders." Characters were Allan Harrison, Zelda Dodds, Harris McClymont, Edward Nahrebeski, Donald Edwards. This was a forceful presentation ably acted.

God Save the King.

Congratulations are due to the teachers and students of the High School. There is always a great deal of painstaking work preceding events of this kind and it is gratifying to see such a splendid presentation and such a large turnout.

The stage scenery and lights which added to the pleasure of the evening were in charge of Muriel Rogers, Vivian Shaw, Lorene Wood, Margery Murray and Ross Scott.

The play, "Poor Madeline," was directed by Pat Firth, Minnie McAllister, Louise Stevenson, and Euphemie McBratney.

UNITED CHURCH NEWS

Special Christmas services will be held on Sunday, 20th of December. At 11:00 a.m. the Sunday School will hold an open session—everybody welcome. The Junior Choir will render the Cantata "Gift Divine." There will also be recitations. At 7:30 p.m., the evening service will be assisted by the choir rendering the Christmas music. "O Come all ye Faithful" anthem—Ladies' chorus—solo. The familiar and joyous Christmas hymns will be sung. A cordial invitation to all at both services.

The Rev. D. K. Allan will preach at Ketchamoot in the afternoon at 2:30 p.m.

LOCAL & PERSONAL

Mr. Fred Hicks of Cadogan is visiting with Mr. and Mrs. Ed. Hicks.

Mrs. Calvert of Edmonton spent the week end in Tofield.

Mr. and Mrs. George Glover returned to Edmonton after spending a week in Tofield.

The winner of the Rolls razor was Stan Smith, not Stan Swift in the Veteran's Association raffle.

Blake Clutterham returned this week from the States where he has been studying and taking treatments.

Mrs. Ed Wuetherick is visiting at her parents at Mallaig near St. Paul.

Mr. Glover returned from Edmonton after spending a few days there.

Mr. Van Dyke, operator at the station left for Toronto and Detroit.

Mr. McTaggart and George spent the week end in Stettler.

Mrs. Brisbin of Holden spent a few days visiting at the Thomas home this week.

Miss Mary Burnett spent the week end visiting friends in Edmonton.

Mr. A. Matcheson spent the week end visiting at Strome.

Mr. and Mrs. Cowell and Peggy spent the week end in Edmonton.

Mrs. Bertha Seale and Miriam was with her sister Mrs. Yakabuski over the week end.

Mr. McSporan spent a few days in Edmonton last week.

Mr. Wright is relieving Mr. Van Dyke at the staton here.

Mr. and Mrs. W. Eldred of Edmonton visited at the McCauley home on Wednesday.

Miss Pat Burnett, Mrs. Bert Lovel and Arthur Francis motored to Edmonton on Wednesday.

The Tofield High School Student's Union wish to thank the parents and friends for supporting their annual concert in such a wonderful manner. Specail thanks are due to one and all who helped in any way to make the concert a success.

The Eastern Star ladies wish to thank all those who donated to their bazaar and all others who helped to make it such a success.

Mrs. Stevenson left last Friday on a trip to the United States where she will spend the Christmas holidays with relatives. While there she expects to visit Dallas, Texas, Illinois and North and South Dakota. Mrs. Stevenson will return in the spring.

KETCHAMOOT

Next Sunday, Dec. 20, Christmas services will be held at 2:30 p.m. A large congregation is requested to be present, the minister, Rev. Allan will be pleased to see you there and you will be the better for being there.

Born: To Mr. and Mrs. Roy Lee, December 14 a daughter. Mother and baby are both doing fine. Congratulations, Roy and Mildred.

Misses Margaret Mitchell and Ethel Coombes visited Miss Ella Kleinschroth at her home Monday afternoon.

Messrs. C. Coombes and O. Barnes returned home one day last week from a month's hunting trip spent near Drayton Valley.

Miss Signe Winder is assisting with the house work at the Roy Lee home.

Mrs. Davison and brother Bill Stairs were guests of Mr. and Mrs. Frank Shupe of Lindbrook Saturday night and Sunday. Mrs. Shupe accompanied them home for a few days visit.

Miss Kathleen Ingram is spending several days with her sister Mrs. Leo. Oveldson of Miquelon.

A pleasant afternoon was spent Thursday afternoon of last week when Mrs. William Ingram entertained the Social Hour Club at her home. Quite a large crowd was present, including members and visitors. There was not a draw for the quilt as all the tickets were not sold so it was decided to hold a card party at the Henry McGinitie home between Christmas and New Years and make the draw then. Five dollars was sent to Sunshine.

Little Miss Doris McGinitie was taken back to the hospital a week ago where the final operation was made on her leg. She was able to return home on Monday of last week and will soon be able to walk again.

Mr. and Mrs. Thompson of Tofield and Mr. and Mrs. A. F. Schultz were Sunday guests of Mr. and Mrs. Williams.

FIRST HOCKEY GAME OF SEASON TUESDAY NIGHT

The first hockey game of the season to be played at Tofield will take place at the rink on Tuesday next. Given favorable weather the ice will be laid by that time, the rink lessees, Norman Glover and Allistair Swinton are now busily working putting the final floods.

The opponents of the locals on Tuesday will be Holden who can be depended upon to put a smart squad on the ice. The line-up of the local team wiwll include several of the old timers as well as players brought up from intermediate ranks, but to the last man they can be depended upon to give the fans a good game.

Curling Season Opens With Bang

By A.B.C.

Here we are again Folks with gobs of jokes old and new. Art has the ice highly polished, scraped, colored and the well known Welcome sign is out. Art sure knows his frozen water.

∗∗∗∗∗∗∗∗

The Curling season opened with a bang. Among the throng noticed on opening night, Mayor Bruce and his good wife, the President, Johnston Ferguson and Mrs. Ferguson, Doc and Mrs. Law, Crispen and Peggy, Banker Allan and wife, Rev. Allan and wife, the Teachers, the Butchers, the Barbers, J. O. A. L. and the Mrs., Yours truly and the wife, our genial secretary Wm. John Chapman and Mrs. Chapman, Uncle Alex and wife, Mr. and Mrs. Swift, Clara Rogers and a host of other folks, some of whom we will no doubt mention in our column during the season.

∗∗∗∗∗∗∗∗

My poetry is not censured, but the boys censure me for using it.

∗∗∗∗∗∗∗∗

Now is the time to get in your curling, BECAUSE—

When e'er I see upon the stairs,
Long rows of mops and brooms in pairs,
And watch the curtains fall like sails
And listen to the good wife's wails,
I know its Spring, Beautiful Spring.

If flesh be grass as scriptures say,
Most Curlers are a load of Hay.

∗∗∗∗∗∗∗∗

Some of our curlers figure we have a sense of humor, but most of them figure we have a lot of humor and no sense.

∗∗∗∗∗∗∗∗

They tell me that Lady curlers are temperamental—that is fifty per cent mental and fifty per cent temper.

∗∗∗∗∗∗∗∗

My curling wheel goes round and round, until at last a name is found. Lem says to Bill, "Do you believe in Curling clubs for women?" Bill flashed back "Sure, if kindness fails."

∗∗∗∗∗∗∗∗

By what: when one curler said to another "My wife was outspoken at the annual meeting."

∗∗∗∗∗∗∗∗

The high light of our annual meeting was when Chris said, "we are here to help others" and one brigh youth said "and what are the others here for?"

∗∗∗∗∗∗∗∗

When it comes to headwork, the barber curlers will surely trim you.

∗∗∗∗∗∗∗∗

Some of our curlers are always giving themselves away. Unfortunately I have a few rink at present.

∗∗∗∗∗∗∗∗

Let us shed a tear for our departed curlers, Smith the banker, Larry the Teacher, Bert the barber, Vern the Lumber King and Mack the undertaker. All gentlement if not so hot at the curling game.

∗∗∗∗∗∗∗∗

Women curlers, generally speaking are generally speaking.

∗∗∗∗∗∗∗∗

Editing this junk without ruffling somebody's feelings is like fishing without a hook on your line, lots of recreation but no results.

∗∗∗∗∗∗∗∗

There's a fellowship fostered by winter,
That the long evenings linger to prove,
There's a light on dear faces familiar,
And a tee if you just get the groove.

∗∗∗∗∗∗∗∗

What care we for Summer or the autumn or the Fall,
But the skips that like Winter weather, need a clout across the jaw.

∗∗∗∗∗∗∗∗

Every curler should know one good joke on somebody. Give them to me boys, I can use them.

Practical Holiday Gifts for Men

SOCKS—	
Better quality Cashmere and Silk and wool	50c and 60c
SHIRTS—	
Broadcloth with color attached. New plaids and bright pappterns. Others more conservative	$1.50 to $1.95

Change of Location

Owing to the sale of the equipment in the meat market operated by me during the past six months, I beg to announce that I find myself obliged to secure new equipment and premises. It is my intention to continue in business, and commencing with TUESDAY, December 15th, I shall operate an up-to-date meat market in the premises recently occupied by Mr. H. A. Kendall, opposite Crown Lum. Co., Limited. As soon as the weather permits it is my intention of erecting suitable premises on Main Street.

In requesting the continuance of the patronage of my many friends and customers, I take this opportunity of expressing my appreciation for past favors.

FIRE ALARM BOX MISTAKEN FOR MAIL BOX

Strange as it may seem, Edmonton was blessed Monday with a visitor who mistook a fire alarm box for a mail box. The [illegible] a girl in her late teens, had some letters to mail and while walking in the vicinity of [illegible] and 106 avenue, noticed a [illegible] telephone pole. Thinking it a mail box, she walked over to it and searched for an opening to place the letters in, but was unable to find one. Following the directions on the box, but unaware what she was really doing, the young girl sent in an alarm to fire headquarters.

[illegible] surprise when Chief [illegible] Dutton and his fire laddies [illegible] their big red chargers.

Th[illegible] letters in her [illegible] Fireman informed her of the mistake.

FRIGHTENED BOY 'SCOOTS' 9 MILES HANGING ON CAR

Constable Ernest Foster, acting head of Edmonton police force's traffic squad is convinced there would be fewer children playing on Edmonton streets if more of them had the experience of a wide-eyed boy whom he was reprimanding for chasing cars. He narrated the incident Monday to a Journal reporter.

Staring solemnly at the officer, the child shook his head and said: "Not me—I haven't been chasing cars. I used to do it, but I've learned my lesson. Never again!"

"How do you mean, you've learned your lesson?"

"A few days ago I grabbed hold of the back spare tire of a car on Portage ave. I intended to drop off after 'scooting' for a block; but suddenly the car speeded up, and I was afraid I'd be killed if I let go. So I just hung on all the way—and didn't drop off till we reached St. Albert!"

The Farmer's Income

The use of good seed of a recommended variety will improve the quality of the farmer's crops—so will increase his income.

Every farmer can use at least some good seed and so build up the quality of his crops.

See the nearest Searle or Home Agent about securing, at [illegible] price, Registered or Certified seed sealed in the sack.

SURGEONS ENCASE HAND IN ABDOMEN

GREENVILLE, S.C. Dec. 7—Surgeons have encased Dewey Wright's crushed hand in an abdominal incision to allow the skin to grow over the bones and restored it to usefulness.

Wright, a 22-year-old textile worker, fell beneath a train on September 21. When he reached the hospital there was nothing left of his hand but a few bones.

Now damaged but healing rapidly, he has a hand and a thumb and an index finger as well. Physicians said that after exercise treatments, he can go back to his loom.

Surgeons made a vertical incision six inches long in Wright's abdomen, about a quarter of an inch deep for four inches and inserted the bony hand. Arm and body were placed in a cast and the doctors stood back for two weeks to await results.

Then the cast was taken off, and some time later the surgeons sliced the tissue from around the sides of the hand, freeing it from its abdominal encasement. The abdominal skin had, as they hoped grown to the hand bones.

Then from Wright's hip, the surgeons said they transferred bits of flesh to the palm of his hand.

BRITAIN PLANS FOOD RESERVES

The United Kingdom has apparently made up its mind that food reserves are a matter of paramount importance in the event of war, and has developed plans towards that end. The details of these have not been made public as yet, but the bare announcement that the step had been taken was the strongest factor in the lively wheat market this week.

Great Britain is peculiarly susceptible to danger during war from lack of food. One of the most densely populated countries in the world, her insular position, at one time considered an advantage in case of war, has made her peculiarly vulnerable, due to the fact that submarines can create havoc with ships bringing food supplies.

Up to the present Britain has carried her reserves of wheat and other food supplies on the oceans of the world in the holds of hundreds of ships. It has not been exceptional for 40 to 50 million bushels of wheat to be on ocean passage with Great Britain as their ultimate destination.

The suggestion has been made that Great Britain will store 100 million bushels of wheat in her own land as a reserve in case of war. Of course, the gathering of this large supply will probably be gradual as at the present time there is not such a surplus available in exporting countries. It has also been suggested (and this interests Canada) that the Empire preference of 6c a bushel will be discontinued at the next conference of the British Empire countries.—Wheat Pool Bulletin.

GENERAL ABSOLVED OF WAR-TIME LOSS

LONDON, Dec. 7.—Eighteen years after he had been recalled following the allied retreat of March, 1918, General Sir Hubert Gough, commander of the fifth army, has been vindicated by war-time Prime Minister David Lloyd George.

"I need hardly say that the facts which have come to my knowledge since the war have completely changed my mind as to the responsibility for that defeat," the former premier wrote the general. "You were completely let down, and no general could have won that battle under the conditions in which you were placed."

Said General Gough: "I have been through h—— in the past 18 years. I was deeply wounded at the time of my dismissal but I am very grateful to Mr. Lloyd George for exonerating me, following upon Mr. Churchill, the late Lord Birkenhead and others, and for allowing me to publish his letter."

General Gough was appointed chief of the allied commission in the Baltic in 1919, but three years later he was put on retired pay.

But when Edward J. Williams, a Welsh Labor M.P., rose from his place in the house of commons a few days ago and asked what steps the government proposed taking to recompense Gough, Prime Minister Baldwin said he did not think "at this distance the government would be well advised to revise decisions taken by its predecessors."

General Gough himself has never complained, firmly believing that one day his military reputation would be restored.

"It has come belatedly," he said, "but that doesn't make the relief any less tremendous. Tremendous, that's the word.

"To be told that I had blundered was a shattering blow. It robbed me of the personal joy I gained from other awards."

(General Sir Hubert Gough had been held responsible for a share of the March, 1918, defeat at St. Quentin on the Somme. For eight days his fifth army defied an enemy force of 42 divisions on a front of 42 miles. When the Germans broke through his inferior forces and the line Somme was lost to the Allies, the British war office relieved the general of his command and recalled him.)

LIVED UNDERGROUND 2 MONTHS; CAUGHT

JEFFERSON CITY, Mo., Dec. 8—Young convict, who had lived underground two months in a plot to free himself and two cellmates tunnelled from under the Missouri penitentiary walls Monday night into the arms of a waiting guard.

The convict, Fred Turner, 22 had lived underground since Oct. 4.

Warden Sanders said Turner had hidden between the walls of two cells and by removing a sewer pipe leading into his cell had opened the way for the other two to help him tunnel.

The three had dug a 140-foot tunnel. Turner was breaking through on the outside of the wall when the plot was discovered and a guard stationed to wait for him.

Turner and his two cellmates had rung an electric lighting system along the hole with 14 light bulbs attached. A screw driver, chisel and pliers were used in tunnelling.

His cellmates supplied Turner with both food and clothes. Sanders said he had not been out of the passage since he dug his way in shortly after his disappearance.

TUBERCULOSIS

Two general types—the Human and the Bovine. Bovine commonest in children but 80 per cent of total tuberculosis is of human type.

The human form of tuberculosis is by far the commoner. Like the bovine form it is usually acquired in childhood and from close association with an open case of the disease in the family or from someone closely associated with the child. Eighty per cent of all tuberculosis is of this type.

Bovine tuberculosis invariably infects the child through milk from the cow with a tuberculosis udder. Four-fifths of the tuberculosis appearing in little children is of this type. It affects the bones and joints, the glands of the neck or deals destruction as meningitis, the so-called brain fever.

It would be a simple matter to control bovine tuberculosis. The method is pasteurization of all the milk used by children. In cities where all the milk and cream used is pasteurized, there is no bovine tuberculosis, and the incidence of such affections as undulant fever, diptheria, scarlet fever and the devastating summer complaint of babies is unheard of. Pasteurization of milk means simply the heating of the milk to 145 degrees F. holding at this temperature for 30 minutes and rapidly cooling it and keeping at a low temperature until used.

Human tuberculosis is not so ready of control. It involves the "separation of the sick from the well." The tuberculosis person—the source of infection—must be sought out and sent to a sanatorium or to some place where he will learn to take proper care of himself until he is safe for other people to associate with.

Although important progress has been made in the control of tuberculosis in the last 25 years, much remains to be done. All milk supplies must be brought under pasteurization. Children in school and under school age should be sifted to discover those having a tuberculous infection. In all such cases the source of infection should be traced and prevented from doing further harm.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto will be answered personally by letter.

SPECIAL CORRESPONDENT TO 'COVER' GRAIN PROBE

Arrangements have been completed by the Tofield Mercury to have the proceedings of the Royal Grain Inquiry Commission 'covered' by a special correspondent who will attend all sessions of the Commission during its meetings throughout Western Canada. Mr. Sam Ross, well known Western writer, will contribute a concise review of the week's proceedings of the Commission in each issue of this publication during the inquiry. Mr. Ross' articles will consist of a weekly review of the evidence presented.

The Grain Inquiry Commission, which will be presided over by Mr. Justice Turgeon, will investigate various methods of marketing of Canada's wheat, including pooling, the futures market, and the wheat board system. The future of Canada's wheat in the export markets of the world will also be dealt with, as well as the problem of falling off in consumption and international trade in wheat.

SPEECH BY MR. IRVINE

(Carried on from Last Week)

have seized Manchuko and have threatened Russia.

More recently the situation between Italy and Ethiopia is a similar one. Italy is hemmed in and wants more territory. Mussolini is a very active military dictator. Germany is in a like position. Hitler is another military leader trying to stabilize his country by military threats. He has defied the Peace of Versailles as well as many other treaty obligations.

All over the world today there is threat of war. Billions of dollars are being poured into war funds. Preparations are being made for the greatest onslaught of murder the world has ever known.

These national and international problems could not be there unless there were causes. Unless we can penetrate to the cause we can hope to do nothing. Capitalism is the most pertinent cause. It must accept responsibility for the national and international conditions described. These [illegible] are phases of an economic system involved. An economic system is a way which a people have of producing and distributing goods and services. The system we have today is of relatively short duration. With this in view it is apparent that change has taken place, is taking place and will always take place. This means we must realize that change is possible and necessary.

A trouble in the past and at the present time is due to the temporary cures promised at each election and carried out for the period of that government. Unless we can get down to the injustice and the exploitation and remove these from the system it is impossible to cure the trouble. We require the re-formation of our social order. "I shall describe that social order in one phase at least."

In regard to our natural resources Mr. Irvine took the St. Lawrence River as an example. The power is owned chiefly by Sir Herbert Holt. The question that arises in the mind of the average person is that since there are nearly 11,000,000 people in Canada and only one St. Lawrence River, how did he get the ownership of its power? Many of our products were produced in factories supplied with power from the St. Lawrence river. Everyone of the articles has been assessed by this owner for being allowed the privilege of using our power.

When you realize that you are not able to produce the second side to bargaining because bargaining always implies two sides you can see the unfortunate position in which you are placed. It is in this way that the farmer and wage-earner is exploited in many of the ways illustrated above.

Watered stock is another cause of increased price. You have to pay on this stock because you have nothing to say as to the price of your necessities nor have you anything to say as to the price of your products which you sell. This exploitation was illustrated further by Mr. Irvine when he used the evidence taken by the commission last year in which Sir Herbert Holt informed them that he and his syndicate had taken $15,000,000 over a period of years on an investment of $150,000. On another page of the evidence he went on to show that certain people were paid from 3 cents an hour to $9 a week in these same factories.

In the monetary system we have a still further exploitation. If your grandfather had invested $5,000,000 he and his heirs would never have to work because of the capitalistic system. They would live on interest. Labor and raw material represents cost but interest never does. Here is another virulent form of exploitation.

Exploitation was pointed out by Mr. Irvine because of the dividing up wealth annually. It is like a separator. The cream goes to the one about as long as the machine is working. While it is working cream will never come out of the skim milk spout because of physical laws. Capitalism is like this too. As long as this system operates the machine will never stop exploitation. There are people who for the past twenty or thirty years or longer, have been sitting under the skim milk spout watching for some of the cream. To date they have not received any.

The C.C.F. plan proposes to get rid of exploitation by getting rid of the system as it operates today. The power of the St. Lawrence river would not be given to private owners. The profit would come to the state. "We propose to take over the social machinery of the nation."

In the matter of private property, when people have little they are not averse to losing it. When they have nothing at all they are very afraid of losing it. "Private property is any sort of property I may use and own, but which does not prohibit anyone else from owning and using a similar property. The C.C.F. does not want to own this. Your own home, or furniture, clothing, etc. are your private property. Every one can own a home but cannot own a railway or a bank or a St. Lawrence river. If [illegible] valuable resources are given to private owners, exploitation will always take place. A power river or any other resource is the property of the nation, and not a private property.

A factory should be owned by the people. It took hundreds of years to develop this. Millions of people's brains were used in the improvement of the factory and machinery. Therefore, the factory should be the property of the nation. The factory is not for self. It is a social heritage of man. This is public property. The C.C.F. proposes to take out the hands of private control these public properties.

In building a new social order we are attempting to put as its main objective the happiness of you and your children. Today Canada has no purpose. We cannot help in getting nowhere. When we do not know where we are going how will we know when we get there? There is no man today who can say for what ideal Canada is standing at the present time. The C.C.F. has a purpose in economics, viz. a human purpose.

A farmer chooses his seed carefully, and cultivates it well. Just as this is the case in farming, so in Canada there must be a great people to procreate and be raised in a proper environment. Science must be used in this. Those who come after should have this condition in which to arise. It became a kingship.

other selection by the Bardo male quartette the meeting was thrown open for questions.

The meeting then closed with the singing of O Canada.

FEEDING TERMS ARE EXPLAINED

A great many farmers who read agricultural articles miss a great deal of their value because they do not understand the meanings of many of the terms used.

Although most writers in agricultural journals try to avoid the use of technical terms, it is sometimes necessary to use them as often one such word will express an idea which it would require half a page to explain in any other way. However, in order to increase the value to [illegible]ers of articles on farm problems [illegible] Dominion Experimental Station, Lacombe, has compiled a list of these terms, together with explanations in the simplest possible language.

One of the most widely misunderstood terms is "balanced ration." For all practical purposes, a balanced ration is nothing more than that mixture of feeds which will produce the quickest and most economical gains. Contrary to public opinion, it is not always costly to feed such a ration. In most cases when a balanced ration is fed, the cost is actually less than when other rations are used because [illegible] gains are secured from equal weights of feed; and in addition to this, less time is [illegible] for feeding, and greater returns are secured from the superior type of carcass [illegible]ced.

[illegible] term which causes many readers to throw up their hands in horror is assimilable matter." This is merely feed in such form that it may be readily used by the body for building meat, bones, muscles or tissues, or in heat and energy maintenance. As an illustration, iron in its solid form cannot be used by the animal body; but after it has been dissolved and absorbed by plants, animals can readily use the iron contained in the plant, it is then in assimilable form.

"Supplementary feeds" are those which are fed along with grain to supply materials in which the grains are wholly or partially lacking, but which are necessary for animal growth. In other words, by adding supplementary feeds in the proper proportions to the grain ration, the ration is balanced.

"Fats" are the form in which the animal body stores most of its reserve food, and they form a chief part of the fatty tissues of the body. Hence, for finishing animals the ration must be high in fats.

"Carbohydrates" are the starchy portion of the feed, which supply heat and energy, and produce fat.

"Fibre" is that part of the feed which is largely indigestible, such as oat hulls. It has no actual feeding value, and if present in too great a proportion may be harmful.

"Protein" is the chief constituent of lean meat, tissues, skin, etc. and makes up about one-sixth of the animals body weight. Since the cereal grains contain only a relatively small amount of protein, in order to ensure maximum growth and development, provision must be made for an additional supply of this substance.

Not The Job, But How We Do It

The day returns and brings to us the petty round of irritating concerns and duties. Help us to play the man. Help us to perform them with laughter and kind faces.—Robert Louis Stevenson.

The Kings of Britain

The following was a short talk given to the students of the Tofield High School and Intermediate school on the occasion of the celebration of the birthday of our new sovereign, King George VI.

"This morning we celebrate for the first time the birthday of our new King. Owing to the unusual and extraordinary events which have taken place within the past few days, I think that it would be worthwhile to mention a few outstanding facts in [illegible] to our sovereignty.

In Ancient Britain there [illegible] first the chiefs of the Britons, who had as their equals almost, in power, the Druids. When the Romans captured these people these rulers were displaced. After they went away they left certain relics, but the chief things that have come down to our times have come mostly since their control.

The Jutes, Angles and Saxons came from the country which we now know as Germany on the invitation of the natives who were being overcome by the people to the north of the island. When they arrived they took the country over. They introduced their customs which included a rough parliamentary government with a chief at the head. At certain intervals this group would meet on their moot hills. Their oldest relative was usually the chief. As the tribes grew in size it became more and more impossible for the ordinary people to know their chief personally. He was the connecting link with other tribes. When the Danish people invaded the country it was necessary for the people to be more united so the tribes made unions and the chief of this union became so far removed from the common people that the element of superstition entered into the chiefship. After a few further remarks [illegible] an-

When the Normans came over they brought with them a more highly developed feudal system. This was ruled over by the king and his Great Council of nobles. This made the king still further removed from the common people. Thus the way was paved for the Theory of Divine Right which caused so much trouble in later times.

The only trouble that was growing up at this time was the opposition [illegible] the nobles. They were in some cases as powerful and could control as many followers as the king could. This led to many troubles in the line of succession to the crown. William the Conqueror was followed by his son William Rufus, who was murdered. Next came his second son Henry I. After Henry's excellent rule a weak nephew Stephen, succeeded. It was during this reign that the apparent weakness of the king's power became noticeable. In regard to the nobles Henry II, grandson of Henry I, became king. He was a very good ruler and early re-established the throne in its strength. However his later years were spent in overcoming rebellions led, in most instances, by his sons. He died after having been defeated by his son Richard and forced to sign a humiliating treaty.

Then came the Crusades. The kings, needing money, sold charters to groups of freemen for the formation of towns. Thus one of the nails was hammered into the coffin of feudalism. Richard was away most of the time in the Holy Land. His brother John, plotted against him. He forgave his brother, went away to the Crusades, and was killed in battle on the Continent. John was so bad that the nobles started against him. To get the help of the poorer classes he allowed them to send representatives. This did not stop them from siding with the nobles and John was forced to [illegible] sign the Magna Carta at Runnymede in 1215. By this the king was forced to agree to the following terms:

(1) That the Law will be sovereign and the king must obey them as well as anyone else in the kingdom.

(39) "No freeman shall be taken or imprisoned or dispossessed, or outlawed or banished or in anyway destroyed, nor will we go upon him, nor send upon him, except by the legal judgement of his peers, or by the law of the land."

(40) "To no one will we sell, to no one will we deny or delay right or justice."

(12) "No scutage or aid is to be levied upon our kingdom except by common counsel of our kingdom."

John felt so pleased after signing this that, we are told, he grovelled on the ground and tore up the dirt in [illegible]. He did not intend obeying this but before he could do very much he died as a rebellion [illegible] breaking out.

Henry III was the next king. He ascended the throne when nine years old. As long as his regents were looking after affairs of state all went well. When he took charge things grew worse and worse until Simon de Montfort rebelled and put both Henry and his son Edward in prison. They later escaped and overthrew the power of Simon de Montfort. He was killed in this battle. Henry died while his son Edward was on a Crusade. When Edward came back from the Holy Land he became Edward I. He was wise and strong. He saw the advantages of Simon's First Parliament which had been held in 1265, and in 1295 called the Model Parliament." This included two knights from each shire, two tradesmen from each town and representatives from the Lower Clergy. In addition to the Upper Clergy and Higher Nobles. Thus the parliament came into being. In 1341 it was divided into two parts, an Upper house and a Lower House. It was during the reign of Edward I that the Scotis Stone was brought down from Scotland. King George VI will be crowned upon this stone next May, just as all English Kings have since been crowned.

So we could go down with the history of these kings. After Edward I came Edward II, his son, a weak ruler. This king was so poor that he fled from London, was captured in South Wales, and imprisoned in Berkely Castle. Parliament ordered him deposed. He was afterwards murdered in his prison on Sept. 21, 1327. Thus the first deposition in English history took place.

Edward III ascended the throne upon his father's deposition at the age of 14. He ruled for 50 years. During his reign the Hundred Years War started. This was the war which so decimated the nobles that their opposition to the king grew practically non-existent by the time of the Tudors. Richard II, a grandson of Edward III came to the throne in 1377. His was a [illegible]. He was forced to abdicate in 1399 and his cousin, Henry of Lancaster became king. This is the first abdication in English history. It was forced from Richard by threats of Henry. When he died on February 14, 1400, few people doubted that he was not murdered.

Henry of Lancaster became Henry IV. He was succeeded upon his death by Henry V. When he died he arranged for his successor, his son, Henry VI, who was one year old. This contrasted with parliament having elected Henry IV to be king. The War of the Roses took place during Henry VI's reign. It went on in dispute, over the succession, killing off the nobles more than ever. Henry VI was made a prisoner in the tower of London and Edward IV seized the throne. He lived a tranquil life and was succeeded on his death by his son Edward V, then 12 years old. He and his brother were smothered in the tower of London. Edward had been deposed. Richard III the perpetrator of the crime seized power and ruled for two years. He was killed at Bosworth Field by Henry Tudor.

Thus the Tudors came to the throne with much greater power than any previous kings. The nobles were done away with, largely, the tradesmen were richer and could give the king more help. They were also more willing to respect him than the haughty nobles. So the succession [illegible] through the reign of Henry VII, Henry VIII, Edward VI, Mary I, Elizabeth, until the Tudor line had no descendants. They then went to the great grandson of Henry VII in Scotland, James VI of Scotland. Thus the Stuarts came to the throne of England.

The Stuarts tried to enforce the theory of Divine Right on the people, who had been becoming more powerful in the later parliaments of the Tudors. This, along with other local things caused Charles I to lose his head in 1649. During the reign of Charles I he had been forced in 1628 to sign the Petition of Right. This had among its terms the following important ones:

1. King must obey the laws of the land.
2. The imprisonment of any man without cause shown to be illegal.
3. Any "gift, loan, benevolence tax, or suchlike charge" without parliamentary grant was unlawful.

When Charles II came to the throne in 1660 he was on the crest of a wave of enthusiasm. He tried to make things easier for non-conformists, but parliament, becoming alarmed passed the Test Act, which said that all officers of the government of Crown had to take the sacrament according to the Established Church. This followed for over one hundred and fifty years in regard to all but the kingship. The sovereign still takes the declaration stating he is a protestant. This has been changed a little since 1711. All the Tudors had died natural deaths and the succession had been normal with the exception of the attempt of the Duke of Northumberland to put Lady Jane Grey on the throne instead of Mary. She reigned 14 days but the people of England did not wish to have the line of succession interfered with. The Stuarts had succeeded and James had died a natural death. Charles I was beheaded. The only instance of this occuring. The Rump, was of course an unconstitutional body so his death was really murder. Charles II died and was succeeded by his brother James 1, who tried to rule by Divine Right and make England Roman Catholic. William III was invited over by parliament because his wife was the daughter of James II. He tried not to capture James II but unfortunately he did. However he let him escape and James II fled to France.

A parliament called a "convention" (because it was not summoned by a king) met and voted that:

> "King James II having endeavored to subvert the constitution of the Kingdom, by breaking the original contract between king and people, and by the advice of Jesuits and other wicked persons having violated the fundamental laws, and having withdrawn himself out of the kingdom has abdicated the government and that the throne is hereby vacant."

On February 13, 1689 William and Mary were declared sovereigns. Thus the kingship was not vacant until January 22, 1689. For a period of 22 days there was no king.. I believe this is the only occasion in British History where this occurred. On the death of William and Mary the succession was declared to go to Anne, another daughter of James 11. Then it was to go to the descendants of Sophia of Hanover, a granddaughter of James I of England. Thus George I, her son succeeded Anne. Then came his son, George II followed by his grandson George III. George III was succeeded by his son George IV in 1820. In 1830 his third son William IV succeeded. Upon the death of William IV in 1837 the daughter of George III's fourth son, Victoria became Queen. She was succeeded by Edward VII, her son. Then came George V, Edward VIII, the first son of the late King George V and Mary the Queen Mother, reigned from January 20, 1936 until December 10, 1936. This made the third shortest reign in the British History. It was also epoch-making due to the fact that this was the first time a king of England had laid aside the sceptre voluntarily.

All the king and queens of the Houses of Hanover and Windsor have died naturally and the line of succession has carried on in the normal way. This is the first unusual break since the accession of William and Mary to the throne.

Our feelings are rather mixed in this matter. According to the Act of Supremacy, the king of England is head of the Church of England. Article 37 of the Articles of Religion of the Church of England accepts this. Article 20 of these articles also gives the Church power to decree Rites or Ceremonies, and authority in Controversies of Faith. The Church of England do not have to marry any divorced person. They therefore could and would refuse to allow the marriage of King Edward and the lady of his choice to take place in the Established Church. It could not constitutionally take place in any other church. Thus the constitution makes a law of divorce possible for everyone yet does not allow the king alone to marry a divorced person. For this reason King Edward had to make his choice of whether he would abide by the constitution or have parliament pass amendments to modify the constitution. Parliament could not see why they should amend it. If they did it meant putting an amendment in for the person of his Late Majesty [illegible] not for the King. It would undoubtedly have caused a sharp division between the strict constitutionalists and the other people. So Edward VIII, ever an astute observer, not wishing to cause any schism of this nature in his empire, in which he was beloved from end to end chose the solution of abdication in favor of his brother Albert Frederick Arthur George, second son of his late Majesty King George V and Mary, Queen Mother of England.

We thus have the unusual events of celebrating the second birthday of our sovereign this year. After a King dies there is a period of mourning. So the coronation does not take place for at least a full year following his death. In this way Edward VIII was not crowned, although he was king from January 20, 1936. His abdication must add a great deal of gloom to this birthday celebration. However, Albert Frederick Arthur [illegible] our present king is well-known as a favorite member of the Royal Family. He was born on December 14, 1895 at Sandringham in York Cottage a year and six months and twenty-one days after Edward Albert Christian George Andrew Patrick David had first seen the light of day.

His early life was spent with the rest of the family in the same way as any normal English child.. He could be found in the same kind of mischief as any other child. The royal mischief I think can well be brought home to you by a little bit his father once got into. Queen Victoria was most annoyed on one occasion because her favorite grandson had misbehaved at luncheon. She ordered him to get under the table. After some minutes of great silence the Queen relented and told him that he could return to his chair. The next minute there were polite gasps from the few guests. Having nothing better to do during his improvised punishment the small boy had undressed himself. When he crawled from beneath the table he was as naked as the day he was born. Now I must say that I have not read of a similar incident with regard to His Majesty, King George VI, but you can see how even kings can get into mischief.

When he was old enough the Duke of York entered the Navy. As time went on he was promoted in this service. He was always trained in a sympathetic family manner, just as his brothers and sister. In the spring of 1923 the Duke of York married a commoner, Elizabeth Bowes-Lyon, the daughter of the Earl and Countess of Strathmore. They have two children, Princess Elizabeth and the next line of succession, and Princess Margaret Rose. Since their marriage the King and Queen have endeared themselves on the people of the Empire. The have done much of the work which trains them so well in matters of social affairs. In addition they have learned to know the people over whom they rule in a very fine manner.

I think you will all join with me in wishing His Majesty many happy returns of this day. May he have many years to reign over us in happiness and prosperity. Also I am sure you join me in the age-old wish "God Save the King."

TREES AVAILABLE FOR FARMERS

In connection with the statement of the Alberta Government published last October regarding certain types of trees being available to farmers for transplanting it was learned in an interview given today by the Honourable C. C. Ross, Minister of Lands and Mines, that a large number of Lodgepole Pine, and to a lesser extent Scotch Pine, are still procurable from the Forestry Division of the Department. As a result, applications for these two species for transplanting next spring will continue to be received up to January 31st, 1937.

The stock referred to is stated to be large and healthy. It is available only for additions and replacements in windbreaks and natural bluffs. Application forms are obtainable from the Director of Forestry, Department of Lands and Mines, Edmonton.

ELECTRICAL Gifts
Always Most Prized

No woman can resist the smart beauty of reliable Electrical Gifts. Nor can she resist the ever-deepening appreciation of their utility and convenience as day by day they lighten her household tasks. They add grace to her entertaining, tastiness to her meals and give her hours upon hours of extra time for pleasure and play. Make Electrical Gifts your first choice. You'll then give gifts which bring forth instant spontaneous enthusiasm, and also lasting gratefulness for the ease, convenience and freedom, which Electrical Gifts provide at such little cost.

Calgary Power Co., Ltd.

LAKESHORE

Miss Margery Murray was rushed to the hospital in Edmonton on Tuesday with appendicitis.

Miss Marjorie Ferguson is in the Lamont hospital with rheumatism.

A meeting of the Social Credit study Group was held in the Lakeshore school on Monday evening.

Mrs. George Francis is leaving soon on a visit to Ontario.

J. H. Johnston left on the 7th for a visit to England and Scotland, where he will spend Xmas with his mother whom he has not seen for thirty years.

The annual Xmas Concert of the Lakeshore School is being held on the 22nd.

WOODLAWN

The whist drive held last Friday evening in the Woodlawn school, though it did not receive a large attendance was quite a success. Ladies' first prize was won by Mrs. Franklin Ray. Gent's first by Mr. Richard Lougheed. Ladies' consolation was won by Mrs. O. I. Cookson and the gent's was won by Mr. Jim Williams. After lunch the young people enjoyed a few hours dancing. Special thanks are given to those who helped to make the whist drive a success.

Miss Margaret Cookson and Mr. Hugh Bruce were visitors at the Wilson home last Sunday evening.

Miss N'a Cookson is ill with a severe cold.

Mrs. Jack Wilson will accompany the Christmas anthems for the concert, on the organ, Tuesday evening, December 22.

CARD OF THANKS

Mr. H. Kleinschroth and family wish to thank friends and neighbors for kindness and sympathy shown to them in their recent bereavement, also for the floral tributes received.

BUSINESS CHANGES

A business change of interest to Tofield and district took place on Monday when the Central Meat Market went under new managership. The new manager and owner of this establishment is Art Fose, an attractive young fellow from Camrose who purchased the equipment from Mr. Roseland, who readers will remember owned and managed the business last winter.

Walter Bellamy who leased the equipment from Mr. Roseland in the spring and who has been operating the shop all summer has opened a butcher shop in the building formerly owned by Mr. H. Kendall, located opposite the Crown Lumber building. So Tofield is fortunate in having two butcher shops.

USED ARTICLE EXCHANGE NOW IN OPERATION

Not since the days of "Dad" Forbes has Tofield been favored with a used article exchange. Mr. Forbes had his establishment immediately north of the Royal Alexandra Hotel, it being burnt down quite a number of years ago. Now we have as yet a small but bright and enterprising establishment conducted by Stinson and McCarthy, located near the telephone office.

S. STAUFFER HAS CAR MISHAP

Returning from Chicago where he had taken delivery of a new La-Fayette automobile, S. Stauffer was unfortunate enough to run into trouble on the Calgary highway near Innisfail.

Mr. Stauffer was driving and had with him Arthur Francis, when, due to the icy roads the car skidded over the grade into the ditch. It must have struck something solid as both men were thrown out of the car. Fortunately they did not suffer serious injuries though Mr. Stauffer did were badly shaken up. One side of the car was badly damaged.

POST OFFICE TO BE OPEN FOUR HOURS CHRISTMAS DAY

In conformity with new post office regulations the local post office will remain open four hours on Christmas day. The hours chosen by the local postmaster are from 8:00 a.m. to 12:00 noon. This will take care of any mail arriving on the morning train from the east and will enable local residents to obtain their Christmas mail right up to noon.

Rural residents, those on rural mail delivery routes will also have a Christmas day delivery.

FLORAL TRIBUTES SENT TO LATE MRS. W. O. GLOVER

Willie and the boys; Beckie; Brothers and sisters; Jack and Louie; Mr. and Mrs. J. S. Glover; Mrs. Baptist and Jean; Mrs. Smith, Stanley Smith, Bob Smith and family; Tofield Operators: Mr. and Mrs. Reid Burchard; Mr. Dunn, Mrs. Wallen and her three God-children, Carson, Eloise and Delwyn; Mr. and Mrs. A. Tucker, Lindbrook; Mr. and Mrs. F. R. Daniel and children, Edmonton; Gran and the McCarthys; Bill, Sid and the Worton family; Mr. and Mrs. A. B. Clutterham; Mr. and Mrs. E. Rogers; Mr. and Mrs. G. B. Bruce and Jim; Holy Trinity Congregation; Mrs. Tofield and May; Mrs. Davison and Bill; Mr. and Mrs. T. W. Taylor and family; Mr. and Mrs. A. A. Bearnes and family; Mr. and Mrs. M. C. Nash LaFayette Introduces 1937 Models

Three distinctive new lines of modern motor cars have been announced by the Nash Motors Company for 1937. Bigger and roomier, smartly styled, each series is a leader in its price class. While retaining all popular Nash features and built to conform to the high Nash standards of quality, the new models have been improved and refined in body, chassis and motor. Every feature adding to safety, comfort, performance and economy has been engineered right into the 1937 Nash LaFayette cars. Leader of the line is the aristocratic Nash Ambassador Eight. Next in size and price is the Nash Ambassador Six. In the low price field is the Nash LaFayette-"400". Pictured above at the left is a head-on view of the Nash LaFayette-"400." At the right is the front view of the Nash Ambassador Six. Below is shown a side view of the Ambassador Six four-door sedan.

A Christmas Story

aim et to a whisper

But there were some sinister [illegible] at work " he continued "for within six months Lady X had her right arm which was removed through cancer

"The years passed by [illegible] to live abroad, and Lady X, through living on her own [illegible] somewhat eccentric. She [illegible] had a fear of dying [illegible] as she was not perfect [illegible] that only the perfect [illegible] would enter heaven [illegible] thought she would not be admit[illegible] [illegible] with her old law[illegible] who lived on the estat[illegible] who managed her affairs

To appease her troubled mind the [illegible] that she sh[illegible] [illegible] This should be buried w[illegible] and then he said, 'When Peter [illegible] you and realizes how mu[illegible] you are than [illegible] doubtless let you [illegible]

[illegible] arm was made and when Lady X was called [illegible] golden arm was [illegible] In her endeav[illegible] home the good lady [illegible] penny to the [illegible] Lawyer Jarvis [illegible] for happiness in his [illegible] consideration that [illegible] nosed him was left [illegible] suddenly became [illegible] golden arm and [illegible] at night for the treasure that lay [illegible] Get that arm [illegible] be open for [illegible] Christmas Eve [illegible] the stone [illegible] [illegible] quickened pulse [illegible] and raised [illegible] he viewed [illegible] the peaceful alabaster face of [illegible] X

[illegible] heaven all right" he [illegible] Now she won't need [illegible] raised the wr[illegible] [illegible] removed the [illegible] to the hut [illegible] which he was temporarily [illegible] which had once been the [illegible] the gardener [illegible] famous iron saucepan and [illegible] intended melting down the gold As he ra[illegible] the arm to the pot two faint kn[illegible] the door broke the awful [illegible] the house Trembling with fear he hid the arm and went to [illegible] There was no one [illegible] wind howled and the snow [illegible] evergreen [illegible] white as the face [illegible]

Old Lawyer Jarvis was [illegible] night and [illegible] and hid his head [illegible] the red g[illegible] upon the [illegible] What [illegible] there in [illegible] to answer [illegible] know [illegible]

[illegible] Christmas evening the [illegible] arm were again [illegible] He [illegible] there was nothing to worry [illegible] he lifted the [illegible] before [illegible] again as two knocks [illegible] those of the previous [illegible] on the door With [illegible] the bolt [illegible] no one there, only [illegible] deeper than the night [illegible] moon was fuller and [illegible] Certainly he de[illegible] [illegible] up in the morning [illegible] melting pot again [illegible] Lawyer Jarvis decided [illegible] were [illegible] that he [illegible] New Year's Eve [illegible] a good opportunity [illegible] by December 31st he had [illegible] to proceed with his [illegible] task Melting pot and arm ready he lifted the [illegible] slowly [illegible] There was a sound [illegible] the pot [illegible] Come what [illegible] put it in the pot now [illegible] As he did so the win[illegible] violently and two [illegible] than ever before [illegible] and indeed the whole [illegible] Jarvis threw the arm from [illegible] He tried to be [illegible] It's only the wind and the [illegible] the wind and the snow, [illegible] to himself between gasps [illegible] Only the wind [illegible] He [illegible] Summoning his [illegible] he opened the door

[illegible] was clouded over but [illegible] Jarvis could see a dark [illegible] the figure of a man [illegible] Gardener James! [illegible] for a moment

then the figure said slowly but deliberately, 'I want my arm!'

Next day the village learnt that Lawyer Jarvis had died the previous night of heart disease What a coincidence it was that Gardener James's son the very spit of his father when he was his age had turned up in the village! Quite by chance he happened to be employed by the firm of undertakers who were attending to Lady X's vault which was to be permanently sealed. On second thought was it by chance? After all, Lady X had said to his father: 'I would give my right arm' . . . Anyhow the [illegible] was settled at last"

Uncle Joe sighed as he finished the story and we all clapped loudly

"But when do you die, Uncle?" asked Gloria

"It must be after the story is related Gloria said my Uncle good humouredly I can't die before now"

WORLD OF WHEAT

The price of wheat is governed by [illegible] available and as well by the demand for those supplies

It is because we forget "demand" that we are sometimes disappointed when price does not rise as we think it should Two years ago, for instance, we heard of a serious world shortage of wheat and coarse grains, yet prices, to our disappointment, did not rise. Why? Simply because the demand fell off to the same extent [illegible] had become decreased.

Happily now and then, the reverse is the cause. We have had a good instance recently.

During the past few weeks it became apparent that the crop of the Argentine was larger than expected, so naturally wheat prices began to decline Suddenly unexpected demands for wheat appeared, so that [illegible] the weight of the larger supplies prices actually rose

As far as can be judged the extra demands came from some countries which are "stocking up" with wheat, [illegible] preparation for war, [illegible] because of fear of it

It seems apparently that large supplies of wheat are just as necessary to [illegible] a war as are supplies of copper, nickel, lead, cotton, rubber and oil

---

Prices have tended to be raised by the following. European countries [illegible] wheat heavily—Fear of war [illegible] Europe continues Private [illegible] [illegible] China starts purchasing [illegible] Germany purchases Canadian [illegible] under new trade agreement Fears that rust epidemic may [illegible] Western Canada [illegible]

[illegible] have tended to be lowered by [illegible] Harvesting of wheat [illegible] general in Australia—Seeding of Italy's crop proceeding favorably—Rains occur in North Africa—India [illegible] barley heavily—Argentina [illegible] countries make heavy shipments of maize and rye—Rains benefit newly sown Indian crop

UNITED CHURCH NEWS

The Christmas services held at Ketchamoot and Tofield were well attended

The Junior choir wearing their surplices for the first time gave a splendid rendering of the Cantata, "The Divine Gift " Mrs Stinson is to be congratulated on the fine success of her efforts It contains the Christmas message and the music is excellent

In the evening the senior choir brightended the service with anthem, chorus, and [illegible] were greatly enjoyed by the large congregation

Next Sunday, Dec 27th, the junior choir will repeat the Cantata by request at the evening service

It is the last Sunday of [illegible] let [illegible] come with grateful praise into the Sanctuary

The United Church Sunday school Christmas tree and concert was held on Tuesday evening, 22nd The church was packed Every item in the program was interesting and the [illegible] put things [illegible] great style The adults were kept in great humour and applauded heartily the effort of the boys and girls Santa did not forget to leave candies for the boys and girls

TOWN COUNCIL MEETING

A regular meeting of the town council was held on Monday December 21st at which were present Mayor Brace, Councillors Swift, Lovel Hammond, Bellamy and Coutts No business of particular importance came before the meeting, such business as was transacted being of a routine nature No further information had come to hand regarding the proposed refunding of debentures The town office will be closed Boxing Day as well as Xmas Day

KETCHAMOOT

Another year has rolled around and time to wish a Merry Christmas and Happy and Prosperous New Year to the editor and family, correspondents and all readers of the Mercury

The school concert will be held Wednesday evening, Dec 23 Owing to lack of room to accommodate the crowd it was not advertised in advance The school attendance is [illegible] pupils

The Social Hour club are putting on a whist drive at the Henry McGinitie home next Wednesday evening Dec 30 Nice prizes will be given and a delicious lunch will be served Everyone welcome Admission 25c

Mr. Lewis Carlisle left Saturday evening for Reinbeck, Iowa to spend Christmas with his wife Mrs Carlisle and to visit relatives and friends Mrs Carlisle's mother is gradually failing in health

Mr. and Mrs Herman Lawson, Mr and Mrs Fleming and Mr Sterret marketed turkeys to Edmonton Friday of last week

Mr and Mrs H McGinitie and [illegible] and Mr John McGinitie were [illegible] visitors Saturday

Mr and Mrs. Oliver Thompson, Miss Selma Nomeland and Julius Lerbekmo marketed poultry to Edmonton the first of the week

Mr and Mrs. Sears, Miss Hazel and Charley were Christmas shoppers in Edmonton Friday last

[illegible] getting ready [illegible] Christmas [illegible] Merry Christmas

AMISK CREEK

The boys around here have been busy flooding the skating rink They are hoping to have it ready for Christmas In the meantime they have been skating on the railroad dam Last Wednesday they had a party, cake, sandwiches and coffee being indulged in As it was Glen Hillerud's birthday a birthday cake was also enjoyed

Hilmar Moen arrived home last week from Wastenan where he has been the second man at the elevator

Hilmar Moen and Ole Berild motored to the city to spend a couple of days there last week. Merl Hillerud who is attending Normal School returned with them.

Mrs J Jacobson, Truman and Ma[illegible] visited at the Plaster home Wednesday evening of last week.

Mr and Mrs J Berild and Mr R O. Berg motored to Miquelon lake last Sunday and visited Miss R Berild who is teaching the [illegible] there

Mr and Mrs R O Berg motored to the city last Monday. Lilly, who is attending university returned home to spend the holidays at home

Well Christmas is now drawing near and another year is at its end so we take this opportunity to wish the Editor and staff and all the readers of the Mercury a Merry Christmas and a Happy New Year

U F W A NOTES

The November meeting was held in Tofield at the home of Mrs. Seale. Mrs Booth gave a very interesting paper on "The Work of the Institute for the Blind " The program committee, Mrs Bigland, Mrs. J Warner and Mrs Baptist had planned a splendid program for 1937, which was reported by Mrs Bigland It was decided to send a dollar to the Edmonton branch of the W I L P F for peace literature

The Annual meeting was held Dec. 10th in the Municipal Hall The election of officers was the chief business of the day We were fortunate in being able to retain Mrs Murray and Mrs Olson as president and secretary treasurer Mrs Anderson was elected vice-president and the directors appointed were Mrs Booth, Mrs Bigland, Mrs Harrison The Sick committee is composed of Mrs. D Warner, Mrs. Erickson, Mrs Jacobson. The choosing of a press reporter was left until another meeting. Enough funds on hand to send a delegate to the U.F.A convention to be held in Calgary in January Mrs Torrie was chosen with Mrs. Olson as alternate delegate Mrs Bigland and Mrs Baptist were appointed Resolutions Committee

The next meeting will be held in Tofield on January 14th

In the Editor's Office

"'Cold embers!' Did you ever hear of cold embers?"

"Sure November and December"

CHRISTMAS LUCK: OMENS USED IN DAYS LONG AGO

Do you know that a full moon at Christmas day is supposed to be unlucky, the saying going:

"Light Christmas, light wheatsheaf; dark Christmas, heavy wheatsheaf" and that a windy Christmas and a calm Candlemas were held as omens of a good year Rain during the twelve days after Christmas was said to foretell a wet year to follow. When decorating the house with Christmas holly be careful not to burn any leaves or berries that fall, but put them carefully away until Twelfth Night when they should be burnt with the rest of the decorations Then luck and happiness will follow; but if so much as a holly leaf is burned beforehand you are courting disaster says the old-fashioned country folk who set store on Christmas omens. Look to your fire on Christmas day, for if it burns brightly it is a sign of prosperity; if however, when the fire is first lighted it smoulders and refuses to "draw" setbacks may be looked for during the year to come.

Wear something new on Christmas day if possible, "for luck" and be very careful to put on no garment with a hole or tear in it, otherwise you will lose money. Also, remember that the first words spoken in the day should be cheerful to speak a word of grumbling is to court bad luck.—Montreal Herald

Here and There

Opening [illegible] weeks earlier [illegible] snow fall [illegible] season in Quebec province was off to a [illegible] Canadian Pacific [illegible] as well as regulars crowded with enthusiasts on the first week-end thereafter from Montreal to the Laurentians.

The Empress of Britain will start the winter cruise season from New York December 29 on a [illegible] day voyage to the West Indies and Cuba. It will carry its [illegible] night club of Broadway entertainers and a smart dance [illegible] Empress of Australia, between January 7 and March 26 will make six cruises of eight, nine, ten, 14 and 18 day duration to the West Indies all from New York.

[illegible] home for Christmas and [illegible] was the unusual present suggested for the year end by G. E. Carter, general passenger agent Canadian Pacific Railway, Montreal, as he explained the company's pre-paid ticket plan for sending transportation to [illegible] relatives and friends. Arrangement of details of such plans is extremely simple, Mr Carter said [illegible] tickets cost [illegible] telegraph [illegible] will reach [illegible] service [illegible] Christmas and [illegible]

[illegible] and world skiing [illegible] will have an opportunity [illegible] the Rocky Mountains' [illegible] having the facilities [illegible] Canadian [illegible] are held [illegible] the steep [illegible] miles from the Canadian Pacific Railway station at [illegible]

According to announcement by Canadian Pacific Communications Department [illegible] Christmas and New Year's greetings of pre-arranged messages [illegible] will be again available [illegible] public this year. Within [illegible] or within Western Canada they will be accepted at the low rate of 25 cents. Between eastern and western Canada and from points in eastern and western Canada to points in the U S.A. they will be accepted at 40 cents. [illegible] are subject to government tax

A gift to the Province of Ontario from the Kerry Hill Flock Book Society, in North Wales ten ewes and one ram, of the world famous Kerry Hill sheep are now at the Ontario Agricultural College Guelph. The [illegible] was arranged through W [illegible] [illegible] "Whig [illegible]" and the sheep, known [illegible] are expected [illegible] popular [illegible] an outstanding breed, [illegible] for their adaptability to any environment, and for their general utility.

[illegible] Pacific semi-streamlined air conditioned trains which have been a feature of railway [illegible] year, have had [illegible] and are now [illegible] shown at [illegible] of the big department stores in the form of models. These miniature trains are having great success with the kiddies who are given rides in them in the stores and then have the op[illegible] of getting a toy train for Christmas, built on the same lines as the miniature.

PARCELS—

PERHAPS THE most inconspicuous thing in the world is a parcel Not the contents of a parcel but the mere package. That is in ordinary times. A parcel may contain anything, things good to eat or good to wear, things pretty and beautiful; magnificent or grand. Or a parcel may contain things that are poison to man and beast; things ugly and an offence to the eye; things that sear and burn, even sometimes explode A parcel may contain nothing but a clod of earth wrapped solely as a first of April joke, worth less than nothing, if this be possible; or it may contain precious jewels worth a king's ransome An ordinary parcel may contain something that is as common as sand or it may have packed safely within, an article as rare as radium. Within the string and brown paper fastenings of a parcel is often a key to the flood gates of human emotion Joy and sorrow, laughter and tears, exultation and despair, hopes fulfilled and bitter disappointment, all are found by someone, sometime, in that inconspicuous thing—a parcel.

That is, as we have said, in ordinary times. But Christmas time is not an ordinary time. Even if we count the Christmas season as of a week's duration, it is a 52nd part of a year An extraordinary 52nd part And this is the Christmas season. This week in Tofield I have seen many parcels. On the post office floor they were in piles. I have seen people taking them out and taking them in—and they were equally happy doing either I have seen them hurrying away from the post office, parcels clutched tight under their arms, a smile—one could almost say a grin—on their faces We have all been taught since childhood, that among other things, Christmas is a time of holly, mistletoe, turkey, roast beef and plum pudding, and choice viands of every kind, but it is surely also a time of parcels We said at the beginning that a parcel was the most inconspicuous thing in the world—but not a Christmas parcel. A Christmas parcel may contain articles of rare value or of relatively little worth, but they contain—and exude—an element priceless beyond words—good-will. Without good-will there would be no Christmas parcels For fifty-one weeks of the year we count our pennies and weigh our parcels, but this extraordinary fifty-second week we say, not how much am I going to get but how much am I going to give. Even children impregnated in the belief of Santa Claus and his spontaneous gifts, like to give as well as receive, otherwise how would you count for so many lunches set out in homes on Christmas eve.

We like the tone of the following note to Santa Claus:

> Please bring me a bisikkle so I can get to school on time. Also a punching bag so I can get strong fer moweng the lawn, and a big red waggon so I can bring in stoav wood. I need roler skates too so I can run errands faster for mother.
>
> Yours truly,
> Willie Jones

HEALTH

A HEALTH SERVICE [illegible] THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

BLOOD PRESSURE

Blood pressure is the force that the heart exerts in order to pump the blood through the circulatory system. The heart is a hollow muscular organ which acts as a pump to keep the blood in circulation. The blood leaves the heart in two stream One stream carries the blood to the lungs where it is purified; the other stream goes to all parts of the body, carrying food to the tissues.

The arteries are hollow tubes which carry the blood. Normal arteries are soft and elastic. The impulse of the heart beat is carried along through the arteries and can be felt at the wrist, where it is called the pulse.

In the normal, healthy body, the blood pressure is normal Certain abnormal conditions particularly those affecting the heart, arteries and kidneys, cause an alteration in the blood pressure and it becomes abnormal

An abnormal blood pressure is not a disease but is a symptom of some abnormal condition It is a warning sign and the physician seeks for and treats the cause

Disregard of the [illegible] the body for exercise, rest, proper food and [illegible] throws a needless [illegible] upon the whole system and one symptom of this is frequently an increased blood pressure.

The [illegible] physician should be consulted regularly for advice as to how to live The periodic health examination is not only for the purpose of discovering abnormal conditions, but also for receiving advice as to how to keep normal

Questions concerning Health addressed to the Canadian Medical Association [illegible] will be answered [illegible] letter

LINDBROOK

The people of Lindbrook wish the Editor and family and all their friends and neighbors of Tofield and the surrounding countryside a very Happy Christmas and a Bright, Happy, and Prosperous New Year

LESS FLUCTUATION IN PRICE OF GOODS URGED BY ECONOMIST

(By Sam Ross)

Saskatoon, Sask Dec. 21—(Special Correspondence) With a large volume of evidence submitted from farmers, economists and expert agriculturists, the Turgeon Royal Grain Commission stands adjourned until January 5th in Winnipeg

Dr William Allen, professor of farm management at the University of Saskatchewan gave the outstanding evidence of [illegible] week's sitting here in which he urged crop insurance, minimizing of price fluctuations on Dominion-made products He declared guaranteed prices for wheat failed in the objective sought

The economist board was Dr. W W Swanson professor of political economy at the University of Saskatchewan and another member of the faculty Prof T K Pavlychenko, gave evidence on the cost of weeds to growers Conflicting opinions on marketing [illegible] came from farm [illegible]

Pointing to the cost of guaranteed wheat prices Dr Allen gave examples based on what would have happened had a guaranteed price of [illegible] cents a bushel been in effect six years 1930 to 1935

Farmers received $117,300,000 for their wheat in the six years and $418,[illegible] would have been required as a bonus to bring the price to 90 cents And he said, the farmer with the largest crop would have received the largest share of the total bonus when actually it was the farmer with the small crop who needed the most assistance

As an example he said farmers harvesting from zero to 7 5 bushels an acre received $54,000,000 for their crop and would have received a $45,000,000 bonus to bring the 90-cent price In contrast farmers harvesting more than 18 1 bushels an acre received $195,000,000 for their crop. The amount they would have received as a bonus would have been $160,000,000.

Dr Allen advocated a workable and reasonable form of crop insurance and urged that land be classified to indicate its best agricultural use The Bank of Canada he believed could play a major part in the minimizing of price fluctuations of Dominion made products a step which he declared to be important.

Mixed farming he contended did not lessen the risk of farming. He pointed out that when the wheat crop was good the other diversifications of farming flourished also but when the wheat crop was bad all others also wilted.

While per bushel costs of wheat production were difficult to estimate, he pointed out that low yields boosted production costs and high yields lowered them. In his summary of farm conditions in Saskatchewan he [illegible] out some farmers who had [illegible] south country because of [illegible] and insects and were now [illegible] the north on land unfit for agriculture

Necessity of an international standard of value in international trade [illegible] Dr [illegible] [illegible] he had "slight hope" of any venture which the Bank of Canada might make in controlling prices as suggested by Dr Allen.

Professor of field husbandry at the university Prof Pavlychenko said weeds cost farmers more than plant diseases and insects Eradication of weeds would be a big step in combatting drought because weeds robbed the soil of moisture Farmers could fight weeds by cultivation methods he said

Abolition of the Winnipeg Grain Exchange futures market and appointment of a federal board to do all marketing was asked by the Citizens' Wheat Board and Price League who submitted a brief through W H Caswell, Saskatoon lawyer If that were not obtained, then the league favored a wheat board which would pay producers a guaranteed price

Mr Caswell pointed to the heavy cost of tariffs to Western Canada In the fiscal year 1931 the excess cost of tariffs to Manitoba, Saskatchewan and Alberta as estimated by Hon Norman Rogers was $54,925,252 said Mr Caswell In the same period the excess benefit to Ontario and Quebec totalled $69,672,644

Two farmers and a farmer's wife declared the average farmer preferred to market his own grain through the futures market W W McQuarrie of Aberdeen Sask favoring the open market said he thought some government regulation would be advisable Charles Bell of Nipawin Sask opposed compulsory marketing and said he preferred to sell his own grain Mrs. Marie Wilson of Harris Saskatchewan was critical of "radicals and extremists" and said good farming brought dividends She supported the open futures market

CORNHILL MUNICIPAL MEETING

The Cornhill Municipal district met on Friday, Dec 18th We intended to publish the minutes in this issue but owing to the Christmas rush are holding them over until next issue where a full account of the meeting will be given

CROWN LUMBER DOLL AND SKATES CONTEST CLOSES CHRISTMAS EVE

[illegible] have only a few hours left [illegible] your votes to your favorite candidate in the Crown Lumber Co's [illegible] child contest Each purchase [illegible] your favorite candidate a better chance of winning, if it is a girl, a [illegible] doll and if it is a boy a [illegible] skating outfit The contest [illegible] 10:00 p m Christmas Eve [illegible] hand to greet the winners

Does Honesty Pay?

Usually, the answer is as obvious as the fact that two and two make four no matter how you try to get any other total. Is there a substitute for honesty in [illegible] friends our neighbours our business associates Would not the very foundations of our everyday [illegible] and faith we put in the word [illegible]

Sometimes in our haste to attain a certain difficult objective, we may overlook certain [illegible] Perhaps it is wise then that we should stop now and ask ourselves that simple yet essential question Does Honesty Pay?

An individual certainly makes little progress if he consistently adopts a policy which is not fundamentally honest Therefore does it not follow that a group of individuals would suffer the same penalty if it adopted a similar policy?

In other words can two wrongs ever make a right? Can this province afford to pay the penalty of breaking faith with those who accepted our word in good faith? Will the immediate gain be more than wiped out by loss of our individual and collective honesty in the immediate future in the eyes of those to whom we MUST eventually go for financial support?

The answers to these questions concern every man woman and child in Alberta today Our future and our children's future is at stake

This statement is one of a series written by The Mortgage Loans Association of the Province of Alberta. The Association is composed of 14 member companies. It represents hundreds of thousands of small investors by typical Canadians. It lent to citizens of Alberta amounts to some [illegible] million dollars.

(The [illegible] statement in the series will be published in this paper)

As a Life Insurance Policyholder

Your Policy is Larger
Your Premium is Smaller

Because of Interest Earnings

YOU get more Life Insurance, and you pay less for it, because of interest.

The hard-earned savings that you set aside each year for the financial protection of yourself and your family are invested for you by your Life Insurance company in government and municipal bonds, first mortgages, public utility bonds, industrial and other interest-bearing securities.

Because of the interest earnings—the rental value of your savings—your money makes more money, and this earning power of your savings is put to work for you from the moment you pay your first Life Insurance premium.

At that moment, the Life Insurance company that you have chosen to act for you begins accumulating necessary funds to pay your policy claim promptly and in full when it falls due

These funds are regulated by Dominion and Provincial Insurance Acts and are mathematically calculated. To maintain them, both the premiums you pay and the interest earned on them are necessary.

The part played by interest is, therefore, an essential part of your Life Insurance contract. Your policy is larger, your premium is smaller, because of the additional money that interest earnings add to your savings, and this is true in the case of 3,500,000 other Canadian Life Insurance policyholders

Christmas Message From The Churches

Rev D K Allan

[illegible] the Word became [illegible] among us [illegible] own Church [illegible]

Rev A Wallis

[illegible] the Christmas Season [illegible] through the kindness [illegible] of the Tofield Mercury [illegible] greetings to all [illegible] Church God so [illegible] Scripture tells us— [illegible] of battle God [illegible] a babe, and sent [illegible] would twine [illegible]

[illegible] Christmas message seem [illegible] does it strike a [illegible]

[illegible] outstanding [illegible]

[illegible] striking a fa[illegible]

As Pastor of the United Church, I [illegible] a Christmas and a Happy New Year

This is my Father's world
[illegible] never forget
That though the wrong seems oft so strong
God is the Ruler yet

This is my Father's world
The battle is not done,
Jesus who died shall be satisfied
And earth and heaven be one
[illegible]

[illegible] ver sad?
Lord [illegible] king [illegible] the heavens Ring
God reigns [illegible] let earth be glad

Thanking Mr [illegible] for this courtesy and wishing the Mercury a prosperous New Year

[illegible] of the way of peace
[illegible] the holly it isn't the [illegible]
It isn't [illegible] the firelight glow,
[illegible] flame that goes from the hearts of men
When Christmas love is abroad again
'Tis the laughter of children quivering high
In a [illegible] of radiance to the sky;
[illegible] wishes are real and love is free,
And the torches, which ages ago, had source
In the Star that lighted the Wise Men's way,
Burn with a magical fire today."

May you one and all enjoy a very Merry Christmas and a Happy and Prosperous New Year

FIRST HOCKEY GAME OF THE SEASON

The first local hockey game of the [illegible] was played at the Tofield [illegible]

[illegible] being a [illegible] league [illegible] Holden and Tofield [illegible] each other

There was a comparatively small [illegible] the local [illegible] winter game, the [illegible] sprung up during [illegible] partly respon[illegible]

[illegible] Holden gets the credit of [illegible] Tofield [illegible] the [illegible] being the marks[illegible] the game as a whole the teams were evenly matched and [illegible] in Holden's favor [illegible] of the [illegible] little more [illegible] but were off [illegible] Tofield's aggressive [illegible] kept them [illegible] Holden had the [illegible] playing previous games [illegible] were better organized, and [illegible] that [illegible] had a chance to get a few [illegible] they [illegible] for any team [illegible] Both teams [illegible] players, youngsters growing up [illegible] had some of the old [illegible] Holden we [illegible] Huram, [illegible] and Black and [illegible] Tofield we had Harry [illegible] and Les Glover

Mr Burke of the Crown Lane [illegible] the [illegible] this year and [illegible] had a chance to whip [illegible] shape they should [illegible]

[illegible] continuously, but the [illegible] to speed up after a [illegible] the period [illegible] for Holden [illegible] a little later added [illegible] The game then became [illegible]

[illegible] the local Holden put on [illegible] and a rush down the [illegible] a hard shot [illegible] in the scrimmage [illegible] of the goal Huram drove [illegible] The period ended with the score 2-1 for Holden

The second period opened up fast, Tofield setting the pace and trying to wipe out the two goal deficit All the players were working hard with Les Glover the spearhead of many Tofield attacks The first break came when after a determined rush [illegible] the Holden end Beirnes passed the [illegible] up the ice and Les Glover [illegible] it, shot and scored After this [illegible] play was fast but fairly even [illegible] end to end rushes Both goalies were called on to stop hard drives [illegible] there was considerable wild [illegible] and missed opportunities Towards the end of the period Les Glover found the net for the second [illegible] and the game was tied up The second ended 3-3

The third period was a ding-dong affair and anybody's game While Holden did not have a margin of the [illegible] their rushes were smoother and better timed than the locals After [illegible] five minutes of play Hopkins [illegible] for Holden The visitors however did not bank their defence but [illegible] aggressive [illegible] to the end Tofield were working hard also and [illegible] times came within an ace of [illegible] evening the score, but though [illegible] never ceased trying the final [illegible] found the score 4-3 for Holden

Stan Burke efficiently refereed the game.

Line-up—Holden goal McLennan; Defence: Huram Edworthy; Forwards: Pelaski, Stuart, Zwierschke, Black, Hopkins, Foran

Tofield: Goal Bowick; Defence, Allan, Everett; Forwards: N Glover, Les Glover; Beirnes; Whyte; Matchmoor; Jack Bowick

WOODLAWN NEWS

Miss Hazel Sterrit of Kingman spent the week end at the Laughead home [illegible]

[illegible] Saturday to meet his brother who is home from his school at Lac la Biche for a two week's holiday

[illegible] at the home of their cousins, Mr Jack and Mr Earl Wilson last Saturday

The Christmas entertainment held at the Woodlawn School Tuesday evening was well attended and enjoyed [illegible] The costumes were [illegible] and lent humor to [illegible] Hearty thanks are given to Mrs Gloonberg who gave her much appreciated help toward the decoration of the school, which was done very tastily Thanks are also extended to those who helped with the platform and Christmas tree setting, and to all others who helped to make the program a success

Old Santa Claus was very generous in his distribution of presents and candies and so closed a delightful evening.

Cornhill Municipal Minutes

On Friday, December 18th, a regular meeting of the Municipal District of Cornhill Council was held at the Council chamber, Tofield. There were present, Reeve Glen and Councillors Bonney, Mellgaren, Morden and Walker.

Routine passing of minutes of previous meeting, together with expense account totalling $[illegible] was done.

Councillors initialled pay sheets.

Mr. Oscar Johnson made application to lease S.W. ¼ sec. 2-49-20, situated near Miquelon lake. This is in Councillor Holmberg's division and it was decided to hold the application in abeyance until Mr. Holmberg returns from a visit to the Pacific coast.

Correspondence was read from Mrs. Pithouse re compensation for damage done by flooding. This matter had been taken up with a government department and they were not favorable to compensation and suggested that it be dealt with through assessment.. Moved by Reeve Glenn that the matter be tabled until councillor for that division is present.

Mr. Wm. H. Craig wrote asking that certain block of land be added to village of Hay Lake. It was decided to table this request until Councillor Holmberg returns.

Chas. H. Grover wrote desiring to cut brush in payment of taxes. This matter also was left for Councillor Holmberg's attention.

A report from Dr. Armstrong of Edmonton, re examination of Mrs. Robert Kennedy was read. Council authorized payment of five dollars for the examination. Mrs Kennedy needed immediate attention due to an eye affliction.

An application from Mrs. C. A. Anderson of Hay Lakes, widow, for Mother's Allowance was considered. By resolution of Councillor Bonney it was recommended that allowance be $10 per month.

Four applications of relief were carefully considered one by one, and dealt with in various ways.

Correspondence was read relative to an account of Mrs. Puffer, Edmonton, who had been caring for Mrs. Kozak, a resident of the municipality. It appeared that Mrs. Kozak who was quite ill, entered a nursing home operated by Mrs. Puffer. The condition of Mrs. Kozak was said to be improving and Mrs. Puffer wanted payment from the municipality. Mr. Kozak appeared on behalf of Mrs. Puffer and to clarify the situation Dr. Law was called. He explained the situation as

Mr. and Mrs. R. Burchard are visiting in the States for some time.

Mrs. Kallal returned from Winnipeg after visiting with her daughter there for two weeks.

Jack Beirnes returned on Christmas morning from England.

Mr. Pat Moon visited with his parents here for a few days.

Mr. and Mrs. Bert Swift and son from Fallis spent the holidays at the Booth home.

Lee Burnett spent the holidays at his home here.

Mr. A. Matchmoss spent Christmas at his home in Strome.

Mr. A. Hummel spent Christmas visiting in Edmonton.

Mr. Dorsey Letourneau from Calgary spent the Christmas holidays with his parents in Tofield.

Miss Helen McCauley who is nursing in the Ponoka hospital spent the holiday week end at her home here.

Miss Margaret McCauley who is a nurse in the Lamont hospital spent Christmas day with her parents here.

Mr. and Mrs. R. Whyte of Wetaskiwin spent the holidays with their parents here.

Mrs. Ellis and Joan and Miss Cherry spent Christmas at the Malcolm home.

Mrs. A. E. Calvert of Edmonton spent Christmas with friends in Tofield.

Mr. and Mrs. M. McHeffey and daughter spent the holidays visiting at the Fred McHeffey home here.

Miss M. Redig spent Christmas at her home in Lacombe.

Miss Myrtle and Melville Bethel visited their home for Christmas.

Mr. and Mrs. Bill Swift and family of Camrose spent Christmas at the Swift home here.

John Swift who is attending school in Camrose spent Christmas at his home here.

The Misses Aileen, Margaret and Eppie Allan, Mr. and Mrs. Provost and son, and Mr. R. Posting were visitors at the Allan home during the holiday season.

Miss Margaret Whyte who is nursing at the Royal Alex hospital visited her home here for Christmas.

Blake Clutterham will be leaving Tofield this week for Edmonton where he will serve an apprenticeship to the mortician profession, at the Andrew Bros. funeral parlor

Mr. Ted Curtis was a visitor at the Barden home during Christmas week. Tofielders will remember Mr Curtis when he was a resident of Tofield.

Mrs. Barden visited her daughter Edythe during the Christmas season. Edythe is a nurse at the General hospital and was unable to get home for Christmas.

The Holy Trinity W.A. will hold their annual meeting in the church on January 14th, at 2:30 p.m.

Mr. and Mrs. Thomas Gould wish to extend thanks for the many kindnesses shown during the Christmas season.

The Misses Pat Firth, Muriel Rogers, Joyce and Jean Innes and Ida Jacobs spent the Xmas week as the guests of Miss Enid McLaughlin at Wetaskiwin Mrs. J. W. Somers entertained for them at a luncheon on Tuesday, December 29th, and Mrs. McLaughlin entertained for them at a party on Wednesday, when the decorations, favors and lunch were in the Xmas colors. The girls returned all reporting a very enjoyable holiday.

Arthur Beirnes returned to university after spending the holidays at his home here.

BEHIND THE HOG

And Curlers, that reminds me, I hung up a sock for each and every Curler at Xmas. A sock on the jaw.

* * *

These two Master Strategists, J. Fergusson, president; and O. Paul Thomas, vice president, got their heads together on a president, vice-president draw, then they agreed to have a Knock Out Competition, so we are away with 9 $40 rinks. The winners, well your guess is as good as mine.

* * *

The nine $40 rinks have lots of new material, in fact a familiar cry around the rink will be, "Hello stranger."

* * *

Speaking about crys, we have a brand new crying towel for all Skips who don't think they get the breaks. Ask the caretaker for towels.

* * *

One of he Old curlers asked a new Curler how they were treating him, and he replied, "Very Seldom."

* * *

The Good Samaritan in Curling as always fascinated me. WHAT a laugh he must get.

* * *

My Curling wheel goes round and round, until at last a name is found.

* * *

Doc said to his lead man, "can't you put one down straight?" and the Lead replied, "you must mean one without Ginger Ale."

* * *

Come over and watch the games, No charge and our waiting room is just the right degrees of Lassitude and Loungitude.

* * *

A curler is the only animal who can B skinned more than once.

* * *

And its Ho for the road in the summer,
And its Ho for the woods in the fall,
But we find our rink in the winter,
The friendliest spot of them all.

* * *

And this is the song of the skipper,
as he squats in the back alone—
Oh give me the strength to deliver
with weight and broom, this stone.

* * *

One to fill in from last year—
The Eskimo sleeps in her white bear skin,
And sleeps very well I am told.
BUT last night I slept in my Bare white skin,
And caught a Helluva Cold.

* * *

At that the Medical men claim that Liquor will not cure a cold. So here's looking Atchoo.

* * *

The Ladies start on Monday afternoon. Look them over boys, here is a good chance to improve on your Sweeping.

* * *

We expect to have a Ladies week 84 long. Any jokes on the ladies would be appreciated.

* * *

Our Motto this year: Curling News with a Smile. We aim to please.

Spectacular Crash at C.N.R. Yards

Early Monday morning about 3:00 a.m. a loaded freight train was travelling west when one of the most spectacular smashes to happen here occurred A broken arch bar from the under carriage of one of the cars was dragging and when coming through the yards caught on a rail sending large box cars in all directions—some through the air.

The smash occurred immediately opposite the old freight shed and a stationary car that was standing there was struck—hurled up and over to the freight shed smashing most of the front right out of the building. This car came to rest with wheels in the air. Cars from the train went in both directions and twisted rails and broken cars wrenched from their undercarriage were "all over the place." The smash must have been terrific for the few moments it lasted. Fortunately none of the train crew were injured as the derailed and upset cars—ten or twelve of them—were in the centre of the lengthy train. Few townspeople heard the crash but with the arrival of daylight many went down to see the wreckage. By that time a wrecking crew with a powerful crane was underway The morning was quite cold with slippery footing. L. Olson, roadmaster came from Edmonton to investigate the crash.

FOR SALE—Bargain list of second hand goods: Titan Tractor; 3 bottom horse plows; 14 inch Gang plows; 12 inch gang plows; 7½ and 9 feet Disc Tillers; Grain Drills; Fanning Mills; 6 hole range. John Deere Tractor. Apply M. C. Hammond, Tofield.

HOCKEY

There has been plenty of action in local hockey circles during the past two weeks. The seniors have played two games at home and one at Irma, winning one home game and losing the other. They also lost the game played away.

Tofield 5—Wainwright 3

During the holiday week Wainwright and Tofield met on Tofield ice, the result of the contest being a win for the locals Our notes on the game have been mislaid and we have to write from memory. The game from the Tofield angle was featured by the playing of Jack Whyte who surprised the fans by his performance at centre. Denny Beirnes, also played a good game. The teams were evenly matched, but the size of the rink bothered Wainwright. As a hockey game, it was the best one played here this season. Brimacombe and Tory for Wainwright were outstanding. The score was 5—3 in favor of Tofield

Irma 10—Tofield 4

On Saturday night the locals journeyed to Irma and played a league fixture there. We have no information concerning the game except the score which was 10—4 in favor of Irma.

IRMA 7—TOFIELD 2

On Tuesday night of this week Irma and Tofield clashed in a hectic encounter in which Canada's winter game was remodelled to suit Never have we seen a goal keeper stop

E. W. ROGERS

FARMERS' HANDY ACCOUNT BOOK

The Canadian farmer may be absolved from the accusation that in taking stock of his farm business at the present time he is only following the [illegible] fashion of making good resolutions for the New Year. It [illegible] happens that the season of the year when good resolutions are [illegible] supposed to have a [illegible] coincides with that [illegible] of the year which affords the farmer the best opportunity for making an [illegible] survey of his business and [illegible].

To-day farming is more of a business [illegible] than it has ever before [illegible]. The farmer who does not know the exact state of how he stands with [illegible] every [illegible] connected with the farm is at a disadvantage with the farmer who does. Something more than a rough and ready [illegible] is necessary.

A record of each department of the farm business should be kept because it is the only way of finding out which part of the farming pays and which does not. To assist the farmer in this very important matter, the Dominion Department of Agriculture [illegible] a very simple and useful little account book which may be obtained from the King's Printer at a nominal price of 10 cents. No special knowledge of accounting is necessary and a record of transactions can often be made in less than one hour per week.

EDMONTON SEES FIRST C.N. TRAIN 31 YEARS AGO

EDMONTON, Alta—December 28. Exactly 31 years ago November 24 the first Canadian Northern train from Winnipeg was pulled into the Edmonton station by locomotive No. 103 28 hours after leaving the Manitoba capital. That was a historic moment for Edmonton and a majority of the citizenry met the train.

In sharp contrast to the 28-hour time made by locomotive No. 103 a crack train of today makes the Winnipeg-Edmonton trip in approximately 22 hours. Nevertheless the old "iron horse" was accorded a great deal of respect for its run, considered fast time in November 1905.

Some ten years ago locomotive No. 103 reached the end of its allotted span and Canadian National officials planned to scrap it. Action on the part of the city secured the ancient engine as a gift. The ancient "iron horse" was given a place of honor on the spur track behind the exhibition grounds.

It has been recently moved from this location to the Canadian National yards where it now stands, unsung, unhonored and forgotten save for the attentions of a number of small boys who get a real thrill out of making imaginary record runs. The old engine has had its day.

NAME ....

STREET OR R.R. ....

TOWN AND PROVINCE ....

THE WORLD OF WHEAT

Some countries have so many people they cannot grow enough wheat for all

Some countries have so much land and so few people that they have wheat to sell

Those nations which are obliged to buy wheat are called "Wheat Importing Countries" while those with wheat to sell are called "Wheat Exporting countries."

About 550 million bushels of wheat this year, it is expected will be purchased by the importing countries from the exporting countries.

This amount of 550 million is about 10 per cent of the World's total annual production.

Canada is the largest wheat exporting country selling Overseas annually a little more than 200 million bushels. Great Britain is the largest importing country buying about 190 million bushels each year.

The wheat grown on our Canadian Prairies finally travels abroad to some 72 different countries. It would be an interesting exercise if boys and girls would make a list—then mark them on a map—of the 72 foreign countries which buy the wheat their parents and neighbors grow.

It would be still more interesting if in addition students would note the products or goods which each of these foreign countries sells to Canada and to other nations, which sales enable them to purchase Canadian wheat.

Prices have tended to be raised by the following—Germany alarmed about possible food shortage—Broomhall increases estimates World import wheat requirements from 540 to 568 million, which will leave only about 84 million in exporters' bins Aug. 1st next—Italy buying wheat steadily from Argentina and Danubian countries—Rains and reports of frost in Argentina during harvest cause uncertainty about yield.

Prices have tended to be lowered by the following: U.S.A. official estimate winter wheat and rye sowings larger than last year—Germany requires millers extract larger percentage of flour from wheat—Demand for wheat from Great Britain falling off as price increases—Weekly shipments Canadian wheat show slight decline—Crop prospects in Italy improved—India receives good rains for germination.

The editor of this paper has made arrangements with Mr. Strange by which he will correct and return any lists prepared by school students, and sent to him before Feb. 1st. Mr. Strange informs us that he would be glad to give a small prize for the neatest and most accurate list sent to him."

FREAK ADDRESSES POSTAL PUZZLERS

It's an interesting game but postal authorities haven't time to play it during Christmas week.

Each Yuletide thousands of patrons of the mail service test ingenuity of authorities by addressing letters and parcels in every conceivable manner.

"They have too much faith in our ability," said A. R. McKenzie postmaster Friday.

"People always seem willing to take a chance at Christmas time. We receive thousands of letters addressed to Mr. and Mrs. 'Brown' Edmonton. Others persist in sending letters to addresses that have been useless for 20 years. It's a problem the year around but during Christmas week it's even more serious."

An effort is made to deliver every letter. Hundreds however, find their way to the dead letter office. A staff of experts is attempting to deal with the problem this week but the opposition is well in the lead.

The "classic" an address which employes repeat with head shakings but with ill-concealed admiration" is "Mrs. Brown, next door to Mrs. Smith, Edmonton.

HUNTERS DEPLETING BUFFALO HERDS

WAINWRIGHT, Alta. Dec. 28.—Sharpshooter Sam Purcell's rifle is crackling with deadly accuracy around here and each time a spurt of flame issues from its muzzle annual kill of surplus animals at National Buffalo Park, which is on the line between Saskatoon and Edmonton is under way. The contract for the slaughter of 1500 choice buffalo was awarded this year to Burns and Company this year, who are preparing the meat under government supervision, at the abattoir erected within the confines of the National Park. Since the opening day a steady stream of cars have been rolling eastward each car loaded with buffalo carcasses.

Buffalo meat is comparable to prime domestic beef while buffalo steaks and tongues and other cuts are considered delicacies as they were in the days of the plainsmen. The meat finds a ready market in Eastern Canadian cities.

Annual thinning of the Wainwright herd is necessary in order to keep the number of animals within the grazing capabilities of the huge park.

RATTLER AND 2 RATS FORM STRANGE COMPANY IN PEN

A buzzing rattle snake two hungry rats and a somnolent friendly bull snake are amazing University of Alberta zoological authorities by living side by side in comparitive domestic bliss in a small pen.

The rats were placed in the snake domicile as food two weeks ago. The reptiles appear completely disinterested in their presence and recently the animals commenced to chew the rattlers rattles. Already they have destroyed one of the organs. Nine remain ......

According to the common belief of zoologists bull snakes are "poison" to rattlers and vice versa. Bigger but lacking fangs the former was expected to swallow his smaller companion whole when they were placed side by side in the pen a fortnight ago. The rattler was expected to retaliate by testing his venomous fangs.

Nothing happened. Neither has eaten since they arrived in the laboratory. Expected to tempt both snakes when they were released in the pen some time ago the rats scamper about at will attempt to halt the rattler's ominous warnings by chewing his rattles and generally enjoy life paying little attention to accepted food habits of reptiles.

Dr. Winnifred Hughes, professor of zoology and her two assistants R. B. Miller and B. Biles are at a loss to explain strange behavior of their charges.

"It has always been believed that the bull snake and the rattler are mortal enemies. Possibly bull snakes have been confused with king snakes which are believed to be the only reptiles unaffected by venom of rattlers" said Mr. Miller, curator of the snakes.

3,000 MILES OF HIGHWAY SANDED IN THREE HOURS

As a part of the great system which enables the Province of Ontario to keep almost the entire network of Provincial highways open throughout the winter Ontario highway engineers have built up an organization capable of sanding 3,000 miles of highway within three hours after the need arises. Fast trucks, mechanical spreaders and conveniently located piles of abrasives have made this wonderfully efficient feat an accomplished fact. The materials used to make winter driving safe are sand, cinders and stone chips, mixed with common salt. The salt prevents the stock piles from freezing and when the sand is scattered on the highway, the salt melts the ice thereby embedding the abrasive in the slippery surface. Without the salt the sand and cinders would be dissipated by wind and traffic.—The C-I-L Oval.

Bakers in Haiti in the West Indies pay little attention to scientific methods when baking their bread, employing the rule-of-thumb. It is said however that the resulting product on the average is superior in texture, appearance and flavor to that produced in some other countries where more up-to-date methods are employed.

U.F.W.A. PROGRAM 1937

JANUARY: Roll Call—Local problems that might be helped by legislation.

Discussion and preparation of resolutions to be sent to Convention.

FEBRUARY: Roll Call—My choice of abode in Canada.

Report of Convention.

MARCH: Roll Call—Housecleaning hints.

P. Youth— Unemployment, Mrs. Moline.

P. Conscription—Armaments, Mrs. Erickson.

APRIL: Roll Call—My worst cooking failure.

Round-table discussion on gardening conducted by Mrs. J. Warner.

MAY: Roll Call—Each member to respond with the name of a flower or vegetable beginning with the first letter of her Christian name.

Demonstration on bee-keeping by Mrs. Gray.

JUNE: Roll Call—Birthplace and description of home.

P. What an immigrant gives to Canada by Mrs. Anderson.

JULY: Roll Call—Cooling beverages.

P. Bird life in Alberta by Mrs. Baptist.

AUGUST: Roll Call—Sing, say or a nickel to pay.

Report of Conference.

SEPTEMBER: Roll Call— Sandwich fillings for school lunches.

P. Alberta exports by Mrs. Graham. Alberta imports by Mrs. M. Seale.

OCTOBER: Roll Call—If you were given $100 how would you spend it? Birthday party.

NOVEMBER: Roll Call— Current events.

P. Life and work of Cora Hind by Mrs. E. Seale.

DECEMBER: Roll Call— Xmas verse. Xmas story told by Mrs. Torrie. Election of officers.

Millions of "Little Savings" Make Up Life Insurance

LIFE INSURANCE ASSETS—large in the aggregate—actually consist of the "little savings" of more than 3,500,000 Canadian policyholders. The great majority of these policyholders are men and women of moderate means, whose thrift often involves personal sacrifice.

Sharing in the protection and financial security of Life Insurance, are people from every walk in life—including thousands upon thousands of wage earners whose individual savings are necessarily small. That is why Life Insurance is rightly regarded as Canada's greatest co-operative enterprise.

Consider what *your savings* in Life Insurance mean to you and your dependants, in protection and peace-of-mind. Then you can realize what millions of similar savings mean to the people of Canada.

These combined savings in Life Insurance, which total more than Two Billion Dollars, are invested so that every obligation to policyholders and beneficiaries may be promptly and fully met.

Day after day, year after year. "little savings" in Life Insurance accomplish great things in aiding the widows and fatherless — in educating children — in making older men and women financially independent.

Life Insurance

Guardian of Canadian Homes

LINDBROOK

News received last week—

Xmas is over and we hope that all enjoyed themselves and that Santa was good to them, also that none have felt any after effects, so now it is in order to wish you one and all the Best, Brightest and Prosperous Happy New Year that you've ever had from your Lindbrook neighbors.

The annual Xmas tree and concert was held here at the school at 8 p.m. on December 22nd. The school was prettily decorated in traditional Xmas style and boasted a large tree burdened with presents, tinsel and ornaments and all looked swell. The teacher, Miss V. Phipps and her pupils did it all, even to erecting the stage for the concert. The concert went off fine, not a hitch and was well rendered and well received by all, by the way, there wasn't even standing room, so many there. Everyone voted it A1 and great credit is due to teacher and pupils for same. Then at the finish of the concert "Santa Claus" (Mr. E. W. Hooper) came in with a sack of goodies for the children which he distributed amongst them, and then asked where the presents were so that he could hand them out, all the time accompanying this with Xmas patter dear to the hearts of kiddies. After this the crowd dispersed to their homes voting it a real good Xmas concert.

O Canada. 1. Verse—"Short and Long of It," by Lois Wilson. 2. Song—"Hark the Herald Angels Sing," by the school. 3. Verse—"Merry Christmas." by Agnes Enns. 4. Play—"Whipping Henry Didn't Get," by Howard Brown, Henry Regehr, Alice Bailey. 5. Song—"Jolly Old Santa Claus" by girls of grades 6 and 8. 6. Verse— Dolly's Christmas," by Virginia Genenki. 7. Play—"Grandma's Second Childhood," by Vera Jensen, Neta Regehr, Peter Korobko. 8. Verse—"Twins" by Ken and Don Bailey. 9. Poinsetta Drill. 10. Song—"It Came Upon The Midnight Clear" by the School. 11. Verse—"That's Me," by Jacob Enns. 12. "Mrs. B's Christmas Presents," by Thelma Kortzman and Pansy Bracegirdle. 13. Verse— "Santa Clausin'" by Edith Odlorne. 14. Verse—"Gifts for Santa." 15. Play—"Mixed Numbers" by Alice Bailey, Star Bracegirdle, Verna Stine. Mary Regehr. 16. Song—"Coming of Santa." 17. Pantomine—"Father the Hero." 18. Verse—"Little Orphant Annie" by Evelyn Blake. 19. Play—"Unexpected Company." 20. Song—"Oh Little Town of Bethlehem" by the school. 21. Drill—"Clown Drill." God Save the King.

Weslake School gave their Xmas concert the following night and the procedure was practically the same The school was prettily decorated tree and all. The concert went off very well and Miss Burns and her pupils are to be congratulated on their showing. Mr. E. W. Hooper again deputized for good Old Santa and as his reindeers couldn't work Mr. Tucker's car acted as chariot. Everyone present said it was a real good concert.

Some of our lads are going to work in the lumber mills at Breton soon. We understand, one qualification is to be a good hockey player. Keep on fellows, you'll land in the big league yet.

Mr. Alec Donald has the rink at Hastings Lake. It is all cleared and boarded, in fact quite a rink. This is where the games are played, there being one practically every Sunday.

A closely contested game played between Ministik and Hastings Lake on Sunday, December 27th resulted in a 2-2 tie after 10 minutes of overtime. Goals were scored by George and Murdock for Ministik and Bailey and G. Campion for Hastings Lake.

News received this week—

Miss Adela Gill, daughter of Mr. and Mrs. A. Gill of Lindbrook, and Mr. A. ("Sandy") Robinson, eldest son of Mr. and Mrs. Robinson also of Lindbrook were married in Edmonton last week. We don't know just whether it was 1936 or 1937 but somewhere about the New Year's appearance. Members of both families were present at the ceremony. Here's wishing you both the best of health, happiness and good luck and a long life together from all your friends of Lindbrook.

The monthly meeting of the L.C.C. was held last Wednesday at the home of Mrs. J. Pruden. The roll call was answered by New Year Resolutions, very resolute too, some of them, we don't think! The next roll call will be "Hints for the Bride." Gee! the voices of experience speaking, but here's one "If you've got to sock him, sock him hard! The afternoon was spent in music around the piano and greatly enjoyed by all. A dainty lunch was served and everyone felt ant afternoon.

AMISK CREEK

There were two Silver Wedding Anniversaries held in the Church during the Christmas and New Year season. Mr. and Mrs. E. A. Moen celebrated their 25th wedding anniversary on December 26th, when about one hundred and fifty friends, relatives and neighbors gathered to do them honor. Rev. Hoverstein, on behalf of those present presented Mr. and Mrs. Moen a lovely set of flatware and a lamp. Relatives of Mr. and Mrs. Moen presented them with a beautiful dinner set. Dr. J. L. McPherson, M.L.A. gave a brief address after which many congratulations were bestowed upon Mr. and Mrs. E. A. Moen. The table was centred with a lovely wedding cake made by Lillian Patterson. Seated at the table of honor with Mr. and Mrs. Moen were Mrs. J. Westby, who was Mrs. Moen's bridesmaid 25 years ago, Dr. and Mrs. McPherson and Rev. Hoverstein, who asked the [illegible].

On January 3rd, Mr. and Mrs. H. Hillerud celebrated their 25th anniversary. A large crowd gathered at the Church to help them celebrate the occasion. The Bardo male choir, of which Mr. Hillerud is a member, was present and gave several numbers. Albin Anderson gave a brief address and on behalf of the Bardo choir presented Mr. and Mrs. Hillerud a silver plated Tea Set. Dr. McPherson also said a few words of congratulations and on behalf of friends and neighbors presented the guests of honor with a lovely chest of flatware. Rev. Hoverstein also gave a brief address. The Misses Clara, Lilly and Olive Haugen rendered a few selections, which were much enjoyed. Mr. E. A. Moen acted as chairman for the short program. A lovely wedding cake was placed in the centre of the table. Mrs. C. Patterson, daughter of Mr. and Mrs. Hillerud made the cake. Seated at the table with the guests of honor were Mrs. N. Solberg, Dr. McPherson and Rev. Hoverstein, who said grace. Mr. and Mrs. Hillerud thanked all their friends for thus honoring them on their Silver Anniversary.

The Young people and Sunday school held their Christmas program in the Church on December 28th. A very nice program was rendered, after which apples and candy were passed around. Much credit is due to Margaret Moline who directed most of the program.

Mr. and Mrs. C. Erickson and baby visited with Mr. and Mrs. J. Holte at Lake Demay between Christmas and New Years.

Miss Glasinger held her school concert on December 23rd. A well rendered program was given and much credit is due to the teacher and her pupils.

Those who spent the holidays at their parental homes here were: Agnes Annebo from Camrose, Glen Olson from C.L.C. Camrose, Lilly and Ruby Berg from Edmonton, Merl Hillerud from Normal School, Edmonton and Beret Berlid from Miquelon Lake School.

Mrs. K. Olson is spending Christmas and New Year with her daughter Mrs. L. Watt in Edmonton.

Mr. and Mrs. Hillerud and family, Mr. and Mrs. E. A. Moen and family and Mr. and Mrs. C. Patterson were dinner guests at the A. Patterson home last Sunday.

Mrs. I. C. Olson took the bus to Edmonton Monday morning, returning the same evening. Lily Berg returned to Edmonton on Monday to resume her studies again at the university.

The Bardo hockey team played a friendly game with local team last Thursday. The game ended 3-1 in favor of Bardo.

Mrs. K. Pearson has been in Edmonton for some time taking treatments for her health.

WHERE DO OLD NEWSPAPERS GO?

WINNIPEG, Man. January 4.—"Where do old newspapers go?" is a question that might be asked, seeing how many millions of copies are turned out from the thousands of presses throughout the world. They are liable to turn up in all sorts of places. If you should happen to make a purchase in one of the bazaars in India, the chances are your parcel would be wrapped in a newspaper that had performed its function as a newsheet and was now devoted to utilitarian purposes.

It is claimed that the use of Canadian newsprint is more economical as it does not absorb ink to the same extent as some other kinds.

USE PHOSPHATE ROCK DEPOSITS

Out of Canada's little known but valuable deposits of phosphate rock located near Buckingham, Que. chemists have produced a cleansing compound which few households do not number among their everyday requirements. The compound, tri-sodium-phosphate, forms the basis of numerous proprietary washing preparations on the market. TSP is an excellent example of what the chemist has done to help out around the house and to assist in the sterilization of bottles, vats, cans etc., in various industries.—The C-I-L Oval.

WOMEN RECEIVE 80 PER CENT OF LIFE INSURANCE BENEFITS

The women of Canada are the beneficiaries of over 80 per cent of all life insurance estates. Of over $40,000,000 paid out in death claims last year by life insurance companies operating in Canada, $32,000,000 went to the women of Canada to tide themselves and their families over periods of financial distress. It provided ready cash to meet pressing obligations during the difficult readjustment period. It supplied funds for food, clothing, shelter and other necessities of life. It provided money to pay the rent or to meet mortgage payments and it gave to thousands of families a certain measure of financial security against the future. Legislation that imperils the security of life insurance investments—that arbitrarily reduces interest rates on securities and that repudiates public or private debts—is of vital interest to the women of Canada.

CLEAVING TO THE OLD

"Young men for leadership!"
"Let youth have a chance!"

These are cries frequently heard as the world muddles along, experiencing difficulties. It has been felt in some circles that youth should be given a fling at leadership of the human family, that older men have made a sad mess of things and that young men at least could do no worse.

The Alberta Wheat Pool, which must include a fair host of youngbloods in its membership, scoffs at this idea to the extent of re-electing to its presidency a man in his late seventies.

Henry Wise Wood, just put in as president of the Alberta Wheat Pool for the 14th year in succession (he has been the only head of the organization since it was launched in 1923) is 79 years of age according to the despatch from Calgary. The Canadian "Who's Who" says he was born in 1860 which would make his age 76. Anyway he is no "spring-chicken." He is an old man.

An old man but seemingly still giving vigilant and aggressive leadership to the organization he himself largely created 14 years ago, when he was no longer young. Mr Wood might be glad to relinquish his job at his age and after these long and exacting years of leadership, but the Alberta Pool men evidently consider him fit as a fiddle and thus far are prepared to consider no one else for his place.

In his 77th year or his 80th year, whichever it may be, Mr. Wood is entitled to a whimsical smile as he surveys the field.

THE WORLD OF WHEAT

A Scotchman made perhaps the greatest gift ever sent to Western Canada and received nothing in return!

This refers to the introduction into Canada and the West of the famous Red Fife wheat which was not only of superlative quality itself but also is one of the parents of Marquis, Reward, Garnet, Thatcher and other good varieties.

It appears that in 1842 David Fyfe of the township of Otonabee, Canada West (now Ontario) asked a friend in Glasgow, Scotland to send him a little wheat. This Scottish friend took a small quantity from a cargo ship which had just arrived from Danzig. David Fyfe received this and seeded it, but only three ears ripened. These were carefully preserved and seeded again and proved to be a wonderful wheat, which was soon given the name of Red Fife.

Red Fife was imported into Manitoba about 1870, and the first shipment of wheat from Western Canada, made in 1876, consisted entirely of Red Fife. This established the high reputation of Canadian wheat on the world's markets.

David Fyfe made little or nothing out of his selection and the name of his Scottish friend who made the valuable gift to us is not even known.

Following factors have tended to raise price: Persistent wet weather in the southern hemisphere lowers the quality and quantity and delays the movement of new wheat.

Snow covering in Russia insufficient and good precipitation needed.

Italian wheat production for 1936 reported as 227 million bushels compared with 224 million in 1935.

Continued unsettled European conditions.

Following factors have tended to lower price: Large U.S. winter wheat acreage indicated with production slightly over 600 million—Italian corn, rice and potato crops larger in 1936 than in 1935—U.S. Department of Agriculture reports ample world wheat supplies during present crop year—Reports of considerable surplus of Turkish wheat, barley and corn for export this season.

OBJECT LESSON IN POULTRY MARKETING

Most people know pretty well by now why a chicken crosses the street. How many know why a chicken enters a town hall? Ask the folks of Bourget, Ontario, where community hall opened its doors to several thousand poultry recently. No use asking the poultry; they, unhappily, attain their glory only in death.

It was annual marketing day for the Bourget Poultry Pool. Nature had tempered the wind to the plucked chicken, and the farmers had a clear calm December day for their trip to town. Before the Pool was organized each farmer had to sell his own poultry as best he could without knowledge of the market and without packing facilities. He did not even know how his assortment would grade out commercially. Under the Pool, every bird is graded, the whole output is uniformly packed and, by shipping en masse the lowest freight rates are secured. Moreover the selling is done through a Montreal agent who is conversant with the needs of all the buyers and is able to distribute the various weights and grades to the best advantage.

Apparently the only grievance the consumer could have about the Pool is that for once he had no grievance. Not only does the mass marketing bring a reduction in the middleman and distribution charges, but the quality of the pack is improved. The Dominion Department of Agriculture, working through the Pool organization, teaches the farmers how to rear their birds for quality and how to kill and pluck them. Moreover, when the farmer lines up his birds on the receiving counter beside those of his neighbour he doesn't want them to look as though they had led under-privileged lives. There is much comparing of grading slips and proud is the man who can show nothing but grade A's.

Fifteen tons of poultry were graded weighed and packed in the Bourget town hall in that one day. Credit for the accomplishment goes to the Pool Manager, Antoine Lalonde and to the five members of the Poultry Division of the Dominion Department of Agriculture, led by J. F. Hagarty, who did the grading and supervised the whole operation. In the course of its transit from receiving counter to shipping room each separate bird had first to be graded and had later to be weighed accurately and fitted into a paper-lined box with eleven companions of similar size and quality. The crew of thirty-odd had little time for chatting.

The birds made a brave display. There were hundreds of milkfed chickens, plump and firm; there were great turkeys, proud in death; there were salmon-hued geese as fat as little porkers. The C-grades, blue and runty, seemed to hang their heads for shame in such august company

W A Brown, Chief of Poultry Services, Dominion Department of Agriculture, visited Bourget during the day. He stated that the Bourget Pool was typical of hundreds throughout Canada, particularly in Ontario and the Prairie Provinces The Dominion Department of Agriculture has in the interests of better poultry, encouraged the pool idea from the start and is always ready to offer instruction and assistance.

WESTERN ELK ARE SHIPPED EAST

MONCTON, N.B. January 4.—Possibilities of New Brunswick becoming a hunter's paradise for elk were envisioned with the arrival at the private deer park of F M Colpitts, M P P, which he maintains in connection with his huge fox ranch at Colpitts settlement, of two elk from Western Canada, a male and a female The elk were in excellent condition on their arrival at the railway station after their long journey in a stock car along with several head of western cattle from Calgary, Alta. The elk occupied an end of the stock car which was partitioned off for their accomodation.

The importation of these elk into New Brunswick is in line with a suggestion made by E. G. Poole Fish and Game Protective Association held in Fredericton as to the possibility of establishing elk from Western Canada in the province

C.N.R. PRESIDENT LOOKS TO FUTURE WITH CONFIDENCE

MONTREAL, Que. January 4.—In his annual year-end message, Mr. S J. Hungerford, Chairman and President of the Canadian National Railways, looks to the future with confidence and, in part, says:

"With the dawn of another year, the Canadian National Railways look forward confidently. We hope for a continuation of improved business conditions which have made themselves felt during recent months Signs are not wanting that 1937 will bring to the railways an increase over the traffic which they enjoyed in 1936

"Increased traffic will bring additional work and therefore a greater measure of prosperity to all railroad workers It has already been announced that, commencing with the first of the year, the working time in our shops will be extended to a considerable degree This is due chiefly to the demands created by a larger volume of traffic, thus necessitating the repairing and re-conditioning of more locomotives, freight and passenger equipment

"I hope that, as the year proceeds, business will continue to improve and that we shall all benefit thereby."

If it's grain . . . Ask us!

CANADIANS AND THEIR INDUSTRIES....AND THEIR BANK

MINING AND METALLURGY

Mining in Canada, now second largest of the country's industries, gives employment to 80,000 workmen and has a production value of over $300,000,000 per annum.

As an accompaniment of this great and growing mining industry, Canada is building up a smelting and refining industry of world importance There are now huge plants in Ontario, Quebec, Nova Scotia, British Columbia and Manitoba These plants produce:

Copper • Nickel • Zinc • Lead • Cobalt • Iron
Ferro-alloys • Gold • Silver • Bismuth • Radium
Cadmium • Selenium • Aluminum • Tellurium • Uranium

The plants give direct employment to 10,000 workers, and indirect employment to many thousands more, have a production value of $200,000,000 per annum, purchase coal and electricity to the value of $12,000,000, pay for equipment, supplies, freight, etc., some $40,000,000 per annum, and add some $100,000,000 to the export value of Canada's mineral products, without counting the value of the gold recovered from base metal ores.

Prominently identified with the upbuilding of the smelting and refining industry of Canada from its inception, the Bank of Montreal gives this industry financial service through every stage Thousands of workers are depositors, sharing in the safety and facilities of the Bank with their employing companies.

The Bank's services include Commercial accounts, foreign currency accounts, financing of shipments, loans and discounts, collections, trade and credit information, safekeeping of securities, savings accounts, money orders, travellers cheques, banking by mail, personal loans.

MODERN, EXPERIENCED BANKING SERVICE... THE OUTCOME OF 119 YEARS SUCCESSFUL OPERATION

MUNICIPAL DISTRICT OF CORNHILL MEET

(continued from front page)

he understood it and recommended that Mrs. Kozak be treated at a recognized hospital. The council did not take any action regarding Mrs. Puffer's request for payment.

Mr. Kozak who is receiving relief also made application for a pair of mitts and "some smoking." The council agreed to arrange for the supplying of mitts but turned thumbs down on "the smoking." Mr. Kozak also complained as to the prices charged relief recipients at a certain store, claiming they were much higher than those charged ordinary purchasers. During discussion it was stated that this was not as [illegible] and the councillor for the division affected promised to give it his attention.

Application of Mr. Chas. Plants for old age pension was upon the motion of Reeve Glenn endorsed.

Application of Mrs. E. McMullen for old age pension was upon motion by Councillor Walker endorsed.

A communication from Mr. J. W. Hawkes offering acreage was tabled.

Mr. [illegible] wrote asking $30.00 for acreage re road diversion. On the motion of Councillor McSporan, the secretary was authorized to offer $[illegible] in full payment of land.

A communication from the Canadian National Institute for the blind explained that the allowance of Harry Donald, a dependent of this municipality has been cut from $15.00 per month to about half that amount. They suggested that council make up the difference. On the motion of Councillor McSporan, council decided to make up Harry Donald's allowance to $10.00 per month, meaning the council would have $2.50 per month to pay.

A communication from Ronald Swales was read requesting payment for labor performed in fighting fire. This was tabled for further information.

Andrew Ferguson wrote asking for a way out from Mr. W. Ferguson's place in order to haul grain. Council had some planks and Councillor McSporan will arrange for him to get same.

The question of printing the financial statement came up for consideration, the secretary explaining that a photographic-litho process, new as applied to this particular job, was being offered the municipality. After procuring quotations on this class of work, he had suggested that the traveller see Mr. Worton and perhaps come to some arrangement whereby Mr. Worton procured the photo-litho process through him.

Mr. Worton was present and explained that he had done this particular job yearly, with a brief interval for 24 years. He recognized the advantage of having an absolutely true photographic replica of the [illegible]'s financial statement, but suggested that as this matter had come up a short time before the statements were required, that letter press statements be used this year. And should the photo-litho process prove a success for this class of work, he would have had time to install equipment for this process.

On the suggestion (or motion) of Councillor McSporran it was decided to have Mr. Worton handle the statement this year. This would give him a year to adapt his office to the photo-litho process.

It was decided to publish with the statement a list of lands for sale and also a list of the relief recipients.

It was decided to sell lots 26 and 27 Kingman, for the erection thereon of a Baptist church. The sum mentioned just about covers the cost of transfers etc.

By resolution Councillor Holmberg, who is visiting the Pacific coast was given a four months leave of absence.

A communication was received from Mr. Baker enclosing an account for machinery repairs amounting to $20.00. It was explained that by arrangement with Mr. Baker road work in the municipality was done payment being made by the government in script. Municipal machinery was used and in return for the work done the municipality agreed to keep the machinery in repair. The account was passed.

Discussion regarding the sale of a grader to Beaver Lake took place. It was decided that the reeve be empowered to make best possible arrangement for disposal of 8 foot grader.

The date of the next meeting will be at the call of the reeve and secretary.

Reeve Glenn who had recently attended the Convention of Alberta Municipalities gave a very interesting report outlining the high-lights and most important resolutions of the gathering. There were 80 resolutions passed covering all phases of municipal activity. Reeve Glenn read quite a number of the more important resolutions. The convention, he said, was a little disappointed in not having more members of the cabinet present. Hon. Mr. Cockroft was present and spoke to the convention.

After Reeve Glenn had concluded his report the meeting adjourned to meet again at the call of the reeve and secretary.

HOCKEY

(continued from front page)

so much rubber in two periods as Burke for Tofield did in this game. Shots high and shots low, fast and slow, long and from close in. For two periods from his point of view the sky must have been raining pucks. Tofield was very weak. Les Glover, Norman Glover, Jack Bowick were unable to play due to injuries and to make it worse both Whyte and Swinton were suffering from colds, though on the line-up.

The game opened up at a fast clip and in the first period the play was fairly even, the locals outscoring the visitors 2-0. Both goals were scored by Swinton, one part rebound and part scrimmage. The puck was carried down by Allen, scrambled for, shot, saved and landed on Swinton's stick. The next second it was in the net. The second goal was a peach. Picking up the puck at his own blue line he went down, eluded the defence and drove it into the net. The play remained fairly even until the end of the period which closed with the score reading 2-0 for Tofield.

The second period was a terror. Irma chose to play four men up, sometimes five and only on rare occasions did the puck get beyond centre ice and just as soon as it did it was immediately returned. Burke literally saved shot after shot, scores of them. In this period Irma scored three times. L. McGuire, B. McGuire and Smith being the marksmen. All the goals were of the scrimmaging type as play hung around to the side and behind the Tofield goal for minutes at a time. The period ended with the score reading 3-2 for Irma.

The third period was a replica of the second almost a perpetual scramble in Tofield close-in territory. Again Burke was subjected to a regular barrage. Irma scored four in this period, the game ending 7-2 in their favor. The goals were scored by F. McGuire, Lawson, Smallwood and B. McGuire.

Line-up: Irma —Knudson, Lissee, Lattner, Lawson, Smith, Lattner; McGuire, McGuire, Smallwood.

Tofield —Burke, Allen, Dunn, Whyte, Beirnes, Sears, Swinton Everett, Matchmess.

Referee—Jack Bowick.

A Junior game between Bardo and Tofield was played at the local rink on Saturday. Bardo put up plenty of stiff opposition and the locals had to extend themselves to turn in a win. The score was 3-2 for Tofield.

News received last week—

Happy New Year to All.

A large crowd attended the Christmas concert held at the school house last Wednesday night, one of the best programs were put on, all doing their parts successfully. One outstanding feature was music supplied by Miss Jean McMullen on the guitar and Harold McMullen on the accordian. Much credit and thanks were given to the teacher, Miss Lindsay. Mr. Jim Hutton acted as chairman and Miss Hazel Sears as organist. After the program Santa Claus came on the scene, much to the delight of the youngsters and distributed gifts and stockings packed full of nuts and candy. Apples were passed around to all.

Miss Mabel Lawson of Camrose is spending her Christmas holidays at the parental home.

Miss Maud Wildman, who has been attending high school in Edmonton and Miss Marie Lawson in Kingman, are home for the holidays.

Mrs. Annie Lee is spending the Christmas holidays visiting her mother and other relatives at Lethbridge.

Miss Nellie Lindsay is spending her holidays at the home of her parents at Innisfree.

Mr. Harold Schultz motored to Vermilion and spent Christmas visiting friends.

Mrs. E. McMullen, Mrs. T. D. Ferguson and Miss Ethel Coombes were Saturday evening guests of Mrs. Sears and Hazel.

Mr. Ralph Whillans, who is working near Pickardville and Lloyd Whillans of Bushby spent the Christmas holidays with their parents, Mr. and Mrs. Chas. Whillans.

Mrs. T. D. Ferguson and son Lloyd of Lakeshore spent several days at the home of J. H. Ingram.

Mrs. W. A. Mitchell entertained a few girl friends in honor of Miss Maud to dinner Tuesday. Those were: Misses Marie and Evelyn Lawson, Ethel Brown, Eileen Starritt and Selva Carlisle.

Mrs. Davison, Miss Edith and Bill Stairs were guests of the Coombes family Sunday.

Messrs. Fred and George Williams and William Davison were guests of the Sears brothers Sunday evening.

Mr. and Mrs. Brown sr. entertained the Brown and McGinitie families at Christmas dinner.

Mr. and Mrs. T. D. Ferguson and son, Mr. and Mrs. William Ingram, Mr. and Mrs. Leo Oveldson took Christmas with their parents, Mr. and Mrs. J. H. Ingram.

Mr. and Mrs. C. A. Ingram, Mr. and Mrs. A. F. Schultz took Christmas dinner and spent the evening with the Sears family.

Family re-unions were held in all the homes but we did not get all the names.

Mrs. Sheppard has been ill at the home of her daughter, Mrs. Whillans the past two or three weeks.

News received this week—

Mrs. Annie Lee returned home Saturday after spending the Christmas holiday with her mother at Lethbridge.

Mr. George Lambert of Camrose was a guest of the Lawson family over the holidays.

Miss Maud Wildman returned to Edmonton and Miss Marie Lawson to Kingman to take up their school duties.

Mr. and Mrs. Sears and sons and Mr. Vick were New Year's guests of Mr. and Mrs. C. A. Ingram.

Mr. and Mrs. H. McGinitie and family were Sunday guests of Mrs. Bruhn of Shonts.

The card party put on by the Social Hour club at the Henry McGinitie home Wednesday evening of last week was a decided success. Six tables of whist and four of bridge was played. Highest score in bridge went to Henry McGinitie and Harold Coombes. Second to Mabel Lawson and Leslie McGinitie. Ladies first prize in whist went to Mrs. M. McGinitie, gents Mr. Mikkelson. Consolation: Mrs. Sears and Gordon Whillans. A draw was made for the quilt, Doris McGinitie was the lucky winner. Lunch was served which brought an enjoyable evening to a close.

Miss Nellie Lindsay returned on Sunday from Innisfree to take up her duties teaching.

Mrs. Sheppard was able to return to her home in Edmonton Friday of last week. Roy and Ralph Whillans accompanied her to Edmonton.

KINGMAN

A Happy New Year to every reader of the Mercury.

Mrs. Charles Lindberg spent Sunday afternoon at the Roy Melvik home.

Miss Catherine McDonald of Armena spent a couple of days with her sister Elizabeth McDonald last week.

Miss Gertude Asp of Calgary spent Christmas with her parents, Mr. and Mrs. A. Asp. Mrs. Asp accompanied her daughter home last Sunday for a two week's stay.

Mr. Leonard Simonson from Edmonton is home for the holidays.

Mrs. Petra Simonson and her family were guests at Mr. Thor Horte's for Christmas day.

Miss Connie Erickson of Edmonton is at home with her parents Mr. and Mrs. Jack Erickson for the holidays.

The School concert which was held on December 23rd was well attended. The program was good and Miss Martha Hardin was chairman. There was treats for the children and Santa Claus was there to help pass out the presents.

Quite a number of friends and neighbors helped Mr. and Mrs. Norman Wideman celebrate their fifth Wedding anniversary on December 24th.

Mrs. Wilson and son Shurley were guests at the J. K. Dettwiler home for Christmas dinner.

WOODLAWN

Mr. and Mrs. Eric Hansen visited their friends in Woodlawn last Sunday. Mrs. Hansen is going to Calgary to visit her mother, who has been ill for some time.

Miss Ella Hansen is leaving school to take a correspondence course at home for the remainder of the term.

Mr. George Loughead and his mother visited at the home of his former teacher, Mrs. Donald McCowan last Monday. They also visited at the home of Mrs. O. I. Cookson.

Miss Kathleen Loughead was home for the Christmas week end.

Mrs. O. I. Cookson and family spent Saturday, the twenty-sixth, at the home of George Cooksons, at a family gathering in honor of Mr. and Mrs. Jack Cookson jr. of Edmonton.

Mr. and Mrs. Jim McFadzean and family and Mr. and Mrs. Dek Ross and family spent Christmas at the home of their sister, Mrs. Charles Campbell.

Mr. and Mrs. Wallace Lee and family spent Christmas at the Bruce home.

Mr. Hugh Bruce visited Mr. Franklin Ray last Monday afternoon.

The Woodlawn boys played a hockey game against the Miquelon team last Sunday at the Miquelon rink. The score was 8-7 in favor of Woodlawn.

Members of the Good Will Club met at the home of Mrs. J. T. Wilson on Wednesday afternoon, Dec. 30th. The bad weather did not favor a large attendance, but they had a jolly time. Mr. George Loughead was a visitor and gave some much appreciated suggestions.

A party was held at the home of Mr. and Mrs. Alfred Loughead last Wednesday evening in honor of Mr. George Loughead's departure for his school at Lac La Biche after the Xmas holidays. Miss Hazel Stirrit of Kingman was a guest at the party.

The Woodlawn friends extend their hearty congratulations and best wishes to the new bride and groom— The former Miss Adela Gill and Mr. Alexandra Robinson.

Mr. and Mrs. Theodore Yaremko and their son Harold of Lamont visited Mr. and Mrs. J. T. Wilson last Saturday evening.

Miss Mabel Lawson and Mr. Lambert returned to Camrose where they are both engaged in teaching.

Mrs. Wm. Thompson and son John visited Mrs. Henderson at her home Monday.

Messrs. Jim and Ed Ratigan returned home Monday evening. They were working near Edson for several months.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

LAKESHORE

News received this week—

R. C. Phillips returned home on Sunday after spending a month on the Pacific Coast.

Mrs. Seale and Miriam are spending the Xmas holidays in Calgary.

Mr. and Mrs. T. R. Murray, Douglas and Malcolm spent Xmas day in Edmonton.

Mrs. Gladys Plants is spending a few days in Edmonton.

Neil Phillips spent a few days in Mannville last week.

Patrick Phillips is suffering from blood-poisoning in his chin.

News received last week—

Mrs. Seale and Miriam returned on Monday from Calgary where they spent the Xmas holidays.

Miss Margery Murray is confined to the isolation ward of the Royal Alexander Hospital with measles.

A party was held at the T. A. Jones home on Monday evening.

Miss Ethel Graham went back to her school near Mannville on Sunday.

Miss Marie Graham returned to Edmonton on Monday.

R. C. Phillips, Donald Phillips, Gloria and Gordon Plants spent Sunday afternoon at the Chas. Plants home.

Mrs. James Gimmel spent a few days at the home of her parents, Mr. and Mrs. J. H. Johnston. Mr. and Mrs. A. Rodway accompanied her to her home at Leslieville. They will spend a few days there before returning.

H. E. ROGERS

'THE TOFIELD MERCURY

Vol. XVII., No. 40 — Thursday, January 14th, 1937 — $2.00 Per Year. To U.S.A. $2.50

LINDBROOK

The annual meeting of the ratepayers of Lindbrook S.D. took place in the school here on Saturday afternoon at 2:30 p.m., Jan. 9th, 1937. The attendance was very meagre despite fine weather and good roads, there being only about a dozen people present all told. Mr. Chas. Morden was elected chairman of the meeting and performed that office very creditably. The usual minutes etc., financial statement and auditor's report were read, also the inspector's report and none drew much comment, favorable or unfavorable and so were passed O.K. Mr. J. Brown was re-elected as trustee by acclamation. General discussion followed, one item being the warmth of the school on cold mornings and a motion was put to engage an older person to see to the fires, another that a small heater be added and another that it be left as now, to the pupils, only that should they fall down on the job that they be replaced. Ultimately we believe it was left in the hands of the trustees. Another item was the provision of shelves to accomodate storing of lunches inside the school and we understand that Mr. Asa Rogers offered to supply and fix the shelves as needed. Another question came up as to the reason for the increased mill rate and it was disclosed that the operation of the school costs between 8 and 9 mills yearly, and that the 8 mill rate was due to a surplus and lately, owing to economic stress the taxes were unpaid by about half, in fact $1500 being outstanding now, when and if they come in, the mill rate will be reduced. It was also voted a sinking fund of $300 yearly be raised, but some said it was illegal and that a certain percentage of ratepayers was needed to pass same and these were not present, so it was left to the trustees to find out if legal and if so to call a general meeting to discuss same. The meeting closed about 5 p.m.

KINGMAN

Grace and Raymond Grahn are home from school suffering with the whooping cough.

Mr. Grahn was an Edmonton visitor on Friday.

Mr. and Mrs. J. K. Detwiler and daughter were dinner guests at the Leo Roth home last Sunday.

Miss Marie Lawson spent the week end visiting with Miss Elvina Simonson.

Rev. Emil Erickson and Rev. Heverstein had joint services at the Lutheran church last Sunday afternoon.

Rev. Arthur Lynn had services at the Baptist church in the morning and afternoon on Sunday.

Miss Lavina Simonson has gone to Edmonton where she will spend the winter.

Mr. and Mrs. Horte, Mr. and Mrs. Mackintosh and Mr. and Mrs. Welsh were dinner guests at Mr. Roy Melvik's home.

Leaving Winter Behind---Christmas in Florida

To our many friends at Tofield, Alta., a brief summary of our trip to this South East country.

On December 26th, we boarded the train for Elkhart, Indiana, from St. Paul we travelled on the Burlington Zepher, a stream line, a distance of 441 miles which we made in a little over 6 hours. This train is in such demand that you have to make reservations if you want to get a seat. The chairs are all numbered. We stopped over Sunday at the Administration Building of the Mennonite Board of Missions and Charities at Elkhart, Indiana, also visited the Mennonite Goshen College at Goshen Indiana.

Monday afternoon we took the bus to Flint, Mich. where we took possession of our new buick, which we had bought in Edmonton. From there on we motored, visiting relatives in Michigan and Ohio. Then on south through Ohio, stopping all night in Cincinnatti, Ohio. This is a large city of 500,000 population on the north side of he Ohio river. Crossing the river we entered Kentucky, here we passed through some of the rich blue grass sections which this state is noted for. Then on through Tennessee, here we stopped at the large Norris dam, just recently built by Roosevelt. Our next stop was at Knoxville, Tennessee. Here our church has a mission, we stopped over Sunday. This is a city of about 150,000 and is noted for its marble quarries. The largest marble industry in America. The U.S.A. Post Office is all built of beautiful polished marble. Kentucky and Tennessee, the country is quite rough and part of it mountainous. However, it is quite thickly settled, here you meet more people walking on the highway than any place I ever saw. They come out of these mountains to the highway to go to Town to do their shopping and trading. We saw some leading an old donkey hitched to a sled loaded with things they bought for a living, with the family walking.

Leaving Tennessee we came through Georgia. This is quite a long state north and south. Here we saw the people picking cotton still, also some of the largest Pecan nut groves in the U.S.A. are here. You can buy Pecans all along the highway.

We finally reached this southern State, Florida, where the winter is like summer. This state is about 500 miles north and south and from 100 to 150 miles wide, surrounded by water on three sides.

We have a furnished apartment for our home in Tampa, on the Gulf of Mexico, about the centre north and south. This is a city of a little over 100,000 population with more in the winter when the tourists come in from the north by the thousands. We are about 1500 miles south of Flint, Michigan, and about 3500 miles from Tofield. The roads are all paved, 4 lane high way close in to big cities.

We have been to Miami, that is about 300 miles south east from here on the Atlantic coast. This is a winter playground for bathing and swimming, providing all types and sorts of sports.

Pan American air port is there, where long distant sea planes light and take off. It was our priviledge to see several large planes land and also saw some take off.

Here we had the priviledge to see Mr. O. O. Miller from Akron, Pa., chairman of the Mennonite Relief Committee, take off for Buenos Aires, South America in a four motor, 32 passenger sea plane with a crew of eight. Two pilots, 2 engineers, 2 mechanics, 1 radio operator and a Steward. They make this trip in four days by flying only in the day time.

Mr. Miller's mission is in the interest of the Russian Mennonites in Paraquay, S.A. and also will visit our mission in Argentina.

This is a state of great variation, lots of wild land covered with timber and mostly tropical vegetation, parts are very swampy. The soil is largely unfertile, however some sections are very fertile.

They have the winter garden producing vegetables in season now. New potatoes, tomatoes, corn strawberries are shipped by the car load now. Their main crop is citrus fruits, oranges and grape fruit, which are ready for harvest now. We saw them pack oranges and grape fruit.

All kinds of palm trees, including the coconut palm. The palm grows wild. Christmas celebration is observed in its various forms. The pious wend their way to church and rejoice in the new born King, others indulge in sports and drunkedness. The youth shoot fire crackers, like they do in the north on the 4th of July. We didn't know what all this shooting meant, by inquiring we were told this is the way they celebrate in the south.

We have a Mennonite church in this city and a mission station in connection with it in the Mexican section of the city.

Some of our people from Pa., Mich., Indiana and Ohio come here for the winter, which is a priviledge to fellowship and worship together with our own people.

Providing the editor of the Mercury sees fit to publish this, he is at liberty to do so.

JACOB BRENNEMAN.

LOCAL & PERSONAL

Mrs. Bert Lovell visited Vermilion to attend the Rebecca lodge there for a couple of days this week.

The Misses Agnes and Annie Johnson visited Edmonton last week. Their mother is ill in the hospital there.

Mrs. S. Yakabuski and Miss L. Ross spent the week end with Mrs. Bertha Seale.

Miss Ruth Pauls of Edmonton is visiting with Miss Lois Thompson for a few days.

Messrs. A. Matchmess and A. Hummel spent Sunday in Edmonton.

Les Glover played hockey for the Irma team against Lloydminister on Tuesday evening. The Irma team did not all arrive at Lloydminister one carload being held up by the storm. Lloydminister won 8-2.

Mrs. Doc Simpson is spending a week's holiday visiting in Edmonton.

Miss Joan Ellis visited Miss Muriel Malcolm last week.

Mrs. Thomas sr. is staying at the Thomas home here for some time.

FOR SALE—Bronze Turkey Toms, from Government banded stock. Reasonable. Apply J. Bowick, Tofield.

HOCKEY

VIKING 3—TOFIELD 2

In a well played game on Monday night the local team went down to defeat by the odd goal, the final score reading 3-2 for Viking. The game was interesting from the point of view of the improvement in the Tofield team's play. Particularly was this noticeable in the first period.

The game opened up with each team playing cautiously. Tofield placed the first shot on Viking goal which was turned aside. This was the signal for more speed and in a few seconds the Tofield goalie was called on to handle a hard drive from well out in front. The play swung back and forth, the teams being fairly evenly matched and were both playing an effective passing game which brought them to the opponents defence before the rush was broken. On one rush Tofield shot hard, Rasmussen saved, but the puck went out in front and after a brief scrimmage Les Glover shot it into the net. The one goal advantage was short lived, however, as in a few moments Hardy for Viking equalized. Pretty much the same kind of a goal was scored as before, Bowick saving a shot ending a rush, only to have it shot in from the ensuing scrimmage. The period ended a tie.

The second period opened up fast both teams desiring to take the lead. Shortly after the period commenced Les Glover and a Viking player collided and Glover was knocked down striking his head against the boards. He was knocked unconscious and after a few minutes was assisted from the ice. Play went on,

High Lights and Low

The star on the theatrical stage stands in the brilliancy of spot light illumination; the political leader stands in the brilliancy created by countless votes; the athlete stands in a light created by the plaudits of a multitude. Yet for all of them, some day the light fades—even is extinguished. There are lights high and low of varying degrees for every individual in every walk of life, but for the great majority of us plain ordinary daylight suits us best. As long as life lasts within us, daylight recurs with unfailing regularity.

It is much the same in the realm of commercial affairs. Sometimes the lure of the city causes us to bask in the light of a "great bargain," but we find on sober reflection that the bargain light, like the spot light of the theatre, is purely artificial and magnifies and glorifies things out of all proportion to their true worth.

Every-day buying from your local stores, established to serve you, is, like daylight, safe, dependable and real.

Tofield Stores stand ready to supply you with almost all of your daily needs. Catchpenny schemes are almost unknown and you get value for your money—whatever you buy. Make 1937 a Tofield Trading Year. You will be just as well off in the end.

THE MERCURY

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

COMMUNICABLE DISEASES

There is a fairly large group of diseases which are called communicable-Dipthería, Scarlet Fever, Smallpox and Chickenpox, to name some of the more common ones in this country. They are given this name because of one outstanding and important characteristic. They are all spread from one person to another, from the sick to the well, and usually the spread is fairly direct.

The reason why these diseases are communicable is that they are all caused by disease germs. Disease germs are so small that we cannot see them without the aid of the microscope; for that reason they are called microscopic. They live, grow and multiply just as truly as if they were many times bigger. It is the transference of these living disease germs from the sick to the well which accounts for the spread of the communicable diseases. Each of the communicable diseases is caused by its own special germ. The disease germ which causes Diptheria never causes any other disease and no other disease germ ever causes Diptheria.

Disease germs do not grow in nature outside the human or animal body. They may exist for a time, but they do not grow and multiply. Some of them are hardier than others, but sunlight kills them all in a short time. Bad smells are offensive and we do not want them, but bad smells do not cause communicable diseases. Such diseases are always caused by disease germs, and because of the fact that these disease germs die comparitively quickly outside of the human body, the spread is practically direct from the sick person to the well. The spread of most of them is by transference of the germ-laden secretions of the sick person to the well by coughs, sneezes, kissing, fingers soiled with saliva, or common eating and drinking utensils.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

HISTORICAL PLAYS TO BE PRESENTED OVER CKUA

That historical drama need not be dull and uninteresting but can be as exciting as those old-fashioned "Unhand me, Jack Bradford you dog" melodramas has been proven by both the stage and the screen. The recent vogue for biographical plays has brought out of the mists of the past and into the twentieth century limelight such figures as Queen Victoria, Pasteur, Henry VIII, Rembrandt, Elizabeth of England, Cecil Rhodes, Mary of Scotland and many others. It is natural then that the third and youngest medium of dramatic entertainment — the radio — should also look to history for vivid dramatic material. In a new series of plays "New Lamps for Old" the CKUA Players bring to life for a short half hour some of these tempestuous men and women who saw far ahead of their own time and who fought, often to the death, for the things in which they believed.

"New Lamps for Old" is dedicated to the men and women who have blazed the trails to civilization and the plays in the series are built about the figures of some of these pioneers. In the fall plays centering around Socrates, Galileo, Erasmus, Henry the Navigator, Guttenburg and Oliver Cromwell were presented. On December 29th the CKUA Players present "Visions in Stone" a drama about the great English architect Christopher Wren. Mary Wollstonecraft, James Watt and Ludwig Van Beethoven are the central figures in the first three dramas of the New Year. These will be followed by plays about Florence Nightingale, the Corn Laws, Elizabeth Fry, the Rochdale Pioneers, Abraham Lincoln and others. The series closes with dramas based on the lives of some great Canadians.

The plays are in chronological order and are specially written for the microphone by Gwendolyn Pharis and Elsie Park Gowan. The players have developed a high standard of acting for radio and have exceptional talents in this medium. Ingenuity in obtaining sound effects necessary to give reality to the setting or to further the action has become a feature of these radio plays. Since the last series it has been necessary to obtain such varied effects as the hollow voice of a ghost, the barking of a dog throughout a play, the charge of cavalry followed by a 17th century battle, the cries and threats of an Athenian Court, the clank of instruments of torture, in addition to storms of every kind, mob scenes of violence and exultation, and many other effects.

The CKUA Players are always glad to have comments and criticisms from their listeners. The Radio Listeners who make a habit of following the plays throughout the series form an audience which can make comments of insight and value. Get the habit of listening in to the series now— "New Lamps for Old" every Tuesday night at 8 o'clock over CKUA, the University of Alberta Station in Edmonton (580 kc) and CFCN, the Voice of the Prairie Station in Calgary (1080 kc).

THE WORLD OF WHEAT

Importing countries have bought [illegible] wheat since the depression [illegible] they did in the good years.

[illegible] five years prior to 1929 the average yearly purchases of wheat by [illegible] from exporting countries was [illegible] million bushels.

[illegible] purchases gradually decreased [illegible] only [illegible] million bushels were consumed, a decline of approximately [illegible] per cent.

Canada, unfortunately, was the [illegible], her sales falling from an average of [illegible] million bushels per annum for five years prior to 1929 [illegible] million in 1935-36 a decline of [illegible] per cent.

Argentina suffered less than others and [illegible] actually increasing during the depression years from an average of [illegible] million for 5 years before 1929, to [illegible] million for the year 1934-35, or an increase of 17 per cent.

What did Canada do to lose more than her share of international sales?

What did Argentina do that enabled her to win new markets?

There would seem to be room here for careful investigation and study. Fortunately, things now appear to be somewhat on the mend, for Mr. Broomhall estimates the importing countries this year will demand 560 million bushels and that Canada's share of these sales will be about 216 million.

Prices have tended to be raised by: Talk that Germany is endeavouring to secure British credits with which to buy Empire wheat-Canadian wheat Board issues report showing Government holdings greatly diminished—Indian wheat shipments slow up; supplies diminishing — European countries, particularly Italy, still purchasing steadily—Some demand appearing from the Orient.

Prices have tended to be lowered by: Expectations Argentine crop will be large and of fair quality—Criticisms appearing from European wheat buying countries about increasing prices—Expected Manchuria will import less flour than in previous years—Reported that good wheat crops are in prospect in Italy and India.

OLD WILL IS FOUND AS LEGATEE DIES

VANCOUVER, Jan. 12.—A 17-year-old will drawn up by a Lethbridge rancher who died several years ago was discovered in a second-hand desk in a Vancouver department store on the day the rancher's widow died, ignorant of the will's content.

The will was drawn in February, 1920, by James Harvey Wallace of Lethbridge, leaving his then substantial estate to his wife Barbara Ellen Wallace. It voided a previous will.

Wallace died several years ago and his widow moved east. Last Saturday she died at Stanstead, Que. The same day the missing second will was found tucked to the outside drawer in an old desk used by D. L. Loughman, advertising manager for David Spencer's Ltd.

Loughman said the desk had been in his office for the past four years, after having stood in the used furniture department for several years. Its origin prior to that is unknown.

The will was drawn up at Havre, Mont. and named Mrs. Wallace, Francis Asbury Wallace of Gleichen, Alta and Thomas Brown of Vancouver as administrators.

The document named Mrs. Wallace as sole beneficiary of private property consisting of mortgages, livestock and cash and a half interest in J. H. Wallace and Co., holdings which included ranch lands, leases, cattle, improvements and accounts due in the Lethbridge district.

It was witnessed by E. C. Carruth, Havre, Mont. and Mrs. Mabel Wethereit whose address was not given.

The will was in an unstamped envelope addressed to F. A. Wallace, care of a business block here but the manager of the building declared there was no record of a tenant by that name and none is listed in the city directory.

Neither could Thomas Brown, named as one of the administrators, be traced here.

If a man has a right to be proud of anything, it is of a good action done as it ought to be, without any base interest lurking at the bottom of it.—Sterne.

SAYS HARD WORK BETTER THAN LUCK

"No! I had no thought of being railway president in my youth," said S. J. Hungerford, recently at an Ontario banquet. The chairman and president of the Canadian National Railways merely conveyed the impression that he [illegible] always [illegible] to do [illegible] job in hand as well as he could. Part of his success had been due to good fortune, part to [illegible] [illegible].

In an earlier interview he said that the matter of luck was sometimes the factor which promotes one man before another. But after the appointment, ability to make good in the more responsible [illegible] is what inevitably counted.

"If I had to choose between luck and qualifications, I'd choose qualifications. The difficulty of getting a job today as against early this century is tremendously greater but once that start is made many of the old rules apply," he said. He remarked that it is now tremedously harder to find men qualified to fill the highest positions, partly because the age of specialization created men with intimate knowledge of one phase of industry so that it was harder to find a man capable of running an organization composed of all types of employees.

Mr. Hungerford is just under six feet, slim, with the quiet bearing of the engineer-planner.

ARGENTINA'S GRAIN TRADE

Four grain firms virtually control Argentina's grain trade. They handled 85½ per cent of the total wheat exported last year and 86½ per cent of all exportation of cereals. Most of the existing elevators are in the hands of these four firms, according to W. J. Jackman, former Albertan and now located in Buenos Aires, who states that there is a complete absence of public elevators such as exist in Canada. Mr. Jackman observes that there it is hoped that this condition is in progress of being remedied, but progress is slow. Several years of study led to the adoption of a definite plan for a national grain elevator system. Tenders were invited for the construction of some six elevators over two months ago. What the next step will be and when it will be taken is not yet known. Some day the elevators will doubtless be built and a complete reform of the Argentine handling methods will then, and not till then, be possible, provided that control of them is not obtained by the present semi-monopolies.

An effort is being made to improve the quality of Argentina's export wheat according to Mr. Jackman and new varieties have been introduced. In 1935, however drouth hit the Argentine, and recommended new varieties withered to the point of disappearance side by side with fields of long used but now outlawed wheat which sturdily produced a crop of low grade but profitable grain. Volume appeals to the Argentine grower more than quality as 85 per cent of the acreage under grains is cultivated by tenant farmers and the majority of these pay their rent wholly or in part by delivering grain to the owner.

LOSES 10th WIFE THROUGH DIVORCE; HE'S SEEKING 11th

OLNEY, Ill. Jan. 12—Sylvester Plumlee, 63-year-old odd jobs man, has been divorced by his 10th wife, the former Mrs. Viola Martin of West Frankfort, Ill.

"Ves," as he is known here, is undiscouraged with matrimony however, and has indicated he is seeking wife No. 11.

A NEW SKATING RINK—

THERE ARE many things in Western Canadian life more important than hockey. At best it is a diversion, something by which players as well as spectators vary the monotony of every day work—or lack of work. It is well to always keep this in mind as there is a tendency in the enthusiasm that attendance at hockey games create, especially among young people, to magnify and distort the importance of hockey in ordinary day by day existence. Recognizing this particular phase of Canada's winter game will cause more real pleasure among hockey fans, even though exultation when a favorite team wins may not be as great or disappointment as bitter, when it loses.

The [illegible] is a thrilling one, both for those who play and those who watch, and when played with full regard for all the rules, produces a high degree of sportsmanship, great skill and considerable personal courage. Hockey, even if not actually a native of Canada, is essentially a Canadian game. It is on our frozen sloughs and town and city natural ice rinks that juniors have commenced to play, working up to intermediate, senior and for the exceptionally talented and well trained players, national league honors in this and other countries. Canada is the home of hockey and there are no better exponents of the game anywhere than those who are proud to call themselves native Canadians.

As a sport and as entertainment for people in all walks of life, hockey is rapidly spreading. In Great Britain and throughout the continent of Europe artificial ice rinks are popping up one by one. The game of course, does not assume the importance there that it does here, but thousands attend the games and apparently like them. Even in far-off Johannesburg, South Africa, there is an artificial ice skating rink on which university teams from Great Britain have played.

Tofield has for many years had its hockey teams. The exploits of the Silver Seven are still sometimes talked over, and later the senior team with McIntosh, Pruden, Lee, Bain, Smith, with other players were in the local hockey lime-light; later a senior team, which was the first to win the gas line trophy, some members of which are still playing with the present organization.

One of the greatest causes of dissatisfaction in connection with hockey at Tofield is the size of the rink. There is never a game when this subject is not mentioned and for twenty-five years nothing has been done about it. Called all manner of names and facetiously referred to by the Viking News as a "wash basin," season follows season with the same complaint appearing with monotonous regularity. If calling it names was the only thing to contend with, the burden could quite easily be borne, but unfortunately other things of a more serious nature enter into the picture. With senior hockey played at a fairly fast pace the size of the rink causes far too much bodily contact, frayed tempers and chances of injury—and it is the last mentioned phase which prompts this writing. Due to lack of width there is far too much boarding and playing the boards. Time and time again players are checked at the boards when there should be room to swing around. If they attempt to "get through" by the centre ice route, players are too close to make a clear course possible. Consequently the game has sometimes assumed the aspect of "ice polo," if such a description is permissible. The puck is continually being batted from stick to stick for the simple reason there is neither time or room for a player to make a "get-a-way."

There is no phase of life where imitation, or copying is carried to greater extremes than in sport. Youngsters growing up almost invariably copy and reproduce the actions and methods of older players. Consequently it was with little surprise that we noticed in a recent junior game, local players adopting the same style of play as the seniors; in the juniors' case unnecessarily.

Financing small town hockey teams is a bugbear. "Gates" are rarely large enough to pay the team's way, especially where long journeys are taken. Consequently some form of outside revenue is necessary. To offset this, mention might be made that small town hockey has its place in the credit side of the ledger also. For years Tofield has been complaining of loss of trade from some cause or other, depression, highways, changing habits of former customers, and lack of "drawing power" as a community centre. In this connection it was interesting to note the number of people seen around the rink on Monday last, who could also be seen almost any Saturday afternoon carrying groceries from local stores to their car, buggy or wag[illegible]

Any mention of the disadvantages of the present skating rink calls for some constructive proposition. For twenty-five years complaints have been fairly continuous and any more would be futile; therefore it is constructive suggestions that are needed rather than complaints. It has often been suggested that the old rink could be cut down the centre and widened; it has also been suggested that except for juvenile skating it be abandoned altogether and an open air rink constructed "up town"; others are of the opinion that a re-arrangement of roof supports of the old building could be made which would have the effect of considerably widening the rink. All these ideas are worth consideration. Our own pet idea—take it for what it may be worth—is to have a new rink, using cement blocks for the walls and the timbers in the present rink for the roof.

The "drawing power" of a really good skating rink, entirely apart from hockey, is greater than generally recognized. Given good ice, good waiting room accommodation and suitable music, which is easily obtained, there is no apparent reason why an intelligent promoter could not draw a great many people for miles around to enjoy skating on good ice, under bright lights and to music.

Four years ago the Vegreville Observer bemoaned the fact that the Vegreville team could not or did not win any games. Since that time the team has made such progress as to be in the finals of the Alberta play-downs and Vegreville as a hockey centre, draws such teams as the Saskatoon Wesleys and several Edmonton teams, with people coming from miles around to attend the games. Given the right kind of a rink to play on, reasonable accommodation for a crowd, which at present we haven't got, and there is no good reason why more country people cannot be induced to come to Tofield via the winter sport route. And incidently if an improved rink prevents serious injury to one or more players, it will have served its purpose.

BENEFITS OF OPEN MARKET OUTLINED TO GRAIN INQUIRY

(By Sam Ross)

Winnipeg, Jan. 11—(Special Correspondence)— Benefits of the open market and futures method of trading, criticism of "holding" policies and questions on regulation of the Winnipeg Grain Exchange were placed on the records of the Turgeon Royal Grain Commission last week

W. Sanford Evans, Winnipeg grain marketing authority and a member of the Stamp commission of 1931, and W. J. Dowler, president of the Winnipeg Grain Exchange, were the two witnesses heard by the commission.

Both Mr. Evans and Mr. Dowler supported the open market and futures method of trading as beidg most beneficial to the industry and both were critical of government agencies stepping into the market after the world wide depression started in 1930.

Mr. Evans, first witness of the week, urged development of known markets for disposal of grain because, he said, the finding of "new" markets where Canadian wheat was unknown would be difficult. He deprecated barter arrangements, declaring fluctuations of Canadian crops might make it impossible for Canada to fulfill her part of the bargain in years of short crops.

Criticizing the policy of withholding grain from the market, Mr. Evans said that if a created demand were not met it would disappear forever. It was possible to carry over physical wheat but it was impossible to carry over hunger. A profit might be made on odd sales in a holding policy but generally it worked to the disadvantage of the country as a whole.

In his respect he disapproved of the operations of the United States Federal Farm board which ended in 1933 and the stabilization efforts of the Canadian government agency between 1930 and 1935. They had [illegible] great quantities of wheat without materially affecting the price. It proved, said Mr. Evans, that a single agency could not force prices up against a world trend.

The price factor in [illegible] of wheat was important. A certain quantity could be sold when it was held for a higher price, but it was essential that, to dispose of wheat, the price must be within reach of consumers. If there were large supplies of wheat, then the price must go down to permit its purchase by "the marginal group of consumers." It should be remembered, he said, that tariffs, quotas, etc, increased the price to foreign consumers.

Hon. J. L. Ralston, K.C. of Montreal, commission counsel pointed out practically all wheat accumulated under stabilization efforts had been disposed of now. Mr. Evans contended it could have been sold more profitably if disposed of in the crop year in which it had been harvested. The open market could have taken care of the situation without stabilization efforts, said Mr. Evans. Better market conditions would have prevailed if the government agencies had not entered the markets, he contended.

In giving his evidence, Mr. Dowler declared the open market and futures method of trading brought the most beneficial results to all. "We feel justified in asserting that experience has established the superiority of the open market system over all methods in respect to cost, efficiency and adaptability to the necessities of the case," he declared. War or famine only might bring about conditions when the futures market might not be the most beneficial means of disposing grain, he declared.

The value of the futures market. Mr Dowler contended, was shown in the establishment of, such markets since 1920 for silk, tobacco, cocoa, rubber, tin, hides, copper silver and zinc, lead, canned goods, gasoline and crude oil. Another instance he added was the establishment of a futures market for soya beans by the Chicago Board of Trade last October 7.

In reference to extension of wheat markets, Mr Dowler declared:

"The individual opinions of the members as to governmental policies and methods of encouraging exports may vary considerably.

"But the unanimous view of the council of the exchange in regard to the marketing of grain in the future is that it can most efficiently be conducted by maintaining the open market and the futures trading method.

"That the channels by which Canadian grain can be most widely distributed are those developed by the shippers and exporters here operating in conjunction with grain merchants in the consuming markets.

"That the expansion of those markets will be best attained by facilitating the operations of this branch of the trade;

"And that the objectives of government policies should be the removal of the barriers imposed by other countries to the movement into consumption of Canadian grain and the extension of the knowledge throughout the world of the superior quality of Canadian Wheat."

Speaking for himself when questioned by counsel, Mr. Dowler said the volume of speculation in wheat had been greatly exaggerated. The futures market was used chiefly to avoid the risks of speculation. In the main, all companies in the grain trade used the futures market for insurance against price fluctuations.

The grain exchange was not opposed to appointment of a supervisory officer as suggested by the Stamp commission of 1931, said Mr. Dowler. The Stamp commission suggested a supervisor of independent judgment and position who would consider complaints from producers and traders and be free to make reports to the government at any time.

STYLES IN READING CHANGE LIBRARY OFFICIALS REPORT

Styles in reading, like styles in clothing, change with time. Book readers in Edmonton vary their tastes with the changing styles and have, in the 24 years of public library borrowing, created many book fads.

The first fad set by city readers is recorded by public library officials during and immediately following the great war. At that time books on the subject of war were in constant demand. Then came a period when all types of volumes on spiritualism were wanted. In the early '20's a fad for psychoanalysis developed and was met by increasing numbers of books on the subject.

In 1928, city book readers turned to popular philosophy. They hunted the shelves for volumes on the subject and the demand was always greater than the supply. A fad for socialistic works replaced the philosophy trend into the depression years.

As unemployment increased books on economics were demanded. People turned to useful arts and reference books for developments of latent talents. Books on tea cup reading, astrology and kindred subjects were always in demand during 1933-34.

In the closing months of 1936 home renovation loans created a fad for works on architecture and home planning, state library workers.

ROSS CRAIG STAR VERMILION GAME

VERMILION, Jan. 12.—In one of the fastest games played here this season, School of Agriculture team downed board of trade juniors by a 3-2 score here recently. Ross Craig with two goals, was the outstanding player on the ice. Dorin scored the winning team's third goal. Wright and Gilbert were the junior's marksmen

---

Speaking of the wonders of science, we read recently of a baby in New York that wasn't growing as it should. After trying several different diets, the child was given elephant's milk. By the time it reached the age of six months it weighed two hundred pounds! But of course—it was a baby elephant.—Bee Hive.

FARMER INDIVIDUALISTS

"In the early stages of the Wheat Commission investigations I said that I wondered whether a farmer was an individualist because he was a farmer, or whether he was a farmer because he was an individualist. The last resort of individualism in this country which is tending inevitably towards some forms of collectivism will be the primary industries. Perhaps not you, but certainly your children or your grandchildren, are going to be faced with the choice between being individualists with comparitively long hours and probably comparitively poor standards of living, or being units in a more closely organised system of agriculture whereby you will be able to enjoy at least approximately the same benefits as those enjoyed by industries based upon larger units of production."—Sir Herbert Gepp in The Australian Primary Producer

PERENNIAL WHEAT IN CANADA

Plant breeders have developed a plant with the seed of ordinary wheat and the long lived roots of grass, according to a news despatch from Ottawa. They did it by cross breeding ordinary strains of wheat with agropyron, a perennial grass closely akin to the common couch grass of Eastern Canada and the crested wheat grass of Western Canada. About half an acre of it, representing many different crosses and varieties will be sown in experimental plots next spring.

It is proposed that the new grass will be used to put sod on drifting farm lands in Western Canada. It is not anticipated that it will produce a commercial wheat.

Last year Russia announced the production of a perennial wheat, but few details regarding it were made public. —Wheat Pool Budget.

Don't Lose Money

Crops consisting of mixed or unsuitable varieties grade and yield poorly, so lose money to the farmer. The higher the price of grain, of course, the greater the loss suffered.

The use of good seed will avoid these losses. See the nearest Searle (Home) Agent about securing good seed at cost price.

The January meeting of the Ladies' Aid and congregational meeting was held at the Sears home Wednesday afternoon of last week. At the Ladies' Aid meeting, re-electing of officers was the main item. Mrs Appleby was elected president, Mrs. Carlisle vice-president, Mrs. Sears re-elected secretary-treasurer and Mrs. C. A Ingram assistant secretary-treasurer. Annual report given by the secretary indicated that the undertaking of 1936 was altogether successful After the devotional and business session the meeting was closed. For the congregational meeting, Rev Allan was chairman Gratifying reports were received from the Sunday school, Ladies' Aid and financial report of the church, all obligations being payed in full and $20 from the Ladies' Aid toward the taxes of the manse. Rev. Allan expressed appreciation of the past year's work, and for the co-operation of the members Members elected on the board for the following year were Messrs McCowan, Chas. Whillans, W A Mitchell, Mrs. Appleby and Mrs. Sears W. A. Mitchell, secretary treasurer. Rev. Allan closed with prayer, after which a social hour was spent A delicious lunch was served by the ladies.

Mr and Mrs Whillans entertained a large crowd of friends and neighbors to a card party at their home Friday evening of last week. Seven tables of whist was played Ladies first prize went to Mrs. C. A Ingram, gents first to Mr. Schultz Consolation prizes went to Mr and Mrs Nomeland. At midnight a lovely lunch was served by the hostess After visiting for some time the guests departed for their homes, thanking Mr and Mrs. Whillans for her kind hospitality.

The Ketchamoot boys and Hasting Lake hockey team played a game on the Hasting Lake rink on Sunday. The score was 4-2 in favor of Hasting Lake.

WOODLAWN

The Misses Nola and Margaret Cookson and the Messrs. Hugh Bruce, Wilfred Schroeder and Lloyd Cookson participated in the old style of chivareeing the newlyweds last Friday evening. They were cordially received and spent a very pleasant evening.

Miss Laurean Campbell spent the Christmas holidays in Edmonton with her grandmother.

Miss Edna Campbell of the University hospital in Edmonton, spent New Year's Day at the home of her parents, Mr. and Mrs Charles Campbell

Mrs. Charles Campbell is spending the week in Edmonton with her mother who is ill.

Mr. and Mrs. R. Bruce spent the last week end in Edmonton. Mr. Bruce is at the present time quite ill.

Bridal Shower

A shower held at the home of Mrs. H Stine for the new bride, Mrs. J A. Robinson on Tuesday, Jan. 12, 1937, was a successful affair. Mrs. W. L. was assisting hostess. Ladies present were: The bride, Mrs. J A Robinson; Mrs. J. Appleby; Mrs P Lauritsen; Mrs A Smith; Mrs W. McHeffey; Mrs. F. Kortsman; Mrs W. Hooper; Mrs. J. Bailey; Mrs. J. Bracegirdle; Mrs. T. Glenn; Mrs. R. Smith; Mrs. F. Williams; Mrs. O. J. Cookson; Mrs. J Brown; Mrs. R. Odlorne; Mrs. E. Wilson; Mrs. A. Gill; Miss L. Merden; Mrs H Evans; Mrs J. Pruden; Mrs. W. Glenn; Mrs. T. Genoski; Mrs B. Trainor; Mrs. A. Williams; Mrs. H. Stine and Mrs. W L. Gill. Those unable to be present but who sent along their showers were: Mrs. B. Spilsted; Mrs. G. Branton; Miss M. Dreco; Mrs. D. McCowan

One would also think the men were just a wee bit interested, there being quite a few present at the closing. However we don't think they left any showers.

The bride was the recipient of many lovely and useful gifts, some of them being quite elaborate. She was also presented with a Wishing Well, which provided answers to the guests wishes, some of them being quite funny.

However everyone was most interested in the bride's wish. Mrs. Robinson wished to visit her friend Bessie, who is also a bride of recent date Her wish was answered by two baby dolls and a baby elephant appearing from the bottom of the well and creating much amusement for the crowd.

The bride was then started on a treasure hunt, finding her presents. This started upstairs on the end of a string and ended in the living room. While she was thus opening the presents she had found, a baby basket was carried into the room, all prettily decorated in white and tied with pink bows, holding a sleeping baby doll dressed in swaddling clothes. After a rummage in the basket she found the remainder of her presents which altogether took up quite a space when put on display on the kitchen floor. Everyone offered to take some home for her but she finally found room for them all in her mother's car. A very nice luncheon was served amid the excitement and then the ladies all departed for home.

COWAN—WHILLANS WEDDING

A quiet wedding was solemnized at 3 p.m. on November 18, at the home of the bride's mother, Rev. W. A. Cameron of Central Presbyterian Church officiating, when Miss Amy Jean Whillans, younger daughter of Mrs. Gordon Fraser of this city and the late Robert N. Whillans of Peace River, Alta., became the bride of Mr. Archie V. Cowan of Fish Lake, son of Mr. and Mrs. J. S. Cowan of Winnipeg. The bride was attended by her sister Mrs. Isabel Laird as matron of honor and Mr. Bert Hasel was best man.

Given in marriage by her stepfather, the bride wore ivory charmeuse satin, cut on graceful princess lines, with insets of French imported lace, the traditional wedding veil of net and orange blossoms, and carried Talisman roses. Her sister's gown of cherry moire, black trimmed and in peasant style, was complemented by a corsage bouquet of gardenias and violets, while the bride's mother wore negro brown chiffon velvet with rosebuds on corsage.

Following a trip to the South, the bride and groom will reside at Fish Lake.

About the Neighbours

Somebody once said it takes all kinds of people to make a world Most of us agree they are all here You may like all your neighbours and you may not. The point is, if not, WHY not?

Would you remain friendly with the man who told you one thing one day and the opposite the next? Would you prefer a neighbour who always lived up to his promises, to one who promised one thing one day and did something entirely different the next?

Would you lend your closest neighbour your binder or wagon if you had no reason to suppose he would ever return it? Or would you lend him your cold chisel if you knew he would tell all his friends you were the most unreasonable and most greedy person alive?

Do you think for a minute your community would be made more harmonious, a better place in which to live if everybody did the best they could, were as fair in their dealings with each other as you would have your neighbour be with you?

Is it not a marvelous feeling to know you can trust your neighbour? Is there any excuse your neighbour can possibly make that would pardon him in your own mind for suddenly disregarding all agreements or promises he ever made to you?

This statement is one of a series written by The Mortgage Loans Association of the Province of Alberta. The Association is composed of 34 member companies. It represents hundreds of thousands of small investments by typical Canadians. Its loans to citizens of Alberta amount to some forty-five million dollars.

(The fifth statement in this series will be published in two weeks) 4

HOCKEY

(Continued on back page)

neither side having much advantage. Glover returned to the ice receiving a great ovation from the fans, every single one of whom were glad to see his injury was not serious. At this stage play became very rough and Hannan as referee had to inflict several penalties before the game was straightened out again. A break came when McLaren for Viking put his team one up. Bowick had come out of the net to clear and couldn't get back in time to save McLaren's shot. Tofield then worked desperately to score and cut down Viking's lead when Whyte scored in a scrimmage. The period ended 2-1 for Viking.

There was no scoring in the third period Tofield worked hard for the equalizer but Viking put up stubborn opposition. Playing four, sometimes five men up with the goal keeper at the blue line, the locals bombarded the visitors net, but without success, the game ending Viking 2, Tofield 2.

Line-up: Viking—goal Rasmussen; Defence, Slavik, Goodwin; Forwards, McLaren, McKerhearn, Hardy, G. Ash, B. Ash, Kelly.

Tofield: Goal, Bowick; defence, Glover, Allan; Forwards Beirnes, Whyte, Sears, Swinton, Everett Matchmoss, Jones.

Referee: J. J. Hannan.

EXHIBITION GAME WITH CHIPMAN RESULTS IN WIN FOR LOCALS

On Saturday night an exhibition game with Chipman was held in which though they failed to win the game, the visitors produced some smooth and smart hockey. They were particularly effective in their forward rushes, coming up time and again with well timed passes. They were not so efficient though in finishing off their plays, lacking the final punch that precedes a well drilled shot. This no doubt was partly due to the local defence who were not letting forwards get in too close.

The first period put the locals in the lead 2-1. Tofield was playing a more aggressive game while the visitors were relying on stickhandling and passing attacks. Matchmoss and Swinton combined for Tofield's first goal, which was followed by one for Chipman. Sears put the locals in the lead when he beat the Chipman goalie on a well timed shot.

The second period saw the Chipman boys trying hard for the equalizer, yet keeping their organization intact. On a nice rush Don Beirnes scored for the locals, making a win seem almost a sure thing. This was all the scoring in the second period the score standing at 3-1.

The third period was the fastest of the three, the visitors trying hard to wipe out Tofield's lead. Tofield were the first to score in this period, Sears sinking the rubber after a determined Tofield rush. Chipman then staged an attack which brought them a goal and after numerous tries they scored another. This brought them within one goal of tieing the score and though they made every effort the final bell went with the score standing 3-4 for Tofield.

Line-up: Chipman; goal Strand, defence Strand, Motoyta; Forwards Wilson, A. McLachlan, E. McLachlan, F. McLachlan, G. McLachlan, A. Lauder.

Tofield: Goal Edwards, Defence Glover, Dunn; Forwards Beirnes, Whyte; Sears; Swinton; Everett; Matchmoss.

Referee—S. Burke.

FEARS NEW 'CRASH' BORN OF ECONOMICS

Warning that, in his belief, under the present economic system Canada is "driving toward another 1929" financial crash was issued by Prof. J. King Gordon, Montreal national secretary of the Fellowship for Christian Social Order, in an address Monday in Emery Hall. The meeting was attended by some 40 members of Co-operative Commonwealth Youth Movement of Edmonton.

The son of the Canadian author, "Ralph Connor" said the present approaching "prosperity is class prosperity" and that "that is all we can expect under the present system." The only way out was through "socialized planning," he said.

The speaker said Canada was coming to a new period of "boom" similar to that of 1929. He said it was important to be prepared for the economic development that will take place in the next few years

It was important also, he continued, to know what this prosperity means.

"Prosperity is, more than ever before, class prosperity," he reiterated. The prosperity was "expressed in terms of dividends and profits" but by comparison wages and employment showed only slight improvement.

In the United States despite huge profits dividends during the past year there were 10,000,000 people unemployed, Prof. Gordon said.

It had been estimated that the world depression cost as much in terms of dollars and cents as the world war, he continued.

Casualties of the depression were making it just as difficult for unemployed to obtain work as for some of the war veterans, he said.

He declared that the West contrasted with the east in that in the latter section of Canada "they are all talking prosperity and refer to the depression as if it had passed." There was not the same optimism in the west so far, he found.

HUGE RESERVES WHEAT SOUGHT

LONDON, Jan. 12.— Plans to build up huge reserves of wheat and other foodstuffs will be submitted to parliament soon after it meets Jan. 19, officials of the new food defence plans department said on Tuesday.

They explained buying would not start until the necessary funds had been appropriated, but predicted a reserve sufficient for between six months and a year would be accumulated gradually.

Experts said Britain would need to store 3,650,000 tons of wheat (approximately 136,260,000 bushels) for a full year's reserve, but doubted this much would be obtained immediately because of the huge cost, as well as shortage difficulties.

FOR SALE—Bargain list of second hand goods: Titan Tractor; 3 bottom horse plows; 14 inch Gang plows; 12 inch gang plows; 7½ and 9 feet Disc Tillers; Grain Drills; Fanning Mills; 6 hole range. John Deere Tractor. Apply M. C. Hammond, Tofield.

LAKESHORE

Joe Jones, Marjorie Jones and Mr. and Mrs. Leslie Jones visited Mrs. Joe Jones who is in the Royal Alexander Hospital on Sunday. Mrs. John Jones is helping out until Mrs. Jones recovers.

On Monday the Ladies' Aid held a meeting at the T. R. Murray home. The following officers were elected for the coming year: Mrs. A. N. Booth, president; Mrs. J. B. Warner, Vice-president; Mrs. T. D. Ferguson, secretary. At the conclusion of this meeting the Annual meeting of the United Church was held. 1936 has been a very good year financially for the Church in this district.

John Warner jr., who is one of the youngest members in the local Grain Club has been awarded the General Efficiency prize for the Local. The prize is a two day trip to Edmonton with all expenses paid.

Miss Margery Murray is expected home from the hospital Wednesday.

Mrs. John Wood was hostess to a number of her friends on Tuesday afternoon. Bridge was the order of the day. Those present were: Mrs. T. D. Ferguson, Mrs. W. E. Seale, Mrs. M. Wood, Mrs. Bethel, Mrs. Bertha Seale, Mrs. L. M. Graham, Mrs. J. H. Johnston and Miss Jessie Munro.

Miss Jessie Munro is staying with her sister, Mrs. Seale.

The Women's Auxiliary held a bridge party at the Weatherill home on Monday night. Mrs. E. Googlin won first prize and Mrs. V. Moss was awarded the consolation.

There was a Social Credit meeting at the T. R. Murray home last Friday evening. Cards and checkers were played. Mr. Murray resigned as Organizer and W. Riley was elected to take his place.

Mrs. Booth, Mrs. Seale and Mrs. Bert Swift were visitors at the J. B. Warner home on Wednesday.

BEHIND THE HOG

(Continued from front page)

one replied, "And from the looks of you, you're the guy who caused it."

In curling, go slow and fare well, speed up and farewell.

It was a toss up whether he went to choir practice or curled. Yeah, and he had to toss 15 times before putting on the curling togs.

Some curlers grow under responsibility, others merely swell.

And the Curling rocks go round and
and round, and where they stop
nobody knows,
Oh Ho Oh Ho Ho Ho!
The lead and second, how they sweep,
it almost makes the skipper weep,
Oh Ho Oh Ho Ho Ho!

And look skips. Once you've hit the bottom, anywhere is high.

Ain't it the truth—Time is never idle, BUT lots of curlers idle with time.

The duty of this column is to comfort the afflicted curlers and not afflict the comfortable.

When one of the new curlers said "Hello" to one of the old boys, he said "I don't know you from Adam." The new one replied, "You should, I'm dressed different."

A handicap at the rink is one that is easy on the head.

WINNERS OF MOST POPULAR CHILD CONTEST

Due to the Christmas rush mention was not made of the winners of the most popular child contest sponsored by the Crown Lumber Co. Ltd. The following are the winners: Girls—1st. Joyce Innes; 2nd Patsy Spangler; 3rd Ella Brown; 4th Betty Webb; 5th Muriel Rogers. Boys— 1st Elmer Googlein; 2nd Keith McBratney; 3rd Lloyd Ferguson; 4th Duane Warner; 5th Wayne Heider. The first lucky girl received a large Shirley Temple Doll and the boy a complete skating outfit.

Miss Margery Murray is home from the hospital at last. When nearly recovered from her operation, Margery contracted the measles.

Miss Eileen Phillips is confined at home with the measles.

[illegible] Bert Swift of Falls is still with her mother, Mrs. A. N. Booth.

WOODLAWN

There will be an amateur program [illegible] January 29th, in the [illegible] Prizes will be a[illegible] numbers, as voted by [illegible] recitations, di[illegible] selections Lunch will [illegible] Everybody welcome.

[illegible] Schroeder returned last week from his homestead at Drayton Valley

[illegible] Olsenberg were the Saturday evening guests of Mr. and Mrs. J. T. Wilson.

UNITED CHURCH NEWS

The Annual Meeting of the United Church congregation was held on Monday evening, January 18th. Notwithstanding the cold weather and the prevalence of sickness, there was a good attendance. The reports showed activity and progress in all departments.

The reports of the C.G.I.T Groups given by Pat Firth and Margaret Dodds were well received and they were commended for their splendid showing.

There was a fine spirit in the meeting and while 1936 has been a hard and difficult year for the church as for all institutions, the congregation with all its departments looks hopefully and optimistically into the future.

The financial obligations were not all met but it is hoped the small deficit will be wiped out before the end of January. Messrs. Lovell and McHeffey were re-elected to the Board of Stewards The Rev. D. K. Allan presided. A very delightful social time was held at the close.

Born: To Mr. and Mrs. John G. Macdonald in the Lamont hospital, on Monday, January 18th, a daughter.

BEHIND THE HOG

(By A.B.C.

LADIES' WEEK, WE HOPE THEY CAN TAKE IT.

The creations worn by the Ladies are marvelous in the extreme. Bigger and better than ever. Ski suits, Jockey suits, Curling suits, lots of what nots and why nots. Fancy doo dads on the rocks and brooms, those with weight make up the outfit.

Two ladies' rinks are away to the Edmonton Spiel. Peggy Hammond has 3 willing helpers in Mrs. Doc. Law, Mrs. Bill Chapman and Muriel Malcolm. Mrs. Geo. Bruce has as her helpers, Mrs. Cap Lee, Mrs. Geo. McLaughlin and Mrs. Firth.

The trial games between these two rinks were well played and close, and was followed by a large gallery. Bill Chapman curled a lovely game and was closely followed by Artie and Lera, they played behind the glass. I curled fair but did not have my glasses.

We passed Mrs. Doc. Law as the classiest sweeper. The best draw curler, well, we had better let our choice rest, as we have to still live in Tofield.

Now just a whisper to the men whose wives are away to the Spiel. You had better keep your ear glued to the phone as they just might wonder what you are doing, if they can't get you.

FLASH: We just heard that Mrs. Hammond gets 3rd or 4th in the Grand Challenge. Did not get anything on the other rink.

Now to get a few jokes off my chest

They say that Men and Women curlers are cast in the same mold, but me thinks that some are moldier than others.

One of our young curlers took a lady friend out and when the boys asked him, "what's she like?" he said "Everything, beefsteak, spuds, lobster, salad, pie, ice cream, everything!

A fair young curler asked Doc what could be done for her stomach. He tersely replied, "diet." And she sweetly asked, "What color, Doctor?"

And Ladies, the gallery doesn't laugh when you fall down, but the ice makes some funny cracks.

One lady curler said to her hubby, "I can't wear this dress tonight, it hasn't any hooks on it." He said "Don't worry dear, there'll be lots of eyes on it."

A smart curler is one whom has not let any women pin anything on him since he was a baby.

They tell me that Lem lost what it takes to make a barber, but received a work of Art in return.

One of our curlers of long standing dropped a few games this season, and on the way home he casually dropped into a fellow curlers store and bought a can of spinach. We don't eat spinach. This is a true story.

The men are talking of a local spiel, talk is as far as it has gone so far, but we would suggest as some prizes, 4 cans of Spinach and 4 bottles of Catch-up.

The Ladies, We bless em, caress em, possess em, repress em, rassen em, impress em? Success to them. The Club assess em.

The golden rod has vanished from
the hillside and the plain,
Ladies need no longer look for brooms
out in the lane

"My suppers cold," Chris cried with vim. Then Peggy made it hot for him.

And this is the horrible story, told
as the twilight fails,
And the girls walk home together,
hearing each other's wails.

After a skip has been in several hot spots, he passes out cold.

SERVICE WITH A SMILE
WE AIM TO PLEASE!

HOCKEY

TOFIELD 6—HOLDEN 5

The locals met Holden in a regular league fixture on Monday night of this week, the game being a ding-dong affair with the fortunes of play first swinging one way, then the other. Throughout the game the teams was evenly matched and the score is a fair indication of the run of the play The night was quite cold—almost too cold for good sport.

The first period opened up with no special advantage to either side for the first few minutes. Holden then began forcing the play and for a few minutes appeared dangerous. Tofield however were the first to score, Swinton sinking the rubber on a nice passing play. From this point on to the end of the period Tofield set the pace and added one more to their score when Jack Bowick beat the Holden goalie on a neat shot. The period ended 2-0 for Tofield.

The second period was distinctly Holden's, both as regards play and scoring. With Holden putting on the pressure, the locals seemed to lose their punch, with the result that Holden ran in four goals in this period. Playing aggressive hockey and displaying a sweeping passing attack that brought them within goal range time and time again. They had the score tied and then went on to add two more. E. Stewart scored three of the goals and Black one. At this point it looked like a Holden victory. The period ended 4-2 for Holden.

The third period saw a rejuvinated Tofield team and this period was distinctly Tofield's. In the first minute of play. Les Glover put one by the Holden goalie and a very few minutes after Matchmoss tied up the score. With the game yet to be decided, both teams speeded up the play with the locals a step ahead of their opponents. Tofield went into the lead when Whyte scored on a hard drive from well out in front. Holden made desperate efforts to tie the score and were successful, the latter half of the period seeing the score standing 5-5 Chapel for Holden made the equalizer. The game was still fast and the result a toss-up when Les Glover on a rush put the locals into the lead once more. This was all the scoring the game ending 6-5 in favor of Tofield J. J. Hannan refereed the game

On Sunday a hockey game was played between Ketchamoot and Hastings Lake. It was in the nature of a friendly pick-up game and resulted in a score of 6-4 for Ketchamoot.

A hockey game is billed to be held Saturday night between Tofield and Ross Creek. In case you do not know it this Ross Creek team is no push over, in fact they play fast, smooth hockey. They only lost by the odd goal when they met Tofield two weeks ago.

Mrs. S. Jack of Edmonton visited with her aunt Mrs. McConnel for a week.

COMMUNICATION

(The following letter was received by Mr W. Bellamy Many people in this district are acquainted with Mr. Turner and will be pleased to hear that he is enjoying his holiday.

400 Bury Road,
Bolton, Lancaster,
England

Dear friend,

How is Walter? For myself I am just fine. We had a fine crossing, it was just great How is everybody in Tofield? There is quite a change here, but not as much as I expected to see Things seem very dear Most any kind of a turkey made four bucks this Xmas and other things accordingly. We have been here five weeks tomorrow and have seen the sun about 2 hours in that time. Fog and rain and more fog and rain, but we are enjoying ourselves just the same. Now Walter, will you remember me to everybody in Tofield and tell them I have not forgotten them at all. So good-bye for a while.

DICK TURNER.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

CLOTHING FOR INFANTS AND CHILDREN

Is your child dressed too warmly? Probably he is. Almost every mother puts too many clothes on her child. Too many clothes makes the child perspire, tires him out, and makes him more susceptible to colds and other infections.

Children should be dressed properly for health and comfort. The rule to follow for the amount of clothing is: if the child perspires, less is required; if the hands and feet are cold and the face is pinched, more is needed. Thus the run-about child [illegible] after the cold has healed, [illegible] he does not perspire. When [illegible] out of doors, outer garments [illegible] sweaters, snow suits, leggings etc. should be put on. It is a [illegible] to weigh a child down with a heavy underclothing which [illegible] him perspire and be uncomfortable while in the house. In hot [illegible] the child should be clothed [illegible] suit which allows freedom, [illegible] comfortable and allows the child [illegible] tanned.

What about the baby? Here the [illegible] is even stronger to bundle [illegible] with more clothes than he needs. In the winter time a baby should have a shirt of wool and cotton [illegible] and silk, over this a flannelette [illegible] and a cotton dress. Long stockings or knee length bootees are necessary to keep the feet warm. If the baby requires more, sweaters should be used. It is very important that the dress and gertrude are not long enough to hinder the movement of the legs. When going out of doors [illegible] bonnets, blankets and sleeping bags are used. The binder should never be dressed so that when in which is around two weeks of age. In the summer the baby should have the clothing removed so that he does not perspire. In the very hot weather a diaper is all that is necessary.

To sum up clothe your child to be comfortable in the house, and add extra garments when he goes outside.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

CROP INSURANCE IN U.S.

President Roosevelt's committee on Crop Insurance has now prepared its report. The main recommendations of the Committee are as follows:

1 That a plan of crop insurance for wheat be recommended to Congress for consideration at an early date so that it may be put into effect [illegible] the 1938 crop.

2 That administration of any crop insurance program be a function of the Department of Agriculture, coordinated and integrated with other programs and functions of that Department.

3 That in view of the public interest in crop insurance including a greater degree of stability of supply and income, and reducing problems of special measures of relief to stricken areas, the costs of storage should be borne by the Government, together with all overhead costs of administration. Adequate funds should be made available to the administering agency to meet requirements for.

(a) Overhead administrative expenses,

(b) The purchase and handling of commodities necessary to initiate the program,

(c) Reserve adequate to meet extraordinary needs such as might arise out of a series of low yields during the early years of operation of program.

4 That any proposed legislation provide for:

(a) Insurance of crop yields only without insurance of price;

(b) Employing the farmers' own average yield, as determined from a representative base period, as the basis of insurance coverage.

(c) Insurance of only a designated percentage of the producer's average yield;

(d) Determination of premiums on the basis of individual and regional loss experience;

(e) Payment of premiums and indemnities in kind or cash equivalent

(f) Holding insurance reserves in the form of the stored commodity for which the insurance is written.

(g) Writing of insurance, adjustment of losses, and general local administration through local committees or boards of directors.

5 That the premiums charged the insured be such as actuarial studies and accumulated experience indicate are necessary to cover crop losses for a period of years.

6 That the administering organization be authorized to require a minimum amount of participation in the crop insurance program from counties or regions before the insurance will be sold therein

7 That storage of wheat reserves for insurance purposes shall be made in federally bonded warehouses or state-licensed warehouses that satisfactorily meet requirements or in other ways that will adequately protect the interests of the Government and the farmers insured.

8 That crop insurance research be continued by the Department of Agriculture in order to facilitate administration of any crop insurance program that may be instituted —Co-operation and Market News.

THE WORLD OF WHEAT

By H. G. L. Strange, Director "Crop Testing Plan."

Dr. William Saunders was a Horticulturalist; his son, Dr. Percy Saunders, was a professor of chemistry. Another son, Dr. C. W. Saunders (now Sir Charles) was a scientist, an instructor in music and voice culture, and a masterly player on the flute.

Out of the genius contained in these remarkable personalities came Marquis wheat, which, during the past twenty five years, has been seeded probably on a larger acreage than any other Spring wheat variety known.

Dr. William conceived the need for an earlier variety than Red Fife. He imported breeding stocks from many parts of the world. Dr. Percy, in 1892, made the crosses of Red Fife and Hard Red Calcutta, and Dr. Charles, in 1904 made the final selections which resulted in Marquis.

Dr. L. H. Newman, in 1912, selected for Dr. Seager Wheeler at Rosthern, Sask., an improved Marquis head, which, multiplied under Seager Wheeler's skilful eyes and hands, became the famous 10-B strain, from which springs probably 90 per cent of all Registered Marquis.

Marquis once occupied about 90 per cent of the wheat acre of Western Canada. Today it still occupies nearly 60 per cent. It is still the "King of Wheats," and should be seeded in preference to any other variety wherever it gives satisfactory returns.

The Following factors have tended to raise price:—

Britain contemplates building up reserve wheat stocks; U.S. farm stocks of wheat and corn on January 1st smallest in eleven years. German Government demands increased grain deliveries and prohibits wheat and rye feeding to livestock. Italy, Greece, Holland, Belgium and Germany have bought large quantities Argentina wheat.

Following factors have tended to lower price: Clear weather in Argentina favors movement of small grains and promotes growth of corn. Australian weather favors crop movement. Plan under consideration to increase British-grown wheat. Large Argentine shipments ensure English millers of sufficient wheat for considerable period

PRINCIPAL C.N.R. TRAINS TO BE AIR-CONDITIONED

MONTREAL, January 18 — Air-conditioning of passenger train equipment on Canadian National lines will be considerably extended before the opening of the next summer season, it was stated by officials of the National System. With approximately 123 air-conditioned units now in operation, including Pullman cars operating on Canadian National lines under contract. All experiments with air-conditioning in the United States have been closely studied and the best features adapted for use in the system installed on Canadian National cars. The result has been that both the travelling public and car department officers have found the equipment most satisfactory in its operation

Air-conditioning embraces more than simply cooling, or heating, the air within a car. The proper circulation of correctly-tempered air is the principal requirement. The problem of car builders has been to provide the correct amount of fresh air in proper condition as to both temperature and humidity. The air-conditioning equipment in use on Canadian National cars provides a plentiful supply of fresh, filtered outside air, controlling the weather factor and maintaining balanced comfort within the moving vehicles. Individual control of the fresh air supply is a feature in Canadian National air-conditioned sleeping cars. Each berth and room has an individual air inlet which can be operated by the passenger to control the air supply in such manner that drafts are eliminated

SCOUT MEETS BEAR

One of the most unique acts for which a Canadian Scout award has been made was that of King's Scout Kenneth Keely, of Bala, Ont.,—the stunning and drowning of a bear which attempted to climb into a boat containing the Scout and his young sister. They were rowing across a Lake Muskoka bay last summer, when they approached a partly sunken log. As they drew near the log suddenly became a bear, and headed for them. Before they could pull away the bear reached them, and got his paws on the gunwale. In the boat was a screw-jack handle. Balancing the boat against the bear's weight, Scout Keely caught up the iron bar and pounded the bear over the head. The animal fell back stunned. Before it could sink the Scout grasped it by the back of the neck, and shoved it beneath the water "until the bubbles stopped coming up." He then succeeded in pulling the bear into the boat, and got it ashore.

FIND TRAPPER DEAD IN LONELY CABIN

R.C.M.P. launched Tuesday an investigation of a trapper's story that he had found his partner dead on their cabin floor, a rifle beside him and a bullet-hole in his temple.

Reaching Entrance, 140 miles west of Edmonton, after an arduous trek through deep snow, Albert Norris told his discovery of the body of Arthur H. Wiersba eight days ago, on the night of Jan. 4. Norris said he arrived at their cabin on Ghost lake, between Little Smoky and Simonette rivers, to find Wiersba dead, apparently by his own hand.

A .22 rifle lay on the floor nearby.

He said the cabin door was locked from the inside and the window intact so that he had to force his way in.

The cabin is in wild, unsettled country 90 miles north of Hinton more than 150 miles northeast of Jasper. An Edmonton constable has left on the long overland trek to the spot

EARLY VARIETIES OF GRAIN POPULAR

Dominion Experimental Station, Lacombe, News Letter

With standard varieties of grain being damaged by early fall frosts almost every year, Western farmers are beginning to lean toward the earlier-maturing sorts.

A great many early varieties of both wheat and oats have been tested at the Dominion Experimental Station, Lacombe. These tests have shown that, although when the standard sorts attain full maturity they outyield the earlier varieties, yet when the standard varieties are damaged by frost the approved early selections produce more grain.

In addition to the increased yields in frost years, a superior grade is secured on the early grains, which are usually able to mature before the occurrence of damaging fall frosts.

Then, too, their early maturity permits later seeding and consequently more intensive spring cultivation, with the result that the crop is freer from weeds, and dockage is accordingly less.

Recommended varieties of early oats are Alaska, in the very early class, and Legacy in the medium class—about a week earlier than Banner or Victory. Legacy yields up with the standard varieties, even when the latter sorts mature, and in years of frost injury Legacy far outdistances both Banner and Victory.

The Lacombe Station recommends Garnet, Reward and Red Bobs wheat for districts where Marquis will not consistently mature. One of these varieties may prove superior in one district and another in a district with slightly different soil and climatic conditions

Practically any well-known variety of barley will mature under average conditions in Central Alberta. O.A.C.21 is the best variety for malting, while Trebi is the highest yielder. Trebi, although not acceptable for malting, is a good feed barley

These varieties are no longer in the experimental stage. They have been tried and have proven satisfactory over a number of years in the fields of many of the most successful farmers in Central and Northern Alberta.

The "Big Interests" In Life Insurance

Are the Policyholders and Beneficiaries

IN Life Insurance, the "Big Interests" are the millions of Canadian policyholders and beneficiaries — men, women and children who share in the protection made possible by individual thrift and foresight.

The concern of those who act on behalf of these policyholders and beneficiaries is to safeguard their interests. Their accumulated savings, amounting to more than two billion dollars, must be invested wisely to obtain the greatest yield consistent with safety. Every promise made in Life Insurance policies must be fulfilled completely and promptly.

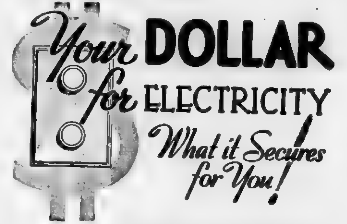
Canadian policyholders may feel justly proud of the wise and careful administration of their trust funds. Even in the darkest days of the depression, their companies met every obligation promptly and fully—bringing financial security to thousands of Canadian homes.

There is added satisfaction in the fact that the investment of Life Insurance funds has helped to build Canadian homes, schools and hospitals—and develop agriculture, industries and public utilities. Thus, the whole Dominion benefits from Life Insurance.

In the future, as in the past, Canadian policyholders and beneficiaries must always be the "Big Interests" of Life Insurance.

Life Insurance

Guardian of Canadian Homes



YOU SNAP A SWITCH! Instantly you commence to enjoy an abundance of light, or the quick, clean and convenient operation of your electrical appliances. Behind the switch, however, are the dams, generating plants, substations, and widespread transmission and distributing systems provided by your Power Company, to produce electricity and bring it to you.

Also behind the switch are the necessary services of highly trained engineers, technicians and skilled workmen to plan improvements and extensions . . . to install and maintain equipment.

Further than that, the technical service of your Power Company's engineering staff is available to all consumers to assist them in securing the greatest possible value from the electricity used.

Your Dollar for Electricity does not purchase just so much electricity. It contributes to maintaining the equipment necessary for generating and delivering that electricity . . . and for maintaining the facilities and organization required so that despite gales, sleet, lightning and every other possible trouble your electrical service will be continuous, dependable, convenient and economical.

CALGARY POWER COMPANY L

FUTURES MARKET BRINGS GREATER RETURN TO FARMER

(By [illegible])

Winnipeg, Jan. 18—(Special Correspondence)—Criticisms of the Canadian wheat pools, effectiveness of the open market and futures method of trading and troubles at the root of Canadian wheat marketing difficulties were detailed to the Turgeon Royal Grain Commission last week by A. E. Darby, secretary of the Winnipeg Grain Exchange.

The inquiry, being conducted by Mr. Justice W.F.A. Turgeon, also heard W. J. Dowler, president of the exchange, conclude his evidence and listened to Frank O. Fowler, manager of the Winnipeg Grain and Produce Exchange Clearing House, explain its operations.

Value of the futures market in making possible extension of loans and credits essential to marketing grain crops was cited by R. K. Beairsto, Western Chairman of the Canadian Banker's Association. A. C. Reid read the submission of the North-West Grain Dealers Association explaining the services of country elevators.

The wheat futures market made it possible for grain companies to operate on a minimum capital, tended to prevent growth of monopolies and fostered competition, Mr. Dowler said in concluding three days on the witness stand. It was "quite possible," he said, that government stabilization policies were essential in re-establishment of confidence after general market conditions had been unsettled by the wheat stocks.

Tracing history of the Winnipeg Grain Exchange, Mr. Darby said the exchange was an indispensable part of the grain marketing machinery. Existence of the futures market and its use for hedging purposes "undoubtedly result in increasing the prices received by the producer and in maintaining the market for cash or spot grain on a more stable basis."

Risk of speculation was inseparable from grain marketing, he said. "The function of the speculator is to carry this risk and, if he can obtain from it some measure of profit, he has rendered in return for it a very real service," Mr. Darby remarked.

Presence of the speculator removed the "risk from those points in the machinery of marketing where its presence would create hardships and confusions," said Mr. Darby. Speculators were unable to set the course of prices and although speculative short selling was possible it could only affect prices temporarily. World-wide factors would quickly right any unwarranted price trend.

Mr. Darby pointed out the period from 1925 to 1931 saw the growth of the Canadian wheat pools and the culmination of their operations "in financial complications which were prevented from assuming the proportions of a major disaster only by the intervention of the provincial and Dominion governments whose assistance was given by way of guarantees."

Principles upon which the Canadian wheat pools operated made failure certain, he charged. The pool policy was to operate for higher prices which brought increased production and decreased consumption. This was economically impossible, he contended, and financial difficulties were inevitable.

"The consuming countries," said Mr. Darby, "have adopted policies of restricting grain imports by means of tariffs, quotas and milling restrictions partly as result of their experience with war-time food supplies, partly of the desire to protect their agricultural population from the worst consequences of post-war deflation, partly under fear of new wars and under pressure of changing political conditions and partly again, we believe, from fear that a combination of producers in exporting countries, considered individually and collectively would result in an era of unduly high prices attained by artificial means and not resulting from [illegible]."

Later Mr. Darby said Canada's worst internal troubles in wheat marketing developed from efforts to put centralized control and operations in the place of the open market. Her worst external troubles he said, grew from "efforts to make a country, the chief wealth of which lies in the possession and production of raw materials and foodstuffs, into a self-sufficient, self sustaining and industrial nation."

The clearing house, Mr. Fowler told the commission, was established for convenience in facilitating handling of the immense volume of transactions on the grain exchange. It took the position of buyer to the seller and seller to the buyer and made sure the members were financially and morally able to carry out their contracts. Information on trading was confidential because grain companies did not want their rivals to know their business.

Mr. Reid, submitting the brief for country elevators, pointed out there were 5,600 country elevators with total capacity of 190,000,000 bushels in Western Canada. Economic functions of the country elevator "are those of a merchant, a warehouseman and producer's agent," he said. "To these functions may be added the responsibilities and privileges of government agency of seed distribution and generally of a number of services which I believe have made no small contribution to the progress of Western Canada.

"Through all the years of depression, when elsewhere many financial institutions had to suspend payments and when even in Canada markets for certain products were seriously restricted, no elevator has ever refused to purchase the farmer's grain and cash tickets issued in payment have always been immediately transferable into spot cash."

ALBERTA DAIRYMENS' CONVENTION TO BE HELD IN CALGARY

Alberta Dairymen from farms and factories, will hold their annual Convention at the Palliser Hotel in Calgary for three days, Tuesday, Wednesday and Thursday, February 9, 10 and 11. The meetings of every section give ample opportunity for discussion of problems related to the industry today. Reports of recent research will be brought by Dr. E. G. Hood of the Dairy Research Division at Ottawa. Mr. Singleton and Mr. Burgess of the Dairy and Cold Storage Branch at Ottawa will discuss the butter situation throughout the Dominion and in the export market. Mr. A. C. Fraser of the National Dairy Council will also speak.

The Cattle Breeders' and Producers' Sections will meet on Tuesday and Wednesday respectively. Dr. Bowstead and Dean Howes from the University of Alberta will speak to the farmers on pastures and feeds, Dr. P. R. Talbot, provincial veterinarian, will discuss diseases of cattle, and Mr. S. G. Carlyle, Provincial Livestock Commissioner, will speak on Bull Loan Policies. In addition to these there will be discussions on present problems led by prominent dairymen of the province. Farmers will have an excellent opportunity to meet and frankly talk over plans for the improvement of their herds with leaders in the dairy industry today.

A similar programme has been arranged for buttermakers and manufacturers. Dr. H. R. Thornton will be present and will speak on Milk and Cream Flavours. A feature of the buttermakers' sessions will be the open discussions that have been arranged, with creamery men from various parts of the province acting as leaders. Mr. W. Morris of Eckville is chairman of the Buttermakers' Section this year and Mr. D. Merkeberg of the Manufacturers' Section.

Special meetings and a cheese scoring contest have been arranged for cheese makers. Mr. Burgess of Ottawa will speak on Cheese Defects and their remedies and Dr. Thornton and Mr. Scott from the University of Alberta will deliver addresses.

A study of the complete Programme reveals an unusually good list of topics and speakers. The Alberta Dairymen's Convention has always been of a high order and this year's meetings give promise of being more largely attended and of more timely interest than usual.

TRANSPORTING LONDON'S FOOD LARGELY RAILWAYS' PROBLEM

LONDON, England, January 18.—Upon the railways of Britain falls the large part of the burden of transporting the food for the eight million people who form the population of Greater London, the metropolis of the world. Overnight express freight trains, working on carefully prepared schedules, arrive at the vast London railway freight depots from all large centres, agricultural areas, docks and ports. Many of these trains are loaded with hundreds of tons of foodstuffs and the arrival times are arranged so that all types of produce, including dry goods, are delivered at the principal London markets and traders' premises in the early hours of the morning, in time for opening sales. Many special milk express trains are run nightly to London and at one of the principal milk depots 60,000 gallons of milk are delivered by the railways daily. The movement of this vast quantity of foodstuffs requires the operation of more than 600 express freight trains every 24 hours, most of which run through the night.

WAKE UP YOUR LIVER BILE—
And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

GRAIN RATES CUT STILL IS SOUGHT

OTTAWA, Jan. 21.— Fight for lower domestic grain rates to the Pacific coast will continue, Thomas Reid, Liberal, New Westminster, declared Thursday.

Mr. Reid said he would press a bill to amend the Railway act so the Crowsnest rates would apply on traffic westbound from the head of the lakes as well as that eastbound to the head of the lakes.

If his bill is accepted, Mr. Reid said, rates on all grain and flour from the prairies to British Columbia would be reduced to the export rate of 20 cents per 100 pounds. On milling grains the rate for domestic consumption was 31½ cents he said, but a reduction of 10½ cents was made in 19[illegible] on feed grains and mill feeds bringing the rate on these grades to 20 cents.

DEER AT JASPER LIKE THEIR PIES

JASPER, Jan. 21.—Rapidly becoming used to all manner of civilized foods and even luxuries, Jasper Park deer now top off a meal with pie—not a piece but a whole pie! On Monday a busy housewife in town made a delectable coffee pie and in order that it might be cooled to just the right degree, placed it outside on the porch to chill in time for lunch. She cast a wary eye around for four- footed prowlers, namely deer, which are usually in the wrong place at the right time, but not one was visible.

She had hardly turned away, however, when a member of the family opened the door with, "Here's what's left of your pie," and there it was right enough—just the plate. And walking daintily across the yard was a deer, busily licking the last bits of meringue from his nose.

GOLDFISH SURVIVE WHEN BLAZE GUTS CITY RESIDENCE

Cats are not the only creatures with "nine lives." This week in Edmonton two tiny goldfish entered their claim for the year's narrow escape No. one.

Early Monday fire gutted the frame house of C. P. Hutchinson, 9918 106 st., forcing the family to flee into the snow in their night clothing and causing damage estimated at $1,000. Two hours later firemen were cutting their way through the exposed ruins in zero weather.

In the midst of all the destruction a large bowl lay on a blackened table. The water had not frozen or evaporated, the bowl was quite undamaged, and in the cool depths the family's two goldfish were swimming peacefully.

COURT, PRISONER AGREED ON TERM

LETHBRIDGE, Jan. 21.—Friendly agreement on the length of a prison sentence was reached here recently between a magistrate and a prisoner who pleaded guilty to a charge of vagrancy.

"I would like to remain in jail until the end of March" said Robert Bainbridge the prisoner.

"How would three months suit you? I can shorten it if you wish" Magistrate Beaumont queried.

"Three months is a little too long. I'd like to be out for April 1" said Bainbridge.

They agreed on a term of two months and two weeks.

PETE KNIGHT IS DENVER CHAMP WESTERN RODEO

DENVER, Jan. 21.—Pete Knight of Crossfield, Alta., champion bronc rider of the nation under Rodeo Association of America ratings, today led in the race for the riding title at the National Western Horse Show Rodeo.

Knight, winner of the national championship for four years, has drawn three horses so far, and ridden them all. He won first "Day Money" once, and second twice.

Jackie Cooper, Jasper Park, Alta., rider, finished high in the money Monday by riding Quicksilver.

BRINSTON, Ont., Jan. 21.—Dr. E. R. Frankish, medico-legal adviser to the Ontario Attorney-General's department, returned to Toronto today after exhuming and performing an autopsy on the body of 10-year-old Douglas Harper, strangled at his home near here when a horse's tail switched and tangled around his neck.

MRS. F. J. MALLOY IS U.F.W.A. HEAD

CALGARY, Jan. 21.— Mrs. F. J. Malloy, of Warner was elected president of the United Farm Women of Alberta at the Thursday session of the convention. She succeeds Mrs. Richard Price of Stettler, retiring after four years as head of the organization.

Mrs. Winnifred Ross, of Millet, runner-up in the election for president was unanimously voted first vice president.

"Whatever we may think of their politics, both Germany and Russia are putting us to shame in their youth movements and women's organizations" Dr. Warwick F. Kelloway declared in an informal talk in which he stressed the importance of rousing youth to take action in the development of a new social order.

ELECTROCUTION OF POULTRY NEW KILLING METHOD

OTTAWA, Jan. 21.—Electrocution of poultry instead of the usual killing methods now employed by farmers in Canada may result from experiments being conducted by the National Research Council.

Methods of electrical stunning of chickens have been tried out with a view to improving the feather release in order to make plucking easier, and also to improve bleeding if possible.

It was found that, if the electric current could be directed to the part of the brain which controls the feather muscles, good dry plucking could be achieved.

ELEVATOR MAN PROTECTOR OF WILD CHICKENS

RIMBEY, Jan. 21. — Harry Jeynes, grain elevator agent at Rimbey, is proving to be a veritable Jack Miner in his wild game preserving activities.

Last winter Mr. Jeynes fed and protected a dozen or more prairie chickens that sought the elevator grounds for grain and shelter. In the spring they disappeared, presumably to the nearby swamp and timber land, but this winter they came back in full force, bringing their friends along.

Mr. Jeynes now has close to 50 wild chicken and grouse.

H. E. ROGERS

DID you know that during the year 1936 one million seven hundred and fourteen thousand (1,714,000) bushels of malting barley were purchased from the farmers of Alberta for brewing purposes and all this at an average premium of thirty-five point eight eight cents (35.88 cents) per bushel over the regular price for 3 C.W. Barley. Just figure out for yourself how much this means to the farmers of Alberta!

KINGMAN

Quite a number of the Kingman people are ill with the flu.

The Skating Club had a party in the Kingman hall last Wednesday. Lunch was served by Herbert Asp and Palmer Bones.

The C.C.F. will hold their regular meeting on January 30th, at 2 o'clock. There will be a program.

The Annual Meeting of the ratepayers of Kingman Rural High School No. 8, will be held in Kingman on Saturday, January 30, at 2 o'clock p.m.

Mr. and Mrs. Ingvald Ness and son called at Mrs. Simonson's Monday afternoon.

MR. HARRY DRAKE PASSES AWAY

At Edmonton on Sunday last Mr. Harry Drake passed away at the ripe age of 82 years. Mr. Drake was a resident of Tofield for many years, being well known as a former rural mail driver. He leaves to mourn his loss one sister and one brother. The funeral was held on Wednesday, interment taking place in the Roman Catholic cemetery.

BEHIND THE HOG

(By A.B.C.)

The Highlight of this week's curling: Our own pet Rink, the A.B.C. Rink, clicked for a seven ender. And while I am on the subject, this stout rink has won eleven games in eleven starts. Did I hear any remarks?

* * *

Further to last week's news re spiel, lots of conversation, but no dice.

* * *

They tell me that Mrs. McLaughlin had an accident that slowed up the Brace rink at the Edmonton Spiel. The details are very meagre.

* * *

We forgot to mention in last week's creations of the ladies' baseball outfits with emblems on the caps.

* * *

Some of the Ladies said they would like to handle this column for one week. I cheerfully give them my consent.

* * *

Prosperity is just around the corner. A ladies rink is lined up for the Camrose Spiel. Mrs. Ernie Rogers, Mrs. Susie Innes, Mrs. Bill Chapman and Mrs. J. Oliver Latourneau. Mrs. Brace might also take a rink if Mrs. Mac recovers.

* * *

One of the boys was watching his better half curl. He said, "Just watch this lady curl!" She happened to miss the broom and weight, then he said, "Well she is a darn good bridge player anyway.

* * *

Wife to Husband: "I suppose you expect me to believe you came straight home from the rink. He said, "Sure, just like the crow flies." "Yes, she said, stopping frequently for a little corn.

* * *

Skips— it's praiseworthy to keep cool in a tight place, but to keep tight in a cool place is the most fun.

* * *

Know your geography: One of our curlers said to a stranger, "I'm a little stiff from curling." The stranger said, "Curling, curling, what province is that in?"

* * *

One skip after a bum shot, "I am generally the first to laugh at my own foolishness." What a merry life he must lead!

* * *

Doc said to his 3rd,"Boy, you must have lived in London." The 3rd said, "How come?" Doc: "Well, you've been in a fog ever since you started this game."

* * *

The lead said to his skip, "Did anybody ever tell you how wonderful you are?" The skip said, "Don't think they ever did." "Then," said the lead, "wherever did you get the idea?"

* * *

One of our curlers got a new fur cap with ear lugs on. The ear lugs worked the first night, but the next time he turned up with the old cap on. The boys asked for the new cap. He said, "Someone asked me to have a drink last time and I did not hear him."

* * *

Next week we are going to present that famous drama, "The Lamenting Lead Rides Again." A Scotch production. Scene: The Curling Rink. Written from personal observation. Music by Bandmaster Abbott. Watch for this as it will show but once, (and I think that will be late).

* * *

The censor for this column has the flu, so we are taking a chance on the above items, but again we know Steve Brodie.

TOFIELD SCHOOL DISTRICT NO. 1939

Bublic notice is hereby given that I will attend at the town hall in the town of Tofield on Monday, February 1st, 1937 from eleven o'clock in the forenoon until twelve o'clock noon for the purpose of receiving nominations for the office of trustee for the ensuing two years.

Given under my hand at Tofield, this 25th day of January, 1937.

J. W. CHAPMAN,

HOCKEY

ROSS CREEK PUT UP STIFF OPPOSITION—LOSE BY ONE GOAL

On Monday night at the local rink the Ross Creek hockey team for the second time this season met the local squad, and as in the previous game lost by the odd goal. The game was interesting at all stages, the score being tied up on two or three occasions. The boys from the north displayed a nice brand of hockey and while not playing as speedy a brand of hockey as the locals, worked more as a unit. Their two and three men attacks with passing combination plays were worth watching.

The first period opened at a steady pace, play being featured with end to end rushes. Ross Creek was sniping steadily from well out, the shots being well on, but Burke handled all of this kind that came his way. On a rush down the ice, Beirnes picked up the puck at left wing, shot and scored and Tofield was one up. As usual the first goal speeded up the game, Ross Creek setting to work in earnest to get the evener. This came after a rush down and a scrimmage around the Tofield goal, J. McLacklan putting the puck past Burke. Tofield, anxious to again secure the lead put on pressure and for a few seconds left their defence open. Ross Creek obtaining possession came up fast, two abreast with no one to beat but Burke. S. Wiltzen scored on this effort and the period ended with the score 2-1 for Ross Creek.

The second period saw Tofield working hard for the equalizer. The break came when Swinton scored on a solo effort. Les Glover had received a penalty for a minor offence and while the locals were short Swinton broke through and scored. Tofield continued to press the play, Ross Creek at this stage of the game finding the going hard. Their goalie was in good form and stopped a lot of rubber. The locals made the score read 3-2 when Swinton again scored. The period ended without further scoring.

The third period saw Ross Creek in better form and the game assumed a more even tone. The visitors were the first to score making it 3-3, and looked good at this stage. Swinton, however again boosted the locals in front, but in a few minutes S. Wiltzen for Ross Creek tied the score up again. This was the most thrilling hockey of the evening, featuring speedy end to end rushes with neither side having any particular advantage. With the score 4-4, Tofield scored next, Whyte checking an oncoming player near the Ross Creek goal, shooting and scoring. Whyte added another a few minutes later and with a two goal lead the game seemed safe enough for the locals. However, with only a few seconds to go, Wiltzen scored again for Ross Creek, the final score being 6-5 for Tofield.

Line-up: Ross Creek—goal, Stran; Defence, P. Stran, Motyka, F. McLacklan; Forwards, A. McLacklan, S. Wiltzen, J. McLacklan, G. McLacklan, A. Lauder, R. McLacklan.

Tofield—goal, Burke; Defence, L. Glover, N. Glover; Forwards, Beirnes Sears, Whyte,, Everett, Swinton.

Referee— G. Allan.

E. W. ROGERS

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

THE VALUE OF CLEANLINESS

There has always been an association between dirt and disease. In their earliest days health departments were occupied in cleaning up the towns and cities because it was believed that disease was bred in dirt.

We have [illegible] there is a great difference [illegible] kinds of dirt. The [illegible] dangerous [illegible] that which [illegible] contaminated by secretions [illegible] or animal body. The reason [illegible] is that the body secretions carry away from the body the disease germs which may be present [illegible].

Tin cans are [illegible], but tin cans are not [illegible] going to cause disease. [illegible] apples in rotting, give off an offensive smell but bad smells do not cause any disease.

The clean person [illegible] one who [illegible] with a handkerchief, who [illegible] out of his home, who washes his hands before he eats [illegible] to live in a [illegible] clean person gets rid of dangerous dirt when he gets rid of [illegible]. This is why [illegible] and cleanliness go hand in hand.

Because a [illegible] town, by caring for all dirt, makes sure that dangerous dirt is disposed of, because clean surroundings are a stimulant to personal cleanliness and tidiness and because cleanliness makes for more comfortable and happier lives, all efforts toward securing and keeping a city or town clean are to be commended and should be supported.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

C N R DINERS ENTER "BELIEVE IT OR NOT" CLASS—READ THIS!

MONTREAL, Que., January 25.—About three-quarters of a million meals a year are prepared and served [illegible] Canadian National Railways [illegible] to appease the appetites of the travelling public, according to information just released by W. W. Swinden, general superintendent of the sleeping and dining car department of the company.

"The business of feeding the travelling public in our dining cars keeps all the staff on their toes. They have got to be supplied with plenty of food on a diner but not too much, as some foods are very perishable," stated Mr. Swinden. "Before a dining car leaves a terminal, the steward must stock his car to meet the demands of the [illegible] and the passenger of simple tastes. Some perishable foodstuffs, however, are picked up en route, as supplies of this nature deteriorate very quickly and it is not possible to stock a car at a terminal with sufficient of these commodities to last on a transcontinental trip."

According to figures prepared by Mr. Swinden, covering the past year, beef proved to be the favorite dish and more than 55 tons of it were eaten. Chicken came next with about 20 tons consumed. Of the vegetables, the lowly potato came first, with more than 222 tons consumed. Onions came second and about 50,000 lettuce heads were served.

Among the desserts, pie is a favorite, with the ancient and honorable apple leading his division. To satisfy the craving for pie, Canadian National chefs cut up 55,000 apples. Oranges and grapefruit follow in order, while more than 50,000 lemons were used. There were also large quantities of beverages, ice cream and other sweets served.

Since the railway cannot wait until the cows come home or because the milkman has overslept provision has to be made in advance for a daily fresh supply of milk totalling 90000 quarts during the year. Cream was also extensively used, 40,000 quarts being consumed. Bread, rolls and butter proved to be staple commodities, [illegible] of bread numbering 146,000 [illegible] 700,000 and butter 56,000 pounds. 26 tons were used. About 7,000 pounds of cheese were consumed to [illegible] the meal. These are just the principal items in addition to which are a hundred and one other products, such as jams, jellies, sugar, mustard, pepper, salt, vinegar and what not.

Special menus to suit the needs of the little folks are scientifically arranged by an expert dietician in one of the foremost children's hospitals in Canada, with appropriately decorated dishes, napkins and bibs. Babies' chairs are also available on all dining cars.

When a trans-continental train of the Canadian National Railways, such as "The Continental Limited" to the Pacific Coast, leaves the terminal, its dining car is equipped with 900 pieces of china, 950 table cloths and napkins, 500 pieces of silverware, about 200 pieces of glassware and 200 pantry and kitchenware items, such as pots, pans, knives, brushes, pails and other utensils. Meals are served from dining kitchens approximately six and two-thirds feet wide and sixteen feet long.

JASPER WEEPS AS "GOOD OLD TUBBY" LOSES LAST BATTLE

JASPER, Alberta, January 25.—"Old Tubby" was for years leader of all the deer in Jasper, Alberta; friend of native and tourist alike, for he soon got to know when a visitor was in town. Stern ruler, ready to fight any member of his herd who showed the least sign of rebellion, "Old Tubby" his bones beginning to creak, was thoroughly beaten in a bitter two-hour battle with a young buck and so terribly wounded that a park warden reluctantly put him out of his misery.

Today fat, gentle, kind, nuzzling neighborly "Old Tubby" was gone and all Jasper was sunk in sorrow.

Everybody's business was the old buck's business. He walked into Jasper yards just as boldly as if he was the landlord,—only he was so much more welcome. If there was a visitor there, "Old Tubby" waited around for the camera to be produced, mechanically did his duty as a good citizen by posing with the thrilled stranger, accepted delectables for his spoiled digestive tract and ambled hither and yon to see what he could see. And there was little "Old Tubby" missed.

He walked majestically along the roads, ignored automobiles because he knew that they always stopped so that the occupants could admire his stately antlered head; let small children pet him and gazed on all the world with his soft brown eyes.

But the young buck didn't believe "Old Tubby" could always be king and the young buck, confident in his strength, was right.

He met "Old Tubby" down behind the railway shops along the river bank one afternoon and [illegible] didn't get out of "Old Tubby's" way. Instead the young buck charged on his old leader, ripped and tore at him, threw him right over his head once with a mighty toss of his antlers.

"Old Tubby" hung on for two hours. Then he limped slowly away and lay down to die. But he didn't die right then. The old warrior regained some of his strength after a while and marched drunkenly away from the scene of his defeat to the hospital grounds. It wasn't a coincidence. "Old Tubby" knew where he was going. He knew that was where the sick and injured were comforted. And he surely needed aid.

The park wardens knew "Old Tubby" should be put out of his misery. They let him live another day, then one of them patted the veteran battler a fond farewell and pulled the trigger.

Success story. The country boy got tired of an open wood fire, went to New York and became rich enough to burn wood in a fireplace.—Detroit Free Press.

VOLUNTARY GOVERNMENT AIDED WHEAT POOL IS PROPOSED TO TURGEON

(By Sam Sims)

Winnipeg, January 25.—(Special Correspondence)—Dr. Harold S. Patton, head of the department of economics at Michigan State College, proposed establishment of a government-aided co-operative wheat pool to the Turgeon Royal Grain Commission last week with continuance of the open market and futures method of trading for those who desired it.

Summarizing pool activities in international grain trade and world [illegible] operations generally, Dr. Patton advised retention of the Wheat Board Act of 1935 to provide authority for payment by the government of fixed minimum prices above market quotations to all producers in times of emergency.

Competition of United States financial interests with Canadian banks in making loans to terminal elevator companies, charges of dual operations of banking and wheat exporting companies in Argentina and a reported "squeeze" of "short interests" in the barley market of the Winnipeg Grain Exchange last December occupied time of the commission. Opinions of [illegible] in support of the open market were read into the records.

Dr. Patton made a wide survey of grain marketing, detailed past operations and made his recommendation for a government-aided wheat pool. He opposed compulsory pooling or fixed marketing through a government board, declaring he preferred to see co-operative pool plan operate in competition with the open market system.

Recognizing the importance of the producer was paramount, Dr. Patton urged present wheat board regulations with the minimum price feature be retained until the government-aided co-operative pool could be established. It would be operated by the producers with government representation on the directorate.

Under Dr. Patton's co-operative pool proposal, the government would indemnify the pool against realized losses arising from the decline of market prices below the approved pool initial payment price. "This would mean in effect," he said, "that the latter would be a government-guaranteed minimum price, available to all producers who chose to market their wheat on a pooling basis. Those who preferred to sell through the open market would, as in the past, take their own chances as to the price received."

The pool would operate on a contract basis. Instead, however, of the former five year grower's contract, Dr. Patton proposed a form of continuous contract. It would provide the option that the grower could withdraw by giving 30 days notice prior to the beginning of any crop year. Fluctuations above the minimum level would be evened out among producers. Declines below the minimum would be absorbed by the nation as a whole in the interests of inter-regional stability."

Henry Gauer, vice-president of the Winnipeg Grain Exchange and Western manager of James Richardson and Sons, Ltd., presented a brief for shippers and exporters. Experience showed, he declared, that government control, stabilization and pooling methods of marketing wheat without exception had been "conspicuous failures."

The London and Liverpool Corn Trade associations and importers at Rotterdam, Holland, all supported the open market as the most efficient, he said. United Kingdom merchants took the view that "interference by governments in the grain trade during recent years have depressed prices of wheat in international markets." Canadian wheat prices would not be so high today if the accumulated surplus of the last five or six years had not been greatly reduced, he said.

M. M. Porter, K.C., Calgary, counsel for the Alberta Wheat Pool, raised the question of the "shorts" being squeezed in the barley market. Mr. Porter asked Mr. Gauer if he had heard of the situation and if he knew a settlement had been made. Mr. Gauer said he knew little of the situation and added no settlement had been made under grain exchange regulations.

George Mathieson, vice-president and assistant manager of Norris Grain Company, Ltd., urged disposal of 65 to 75 per cent of the Canadian exportable wheat surplus within four months after the start of harvesting. He said surplus accumulations were depressing to prices. Questioned on the December barley squeeze, Mr. Mathieson said a "tight" situation existed on the barley market.

Interest rates came to the fore in the examination of R. K. Beairsto, chairman of the Western sub-section of the Canadian Bankers' association, who previously advocated continuance of the open futures market as the best method of providing low-cost financing of wheat marketing. Mr. Porter asked the commission to survey the whole question of interest rates charged by bankers to farmers and grain companies.

Charles E. Hayles, general manager of Canadian Consolidated Grain Company, detailed operations of terminal elevator companies and said they represented an investment of $70,000,000. Mr. Hayles was on the stand when it was declared United States financial interests were competing with Canadian banks in making loans to terminal elevator companies at low interest rates. Mr. Hayles said his company had not borrowed from any American banks.

Sidney T. Smith, president of Reliance Grain Company, said present pressure of Argentine wheat on world markets was not causing Canadian exporters any concern because supplies were light. If Canadian supplies were large, Canadian exporters would be forced to reduce prices to meet Argentine competition.

Answering questions, Mr. Smith said he had heard that dual operations by banking and wheat export companies facilitated the marketing of Argentine wheat. He did not know the details. Mr. Justice Turgeon concluded this phase of the evidence by suggesting counsel endeavor to obtain what evidence could be produced.

NO EDWARD STAMPS, SAYS POSTMASTER

OTTAWA, Jan. 21.—There will be no issue of Edward VIII postage stamps in Canada, Hon. J. C. Elliott, postmaster general, stated today.

The next issue will bear the effigy of the reigning monarch, George VI, and will be in general distribution before the coronation, he said. Immediately following the coronation a special commemorative issue will be released and remain in use for some weeks.

Most missionaries can explain their religion but can't explain their civilization.—Whitsitt Impressions.

Good Faith—and a Good Name!

Money — the financial resources of small investors — was loaned Alberta in good faith and at a time when the province needed help. Shall we break faith with these, our fellow-citizens? Shall we not rather preserve our good name of being "square shooters"? Shall we not rather build up than break down the integrity and honesty which are, without doubt, the best policy?

Alberta is a great province with wonderful natural resources. The development of these resources offers a bright future. This outlook has been hampered by ill-conceived legislation [illegible] which in reality hurts the little fellows.

A prominent Canadian who, by the way, is a successful Western farmer, declared that the drastic steps recently taken by the Alberta Government had, quite naturally, destroyed public and, to a certain extent, private credit but he felt that the native common sense and judgment of the vast majority of Albertans would assert itself because they know that financial integrity and financial honesty are always the best policy.

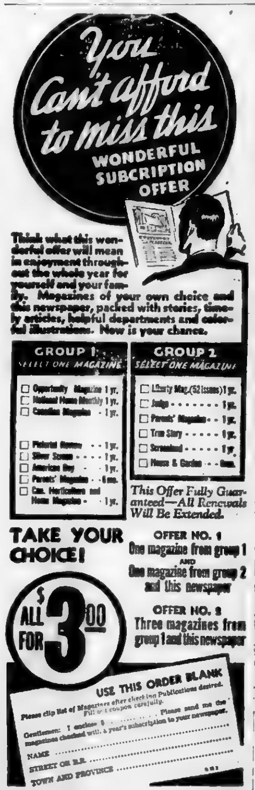
This statement is one of a series [illegible] by The Mortgage Loans Association of the Province of Alberta. The Association is composed of 14 member companies. It represents hundreds of thousands of small investments by typical Canadians. Its loans to citizens of Alberta amount to some forty-two million dollars.

[illegible]

These Little Pigs Went to Market on Springs

FRICTION SPRING

STOCK cars on the Canadian National Railways equipped with friction springs have reduced shrinkage and losses on live stock shipments, effecting a considerable saving both to the railway and the shipper, while at the same time providing the animals with greater comfort in transit and freedom from bruises and damage. Above is shown a shipment of bacon hogs, unloaded at the Montreal stockyards of the National System. Below, left, the friction spring which has reduced jarring and bumping of cars in transit. The wavy line at the top right shows the extent to which the car moves up and down on the friction springs; the wavy line below shows the movement which takes place in travel of a car not equipped with the friction springs. Test apparatus was used to determine the effect of the new spring equipment under actual loading conditions. Railway authorities also find the new spring equipment helpful to them since it reduces stress and damage to equipment and track.



You Can't afford to miss this WONDERFUL SUBCRIPTION OFFER

Think what this wonderful offer will mean in enjoyment throughout the whole year for yourself and your family. Magazines of your own choice and this newspaper, packed with stories, timely articles, helpful departments and colorful illustrations. Now is your chance.

A MAJOR DISASTER—

IT IS NOT with the sole idea of congratulating ourselves that we are not in a similar plight, that we make mention of the disastrous floods and the havoc they have caused in certain sections of the United States. Rather it is to express sympathy for the thousands and thousands of people who are homeless and who are suffering hardship and privation due to flood waters, cold and rain. The Ohio river and the great Mississippi are the natural drainage channels of a vast area, an area populated by farmers, villages, towns and cities. Unusual rains and warm weather melting snow, place a drainage task upon these waterways greater than that of which they are capable and the resultant overflowing, floods farms, villages and even cities. The floods are aggravated by the fact that for many years there has been a gradual transformation in the surface of the country. Formerly dense forests and heavy grass lands retarded the rush of waters to the rivers and while perhaps floods were experienced, they were not so vast as the present one. The denuding of large areas of tree land and the breaking up of former bush land and tree land into farm land, aggravates the flood situation in two different ways. Formerly drainage waters going to the rivers would be slowed up by dense bush and grass and upon reaching the rivers would enter them chiefly as water. Now drainage waters flowing over vast areas of broken land form gullies large and small, down which water runs, carrying with it soil in solution which upon entry into the river causes it to silt and clog up, thereby lessening its power to carry flood waters away on their long journey to the sea. To people living in close proximity to such rivers, the flood menace is in late winter and early spring always a source of danger. Some years of course are worse than others and this appears to be a particularly bad year. It is very satisfying to note that forces, both official and unofficial are moving quickly to, as far as humanly possible, aleviate distress. President Roosevelt has urged Congress to vote a very large sum of money which it will undoubtedly do, and the Red Cross is appealing to the general public for financial aid.

THE TOWN FINANCIAL STATEMENT—

THE ANNUAL FINANCIAL Statement of the Town of Tofield published in this issue gives the reader accurate knowledge of the town's business. While the items are pretty much the same from year to year, there is always enough difference to make interesting reading for those concerned. The cost of educating Tofield's young folk runs to $6550.00, which is probably cheap at the price while public works cost $1067.25. This is a little more than usual and is due no doubt to the work done on roads, sidewalks and culverts last summer. Right in line with the larger cities, we evidently have our relief problem too, for $984.87 was paid out for this purpose. This is approximately six per cent of the total land and improvement tax collections. The cash on hand item is considerably higher than former years due to the fact that the 1936 debenture installment has not been paid, pending a suggested arrangement whereby it is hoped to obtain both a reduction of principal and interest. Considerable time must elapse before definite information regarding this will be known.

One item in the assets column is of interest, viz: municipal and school tax arrears. This would indicate that the total tax arrears amounts to $884,677.55, no small amount. Evidently there is not much hope of collecting all of this so $872,557.55 is classed as a "reserve" leaving $12,120.00 carried as a live asset.

The Annual Meeting is called for Friday evening of this week. Last year there was a record attendance, following a number of years when the attendance of ratepayers other than councillors was practically nil. No doubt there will be a number present on Friday, even though the interest is not so keen as last year.

WHEAT PRICES SOFTEN

The Argentinian wheat movement is rapidly approaching a peak, and ships are scurrying from the river Plate to many countries which have purchased wheat from the big South American Republic. Last week's shipments from there were close to 6 million bushels, and, included among the destinations were the United Kingdom, Germany, Italy, Greece, Holland and Belgium.

The pressure of exports from Argentina is resulting in an increasing volume of 'wheat afloat'. The total volume of wheat in that position is now close to 40 million bushels, or very near double what it was a year ago. But a year ago Argentina's sales were at a minimum due to the disastrous 1935 drouth.

Argentina is not maintaining her prices as well as the world's statistical position would seem to justify in her anxiety to market her supplies. Last week Argentinian wheat went as low as 30c a bushel under Two Northern at Atlantic ports. Australian wheat was 15c to 16c cheaper than the Canadian product. The Argentinian crop may be a little higher than originally estimated.

Canada is not worrying greatly about the competition from the southern hemisphere as her supplies available for export and carryover on the 1st of January were down to 124 million bushels. If the carryover at August 1st is 40 million bushels, this country will have to ship only 13½ million bushels a month to clear out the remainder. In view of the high quality of Canadian supplies this should be an easy task.

The United States winter wheat belt seems to have received a generous allotment of moisture. This fact is having a bearish influence. An average United States winter wheat crop would switch that country's position materially, but it will be mid-summer before wheat is available from that source, and in the meantime the world must have its daily bread.

Debenture coupons in the amount of $837.65 fell due on October 1st, 1936, but were not paid. A similar proposal to that made by the Town has been made to the debenture holders; and payment of 1936 debentures has been withheld pending consideration of the matter.

M. C. McCANNEL, C.A., Auditor.
J. W. CHAPMAN, Secretary-Treasurer.

TOWN COUNCIL MEETING

A regular meeting of the town council was held in the Town Hall on Monday evening, January 25th, 1937, with Mayor Brace in the chair and all councillors present.

Following a quantity of routine business, four by-laws were given three readings each and finally passed. By Law No. 274 appointed a Returning Officer for the 1937 nominations and elections. By Law 275 appointed J. W. Chapman assessor for the year 1937. By Law No. 275 set the rate of assessment on buildings and improvements at two thirds of actual value. By Law No. 276 authorized the levy of [illegible] tax in the year 1937.

Some discussion took place regarding the progress made with various bondholders in the matter of refunding debentures at a lower rate of interest, together with a substantial cut in principal. A resolution in this connection was made and forwarded to the Minister of Municipal Affairs, with the request that he arrange for an interview with a delegation from the town consisting of Mayor Brace, Councillor Swift and the Secretary-Treasurer.

A statement of receipts and expenditures for the month of December 1936 was read and ordered incorporated in the minutes.

KETCHAMOOT

(continued from front page)

ill the past week with the flu. The rest of the residents of the district are free from the flu so far anyway.

Mr. Lee Carlisle returned home on Sunday after several weeks visit with relatives at [illegible] Iowa. Mrs. Carlisle will remain for some time yet to care for her mother.

Misses Mildred and Kathleen Ingram entertained the Social Hour club at their home Thursday afternoon of last week. A goodly attendance was present considering the cold weather. After the meeting a delicious lunch was served by the girls. The February meeting will be held with Mrs. John Lee. Those present were: Mrs. J. Brown, Mrs. H. McGinitie, Mrs. Wm. Ingram, Mrs. Lee Ovelson, Misses Dorothy Ovaldson, Edith Davison, Hazel Sears, Margaret Mitchell, Ethel Coombes, Miss Eckenrodt.

The Annual meeting of the ratepayers of the Ketchamoot district was held on Saturday afternoon, Jan. 16th. John Brown acted as chairman. The different reports were read and were satisfactory. Nominations for trustee was then in order. Roy Lee, whose term had expired, was re-elected. The other trustees are Jim Sutton and John Brown. A fair attendance of ratepayers were present. The board of trustees will hold a meeting Saturday evening to choose a secretary.

The Stirritt Telephone company held their Annual Meeting at the Sears home on Wednesday afternoon of last week with eight subscribers being present. The president, Mr. Stirritt was chairman. Mr. Harrison, the secretary read the annual reports which were in good shape and very satisfactory to all. The regular routine business was discussed after which re-election of officers was in order. The same officers were re-elected. President, Mr. S. Stirritt, vice-president, C. W. Sears; Secretary-treasurer, Mr. A. Harrison. We regret not knowing more about the other two lines, one on the East and the other on the West. We would like to see reports of their meetings.

SOUTHERN FROST DOUBLES PRICES ORANGES HERE

Winter-hardened Edmontonians, hearing of unbelievable frost visitations in California, has grinned mischievously during the last few days when they regarded mental pictures of shivering residents of the sunshine state. But wait until those same Edmontonians go to the store to buy oranges, lemons, grapefruit, head lettuce or celery. That is when they discover what a California frost means.

Fruit dealers here reported Tuesday that prices on oranges have doubled during the last 10 days. First freeze in California fruit belts was reported Jan. 7 and thousands of car loads of oranges were reported lost on that chilly night.

Later while Edmonton hurried through 30 below zero weather, they chuckled at reports of startled Californians complaining of 16 above—or 16 degrees below the freezing point. But throughout California orange groves, thousands of smudge pots were kept active to salvage at least part of the orange crop.

As result of the frosts, Edmonton fruit dealers who 10 days ago were quoted $2.50 a case on a certain brand of oranges, now have been notified that the price is $5 a case. Lemons and grapefruit will be given much the same treatment. In one county alone 750 carloads of first grade celery was destroyed by frost. Head lettuce which brought a price of one dollar a crate f.o.b. California recently, now costs Edmonton dealers $3 a case.

BIG FLOOD BRINGS FAMINE, DISEASE

Fear-stricken Americans by the tens of thousands cowered behind weakening levees or fled to higher levels today as the monstrous yellow tide of the Ohio river swelled to record-breaking flood heights on its sweep to the Mississippi. Eddying in muddy, slow rising torrents, the waters spread over an area of more than 1,000,000 acres, taking a toll of at least 125 known dead, driving 550,000 from their homes and leaving many thousands more marooned in precarious straits. Whole towns and villages showed only rooftops. Property damage was estimated far in excess of $10,000,000—and on every side from city officials and army engineers came the warning.

"The worst is yet to come."

The companions of disaster—panic pestilence and fire—constantly menaced cities and towns in the 11-state flood area which holds more than a third of the nation's population. Added to these were the prospects of water and power shortages.

In the flood-besieged city of Cincinnati the water supply situation for its 500,000 residents became more serious hourly. The city was on strict water rations and the health department warned all drinking water must be boiled.

Property Damage Now in Excess $10,000,000

With property damage already estimated in excess of $10,000,000 and a growing army of homeless, 1,000 National Guardsmen moved into the city to help combat the disaster. Martial law was debated after City Manager Dykstra was given dictatorial powers to meet the emergency.

United States troops moved into Louisville to complete evacuation of more than two-thirds of the city's 330,000 residents. The city was under military law, clamped down by Governor A. B. Chandler, who said he acted despite the fact he did not have such authority under state constitution.

As the flood waters drummed an ominous crescendo on southern areas and conditions grew worse along the Ohio, army engineers watched the effect of their first major thrust at the "watery octopus," as one observer described the flood.

Roosevelt Says To Use Haste

President Roosevelt, anxiously watching the progress of the tidal sweep through 11 states, sent out the crisp demand to legislators debating a $790,000,000 relief request.

"Step on it!"

Pending its passage he allotted $900,000 to relieve flood sufferers.

Harry L. Hopkins, works progress administrator estimated 650,000 to 700,000 would be homeless by Wednesday or Thursday. Red Cross officials renewed their urgent appeal for contributions to a $4,000,000 relief fund. The first days' receipts at national headquarters totalled $56,620.

In Louisville, Ky., United States army troops moved into the virtually isolated city of 330,000 citizens to clamp down military rule arbitrarily declared by Governor A. B. Chandler. Khaki-clad engineers rushed construction of pontoon bridges to speed the evacuation of more than two-thirds of the city's population.

2,000 Marooned on House Tops

Gov. Chandler warned the Federal government that state and local authorities could not combat pestilence, panic and hunger in the wake of the city's worst flood in history.

Two thousand Kentucky National Guardsmen were on emergency duty throughout the stricken area.

Lieut. A. Barton of the U. S. Air Corps, after a boat inspection of Louisville's West End, reported 2,000 persons were marooned on second floors or roof-tops. Many refused to move. Safety Director Dunlap Wakefield, of Louisville, renewed orders that looters be shot.

As the turbulent waters plunged south, guardsmen near Cairo, Ill., dynamited the $21,000,000 Birds Point New Madrid floodway levee, sending millions of gallons of pent up fury tumbling into the 131,000-acre lower area bounded by a new 60-foot setback levee.

Workers toiled feverishly to strengthen the weak link in the main line levee below Nickman, Ky. Sandbags by the thousand, were flung up against the weakening barrier.

DEFENCES SOLELY FOR CANADA, ASSERTS PREMIER

OTTAWA, Jan. 26—Projected increases in Canada's defence forces are solely for the defence of Canada and are not designed for participation in any European war, Prime Minister Mackenzie King assured the house last night in the first official utterance from the government on armament policy since the last session of parliament.

Parliament would decide whether Canada should participate in any war, regardless of the participation of other nations of the British Commonwealth, Mr. Mackenzie King declared, as he rejected two points of the triple-barrelled foreign policy resolution submitted by J. S. Woodsworth, leader of the Co-Operative Commonwealth Federation.

The resolution sought a declaration Canada would remain neutral in any war regardless of who the belligerents might be. Mr. King could not agree to this but he agreed with the third point, that the Canadian government should use all its influence to remove causes of international friction and social injustice. He said the government was doing this.

The second point was that no Canadian at any time should be permitted to make profit out of munitions of war. Mr. King agreed with the principle but thought it impracticable. It would involve nationalization of practically all industry and the country was not prepared for this.

"The increases in the estimates for defence," said Mr. King, "are proposed only and solely because of what the government believes necessary for the defence of Canada. They are not [illegible] with any thought of participation in a European war nor with any thought of a co-operative effort with the British and Canadian authorities."

Private industry should be strictly watched to see excessive profits were not made, he said, but the experience of the last war showed guns and shot and shell were not the only things from which excessive profit could be made. Clothing, bacon, boots and shoes and all other things required by armies had been exploited by profiteers.

Mr. Woodsworth said Canada should claim the right to declare war and peace and said if Great Britain went to war, Canada was at war.

The prime minister said this was [illegible]. Only the parliament of Canada could commit Canada to war and the government took the stand it was for parliament to decide in a particular case, having regard to all conditions both within and without Canada.

The [illegible] in Mr. Mackenzie King's opinion should be made on the basis of Canada's interest. It was the world's desire to live at peace with the world but in the present condition of the world it might not be possible.

"How far we remain neutral will depend upon ourselves and to some extent on the enemy," he said when questioned by Mr. Woodsworth as to whether the question of neutrality as well as of participation in war would be left to parliament.

H. E. ROGERS

DID you know that during the year 1936 one million seven hundred and fourteen thousand (1,714,000) bushels of malting barley were purchased from the farmers of Alberta for brewing purposes and all this at an average premium of thirty-five point eight eight cents (35.88 cents) per bushel over the regular price for 3 C.W. Barley. Just figure out for yourself how much this means to the farmers of Alberta!

WOODLAWN

The amateur program held last Friday evening in the Woodlawn school was a real success. First prize was awarded a group of the school children for the "Jazz Band." Second prize was won by Mrs. J. T. Wilson and Ethel Conklin for a dialogue. There were many other humorous numbers. A very good dialogue was featured by Mr. and Mrs. Olsenberg. Mr. Olsenberg, who presided as chairman imitated Professor Bings very nicely, even to the introduction of the gong. Despite the cold weather, there was a large crowd and an enjoyable time was had at the dance which followed the program. Thanks are given to all those who gave their much appreciated help toward making the evening a success.

The Woodlawn ladies held their "Good Will Club" meeting Saturday afternoon at the home of Mrs. Olsenberg. Although the weather was rather cold there was a very good attendance and several new members were enrolled. After a very pleasant afternoon a tasty lunch was served by the hostess.

Miss Hazel Stirrit spent the past week visiting at the Lougheed home.

Miss Margaret Cookson was a week end guest at the home of Mrs. Isabelle Lee.

Miss Ingred Winquist spent the past week end at the Cookson home.

KINGMAN

The Kingman school has reopened after being closed for the past week on account of the flu.

The hockey game played last Saturday between Kingman and Dodds was won by Kingman by the score of 3-1.

Mrs. Andrew Johnson and daughter Inga have returned from Edmonton where Mrs. Johnson has been taking treatments for rheumatism. Her condition is somewhat improved.

Mrs. A. Asp is home again after visiting with her sister and daughter at Calgary for the past month.

Mrs. Eric Erickson called on Mrs. Asp on Monday afternoon.

Miss Alice Simonson was an Edmonton visitor last Friday.

The C.C.F. meeting was not held on January 30th on account of sickness. It will be held at some future date.

BEHIND THE HOG

By A.B.C.

As stated in last week's news we now present for your approval "The Lamenting Lead Rides Again."

****

Music—Curtain: What is a curling game? Why you curl your fingers around a stone weighing about 40 pounds and the fingers of your other hand around a broom weighing about 2 pounds, then you curl your back so your knees nearly touch the ice and your chin touches your knees. You are now prepared to fling the stone, 40 pounds of it down the ice some 75 feet more or less, depending upon your weight. It is aimed toward the house, this house has a front entrance of 12 feet more or less and a back entrance of some 40 feet more or less, wide open, so to speak, built like a raft. Your stone passes through the house and hits a thing called the Hack. You say, Oh Heck, your opponents say, Oh Heck, and your rink says, Oh H——. But this game is not played to hit the Hack, although 80 per cent of curlers seem to think so. You then fling another stone, not so hard this time, it hits an obstruction on the ice put there while you were polishing your second stone. It was at the hog line. The hog line, where have I heard that line before, but it stops your stone anyway, and that's that. Now this is where the Scotch in the game comes in, you have no more rocks. The skip says you might try using your broom, he just doesn't say that, but you get his meaning. The House still remains open for tenants, two more men look it over, as they pass through or are stopped at the Hog. NOW it's the Skips turn. He may have his uses, but so far we have discovered none. He shows you where to put the broom, but you pay no attention to him, he doesn't know where it is going any more than you do. He just pretends, breathes a prayer and starts the stone rolling. After all his contribution to this game is making rotten shots. He must be also a calm, peaceful, philosophic disposition, also a good liar. He says, "well swept, Mr. ——." This is Cricket, if you know what I mean. You see three men play ahead of him to show him what or what not to do. It is really team work that counts, the team that gets the most rocks near the button wins. There are two types of skips. The hothouse skip who plays behind the glass. They live in flocks, like crows and perches on chairs. He plays the game called, Skipping the Skip. The other variety is a Regular fellow, who puts his broom down to show you where your stone won't go. He is nearly always wrong. It's a grand game Laddie. There is no such thing as luck in this game.

****

A Skip was at the rink and had talked curling for an hour. Then he said, "that's the position in a nutshell". "Heavens," exclaimed another member, "What a nut."

****

One curler said to another, "Does your wife ever pay you any compliments?" The other said "only in the winter." "In the winter, how do you mean?" "Why, when the fire gets low, she says 'Alexander the Grate.'"

****

I said to one of the boys, "Have you been sick?" He said "yes." I said "flu?" "Yes," he said, "and crashed."

****

One of the boys complained of a bad corn on the sole of his foot. We think this is a grand place to have one as nobody but yourself can step on it.

****

We pick Mr. Doc Law as the bad man of the curling club. He hands out the heaviest body checks on the other fellow's rocks. I think he favors the running game. I always try and sneak my stone in back of some other fellow's when he is shooting.

****

My own pet rink is now in the same position as "Joe Louis, on the comeback trail. Our president, pinch-hitting for Chris, pulled a "Schmelling" on me, to topple the rink from our lofty position, there is no justice. And again we are in the unfortunate position of having the gallery agin us. Again I say, there is no justice.

****

Liqu-er-up, I mean Soop er up.

HOCKEY

IRMA WINS IN RUGGED GAME

In a hockey game that toward the end assumed a bizarre nature, the locals lost out to Irma by the score of 5-4 on Monday night last.

In the first period the locals more than held their own and it appeared as if they might even squeeze out a win from the league leaders. In the second period Irma worked hard and had the best of the play, but were only one goal up as the period ended. The third period was a nightmare. The visitors ran in three goals in fairly rapid succession. Then in an endeavor to stem the tide the Tofield goal keeper was taken out and an extra forward put on. However the strategy, sometimes successful, did not work and Irma continued to score. Toward the end Les Glover got a well earned goal, coming up all the way and scoring.

Goals—1st period: Irma; Smith, Smith. Tofield—L. Glover, C. Sears.

2nd period: Irma; Lawson, Lawson. Tofield: N. Glover.

3rd period—Irma: Lawson, Lawson, Smith, Smith, Maguire. Tofield: L. Glover.

Referee: J. J. Hannan.

ROSE CREEK DEFEAT LAMONT

The Rose Creek hockey club journeyed to Lamont on January 29 and were winners by the score of 8-4. Despite the extremely cold weather a fair sized crowd saw a fast, rough game and a free-for-all in the second period. Harry Scraba and John Motiki took part in the fracas which resulted in three major penalties.

Geo. McLacklan, S. Wilton, F. McLacklan, B. Motiki, A. McLacklan, J. Motiki were the marksmen for Rose Creek. B. Briggs, H. Scraba, G. Ross and A. Lenz for Lamont.

Lineup: Rose Creek. Defence: Wilton; Motiki; Forwards—G. McLacklan; B. Motiki; A. McLacklan; R. McLacklan; J. McLacklan; A. Lauder; Goal— B. Strand.

Lamont: Goal McQueen; Defence—Shires; Kroening; Forwards— B. Briggs; G. Ross; H. Scraba; J. Coone; A. Lentz; Buckanan.

NOTICE

A Zone Meeting of the Social Credit Groups, Tofield, Lindbrook, Lakeshore and McKenzie will be held in the Variety Theatre on Thursday evening, February 11, 1937. Dr. McPherson, M.L.A. and Mr. Macdonald of Ryley will be present. All members are asked to attend and everybody welcome whether members or not.

Orgr. R. Burnett, Tofield.

10 SHIP LOADS OF BOY SCOUTS

Ten ships will have to be chartered to accommodate the Scouts of England, Scotland, Wales and Ireland who have applied for places in the British Empire contingent to the World Scout Jamboree in Holland this summer.

TOWN MEETING

The annual ratepayers meeting of the Town of Tofield and Tofield School District was held in the Town Hall Friday evening January 29th at 8 o'clock. The attendance was small. A report by the secretary-treasurer was read and the financial statement for the previous year discussed. Among other matters discussed were the towns efforts to reduce the debenture debt together with the annual rate of interest; arrears of taxes and tax penalties. Mr. Edwards expressed himself as of the opinion that tax penalties of 4 per cent levied each six months were too high but realized that the town councils had no jurisdiction to alter them as they were set by provincial laws. This matter will receive further consideration from the council.

Secretary-Treasurer's report read at the meeting will be published in full next week.

Nominations for both town council and school trustees were held on Monday, February 1st, all candidates returned by acclamation. For the councillors the following were declared elected; Mayor, W. C. Swift; Councillors: G. B. Brace, W. Bellamy, and H. W. Lovell.

A. C. Dodds and J. W. Chapman were re-elected as school trustees.

All the above offices are for two year terms.

LOCAL & PERSONAL

Mrs. J. W. Robinson attended the Quarterly Board Meeting at All Saints' Church and Parish Hall last Friday and spent Saturday with her daughter Isabel.

Mrs. Helber visited her sister in Edmonton over the week end.

Mr. and Mrs. S. Yakabusk, left this week for Renfrew, Ont. where they will visit Mr. and Mrs. P. Yakabuski for some time.

Miss Jessie Munro returned home after spending a short time visiting in Edmonton.

Mrs. Calvert of Edmonton spent some time visiting friends and relatives in Tofield this week.

Mr. Bill Bailey returned from Banff last week where he has been taking treatments, but had to be taken to an Edmonton hospital this week.

Mrs. Tandberg, Mrs. Mehus and Mr. Mat Solberg from Ryley visited Mrs. C. Patterson and Mrs. Lovell, who have been suffering with the flu.

Mrs. Brace, Mrs. E. Rogers, Mrs. O. Letourneau and Mrs. A. Innes are taking part in the bonspiel at Camrose this week.

Miss Aileen Allan spent the week end at her home here.

Miss Ella Taylor returned home from Edmonton on Friday last, where she had spent the past week.

CANADA RECEIVED [illegible] FROM TOURISTS LAST YEAR

Montreal, January 29.—"Tourist and convention travel from the United States and other countries to Canada during last year totalled in numbers approximately twice the population of the Dominion," stated C. K. Howard, manager, Tourist and Convention Bureau, Canadian National Railways, in a review of Canada's tourist traffic for 1936 issued here today. "Last year we enjoyed a continuation of the increasing numbers of American tourists visiting Canada and the general view among those directly concerned with the development of the tourist traffic in this country is highly optimistic as to the prospects for 1937.

"This healthy condition prevailed from the Atlantic to the Pacific, as reports received from various tourist organizations from Nova Scotia to British Columbia all indicate a substantial increase in business over the previous year.

"After a setback resulting from the economic upheaval of a few years ago, the tourist industry has again commenced on the upward climb to new heights. When official figures first began to be compiled in 1920, the tourist trade was valued at $83,734,000. In 1929 it had reached a high of $309,379,000, and in 1933, the bottom of the depression, it dropped to $117,125,000. Since then, each year has shown an increase until it now stands at an estimated value of $275,000,000 for the season of 1936, representing expenditures for transportation, purchases and accommodation. Of this total it is estimated that $20,000,000 were spent by those attending conventions, another $20,000,000 by fishermen and hunters, and $235,000,000 by tourist vacationists indulging in various other forms of recreational activities.

"The total conventions held in Canada during 1936 represents a substantial increase, not only in the number of such gatherings but also in the total attendance as compared with the previous year," stated Mr. Howard. "Last year these conventions, held in the principal centres across Canada, numbered 863.

"Sportsmen's traffic also continues on the upgrade, the facilities offered by our representatives for outfitting guides at some of the best hunting and fishing areas on the North American continent being such as to fully satisfy an experienced clientele, the result being that many return year after year to enjoy this form of recreational and sports activity," declared Mr. Howard.

DATES SET for WESTERN FAIRS

Winnipeg, Man., Feb. 1.—At the annual convention of the Western Canada Fairs Association, held at The Fort Garry Hotel here a few days ago, agreement was reached on the dates for the Exhibitions and Fairs to be held in Western Canada during the summer of 1937.

Class "A" circuit has allotted the following dates: Brandon, June 29—July 2nd; Calgary, July 5—10; Edmonton, July 12—17; Saskatoon, July 19—24; Regina, July 26—31.

Dates for the class "B" circuit were set as follows: Moose Jaw, June 23-24-25; Estevan, Weyburn and Carman must make their own arrangements between June 28 and July 3; Portage la Prairie, July 5-6-7; Dauphin, July 8-9-10; Yorkton, July 12-13-14; Melfort, July 15-16-17; Lethbridge, July 19-20-21; Red Deer and Vegreville, July 22-23-24; Vermilion, July 26-27-28; Lloydminster, July 29-30, August 1; Prince Albert August 2-3-4; North Battleford, August 5-6-7.

In connection with the above, the Canadian National Railways will offer special reduced fares for each occasion.

ALASKA TRAIN TIMES REGULATED BY MOOSE

Anchorage, Alaska, Jan. 31.—Train schedules between Kashwitna and Saswell are being revised—to conform with the cruising speed of a moose.

Since recent blizzards, numerous moose have become trapped between high snow banks flanking the tracks. One train lost 45 minutes crawling along behind four sauntering bulls. Two other moose, frightened by an approaching locomotive, plunged to death off a trestle.

Just the Man!

An unemployed plumber joined the Royal Engineers and was immediately given a test i.e. the making of a joint for a lead pipe.

The senior N.C.O. sent a written report of the test to the C.O. which read: "Joint very well done."

Next day the man was appointed to the Officers' Mess.—London Tatler

THE WORLD OF WHEAT

(By H. G. L. Strange)

Canadian wheat in the long run is not paid for in money, but by the goods, commodities and services of foreign people.

Whenever, therefore, the flow of goods and products out of foreign countries declines, we may be quite sure that a corresponding decline will take place in the flow of Canadian and other wheats into those countries.

The League of Nations tells us that the export of goods and commodities from wheat importing countries has decreased during the depression years by about thirty per cent. The sale of wheat from Canada and other wheat exporting countries has also decreased by approximately thirty per cent. This, of course, is just what might be expected.

It is evident, therefore, that as the wheat importing countries of the world are able to sell more of their own goods, commodities and services, they will be able to purchase more Canadian and other export wheats.

It can be said, then, finally, that the welfare of the farmers of Western Canada depends very much on the willingness of the nations of the world to buy each other's goods. Canada, of course, must do her full share of this buying from others if she is to increase her sales of wheat.

The following factors have tended to raise price: Extraordinary bidding for Australian and Canadian wheat that is in store in Europe; countries apparently stocking up for possible war—Drought threatening Chinese wheat crop—Japan and Australia sign Trade Agreement—Mild, rainy weather in France causes weed growth and vermin.

The following factors have tended to lower price: Harvesting completed in Australia—Clear weather facilitates movement of Argentine small grains; corn conditions favourable—Indian wheat and flax seed crop conditions favourable—Larger plantings of winter vegetables in Cuba, Mexico and Puerto Rico—Larger exports of fresh pears from the U.S.

Credit

Beggar: "Will you let me have a dime, mister?"

Sailor: "I haven't any change on me, but I'll give it to you when I come back this way."

Beggar: "Well, all right, but you'd be surprised at the money I lose giving credit this way." —Bee-Hive

By H. G. L. Strange, Director, "Crop

LOOKING INTO THE FUTURE

The future of wheat production in wheat exporting countries depends, to a great extent, on the attitude of the great nations of western continental Europe. It has been due to the policies of such countries as France, Germany and Italy in particular that the international trade in wheat has diminished. If these countries forsake policies of economic nationalism, enlarged trade may be anticipated. But if they persist in such policies, exporting countries may expect to get only that portion of their market which cannot possibly be filled by their own domestic wheat producers.

The witnesses on behalf of the grain trade before the Turgeon Royal Grain Enquiry Commission sitting in Winnipeg persistently suggest that it was due to the policies of the Wheat Pools of Canada from 1925 onward that the European countries launched into economic nationalism, particularly with regard to wheat. Such a theory does not fit in with the comments of world economists. Writing on "International Conciliation" Lionel Robbins says: "For various reasons partly fear of war, partly in order to secure the support of the agrarian electorate, ever since the beginning of the 20's the governments of Europe have been erecting higher and higher obstacles to agricultural imports. The result is a state of affairs which could only be described as fantastic. Behind the obstacles prices are 50, 100 and even 200 per cent higher than those on the world market. In Germany there is even a shortage of essential goods such as butter. At the same time the great areas of the New World, which have specialized in the production of these commodities, and which can obviously produce them at much less cost, are thrown into violent dislocation. What is a luxury in poverty stricken Europe is destroyed or sold at prices far below cost of production in areas which in turn are poverty stricken because of the policy of Europe."

It can thus be clearly seen that the possibility of recovery and fair prices in the countries which have exportable surpluses of food depends primarily on the attitude of the governments of France, Germany and Italy.

CANADA'S BIGGEST BROADCAST SERIES SUNDAY

5:45—6:30 p.m. EST

Presenting diversified entertainment originating in London, New York, Montreal and many world centres, "Canada 1937" the most elaborate broadcast series ever to originate in Canada will be heard on Sunday Feb. 7, from 5:45 to 6:30 p.m. EST over CJCA, CFAC, CJOC and a coast to coast network.

The new program will combine entertainment brought from other parts of the world with a large orchestra, a dramatic company and singers in Montreal. But for all the variety, novelty and international flavor, the series will keep uppermost one thing, the theme of Canada of a great people in a great land on the threshold of new prosperity. To preserve this theme the sponsor will present some specials.

"Canada 1937" has been under preparation for a long time. Victor Grange, who is producing it for the Imperial Tobacco Company of Canada Ltd., has worked on the program for six months, having travelled as far as Europe to complete arrangements for the broadcasts.

Three radio control rooms will be necessary in Montreal, including one specially built for the broadcast. This installation will be equal to that of a moderately sized radio station. The various units composing each broadcast will be fed to this control room and synchronized as a complete show for the network. It's facilities are such that two-way conversation will be possible between the Montreal control room and any part of the world where program material may originate. The Montreal announcer may interview anyone taking part in the program.

"Canada 1937" will be a unique demonstration of the ability of Canadian radio engineers, just as its subject matter will awaken in the minds of Canadian the fact that 1937 is a good year to live in Canada.

A chef is a cook who can make a two-bit dish worth $4.00 by adding a few hand-carved radishes.—Detroit Free Press

IMPROVING THE OATS RATION FOR HOGS

(Experimental Farms Note)

When copiously supplemented with skim milk, oats have sometimes given good results in hog production. Even without much milk, a skilful herdsman, blessed with a motherly sow of the right type, and paying attention to the little things that count for so much in a pig's young life, will occasionally finish a bunch of selects with no other grain than plump, Northern-grown oats; but too often it is otherwise.

An experiment in progress at the Beaverlodge Sub-Station compares five rations for the growing and finishing of purebred Yorkshire hogs. Results of three trials have been summarized.

Tankage and supplements are supplied uniformly to all lots. The first receives no grain but oats; the second and third receive wheat in each of two proportions; the fourth, wheat and barley; the fifth, barley. These grains substitute for oats in increasing percentages from start to finish.

While there was no decisive difference in skipping shrinkage on a 430-mile rail trip, the oats-fed pigs looked worse on arrival. A thick-walled belly collapses less than a thin one when the fill is let out of both. The principle seemed to be indicated by the carcass yields.

The lots receiving the heavier rations were marketed from 8.6 to 10 days sooner than Lot 1 (Oat lot). They ran from 25 to 75 per cent more selects by the live grading and showed quite an improvement in rail grade, belly grade and fat firmness. Many of the oats-fed hogs yielded limp sides with grayish fat and dull flesh. Most of the hogs receiving the larger percentage of wheat had white fat and bright-red flesh.

From the standpoint of carcass suitability, producer's returns and net profit, there was a decided advantage in adding to the oats ration a proportion of No. 5 wheat, or 3 C.W. barley, or both. Hogs may, if necessary be grown on good oats with suitable supplements but the addition of a little heavier grain seems advantageous during the growing stage increased to two-thirds or more towards the finish.

BUTTER CAKES AND COOKIES

In giving further recipes for butter cakes and cookies, the Milk Utilization Service, Dairy Branch, Dominion Department of Agriculture, draws attention to the fact that butter is very easily and quickly creamed and if left in room temperature for a short time before being used.

Butter Cake

One-third cup butter
Seven-eighth fine granulated sugar
2 eggs
1 teaspoon flavouring
One-quarter teaspoon salt
2½ teaspoons baking powder
1¾ cups flour
½ cup milk

Cream butter. Add sugar gradually and cream together. Add well beaten eggs and flavouring. Beat well. Add alternately the milk and dry ingredients, adding baking powder with last amount of flour. Bake in a buttered loaf pan in moderate oven (350 degrees F.) for 45 minutes or in layer cake pans at 375 degrees F. for 30 minutes.

Butter Icing

4 tablespoons butter
Milk, cream or fruit juice
Flavouring

Cream butter. Add sugar gradually. Beat well. Add liquid, drop by drop, until of desired consistency.

Oatmeal Cookies

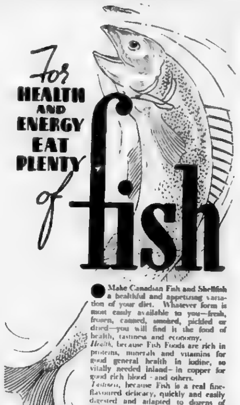
1 cup butter
1½ cups brown sugar
1 egg
1½ cups fine rolled oats
1½ cups flour
One-half teaspoon soda
1 teaspoon baking powder
Pinch salt
1 cup coconut

Cream butter. Add sugar and cream well together. Add well beaten egg, then dry ingredients and cocoanut. Drop on buttered baking sheet and bake in moderate oven (375 degrees F.) about 8 to 10 minutes.

The Truth

One of two fisherman was telling about a fish caught on a recent trip. "I tell you, he emphasized, "I never saw such a fish."

"He's right," added the companion.



Make Canadian Fish and Shellfish a healthful and appetizing variation of your diet. Whatever form is most easily available to you—fresh, frozen, canned, smoked, pickled or dried—you will find it the food of health, tastiness and economy.

Health, because Fish Foods are rich in proteins, minerals and vitamins for good general health in iodine, so vitally needed inland—in copper for good rich blood—and others.

Tastiness, because Fish is a real fine-flavoured delicacy, quickly and easily digested and adapted to dozens of simple and delightful recipes.

Economy, because Fish Foods give you full value in nourishment for every cent spent.

Canadian Fish and Shellfish are noted throughout the world for quality and flavour. Bring this pleasure more often to your table also.

ANY DAY A FISH DAY

"Be It Ever So Humble"

It is to the "humble homes" of Canada that the great majority of Life Insurance payments find their way.

Many such homes today would lack the necessities of life—were it not for the "little savings" which thrifty parents have set aside periodically in Life Insurance.

To the family which loses its breadwinner, Life Insurance means money to buy food and clothing—money to pay the rent—money to pay household bills—money to educate the children. Life Insurance also ensures, in many cases, independence of private charity or public relief.

In your own community, as well as in hundreds of cities and towns across Canada, "little savings" in Life Insurance are doing "big jobs". During the past six years, policyholders and beneficiaries in Canada have received, daily, from their Life Insurance Savings, half a million dollars.

"Be it ever so humble"—there's no home which cannot have the much-needed protection of Life Insurance.

CORNHILL'S FINANCES—

FROM TIME to time ratepayers of Cornhill Municipality drop into the Mercury office and discuss the affairs of the municipality with us. It is not exactly a frequent occurrence, yet it happens often enough to be of more than passing interest. Generally speaking, it is complaints ratepayers have to voice, though occasionally there is the odd bouquet as well as brickbat thrown. Sometimes complaints are warranted, but more often than not they are based upon a misconception or lack of understanding or two little knowledge concerning any one particular matter. Anyway, we have our little "chinwag" and life flows on exactly the same as before.

To a certain extent, though perhaps not fully so, these conversations are simply a matter of "the blind leading the blind," for there are few things concerning the municipality that we know, that the average ratepayer does not understand equally as well. One of the most frequent causes of complaint is the intermittent haphazard publishing of the minutes of municipal council meetings. In this regard it is only fair to say that the blame, if blame be the right word to use, should be borne by this newspaper and the municipality both. However, in the future, it is expected a plan will be worked out, whereby a report of the council meetings will be published while it is still news.

Next to the minutes complaint, which really has been a long smoldering affair, there is the newer matter of the "big grader". The council purchasing this large piece of equipment caused quite a stir among the ratepayers. Many took the view that they would be unable to work out their taxes as formerly, while others believed such a large expenditure at a time when agriculture was in a slump (it has since improved) was unwise. Others, of course, were quite satisfied. Our opinion is that the purchase was a wise move, but it may take several years before the whole municipality receive the benefits of the purchase. Undoubtedly it is more powerful and more efficient than anything used in this municipality before. Its real test is the quality of work and cost of road work per mile compared to other methods, and we have not seen comparitive figures. Relative to this it should be noted that $12,651.87 was the amount paid for labor and applied on taxes during 1936. This is by far the largest item in the public works account, and compares with $9588.25 for 1935 and $9110.41 for 1934.

It is quite unlikely that the present council is 100 per cent perfect, we never saw or heard of a council that was. But it appears to us, everything considered, that the municipal business of the ratepayers is in good enough hands.

Running a municipality is much the same as running any other kind of business, so much money is received and so much money spent and it is necessary for successful operation that a little more be received than spent. The difference between ordinary business and municipal business is that the municipality has power to set its own income by taxation, but the catch to this pleasant way of doing business is the fact that every councillor that is elected is elected on the platform of lower taxation and more improvements. This is just an old democratic custom. In actual practice municipalities are either well managed or poorly managed, only rarely is one found where gross neglect has occurred.

One of the best ways, in fact the only way, to find out how successful or unsuccessful a municipality is, is to study its annual financial statement. That is of course, in relation to the benefits the ratepayers of the municipality have received. This week a detailed financial statement has been mailed to all ratepayers in the Municipial District of Cornhill and while at first glance it is a formidable array of figures, it will repay careful reading.

Saturday, February 20th is annual meeting and nomination day. This day, as the years pass, bring either intense interest or languid recognition of the date, just according to the tempo of the people at the time. Our mind goes back to 1913-14-15. There was plenty of interest then. The Municipal office was a little room with an outside entrance off the R. W. Whillan's print shop. The municipality did not have a phone and the print shop did, and on nomination and election days, it was hard for the printers to get any work done.

Just how large a gathering will assemble this year it is hard to say. Perhaps many, perhaps few, but even if you cannot attend the meeting, it is wise to read the statement because included in this mass of figures is the amount of money you pay, and as far as the council is concerned, the more you know of your business, the better they like it.

Extract From Cornhill M.D. Statement

PAYMENTS (Municipal Only)

ADMINISTRATION—		
Salaries: Secretary-Treasurer		$ 1700.00
Bond $[illegible]; Audit fees $150.00; Elections $[illegible]	185.94

FAREWELL TO THE TEA KETTLE

Memories of the wintry days of 20 to 30 years ago must come back to many an old time motorist when he sees how easily the modern car starts on ordinary zero mornings," said a Pontiac executive recently. "I have heard many an old timer tell about cranking the starting crank with his right hand while with his left, he held a handkerchief saturated with gas over the intake of the carburetor. And the usual thing in those days was to take out a tea-kettle of hot water and pour it over the carburetor and intake manifold to warm them up. But now there is no more huffing and puffing—just a push of the button and the engine sings in on all cylinders, purring like a contented cat. Few of the old-timers and fewer of the younger generation who [illegible] instant starting [illegible], realize that [illegible] of the ease of starting in cold weather is due to Pontiac's pioneering of light oils four years ago. Motor cars probably would not be starting and running in the coldest kind of weather the way they do now if it had not been for that step. Easy starting in cold weather is due to the use of light oils as well as to improved engine design."

A CANADIAN SCOUT BRIDGE SAVES INDIAN LIVES

More than 30 years ago a bridge over a rocky stream at Palampur, Northern India was destroyed by an earthquake and not rebuilt. During the rainy season it became a dangerous torrent, and could be crossed only by fording or many miles of detour. Each year a number of travelers lost their lives in attempting the crossing. Two years ago a troop of Boy Scouts of the Canadian Anglican Mission School at Palampur under Rev. Godffrey Gulten, a former Montreal Scoutmaster, built a stout four-span bridge across the stream since when the road has been constantly open and not a life has been lost.

HERRING WHETS The APPETITE

Modern Packing Methods Retain the Salty Tang of the Day's Catch

Few housewives appreciate the great variety of fish available in our local markets. Dwellers along the coast can take their own food for granted, but inlanders must be kept informed as to the daily offerings, which contribute so largely to making our diet not only more appetizing but healthy.

If you have ever walked along a beach just after a heavy storm at sea you will recall how the very bottom seems to have been turned up on the wet sand. It is always a source of amazement to see what a variety of life there is in water, in lakes and rivers as well as the ocean.

Herrings are delicious, inexpensive and delightfully adaptable. English people look forward to their breakfast of herrings as their morning appetizer and Canadians are gradually becoming more acquainted with the delicacy of this dish. It is worth noting that Canadian herrings are taken in the sea fisheries of the Dominion's two coasts and in the fresh water fisheries as well.

Herrings are welcome everywhere in the guise of kippers, and as the lowly bloater, they have saved many a struggling author and artist from starvation. And they are delicious canned, fresh, pickled or smoked. Talking of smoked fish, we mustn't overlook the famous Goldeyes which are tasty either fresh or smoked. And think too of the appetizing tang of Canadian Finnan Haddie as well as the appeal of our various kinds of smoked fillets.

To get back to the subject of herring, few realize that herring are rich in healthgiving qualities. They contain precious, health-promoting vitamins and are rich in such mineral nutrients as calcium, phosphorus, copper, sulphur and iodine.

In the opinion of a prominent authority on fish, whose knowledge has been handed down through three generations, there is more sunshine to be had in one medium sized herring, than you can absorb through a daily half-hour sun bath.

Herrings at their best should be plump, but not too large, bright and silvery, with unbroken scales and a freshness in the eye.

The Scots (and who should know better?) often sprinkle their herrings with pepper and salt, dip them in oatmeal, spread them out on paper until they are thoroughly coated, and then fry them in plenty of good dripping.

The addition of onion rings to the frying pan is by no means to be [illegible]

Another way of serving them is "Kippered Herring Salad." Mix a cup of diced kippered herring, a cup of cold potatoes cut in cubes, a small chopped onion, one-half cup raw carrots, salt, pepper. Mix with mayonnaise. Serve on lettuce leaves with mayonnaise. Garnish with sections of hard-boiled egg cut in eighths. Sprinkle with paprika.

For grilling, prepare the fish in the same way as for frying, that is, cut off the head and fins, clean and scrape off the scales.

Then score them three times on each side, brush them over with olive oil or melted butter, sprinkle with pepper and salt, and grill them for ten minutes or longer, according to size. Serve with maitre d'hotel butter.

If mustard sauce is preferred brown a dessertspoonful of flour in the oven and mix it with a teaspoonful of mustard and an ounce of melted butter in a saucepan. When it is smooth, add a half cup of boiling water and simmer for five minutes. Then add a pinch of salt and vinegar to taste and serve.

For herring au gratin, the fish is prepared as for frying and also split [illegible] preferably by your [illegible] Well butter a fireproof dish [illegible] the bottom [illegible] finely chopped [illegible] mushrooms, pepper and salt. [illegible] the fish lay them on the dish [illegible] of the same [illegible]

[illegible] sprinkling of fine breadcrumbs [illegible] pieces of butter over [illegible] dish with a little [illegible] gar and cook in a moderate oven for twenty minutes.

Soused herrings make an admirable breakfast dish and may be eaten cold. They are very simple to prepare. [illegible] remove the [illegible] off the [illegible] fireproof dish [illegible] medium sized [illegible] Just [illegible] and water [illegible] the lid on the dish and cook in [illegible] slow oven for three quarters of an hour.

BETTER CATTLE, NOT MORE, LORD'S APPEAL

LONDON, Jan. 21.—The Dominions and Argentina should reduce their livestock production, [illegible] and improving the quality for better prices, as a solution to problems of the world meat trade, the Marquess of Titchfield (Conservative) declared in the House of Commons today.

He spoke after Agriculture Minister Morrison had defended the Livestock Industry bill on its second reading.

LINDBROOK

A dance was given last Friday week at the school here by the older girls of the school. It was in the nature of a Foot Social and much fun was caused by the display of feet, which were ably auctioned off by Mr. Chas. Morden. It takes a bachelor you know, to be a good judge of ankles, so that's why Charlie was so good. The orchestra consisted of Messrs. Stanley Smith and Clark Lindgren who supplied some snappy rhythm or whatever you call it. Mr. J. Bailey acted as M.C.A. Lunch was served in the interval. The dance was enjoyed by all and the proceeds are to be used for benefit of the school, so let's have another.

Mr. Fred Evans has been away at the Military Hospital, Edmonton, for a study of his physical condition. Fred has been pretty ill of late, in fact came near answering the last "Roll Call."

Radio listeners here heard one of our local boys, Mr. Harry Tucker, over the air the other night. Harry sang a number in one of the Edmonton amateur programmes and those that heard him say it was pretty good. Good for you Harry! See you in Hollywood!

The monthly meeting of the L.C.C. was held at the home of Mrs. W. McHeffey last Wednesday and was well attended. The roll call was answered by "hints to brides" and oh boy some hints. Then a punch board was produced and each drew a punch calling them to perform some antic or mimic something, this caused lots of fun. It was proposed to hold a St. Valentine's dance at the school on Friday evening February 12th. Admission: Gents 25c and Ladies 10c; so be on hand to greet your Valentines. The next meeting will be on Wed. Feb. 24th at 2:30 p.m. at the home of Mrs. Robt. Smith. The roll call will be answered by Valentine verses and something of that kind. A dainty tea was served and afterwards everyone departed voting it a great time and looking forward to the next meeting.

LAKESHORE

Miss Jean Burrell of Edmonton is visiting at the L. H. Graham home.

Lynn Phillips returned home from Vancouver on Sunday evening.

Mrs. M. Wood was a visitor to Edmonton last week.

A large number of the school children in this district are confined at home with the measles.

UNITED CHURCH NEWS

The Rev. D. K. Allan attended the Presbytery at Wainwright on Tuesday, February 2nd.

The Junior surpliced choir will assist in the evening on Sunday February 7th, next Sunday. The young folk will render two or three anthems.

The Rev. D. K. Allan preaches at Lakeshore at 2:30 p.m. and in Tofield at 7:30 p.m. on Sunday, February 7th.

A TWO HOURS' RESCUE SWIM

A two hours' swim through a heavy sea to bring help for three companions in a swamped boat in Brisbane harbour, earned the reward of the Silver Cross for Rover Sea Scout Douglas Patrick, 19, of the Gladstone Rover Sea Scout Crew of Brisbane. The medal was presented by His Excellency Lord Gowrie, Chief Scout for Australia. One of the Scouts was lost, the remaining two being saved.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else.

Women's Shoe Sale
$2.49

All High Grade Shoes, bought to sell from $3.00 to $3.65. Choice of Oxford, Brogue, T Straps or Tongueless Ties. Medium to higher cuban heels and some low heels. Black calf or kid leathers and brown calf, suede or elk. Sizes 3½ to 8.

'THE TOFIELD MERCURY

Vol. XVIII., No. 1 Thursday, February 11th, 1937 $2.00 Per Year. To U.S.A. $2.50

Town Secretary-Treasurer's Report

Ratepayers Meeting January 30, 1937

1. Personnel of Council—Mayor Brace, Councillors Law, Coutts, Hammond, Swift, Lovell and Bellamy. Of the above Mayor Brace and Councillors Bellamy, Lovell and Swift retire in 1937.

2. Auditors—McCannel Brothers and Co. Chartered Accountants of the City of Edmonton. Books were audited in accordance with requirements laid down by Department of Municipal Affairs, and Financial Statement for the year 1936 together with the Auditor's Report have been prepared. A Statement of Receipts and Expenditures together with the Balance Sheet were published in the Tofield Mercury on January 28th, 1937.

3. Assessments—The assessment roll of 1936 was reduced by the amounts of the properties in Block 11 Main Street, destroyed by fire in the month of September, 1935. Additions to the assessment roll, and to some extent replacing the burnt properties were the Co-op Store, Doctor's office, post office, bank building and the J. J. Hannan Service Station. Three houses were sold and moved out of the town during the year, while one was moved into town.

4. Tax Collections—These were somewhat lower than in the former year. In the former year an unusually large amount of arrears had been collected due to various reasons. Under normal circumstances these would have been spread over possibly two or even three years.

5. Tax Arrears—The collectible arrears amount now to about $12,000.00. This includes the amount considered collectible on recently cancelled subdivisions. This has been computed at not more than $15.00 per acre in order to keep the figures well within what may be reasonably expected from these lands.

6. Debentures—Debenture coupons were not paid in 1936. This owing to a proposal made to the bondholders whereby the principal amount owing would be reduced by 25 per cent and the interest lowered to 4 per cent. If and when this proposal becomes effective the annual payment to be made by the Town on both principal and interest will be approximately $2900.00 instead of $6569.34 as was formerly the case. A number of the large bondholders have consented to the proposal but one large bondholder has not yet consented. It is felt however, that this will be forthcoming. In the meantime, the town is holding the sum of $4000.00 in a savings account in trust with which to meet the first coupons due under the new arrangement when made effective.

7. Subdivisions Cancelled—During the year subdivision comprising [illegible] lots and about 130 acres in area were cancelled. The Town took title to the lots by various procedure, following which the Board of Public Utility Commissioners issued orders cancelling the subdivision.

8. Reserve Fund—There has been no change in the Reserve Fund during the past year. It still consists of City of Edmonton Debentures of the par value of $3000.00. During the year certain of them were used as collateral security for a bank loan of $1200.00, which was in due course repaid.

9. Relief and Social Services—During the year the sum of $964.87 was spent on direct relief. Of this amount $33.50 was for hospitalization and the balance supplies granted to relief recipients. In addition the Town contributed to pensions granted under the Mother's Allowance Act to three mothers. Also, six persons were in receipt of Old Age Pensions of which ten per cent is chargeable to the Town. During the year the liability of the Town in the matter of Mother's Pensions paid was reduced from 50 per cent to 25 per cent of the amount paid.

HOCKEY

On Monday the Tofield Senior hockey team played its last home league game, Viking providing the opposition. The game was the best played here this season and was marked by the home team's courageous comeback after being four goals down to the point where the score was tied. Incidently it was the first overtime game played here this season, but the tie remained unbroken, both teams scoring in the regulation 10 minutes overtime.

The first period left the boys bewildered but not disheartened. It ended 3-0 for Viking, but on the play the score could easily have been the other way, but hockey games go that way sometimes. Bud Kelley, R. McLaren and A. McEachern tallied for the visitors.

The second period was scarce a minute gone when Swinton put the locals in the running, but Viking came right back and scored twice, making the score read 5-1. The game looked as good as gone right there, but before the period ended Jack Whyte had cut the lead down to one.

The third period was fast hockey. The early part of the period the locals played all men up and cut down their opponents lead when Swinton and Norman Glover scored a goal each which together with a score by a local player we did not spot, brought the score to 5-5. By this time the locals had dropped back a bit and were doing some defending as well as attacking.

Five minutes each way overtime was played, Viking scoring first when Rasmussen picked up the puck in centre ice and skated through, right on top of Burke to score. Changing sides, the score was tied up again when Jack Whyte scored. The game ended 6-6.

D. Edwards refereed the game.

The High School team nosed out a win by the odd goal route on Saturday last. The teams were very well matched, both sides having a fair share of the play. The score read 3 for Tofield and 2 for Round Hill at the end of the game.

On Wednesday the local seniors journeyed to Wainwright where they played in the afternoon, losing 7-1. In the evening they played at Viking, again losing by the score of 5-4.

This ends their league games, though the occasional [illegible] game may be played before the season ends.

MRS. TUCKER SR. PASSES AWAY

The death occurred at the home of her daughter, Mrs. McCarthy, on Saturday night of Mrs. Elizabeth Hannah Tucker aged 77, widow of the late John Tucker of Edmonton. Mrs. Tucker is survived by two sons, Fred of Edmonton and Arthur of Lindbrook, and three daughters, Mrs. Carl Almgren of Viking, Mrs. D. G. McCarthy of Tofield and Mrs. E. L. Moore of Vancouver. A son, Harry, was killed overseas in 1918. The funeral was held in Edmonton on Wednesday, Rev. A. Wallis officiating. Mrs. Tucker had resided at the McCarthy home for the past 15 years and was much esteemed by a large circle of friends.

BEHIND THE HOG

My animadversion of the Billman—Kallal Curling game. The real highlight of this week's curling, and as it looked to the large and enthusiastic gallery.

****

Eddie sees the sunshine, and Billie sees the gloom,
Eddie sees the starlight, and Billie sees the tomb,
Eddie sees the beauty, and Billie sees the smudge,
Eddie sees the craftsmen, and Billie sees the drudge,
Eddie sees the service, and Billie sees the dole,
Eddie sees the doughnut and Billie sees the hole,
Eddie sees the progress and Billie the retreat,
Billie sees achievement—and Eddie just defeat.

****

Of all the poems that line the hall, My curling ones are worst of all.

Eddie's Kid rink, Mark Ferguson lead; Johnson Ferguson, 2nd; and yours truly, 3rd. Billie's rink: Conrad Patterson, Glen Woods and Willie Chapman. This man Billman's trepidation as his players miss the shots was wonderful to behold, and Eddie's sagacity, witticism and what have you, are something to be not taken lightly. The hacks and hogs were well populated during the play, but the sweeping was kind of a hotchpotched affair, as the skips pusillanimity in this respect were very vague. The game itself was a haphazard affair, as each player seemed out of harmony with the skip, but the vocal arrangements were very good. The score was no indication of the play, but Billie nearly passed out as Eddie tied him up on the 10th end. Just as the last rock was flung, Eddie roared out a challenge for revenge, the game to take place at the rink on Saturday February 13th. Eddie is giving a chalk talk to his players on Wednesday and practice will be held b4 the game. What Billie has up his sleeve, we are not in a position to know, as we were not included in the huddle. I think they had a meeting at Jobb's store after the game. Lunch was served after the game, at least I saw some of the boys eating at the cafe. The board walk players had a big night, and from some of the remarks, I don't think they missed a shot the whole evening. One of Eddie's players in his anxiousity to put on a guard, played out of turn, but [illegible] did not notice it, the game went merrily on. Come to the rink next Saturday night for a full evening's enjoyment. Make all the remarks you like, as nobody will probably notice you anyway. The admission is free, and we promise you better weather conditions. I forgot to mention that some of the boys think these rinks could be improved on, but outside of conversation, we know of no change that would improve the curling.

****

The Clara Rogers Bonspiel Rink returned from Camrose, laden with brooms, sweaters, rocks, etc. We did not see the prizes as yet, but maybe they are holding out on us.

****

What! No rink to the Edmonton Spiel, this is something unknown! The Tofield Club must be slipping.

****

One of our curlers dropped into the Cafe after a game. He said to the waiter. Do you serve crabs here? The waiter said, we serve anybody, what can I do for you.

****

The three foods that keep the body healthy for curling are, Breakfast, Dinner and Supper.

****

If we have time and space, next week we will present for your approval, "Rocks", a humorous story in three installments.

BABY'S CRIES REVEAL MANY RAT BITES

Hamilton, Ont., Feb. 10.—Awakened by the cries of their five-months-old baby, Frank and Mrs. Easton, Burlington Golf Club, found that the child had been bitten by a rat yesterday. Dr. W. A. Weaver of Burlington was called and discovered the child's left ear had been gnawed and that he had been bitten on the nose, upper lip and right cheek.

LOCAL & PERSONAL

We are glad to see George Chesser back in Tofield again.

Mr. and Mrs. Burchard returned Friday morning from an extended trip in the States visiting relatives and friends.

Mr. and Mrs. Ray Coutts returned from the U.S.A. this week.

Mrs. Booth visited with Mr. and Mrs. Bert Swift at Fallis last week.

Mr. and Mrs. Carey of Viking visited at the McCarthy home this week.

Miss Beryl Edwards from Ryley spent the week end at her home here.

Mr. McTaggart sr. spent last week end at Stettler.

Mr. Currie is attending the Dairymen's convention in Calgary this week.

Miss A. Swift returned home this week after visiting friends in Lamont for a few days.

Mr. and Mrs. Duckfield of Wainwright stopped in Tofield on route to Edmonton.

Miss Muriel Malcolm spent a few days in Edmonton this week.

A number from Tofield attended the funeral of the late Mrs. Tucker, held in Edmonton on Wednesday.

Miss Florence Kendall left on Thursday morning for Sunnybrook where she will visit for some time.

Mr. J. Chapman was taken to an Edmonton hospital on Thursday evening suffering from a severe nose bleed. Though very weak he is getting on nicely now.

LIARS CLUB LISTENS TO WILD TALES

ANCHORAGE, Alaska, Feb. 11.—Wild were the tales which won prizes in the annual Liars' contests here.

One concerned a mine where sourdoughs dug out electricity in big square chunks and sold them as storage batteries.

Another described air pockets so large airplane pilots were compelled to chop and shovel clouds into them before they could be crossed.

E. W. ROGERS

THE WORLD OF WHEAT

(By H. G. L. Strange)

Duties set up against Canadian wheat by foreign countries are coming down! France, Germany, Italy, Holland, Belgium, Switzerland, Norway and Sweden all recently have either actually reduced tariffs against Canadian and other export wheats, or are considering doing so.

This is most welcome news, but is exactly what [illegible] be expected at this time and what actually was forecasted several years ago by some [illegible].

History reveals that the economic events which happen after a great war always occur in about the same sequence. After the boom—the natural consequence of a great war—inevitably comes a depression. During the depression countries try to produce and manufacture, at home, goods and commodities which hitherto they had imported from their neighbours.

This policy of "Nationalism" or "Self Sufficiency" continues for a few years, then the realization sharply comes that as imports are curtailed so exports going out of any country are correspondingly reduced. As soon as this is recognized, economic safety returns and countries begin to reduce their tariffs.

Next will come the tearing down of other restrictions against international trade and commerce, such as quotas, barter arrangements, depreciation of money and so forth.

Meanwhile Canada will sell her wheat more easily.

Following factors have tended to raise price: Indian crops beginning to deteriorate as Monsoon fails to arrive. Belgium, Germany and Holland buy Argentine oats and barley—Rye exports temporarily suspended by Poland—Germany puts margarine, butter, lard and other fats on ration basis from January 1st.

Following factors have tended to lower price: First acreage estimates of winter wheat for 1937 harvest indicate increases over 1936—Confirmation that 1936 Japanese rice crop almost a record—Estimated Argentine corn surplus increased 23 million; new corn prospects excellent—British hop production shows slight increase.

GRASSHOPPERS MAY INCREASE IN CERTAIN AREAS

The Hon. J. G. Gardiner, Minister of Agriculture, stated on January 23rd, in the House of Commons, that the grasshopper plague from which Western Canada has been suffering in recent years is gradually diminishing.

Entomologists expected, however, said the minister, that the northwestern part of Saskatchewan and the northern part of Alberta would be affected this coming season to a greater degree than those particular areas were last year. Manitoba, however, it is expected will be almost free from grasshopper trouble. "The present grasshopper movement started in 1931 and has been going on ever since but the end of this cycle of infestation is probably in sight" was one statement made.

Parliament, as a result of a request of the minister, promptly appropriated $407,000 for insect investigation and control work of the Entomological Branch of the Dominion Department of Agriculture. The word picture painted by the minister agrees with the sequence of grasshopper plagues that history reveals have occurred in the past in Western Canada.

A series of dry years brings grasshoppers, the wet years see the waning of infestation. Since 1857 the increase and decrease of grasshoppers have been noted.

Henry Youle Hind, who explored the Red River, the Assiniboine and the Saskatchewan in 1857 wrote on page 290, Vol. 1 the "Narrative of the Canadian Red River Exploring Expedition of 1857" as follows:—

"On the 2nd of July (1857) we observed the grasshoppers in full flight towards the north, the air as far as the eye could penetrate appeared to be filled with them. They commenced their flight about nine in the morning and continued until [illegible] past three or four o'clock in the afternoon. About that hour they settled around us in countless multitudes and immediately clung to the leaves of grass and rested after their labors. On subsequent days, when crossing the great prairie from Red Deer's Head River to Fort Ellice, the hosts of grasshoppers were beyond all calculation......at times they appeared in such infinite swarms as to lessen perceptibly the light of the sun. The whole horizon wore an unearthly ashen hue from the light reflected by their transparent wings. The air was filled as with flakes of snow....Clouds of these insects forming a dense body flew swiftly towards the north and northeast at altitudes varying from 500 to 1000 feet and upwards."

And yet a few years later the years of good rainfall returned, the prairies "blossomed as the rose," the growth of grass, shrubs and prairie plants was most abundant and grasshoppers disappeared.

Many such cycles of drought and years of good rains, of great increase and disappearance of grasshoppers, have occurred since 1857 and probably will continue to occur in the future.

These trying phenomena appear to be part of the price nature exacts from man as payment for the high quality she bestows on prairie wheat. —Searle Grain Co. Ltd.

HEARSAY METHODS OFTEN IMPRACTICAL

Wherever farmers assemble there are bound to be discussions on subjects in which they are, perforce, most vitally interested—the merits of different breeds of livestock, feeding practices, and cultural and weed control methods—and many of the arguments advanced are absolutely sound, being the result of years of experience and observation on the part of wide-awake, intelligent men; but there are usually a few which are not so sound, or which hold only under special conditions.

Many of these unsound theories contain enough fact to make them appear plausible, and it is only after trying them and disproving their worth that their fallacy is finally discovered.

Work along all the lines mentioned and diverse others has been under way for years in the Experimental Farms System. Almost every promising breed of live stock and poultry, almost every kind of grain, grass and legume which has any potentialities for economic development in Canada has been tested; hundreds of rations have been tried out; and a considerable amount of work has been done with horticultural crops, bees, weed control and cultural methods on the 26 Farms and Stations in the System.

These Farms and Stations, together with the numerous Sub-Stations and Illustrated Stations, operate under almost every combination of soil and climate found from Halifax to Victoria and they have gleaned information applicable to practically every part of the Dominion.

A great deal of work on these problems has been conducted at the Dominion Experimental Station, Lacombe results are applicable only in localities with soil and climate similar to those which prevail in Central Alberta; but through co-operation with other Stations results in different localities and under various conditions are readily available.

Modern farming is an intricate science which, to be successful, must be carried on along good business lines. The secret of success lies in careful planning well in advance of the season's operations, discarding practices which have proven unprofitable or ineffective in the past, and thoughtfully studying new methods and practices which you may consider adopting.

When you want medical advice you go to a doctor; when your car develops a cough you take it to a garage; so when you want agricultural advice, why not take your problem to someone who is qualified, through long training and wide experience, to give you an opinion backed by years of actual work on similar problems?

If you have any problems relating to crops, methods of cultivation or live stock, and will present them, either in person or by mail, to the Dominion Experimental Station, Lacombe, the staff will be glad to give you the benefit of their experience.

COW BONES WANTED FOR MAH-JONGG SETS

Although they may not have known it, mah-jongg enthusiasts, of which there were many a while back, were playing with the shin or thigh-bones of a cow. Mah-jongg evidently still has its devotees, for China has been making inquiries as to possible sources of supply for cow-bones in Canada, according to the Industrial Department of the Canadian National Railways. Most of the present supply comes from Argentina.

[illegible]

It was a dark and stormy night when the weary husband returned home.

"I've been to every shop in town, and they can't match that bit of ribbon for you anywhere dear" he said to his wife.

"Splendid!" she cried. "I just wanted to make sure that it really was unique."—Tit-Bits

NEW RAILWAY CAR IS RATED A SUCCESS

Halifax, N.S., February 8.—Increased shipments of Canadian bacon to Britain were forecast here after the use of a new type of heated railway car when termed a success by a group of packing officials. The officials inspected 200,000 pounds of bacon which arrived here in the new cars.

Five of the cars, developed by the Canadian National Railways and C. R. Niven of the National Research Council, brought the shipment here from Edmonton in perfect condition. Designed to keep perishable goods at a stable temperature, the cars were equipped with burners placed underneath and outside instead of at either end inside the car.

BRAKE TESTING URGED BY CLUBS

Proper means of testing brakes seems bound to receive still greater attention this year, when there is every indication of the volume of motor traffic being increased.

Branches of the Alberta Motor Association are giving conditions their special attention, through resolutions dealing with the subject have been sent to the Provincial Government.

Action along this line has already been taken at Calgary, where the club has taken the question of brake testing up with the civic authorities. It is expected that a brake testing machine will be rented by the city and put into operation, as a result of the club's representations.

Under winter conditions, the need of having motor car brakes checked over is of primary importance, though brakes should be in proper condition whenever the car is being operated on a street or highway.

Reports of accidents from time to time indicate that serious and even fatal injuries might have been avoided if the brakes had been working [illegible].

When the question of brake testing was brought up at Edmonton recently, provincial officials pointed out that under the law of the province as it stands now, a car owner is required to keep his brakes in proper shape.

With a new car license year opening on April 1st, and the likelihood of more car owners using their cars for longer periods than was previously the case, there will be all the greater need of having brakes inspected at intervals, particularly because of the increased volume of motor traffic.

PREPAREDNESS IS PEACE GUARANTEE IN EUROPE TO-DAY

London, Feb. 8—Through her program of rearmament and defensive preparedness Great Britain now has reached the stage where she is ready for any eventuality and this policy of preparedness has actually brightened the outlook for peace in Europe, in the opinion of Sir Thomas Inskip and Alfred Duff Cooper.

Sir Thomas, Minister for Defence Co-ordination, and Duff Cooper, the secretary for war, spoke at different parts of the country on Saturday.

Addressing the Fareham Conservative Association, Sir Thomas expressed the hope Britain never again would make the mistake of allowing defences to fall into a state of disrepair, which was the case up to two years ago.

"It was a very costly experiment," he said. "It was done with the best of motives. We tried to show what an honest attempt at disarmament meant. We took a risk and it has cost tens of millions of pounds to re-equip the nation."

Sir Thomas hoped war, so much talked about, would never come.

"Indeed I think things are very much brighter today, but we must put our three services into a proper state of repair, give them the equipment they need and we must not stop when the present panic or crisis is over."

Rearmament was not a final goal, he said, but it must march side by side with a policy of appeasement which would bring satisfaction to Britain and other nations of the world. "But we are equally determined we shall have a force adequate to defend ourselves and our interests."

Duff Cooper declared at Walthamstow that Britain's greatest interest and greatest service to peace was in presenting the world with a strong and well-armed British Empire.

The territorial army, he said, had passed the stage in which it was begging for recruits and reaching the stage when it could select only the best of those offering.

"It is something to-day," he added, "to live in a free country and it ought to be impressed upon those young men who lounge in Europe where they would not be compelled by force to do their duty.

"While we keep the flag of freedom flying in this corner of Europe we can only do so if we realise the duty that lies in the best of our manhood to train themselves in the days of peace for the fearful possibilities with which they may be faced in days of war."

The war secretary concluded he believed one volunteer was worth more than four or five pressed men.

CALGARY MEN ON STRIKE GET CHICKEN MEAL

Calgary, Feb. 8.—A board of conciliation to inquire into the wage dispute and strike at the Union Packing Company plant here has been set up and will start work immediately, Clayton Adams, chairman of the Alberta Board [illegible] Industrial Relations, announced last night. Mr. Adams announced that Vic Thompson, of Edmonton, would represent the strikers on a three man board.

A chicken dinner was supplied to "sit-down" strikers in the Union Packing Company's plant here Sunday as the 50 men occupying the building entered the fourth day of their demonstration. Wives, sweethearts and sympathizers cooked and carried the poultry to them.

On word from the workers that they were "prepared to stay in until next Christmas, if necessary," a Christmas tree was also passed in to them.
